

Let's research migratory birds!

Do research using a bird field guide or on the Internet.

Write the name of the bird Whooper Swan

Which bird family is it from? Swan family

How large is it? 140 cm

What sound does it make? Honks often in high voice, sounds like "koh"

Write down visible details such as color or feather pattern

Large with a long neck. Body is white and bill is yellow with a black tip.

What does it eat? It eats waterweeds, reeds, and insects.

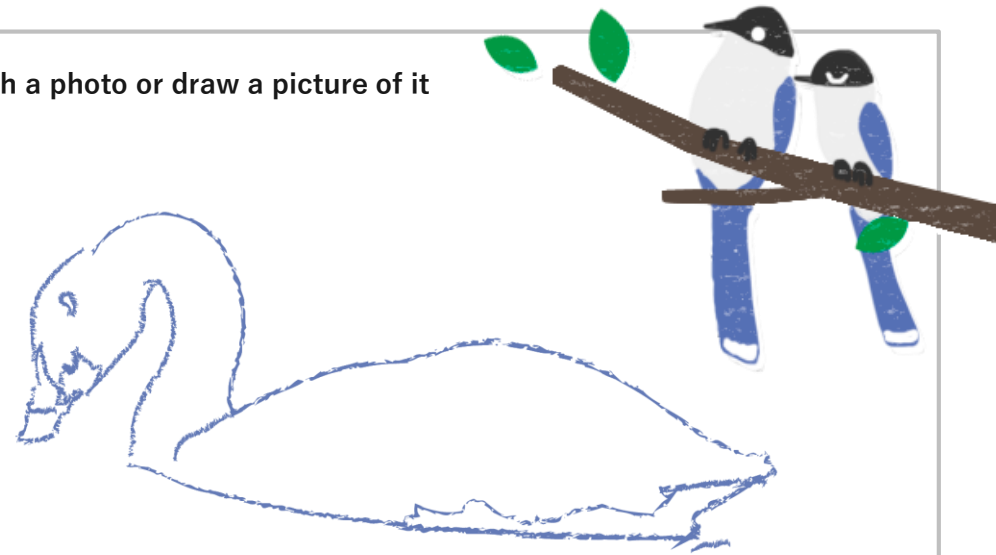

When does it migrate? Where does it come from and go to?
What is the purpose?

It comes from Siberia to Japan in autumn.
It comes to look for food.

Write down your observations/thoughts

It's big and very beautiful. I've seen it on the lake.

Attach a photo or draw a picture of it

Draw its migration route
