# I. Operating Results and Financial Conditions

#### 2012 First Quarter in Review

Looking back at the global economy in the first quarter of 2012, in the United States, the economy showed positive signs of recovery as consumer confidence picked up slightly while the European economy recorded negative growth reflecting the impact of the debt crisis on the real economy. Growth in emerging economies, such as China and India, slowed down somewhat due to lagging exports and investment while within Japan, production activities recovered from the previous year's earthquake in Japan and flooding in Thailand. The global economy as a whole realized moderate growth owing to a short-term alleviation of the downward risks related to the debt crisis in Europe and continued domestic demand in emerging economies.

As for the markets in which Canon operates amid these conditions, within the office equipment market, while demand for color multifunction devices (MFDs) continued to display growth, demand within the laser printer market cooled down mainly in Europe. With regard to the consumer products market, demand for digital single-lens reflex (SLR) cameras continued to realize robust growth in all regions. As for inkjet printers, although demand remained solid in emerging economies, sales overall declined due to product supply shortages and other factors. In the industry and others sector, although the market for semiconductor lithography equipment recorded solid growth, demand for equipment used to manufacture large-size liquid crystal display (LCD) panels remained sluggish.

The average values of the yen during the first quarter of the year were \mathbb{\text{\figs}}79.72 to the U.S. dollar, a year-on-year appreciation of approximately \mathbb{\text{\figs}}3, and \mathbb{\text{\figs}}104.57 to the euro, a year-on-year appreciation of approximately \mathbb{\text{\figs}}8.

Despite improvements in such factors as the downward risks of the global economy that were felt at the beginning of the year and the historically strong yen, the business environment remained harsh in the first quarter as business sentiment, mainly in Europe, worsened and the average values of the yen appreciated. Amid this environment, net sales totaled \(\frac{\text{\$\text{\$\text{\$\text{\$}}}}}{2.5}\) billion (U.S.\(\frac{\text{\$\text{\$\text{\$\text{\$}}}}}{1.3}\) million), a year-on-year decrease of just 1.2%, owing to Group-wide efforts to achieve sales growth. The gross profit ratio declined by 1.3 points from the year-ago period to 47.1%, mainly due to the effects of the strong yen and product mix, while gross profit totaled \(\frac{\text{\$\text{\$\text{\$\text{\$}}}}}{3.90.9}\) billion (U.S.\(\frac{\text{\$\text{\$\text{\$\text{\$\text{\$}}}}}}{3.8%}\). Operating expenses decreased by 4.8% to \(\frac{\text{\$\t

Basic net income attributable to Canon Inc. stockholders per share was ¥51.53 (U.S.\$0.63), an increase of ¥6.38 (U.S.\$0.08) compared with the corresponding quarter of the previous year.

#### **Results by Segment**

Looking at Canon's quarterly performance by business unit, within the Office Business Unit, amid the admirable sales performance of color MFDs led by the imageRUNNER ADVANCE C5000/C2000 series, sales volumes of both monochrome and color MFDs increased from the year-ago period. In addition, sales of imagePRESS C7010VPS-series color MFDs for production printing, machines that were jointly developed by Canon and Océ, gained momentum and contributed to increased unit sales of production printing devices. As for laser printers, deteriorating business sentiment along with channel inventory adjustment led to a temporary slowdown in demand mainly in Europe and the United States. Additionally, affected by the appreciation of the yen, sales for the business unit totaled ¥438.0 billion (U.S.\$5,342 million), a decline of 8.9% year on year, while operating profit totaled ¥52.8 billion (U.S.\$644 million), a decrease of 16.2%.

Within the Consumer Business Unit, unit sales of digital SLR cameras recorded significant growth for such products as the competitively priced EOS Digital Rebel T3i (EOS 600D) and the advanced-amateur-model EOS 5D Mark II and EOS 60D, driven by efforts to boost production and expand sales in response to heightened demand. The EOS 5D Mark III, which was released in March 2012, displayed robust growth and also contributed to increased sales. As for compact digital cameras, sales of four new ELPH (IXUS)-series and six new PowerShot-series models launched in February this year recorded healthy growth. With regard to inkjet printers, sales volumes declined as the effects of the previous year's flooding in Thailand on production continued to be felt through February this year. Furthermore, the company successfully launched its Cinema EOS System lineup of professional cinematography products, targeting Hollywood and the broader motion picture and television production market, along with the new DreamLabo 5000, targeting the commercial photo printing market. As a result, sales for the Consumer Business Unit increased by 4.8% year on year to \(\frac{1}{2}\)303.5 billion (U.S.\(\frac{1}{2}\)3,701 million), while operating profit increased by 17.1% to \(\frac{1}{2}\)46.7 billion (U.S.\(\frac{1}{2}\)570 million).

In the Industry and Others Business Unit, i-line steppers recorded healthy sales thanks to active investment in semiconductor lithography equipment to produce digital semiconductor devices, which are used in smartphones. Unit sales of LCD lithography equipment, on the other hand, dropped substantially in the face of shrinking demand for equipment used in the production of large-size panels, an area in which Canon is particularly strong. Additionally, sales of equipment used to manufacture organic LED (Light-Emitting Diode) panels increased owing to active investment by organic LED panel manufacturers. Consequently, sales for the segment totaled ¥109.8 billion (U.S.\$1,339 million), an increase of 19.4%, while operating profit totaled ¥4.0 billion (U.S.\$49 million), a decrease of 39.5% from the year-ago period.

