I. Operating Results and Financial Conditions

2008 Third Quarter in Review

Looking back at the global economy in the third quarter of 2008, in the United States, the financial crisis arising from the subprime mortgage debacle worsened following the failures of several securities firms amid stagnant housing investment along with slack consumer spending triggered by such factors as rising unemployment. In Europe, the economic slowdown was felt more intensely as financial uncertainty and rising prices led to sluggish consumer spending while export growth also lost momentum. Within Asia, despite the continued high growth rate of the Chinese economy, the negative effects of the American and European economies have triggered an evident slowdown in the region. In Japan, uncertainty over the future and anxiety stemming from poor corporate earnings have led to a drop in capital investments and consumer spending while exports, which had been sustaining the economy, were hit by the decelerating global economy and the sharp appreciation of the yen.

As for the markets in which Canon operates, within the office imaging products market, while demand for network digital multifunction devices (MFDs) continued to shift towards color models and products offering advanced functionality, market conditions weakened due to the impact of the deteriorating economy, mainly as a result of a drop-off in corporate-business demand. Within the market for printers and other computer peripherals, demand for laser beam printers was sluggish amid the economic slowdown. With regard to inkjet printers, the overall scale of the market remained relatively unchanged from the same period of the previous year as sales growth in emerging markets supplemented the reduced demand in major countries while demand in emerging markets continued to shift from single-function to multifunctional models. In the digital camera market, demand for digital single-lens-reflex (SLR) cameras maintained robust growth in each region. Compact digital cameras continued to enjoy healthy growth in emerging markets but, in other major regions, sales slowed considerably and market sentiment regarding excessive inventory led to further price declines. As for the optical equipment segment, while demand for steppers, utilized in the production of semiconductors, remained low due to restrained facility investment by device manufacturers, the market for aligners, used to produce liquid crystal display (LCD) panels, picked up momentum thanks to a recovery in facility investments by LCD panel manufacturers.

The average value of the yen for the quarter was \\$107.61 to the U.S. dollar, a year-on-year appreciation of about 9%, and \\$161.29 to the euro, remaining relatively unchanged from the year-ago period.

Amid these conditions, while sales volume increased for digital SLR cameras, the sharp appreciation of the yen against the U.S. dollar, coupled with flagging demand and falling prices due to the economic downturn, resulted in consolidated net sales of ¥986.0 billion (U.S.\$9,481 million), a decrease of 6.2% from the year-ago period. Despite the continued launch of new products and cost-reduction activities, the gross profit ratio slipped 2.1 points from the year-ago period to 48.2% in the face of the rapid appreciation of the yen, escalating material prices, and declining market prices. As a result, third-quarter gross profit declined by 10.1% year on year to ¥475.2 billion (U.S.\$4,569 million). Operating expenses in the third quarter decreased by 2.3% compared with the year-ago period owing to group-wide expense-reduction efforts. Consequently, third-quarter operating profit totaled ¥129.3 billion (U.S.\$1,243 million), a year-on-year decrease of 25.8%. Other income (deductions) increased by ¥7.6 billion (U.S.\$73 million) year on year due to an improvement in currency exchange losses despite decreased interest income. As a result, income before income taxes and minority interests totaled ¥125.0 billion (U.S.\$1,202 million), a year-on-year decline of 23.0%, while third-quarter net income also recorded a decline of 21.1% to ¥83.0 billion (U.S.\$798 million).

Basic net income per share for the quarter was \$65.91 (U.S.\$0.63), a year-on-year decline of \$16.03 (U.S.\$0.15).

