30-2, Shimomaruko 3-chome, Ohta-ku, Tokyo 146-8501, Japan

(Name and telephone number, including area code, of the
person to contact in connection with this report.)

Check the appropriate box to indicate the rule pursuant to which this form is being filed and provide the period to which the information in this form applies:

- Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1, 2019 to December 31, 2019.

Section 1 - Conflict Minerals Disclosure

Established in 1937, Canon Inc. is a Japanese corporation with its headquarters in Tokyo, Japan. Canon Inc. is one of the world's leading manufacturers of office MFDs, plain paper copying machines, laser printers, cameras, inkjet printers, diagnostic equipment and lithography equipment. Canon Inc. earns revenues primarily from the manufacture and sale of these products domestically and internationally.

Canon Inc. and its consolidated companies fully have been aware of conflict minerals issue and have been working together with business partners and industry entities to address the issue of conflict minerals.

In response to Rule 13p-1, Canon Inc. conducted Reasonable Country of Origin Inquiry and due diligence based on the "OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas," for its various products.

Item 1.01 Conflict Minerals Disclosure and Report

Conflict Minerals Disclosure

A copy of Conflict Minerals Report of Canon Inc. for the reporting period from January 1, 2019 to December 31, 2019 is provided as Exhibit 1.01 hereto and is publicly available at:

<https://global.canon/en/csr/conflict/index.html>

Item 1.02 Exhibit

Conflict Minerals Report required by Item 1.01 is filed as Exhibit 1.01 hereto.

Section 2 - Exhibits

Item 2.01 Exhibits

Exhibit 1.01 - Conflict Minerals Report for the reporting period from January 1, 2019 to December 31, 2019

SIGNATURES

Pursuant to the requirement of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

Canon Inc.
(Registrant)

Date May 28, 2020

Canon Inc.
Conflict Minerals Report
For the Period from January 1, 2019 to December 31, 2019

This Conflict Minerals Report for the period from January 1, 2019 to December 31, 2019, is presented as an exhibit to the Specialized Disclosure Report on Form SD, to comply with Rule 13p-1 under the Securities Exchange Act of 1934.

1. Introduction (Background to the disclosure of the Conflict Minerals Report)

Established in 1937, Canon Inc. is a Japanese corporation with its headquarters in Tokyo, Japan. Canon Inc. is one of the world's leading manufacturers of office MFDs, plain paper copying machines, laser printers, cameras, inkjet printers, diagnostic equipment and lithography equipment. Canon Inc. earns revenues primarily from the manufacture and sale of these products domestically and internationally. For details of corporate activities please refer to our annual report filed on Form 20-F.

Canon Inc. is listed on the New York Stock Exchange and is subject to the final rules issued by the United States Securities and Exchange Commission (“**SEC**”) to implement Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act (“**Dodd-Frank Act**”).

In response to Rule 13p-1, Canon Inc. conducted a “Reasonable Country of Origin Inquiry” (“**RCOI**”) for products manufactured or contracted to manufacture by Canon Inc. and its consolidated subsidiaries (“**Canon**” or “**Canon Group**”) from January 1, 2019 to December 31, 2019 (“**reporting period**”). The inquiry identified four minerals classified as conflict minerals—namely tin, tantalum, tungsten, and gold (“**3TG**”)—that originated in the Democratic Republic of the Congo and adjoining countries (“**covered countries**”) and did not come from recycled or scrap minerals, that are used in some of the parts or materials that make up Canon Group's products. Further, Canon Inc. conducted due diligence on the source and chain of custody of 3TG (“**due diligence**”) identified as originating from covered countries.

2. Application of Conflict Minerals Report on Canon and products subject to disclosure

As of December 31, 2019, Canon Inc. had 361 consolidated subsidiaries, of which 54

subsidiaries manufactured products or contracted to manufacture products in the reporting period for which 3TG were necessary to the functionality and production, and were subject to the reporting requirements under the SEC’s final rules regarding the Dodd-Frank Act. In total, 55 companies of the Canon Group, including Canon Inc. and those 54 consolidated subsidiaries conducted the RCOI. The subsidiaries that conducted the RCOI include certain marketing companies that contracted with manufacturers outside the Canon Group to manufacture items for sale outside the Canon Group.