#### **Cash Flow**

During the first quarter of 2012, cash flow from operating activities totaled \(\frac{\pmathbf{\text{\text{4}}}}{56.1}\) billion (U.S.\\$684 million), a decrease of \(\frac{\pmathbf{\text{4}}}{15.8}\) billion (U.S.\\$193 million) compared with the year-ago period, owing to the effects of the optimizing of inventory levels in accordance with the recovery in production. Due to increased capital investment relevant to production, cash flow from investing activities increased \(\frac{\pmathbf{\text{3}}}{31.4}\) billion (U.S.\\$382 million) year on year to \(\frac{\pmathbf{\text{4}}}{77.9}\) billion (U.S.\\$950 million). Accordingly, free cash flow totaled negative \(\frac{\pmathbf{\text{2}}}{21.8}\) billion (U.S.\\$266 million), a decrease of \(\frac{\pmathbf{\text{4}}}{47.2}\) billion (U.S.\\$575 million) from the previous year.

Cash flow from financing activities recorded an outlay of ¥131.3 billion (U.S.\$1,601 million), mainly arising from the dividend payout and the repurchase of treasury stock. Owing to these factors, as well as the positive impact from foreign currency translation adjustments, cash and cash equivalents decreased by ¥127.7 billion (U.S.\$1,558 million) year on year to ¥645.5 billion (U.S.\$7,872 million).

#### Outlook

As for the outlook in the second quarter onward, amid lingering uncertainty over the sovereign debt crisis in Europe, the global economy is expected to take considerable time before realizing a full recovery. The U.S. economy faces such downward risks as high unemployment and falling housing prices, whereas the European economy is projected to remain stagnant for the time being. Although growth in emerging economies, such as China and India, is expected to slow down somewhat, expanded domestic demand in these markets is expected to drive global economic growth. As for the Japanese economy, despite the challenging environment, growing reconstruction demand points to a strengthening recovery trend.

In the businesses in which Canon is involved, within the office equipment market, demand for such products as MFDs is projected to grow modestly while the laser printer market is expected to follow a path of recovery in the second half of the year. As for the consumer products market, demand for digital SLR cameras is anticipated to continue achieving robust growth worldwide while demand for compact digital cameras should grow mainly for high value-added models with high-definition screens or networking technology functions. Although demand for inkjet printers will remain solid in emerging economies, demand overall will likely remain at the same level as the previous year due to lingering concerns over declining business sentiment in Europe. In the industry and others market, while demand for semiconductor lithography equipment is expected to increase steadily for the time being, there is a growing sense of uncertainty regarding the outlook for the second half.

With regard to currency exchange rates for the second quarter onward, on which Canon's performance outlook is based, despite the uncertain economic prospects, Canon anticipates exchange rates for the period of \(\frac{\text{\$}}{80}\) to the U.S. dollar and \(\frac{\text{\$}}{105}\) to the euro. Upon taking into consideration the abovementioned foreign exchange rate assumptions and the current economic forecasts, Canon projects full-year consolidated net sales of \(\frac{\text{\$}}{3},900.0\) billion (U.S.\(\frac{\text{\$}}{3},488\) million), a year-on-year increase of 9.6%; operating profit of \(\frac{\text{\$}}{4}50.0\) billion (U.S.\(\frac{\text{\$}}{5},488\) million), a year-on-year increase of 19.0%; income before income taxes of \(\frac{\text{\$}}{4}60.0\) billion (U.S.\(\frac{\text{\$}}{5},610\) million), a year-on-year increase of 22.8%; and net income attributable to Canon Inc. of \(\frac{\text{\$}}{2}90.0\) billion (U.S.\(\frac{\text{\$}}{3},537\) million), a year-on-year increase of 16.6%.

This document contains forward-looking statements with respect to future results, performance and achievements that are subject to risk and uncertainties and reflect management's views and assumptions formed by available information. All statements other than statements of historical fact are statements that could be considered forward-looking statements. When used in this document, words such as "anticipate," "believe," "estimate," "expect," "intend," "may," "plan," "project" or "should" and similar expressions, as they relate to Canon, are intended to identify forward-looking statements. Many factors could cause the actual results, performance or achievements of Canon to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements, including, among others, changes in general economic and business conditions, changes in currency exchange rates and interest rates, introduction of competing products by other companies, lack of acceptance of new products or services by Canon's targeted customers, inability to meet efficiency and cost reduction objectives, changes in business strategy and various other factors, both referenced and not referenced in this document. A detailed description of these and other risk factors is included in Canon's annual report on Form 20-F, which is on file with the United States Securities and Exchange Commission. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described herein. Canon does not intend or assume any obligation to update these forward-looking statements.

This document contains forward-looking statements with respect to future results, performance and achievements that are subject to risk and uncertainties and reflect management's views and assumptions formed by available information. All statements other than statements of historical fact are statements that could be considered forward-looking statements. When used in this document, words such as "anticipate," "believe," "estimate," "expect," "intend," "may," "plan," "project" or "should" and similar expressions, as they relate to Canon, are intended to identify forward-looking statements. Many factors could cause the actual results, performance or achievements of Canon to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements, including, among others, changes in general economic and business conditions, changes in currency exchange rates and interest rates, introduction of competing products by other companies, lack of acceptance of new products or services by Canon's targeted customers, inability to meet efficiency and cost reduction objectives, changes in business strategy and various other factors, both referenced and not referenced in this document. A detailed description of these and other risk factors is included in Canon's annual report on Form 20-F, which is on file with the United States Securities and Exchange Commission. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described herein. Canon does not intend or assume any obligation to update these forward-looking statements.