Results by Product Segment

Looking at third-quarter consolidated results by business sector, within the business machines segment, the appreciation of the yen along with restrained investment in office equipment due to concern over business performance led to flagging demand for office imaging products in major regions, resulting in a decline in sales of 11.7%. As for computer peripherals, while sales volume of laser beam printers remained at a level comparable to the year-ago period, sales volume of consumables steadily expanded, contributing to a year-on-year sales increase of 2.5% overall amid the impact of the yen's appreciation. Within the inkjet printer segment, home-use multifunction models and business-use MFDs equipped with faxing capabilities recorded increases in both unit sales as well as sales of related consumables, achieving a slight increase in sales on a local-currency basis, but a decline of 2.2% due to the appreciation of the yen. Accordingly, sales of computer peripherals overall grew 1.3% from the year-ago period. Third-quarter sales of business information products decreased by 14.8% year on year mainly due to a decline in sales of personal computers in the Japanese market. Collectively, sales of business machines overall for the quarter totaled \(\frac{4651.0}{651.0}\) billion (U.S.\(\frac{5}{6,260}\) million), a decline of 5.1% from the year-ago period. Operating profit for the segment totaled \(\frac{4134.0}{651.0}\) billion (U.S.\(\frac{5}{1,289}\) million), a year-on-year decline of 12.0%, as sales decreased and the gross profit ratio dipped mainly due to the effects of the rising value of the yen.

As for the digital camera segment, digital SLR models such as the high-resolution competitively priced EOS Rebel XSi (EOS 450D) and the advanced-amateur-model EOS 40D achieved healthy sales growth. With regard to compact digital cameras, although the company launched 9 new models—2 new stylish ELPH (IXUS)-series models and 7 new PowerShot-series models catering to a range of photographic demands—the impact of declining market conditions resulted in sales volume for compact digital cameras remaining relatively unchanged. As a result, total sales volume for digital cameras rose by approximately 4% year on year, but the appreciation of the yen against the U.S. dollar, along with fierce price competition in the market, led to a sales decrease of 6.8% from the year-ago period to ¥249.8 billion (U.S.\$2,402 million). Operating profit for the camera segment decreased by 41.3% year on year to ¥45.1 billion (U.S.\$434 million) due to such factors as the drop in sales and the deterioration of gross profit ratio resulting from declining market prices and the rising value of the yen.

In the optical and other products segment, while sales of aligners, used to produce LCD panels, gained momentum owing to the recovery of demand by LCD panel manufacturers, sales of steppers, used in the production of semiconductors, continued to lag as market conditions deteriorated. As a result, sales for the segment totaled \(\frac{\pmax}{2}\)8.2 billion (U.S.\(\frac{\pmax}{2}\)819 million), a year-on-year decrease of 12.2%, while operating profit for the segment increased by 47.0% year on year to \(\frac{\pmax}{2}\)3.5 billion (U.S.\(\frac{\pmax}{2}\)33 million).

Cash Flow

Cash flow from financing activities recorded an outlay of \$192.0 billion (U.S.\$1,846 million), mainly resulting from the dividend payout of \$145.0 billion (U.S.\$1,394 million) and the purchase of treasury stocks. As a result, cash and cash equivalents, including the foreign currency translation adjustments of \$65.0 billion (U.S.\$625 million) impacted by the appreciation of the yen, totaled \$737.3 billion (U.S.\$7,090 million), decreasing by \$207.1 billion (U.S.\$1,992 million) from the previous year.

Outlook

With regard to the outlook for the global economy in the fourth quarter, as business conditions worldwide continue to deteriorate, there is an increased concern over the impact to the real economy, a situation brought about as a result of the worldwide plunge in stock prices triggered by the financial turbulence in the wake of failing financial institutions in the United States. Additionally, drastic fluctuations in currency exchange rates between major currencies have led to a heightened sense of uncertainty over the future. Amid this environment, while some degree of growth in such emerging markets as Asia and Russia is expected to continue, fourth-quarter business performance in developed countries is expected to be lackluster, and considerable time will be required to remove the sense of financial insecurity and realize an economic recovery.

As for the markets in which Canon operates, while the market for digital SLR cameras is projected to realize healthy expansion, the compact digital camera market is expected to record modest growth amid further intensifying price competition. Demand for network digital MFDs and laser beam printers will remain at a low level overall. While the market for aligners, used to produce LCD panels, is expected to continue recovering, owing to large-scale facility investments by LCD panel manufacturers, the market for steppers, utilized in the production of semiconductors, will likely remain stagnant.