The business operations of Canon can be divided into the following four categories: the Office Business Unit, the Imaging System Business Unit, the Medical System Business Unit and the Industry and Others Business Unit. The Office Business Unit includes office MFDs, printers, and copying machines for personal and office use as well as production print products for print professionals. The Imaging System Business Unit includes digital cameras as well as lenses and various related accessories. It also includes compact photo printers, inkjet printers, large-format inkjet printers, inkjet production photo printers, and flatbed scanners. The Medical System Business Unit includes Computed tomography (CT), Magnetic resonance imaging (MRI), ultrasound, X-ray systems, and clinical laboratory systems, as well as digital radiography (DR) systems and ophthalmic equipment. The Industry and Others Business Unit includes semiconductor lithography equipment, flat panel display (FPD) lithography equipment, organic light-emitting diode (OLED) panel manufacturing equipment, network cameras, digital cinema cameras, broadcast HDTV lenses and projectors.

In each of these units, electronic components and substrates which contain 3TG are used in the majority of products manufactured by or contracted to manufacture by Canon.

Canon Group purchases raw materials, parts and components which include 3TG and manufactures products. Canon Group is located downstream in the 3TG supply chain, and does not directly purchase 3TG from mines. Therefore, Canon Group had to rely on information provided by the first-tier suppliers to the Canon Group (“**first-tier suppliers**”) in identifying the source country of the 3TG.

3. Basic principles regarding response to conflict minerals

Canon Inc. established the “Basic Approach of the Canon Group Regarding Conflict Minerals” in September 2012. This has been published on Canon Inc.’s official website and applied to the entire Canon Group.

URL: <https://global.canon/en/csr/conflict/policy.html>

4. RCOI and Due Diligence

The design of Canon's RCOI and due diligence measures is in conformity with the "OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas (third edition)" ("**OECD Guidance**"). Canon took the steps described below in accordance with the five steps laid out in the OECD Guidance.

a. Step 1: Establish strong company management systems

- In order to respond to the conflict minerals situation, Canon established a cross-functional Conflict Minerals Response Project Team ("**Project Team**") in its headquarters under the direction of a representative director in charge (Executive Vice President & CFO) in December 2010. Moreover, Canon designated a person in charge of conflict minerals in each of its group companies that manufacture or contract to manufacture products. The Project Team currently operates as the Working Group on Conflict Minerals ("**Working Group**").
- As stated above, Canon Inc. established the "Basic Approach of the Canon Group Regarding Conflict Minerals" in September 2012.
- In March 2016, Canon established the "Guidelines for Compliance with Conflict Minerals Regulation" that clarified the responsible divisions and the framework for handling conflict minerals issues as well as the survey process, for the persons involved in the Canon Group.
- In July 2019, Canon Inc. summoned the persons in charge of conflict minerals for Canon Group's domestic subsidiaries that manufacture or contract to manufacture products and held a meeting to share the result of the 2018 conflict minerals survey and discuss Canon's policies for the survey of 2019. Moreover, for the persons in charge of conflict minerals matters for overseas subsidiaries, Canon Inc. shared information by e-mail, video and telephone conference.
- Canon created and distributed the Conflict Minerals Survey Manual to the first-tier suppliers.
- Canon requested the first-tier suppliers to sign and submit written confirmation ("**Certificate of Consent**") of their agreement and cooperation with Canon's "Basic Approach of the Canon Group Regarding Conflict Minerals" and their agreement to consult with the Canon Group concerning appropriate measures should any affiliation with armed groups be discovered in the supply chain.
- Using its Conflict Minerals Information Management System, Canon Inc. linked survey responses to product information, conducted product-level assessments, and stored the assessment results in a database, except for such products as

handled by newly joined subsidiaries. Internal rules require that data records be retained for at least five years.

- Canon Inc. is a member of the Responsible Minerals Trade Working Group (“**RMTWG**”) of the Japan Electronics and Information Technology Industries Association (“**JEITA**”). As part of its initiatives, the RMTWG held conflict minerals inquiry briefings for suppliers in supply chains in the electrical and electronics industry. Step 3 below provides details of the industry initiatives on conflict minerals that Canon Inc. participates in.
- As an early-warning risk-awareness system for conflict minerals specified in the OECD Guidance, Canon Inc. established a grievance mechanism — “Contact Point for Reporting Concerns Regarding Conflict Mineral Issues” — on its official website in 2015. No reports from employees, suppliers, or other stakeholders were received by the contact point in 2019.

