

# Feather diary

When and where did you find it?

Date found

Tuesday, July 16, 2020

Location

South side of the schoolyard

Details

Length 13.5

cm

Color/pattern Black and grey

What kind of feather is it? (Circle your choice)

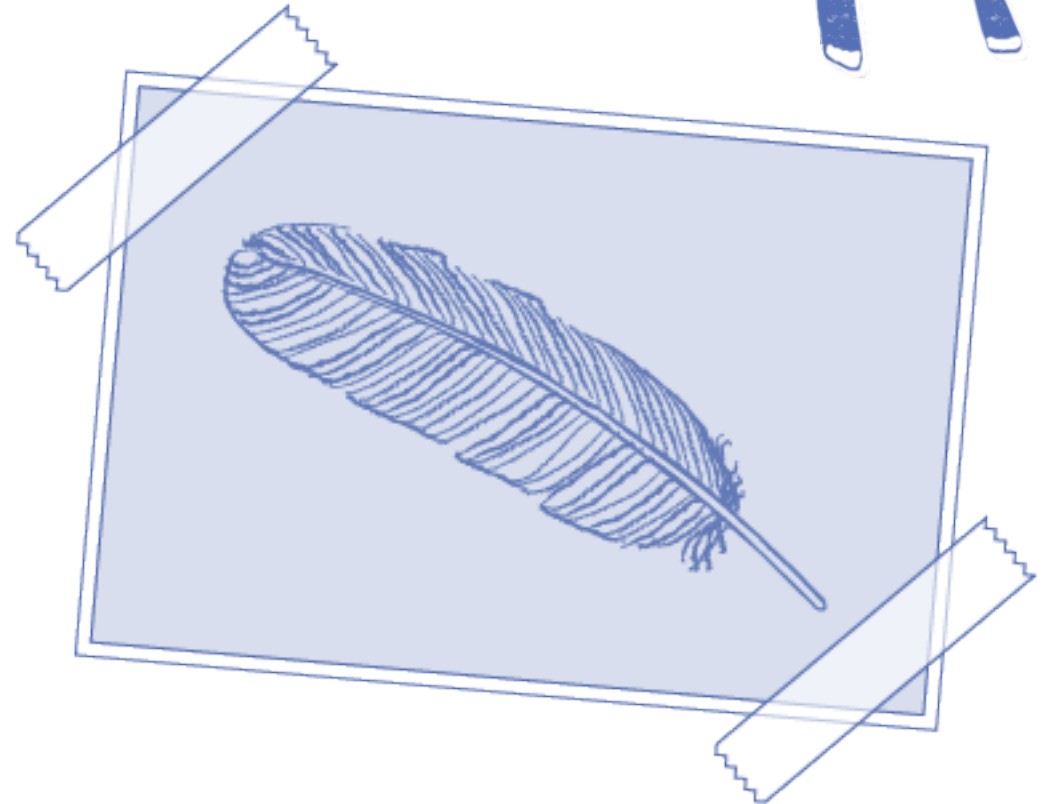

Contour feather (flight feather) body feather tail feather ) Down Don't know

What bird is it from? (Make a guess)

Maybe an Oriental Turtle Dove

Write down your observations/thoughts

I found a nice-looking feather in good condition.  
When I dropped water on it, it made a ball and rolled off.  
It might be a feather from the Oriental Turtle Dove that  
was calling from a nearby hydro pole.

Attach a photo of the feather or  
make a drawing of it