With regard to currency exchange rates for the fourth quarter, on which Canon's performance outlook for the full year is based, despite uncertainty over future interest rate policies and economic prospects for major countries, along with the recent sharp fluctuations, Canon anticipates exchange rates for the quarter of \(\xi\)100 to the U.S. dollar and \(\xi\)135 to the euro, representing a year-on-year appreciation of approximately 13% against the U.S. dollar, and about 21% against the euro. Upon taking into consideration third-quarter business results along with current market conditions and the expected business climate based on these foreign exchange rate assumptions, Canon now anticipates consolidated net sales of \(\xi\)4,250.0 billion (U.S.\(\xi\)40,865 million), operating profit of \(\xi\)580.0 billion (U.S.\(\xi\)5,577 million), income before income taxes and minority interests of \(\xi\)590.0 billion (U.S.\(\xi\)5,673 million) and net income of \(\xi\)375.0 billion (U.S.\(\xi\)3,606 million), a downward revision for each item from the previous announcement.

Notes: 1. The primary products included in each of the product segments are as follows:

Business machines:

Office imaging products: Office network digital multifunction devices (MFDs) / Color network digital MFDs /

Office copying machines / Personal-use copying machines / Full-color copying machines

 $Computer\ peripherals:\ Laser\ beam\ printers\ /\ Inkjet\ multifunction\ peripherals\ /\ Single\ function\ inkjet\ printers\ /\ Image\ scanners$

Business information products: Computer information systems / Document scanners / Personal information products Cameras: Digital SLR cameras / Compact digital cameras / Interchangeable lenses / Digital video camcorders

Optical and other products: Semiconductor production equipment / Mirror projection mask aligners for LCD panels /

Broadcasting equipment / Medical equipment / Large format printers / Components

2. The principal countries and regions included in each regional category are as follows:

Americas: United States of America, Canada, Latin America / Europe: England, Germany, France, Netherlands / Other Areas: Asian regions, China, Oceania

(2) SIGNIFICANT ACCOUNTING POLICIES

The accompanying consolidated financial statements reflect the adjustments which management believes are necessary to conform them with U.S. generally accepted accounting principles, except for the segment information, as required by Statement of Financial Accounting Standards No.131, "Disclosure about Segments of an Enterprise and Related Information."

8. OTHER

We have engaged Ernst & Young ShinNihon LLC to perform a review of the consolidated balance sheets as of September 30, 2008, the consolidated statements of income for the three and nine month periods ended September 30, 2008, and the consolidated statements of stockholders' equity and cash flows for the nine month period ended September 30, 2008. This review engagement was performed in accordance with certain provisions of Statement of Auditing Standards No.100, "Interim Financial Information" ("SAS 100"), established by the American Institute of Certified Public Accountants. Additionally the consolidated interim financial information does not include certain disclosures, such as notes to financial statements, that are required under U.S. generally accepted accounting principles and by the United States Securities and Exchange Commission.

This document contains forward-looking statements with respect to future results, performance and achievements that are subject to risk and uncertainties and reflect management's views and assumptions formed by available information. All statements other than statements of historical fact are statements that could be considered forward-looking statements. When used in this document, words such as "anticipate," "believe," "estimate," "expect," "intend," "may," "plan," "project" or "should" and similar expressions, as they relate to Canon, are intended to identify forward-looking statements. Many factors could cause the actual results, performance or achievements of Canon to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements, including, among others, changes in general economic and business conditions, changes in currency exchange rates and interest rates, introduction of competing products by other companies, lack of acceptance of new products or services by Canon's targeted customers, inability to meet efficiency and cost reduction objectives, changes in business strategy and various other factors, both referenced and not referenced in this document. A detailed description of these and other risk factors is included in Canon's annual report on Form 20-F, which is on file with the United States Securities and Exchange Commission. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described herein. Canon does not intend or assume any obligation to update these forward-looking statements.