URL: <https://global.canon/en/contact/conflict/conflict-form-e.html>

b. Step 2: Identify and assess risks in the supply chain

- Canon designed a framework to identify each of the parts and materials used in the products that it manufactured or contracted to manufacture. Canon used its production and shipping management system, which includes bills of materials for products and also used its procurement system, to identify parts and materials required in products planned for production and shipping between January and the end of December 2019. (Canon Group companies not using such system made use of a similar method to identify parts and materials.) Canon then carried out the RCOI on the first-tier suppliers handling the identified parts and materials.
- For the RCOI, Canon used the RMI Conflict Minerals Reporting Template (“**CMRT**”). The CMRT is published by the Responsible Minerals Initiative (“**RMI**”), one of the programs of the Responsible Business Alliance (“**RBA**”). Canon requested the 3,328 first-tier suppliers that were identified as possibly using 3TG to report their status of 3TG using the CMRT. Suppliers that were not using 3TG for their parts and materials had the option of reporting their status through an alternative method, instead of using the CMRT.
- In addition to the RCOI described above, Canon conducted due diligence examinations of first-tier suppliers that reported the use of 3TG originating from covered countries.
- Canon requested replies from the first-tier suppliers who did not respond by the closing date of the response.

- Canon Inc. verified the replies submitted by first-tier suppliers (for any incomplete answers or errors) using a proprietary reply-processing tool. When necessary, Canon requested resubmissions from first-tier suppliers.
- As of March 6, 2020, Canon had received responses from 95 percent of all first-tier suppliers surveyed.
- Canon compared the smelters or refiners (“**SORs**”) identified through the RCOI against the list of the SORs which have been validated to be conformant to the Responsible Minerals Assurance Process (“**RMAP**”), the audit program of the RMI, as published by the RMI. The RMI implements cross recognition with the London Bullion Market Association (LBMA) and the Responsible Jewellery Council (RJC).

c. Step 3: Design and implement a strategy to respond to identified risks

- The head of the Working Group reported the progress of conflict minerals response activities to the representative director in charge.
- Moreover, the Working Group reported in November 2019 on its progress to relevant directors and executive officers of Canon Inc. as well as the presidents of the relevant domestic and overseas subsidiaries by distributing the material.
- Canon Inc. is a key member of JEITA’s RMTWG. The RMTWG is allied with the RMI, which play the leading role in the response to conflict minerals. Canon Inc. has held the role of co-chair of the RMTWG since 2013.
- Canon Inc. has also served as team leader of the RMTWG’s Smelter Support Team since 2015. In this capacity, Canon Inc., along with the other companies in the RMTWG, played an active role in sending letters to SORs encouraging them to join the RMI’s RMAP or to check if the SORs have so-called Annex II risks of the OECD Guidance or the U.S. sanction risks based on the U.S. Office of Foreign Assets Control (OFAC).
- Canon Inc. participates in the Japan Conflict-Free Sourcing Working Group (CFSWG), a joint initiative by JEITA’s RMTWG and major Japanese automobile manufacturers, and serves as the CFSWG vice-chair.
- In addition to the above activities, Canon Inc. has been a member of the RMI since April 2015. Its membership code is “CNON.” Canon Inc. assists RMI activities as a corporate member of the RMI.

d. Step 4: Carry out independent third-party audit of smelter/refiner’s due diligence practices

- As a RMI member, Canon Inc. supports audits under the RMAP carried out by the RMI on SORs.

e. Step 5: Report annually on supply chain due diligence

- In accordance with the Dodd-Frank Act and the SEC's final rules, on or before May 31, 2020, Canon Inc. plans to file a Form SD and Conflict Minerals Report (this report) with the SEC, and plans to publish the same information on its official website.
- Canon Inc. has been reporting its activities in response to conflict minerals in its Annual Report and Sustainability Report since 2011.

5. Survey results for the 2019 calendar year

a. Result of RCOI and due diligence

- Canon conducted the RCOI on 3,328 first-tier suppliers that possibly use 3TG. Canon conducted further due diligence on first-tier suppliers which reported the use of 3TG from the covered countries.
- In cases where 3TG originating from covered countries were used, Canon received some responses indicating the minerals in question had been sourced from SORs that are conformant with the RMAP.
- Within the scope of the responses, there was nothing to clearly suggest that the Canon Group's purchasing of parts and materials contributed to funding armed groups.

b. Result of SORs survey

- Canon analyzed the information on the SORs mentioned in the responses from the supply chain through the RCOI, with reference to the RMI's SOR information. The RMI classifies SORs based on the auditing status. The website of the RMI provides information of the auditing status under the RMAP. <http://www.responsiblemineralsinitiative.org/>
- 261 SORs in Canon supply chain were identified as RMAP conformant and 5 SORs were identified as Active in the RMAP. The remaining 61 SORs were neither RMAP conformant nor Active in the RMAP. Appendix 1-1, 1-2 and 1-3 provide lists of these SORs.
- Canon was unable to determine whether the remaining entities reported by the first-tier suppliers as SORs were truly SORs.

- Due to inadequate information from its supply chains, Canon was unable to determine the country or region of origin of many 3TG used in Canon Group products.
- Appendix 1-4 lists examples of 3TG countries and regions of origin first-tier suppliers reported to Canon through CMRT responses.
- Based on the results of the RCOI and due diligence mentioned above, Canon was unable to determine whether the 3TG used for the products of the Canon Group financed or benefitted armed groups in the covered countries.

6. Efforts to determine the mine or location of origin of 3TG with the greatest possible specificity and risk mitigation

The following efforts to determine the mine or location of origin of 3TG with the greatest possible specificity are planned to be implemented from 2020 onwards.

- Canon will continue promoting verification operations of high-risk first-tier suppliers in accordance with Canon's Guidelines for Compliance with Conflict Minerals Regulation.
- Canon Inc. will continue its participation at JEITA's RMTWG, CFSWG and RMI, and support activities to make entire supply chains conflict free.

7. Independent monitoring

- KPMG AZSA Sustainability Co., Ltd. conducted an independent private sector audit of this report. The audit assessed whether the due diligence framework Canon designed conforms to the OECD Guidance's due diligence framework and whether the due diligence description in this report is consistent with the actual measures Canon undertook. The independent assurance report is attached in Appendix 2.

Forward-Looking Statements

This report contains not only past and present facts about Canon, but also future forecasts based on plans, prospects, management policies and strategies as of the publication date. These future forecasts are assumptions or estimations based on information available at the time the report was prepared. Due to a range of variables, however, the results or circumstances of our future business activities may vary from the forecasts contained herein.

Appendix 1.

Appendix 2.

INDEPENDENT ASSURANCE REPORT

To the Board of Directors and Stockholders of Canon Inc.

We have undertaken a reasonable assurance engagement of:

- management's assertion, included in section 4 of the Conflict Minerals Report for the reporting period from January 1 to December 31, 2019, that the design of Canon Inc.'s (the "Company") due diligence framework is in conformity with the criteria set forth in the Organisation of Economic Co-Operation and Development Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas, Third Edition 2016 ("OECD Due Diligence Guidance"), and
- whether the Company's description of the due diligence measures it performed, as set forth in section 4 of the Conflict Minerals Report for the reporting period from January 1 to December 31, 2019, is consistent, in all material respects, with the due diligence process that the Company undertook.

Management is responsible for the design of the Company's due diligence framework and the description of the Company's due diligence measures set forth in the Conflict Minerals Report, and performance of the due diligence measures. Our responsibility is to express an opinion on the design of the Company's due diligence framework and on the description of the due diligence measures the Company performed, based on the procedures we have performed.

Our reasonable assurance engagement was conducted in accordance with 'International Standard on Assurance Engagements (ISAE) 3000, Assurance Engagements other than Audits or Reviews of Historical Financial Information', issued by the International Auditing and Assurance Standards Board, and the standards applicable to performance audits contained in Government Auditing Standards, issued by the Comptroller General of the United States, and, accordingly, included examining, on a test basis, evidence about the design of the Company's due diligence framework and the description of the due diligence measures the Company performed, and performing such other procedures as we considered necessary in the circumstances. We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Our reasonable assurance engagement was not conducted for the purpose of evaluating:

- The consistency of the due diligence measures that the Company performed with either the design of the Company's due diligence framework or the OECD Due Diligence Guidance;
- The completeness of the Company's description of the due diligence measures performed;
- The suitability of the design or operating effectiveness of the Company's due diligence process;
- Whether a third party can determine from the Conflict Minerals Report if the due diligence measures the Company performed are consistent with the OECD Due Diligence Guidance;
- The Company's reasonable country of origin inquiry (RCOI), including the suitability of the design of the RCOI, its operating effectiveness, or the results thereof; or
- The Company's conclusions about the source or chain of custody of its conflict minerals, those products subject to due diligence, or the DRC Conflict Free status of its products.

Accordingly, we do not express an opinion or any other form of assurance on the aforementioned matters or any other matters included in any section of the Conflict Minerals Report other than section 4.

In our opinion,

- the design of the Company's due diligence framework for the reporting period from January 1 to December 31, 2019, as set forth in section 4 of the Conflict Minerals Report is in conformity, in all material respects, with the OECD Due Diligence Guidance, and
- the Company's description of the due diligence measures it performed as set forth in section 4 of the Conflict Minerals Report for the reporting period from January 1 to December 31, 2019, is consistent, in all material respects, with the due diligence process that the Company undertook.

We have complied with the Code of Ethics for Professional Accountants issued by the International Ethics Standards Board for Accountants, which includes independence and other requirements founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behavior. In accordance with International Standard on Quality Control 1, we maintain a comprehensive system of quality control including documented policies and procedures regarding compliance with ethical requirements,

professional standards and applicable legal and regulatory requirements.
