I. Operating Results and Financial Conditions

2019 Third Quarter in Review

Looking back at the global economy in the third quarter of 2019, the U.S. economy continued to grow supported by changes in monetary policy and strong employment conditions. However, signs of a slowdown were mounting, particularly for manufacturing industries. The European economy continued to slow down due to a delay in the recovery of exports, mainly in Germany, as well as the confusion surrounding the U.K.'s impending exit from the EU. The Chinese economy was lagging amid a slide in consumer spending as well as decreasing exports caused by prolonged trade friction with the United States. The economies of other emerging markets also slowed down, centered on countries that rely heavily on foreign demand. In Japan, while employment conditions continued to improve, the economy remained in a state of gradual recovery due mainly to worsening economic conditions for manufacturing industries. As a result, the global economy overall showed signs of a slowdown.

As for the markets in which Canon operates amid these conditions, demand for office multifunction devices (MFDs) remained at around the same level as the previous year, while demand for laser printers decreased due mainly to the economic slowdown in China. The market for cameras continued to contract and demand for inkjet printers decreased in each region except for Japan. The market for medical equipment recovered in Japan and demand grew moderately in other markets, mainly in developed countries. Within the Industry and Others sector, although customers continued to slow capital investments in industrial equipment, the market for network cameras enjoyed solid growth.

The average values of the yen during the third quarter and the first nine months of the year were \(\pm\)107.32 and \(\pm\)109.14 against the U.S. dollar, respectively, year-on-year appreciation of approximately \(\pm\)4 and the same level as the previous year, and \(\pm\)119.27 and \(\pm\)122.67 against the euro, respectively, year-on-year appreciation of approximately \(\pm\)10 and year-on-year appreciation of approximately \(\pm\)8.

During the third quarter, overall unit sales of office MFDs decreased slightly compared with the same period of the previous year owing to the decrease of monochrome-model office MFDs. However, color-model office MFDs exceeded the growth of the market. Unit sales of laser printers decreased compared with the same period of the previous year, due to a slowdown in sales of low-speed models, although sales were strong for new models. While Canon has been working towards expanding sales of mirrorless cameras, unit sales of interchangeable-lens digital cameras decreased compared with the same period of the previous year amid the shrinking market for entry-class models. Looking at inkjet printers, overall unit sales decreased compared with the same period of the previous year due mainly to the slowdown in emerging markets. Sales of medical equipment increased compared with the same period of the previous year, due to solid overseas sales in Europe and some emerging countries, as well as expanded sales in Japan. For industrial equipment, sales of semiconductor lithography equipment and manufacturing equipment for organic LED (OLED) panels decreased compared with the same period of the previous year, due to the prolonged sluggishness of capital investments in semiconductor memory and small- and medium-size display panels. On the other hand, sales of network cameras increased steadily amid an expanding market. Under these conditions, third-quarter net sales decreased by 6.2% year on year to ¥869.5 billion. Net sales for the first nine months of the year decreased by 8.8% year on year to \(\frac{4}{2}\),639.8 billion. The gross profit ratio dropped by 1.3 points to 44.8% and gross profit decreased by 8.7% year on year to ¥389.9 billion due mainly to the negative effects of currency exchange rates. Operating expenses decreased by 2.0% year on year to ¥351.4 billion, thanks to efforts to thoroughly manage expenses as well as the positive effect of currency exchange rates. As a result, third-quarter operating profit decreased by 43.7% to ¥38.4 billion. Other income (deductions) increased by ¥9.9 billion, while income before income taxes decreased by 29.9% year on year to \(\frac{4}{4}7.0\) billion and net income attributable to Canon Inc. decreased by 42.7% to \(\frac{4}{26.5}\) billion. Operating profit for the first nine months of the year decreased by 49.9% to \(\frac{4}{22.0}\) billion while income before income taxes decreased by 45.2% to ¥144.2 billion and net income attributable to Canon Inc. for the first nine months of the year decreased by 49.0% to ¥92.3 billion.

Basic net income attributable to Canon Inc. shareholders per share was ¥24.93 for the third quarter, a year-on-year decrease of ¥17.91, and ¥86.16 for the first nine months, a year-on-year decrease of ¥81.51.

Results by Segment

Looking at Canon's third-quarter performance by business unit, starting with the Office Business Unit, although there was solid demand for new color models that feature enhanced security functions and the newly launched imagePRESS C910 series which targets the production printing market, unit sales of monochrome-model office MFDs decreased due to the economic slowdown in emerging countries, and overall unit sales of office MFDs decreased slightly compared with the same period of the previous year. As for laser printers, although sales were strong for new models that achieve low power consumption, compact body designs and high productivity, unit sales of hardware decreased compared with the same period of the previous year due mainly to decreasing sales of low-speed models in emerging markets. Sales of consumables also decreased due mainly to the slowdown of the European economy. These factors resulted in total sales for the business unit of ¥413.8 billion, a year-on-year decrease of 3.9%, while income before income taxes decreased by 16.5% year on year to ¥41.6 billion. Sales for the combined first nine months of the year totaled ¥1,267.3 billion, a year-on-year decrease of 5.1%, while income before income taxes totaled ¥132.4 billion, a year-on-year decrease of 20.4%.

Within the Imaging System Business Unit, unit sales of interchangeable-lens digital cameras decreased compared with the same period of previous year due to continuing market contraction, centered on entry-class models. However, unit sales of mirrorless cameras increased, owing to solid demand for new models equipped with full-frame sensors launched in the second half of the previous year as well as solid demand for affordably priced models. For inkjet printers, although unit sales in Japan increased compared with the same period of the previous year, unit sales decreased overall compared with the same period of the previous year mainly due to the slowdown in emerging markets affected by the sluggish economy. As a result, sales for the business unit decreased by 13.9% to ¥189.2 billion year on year, while income before income taxes decreased by 57.8% year on year to ¥10.4 billion. Sales for the combined first nine months of the year totaled ¥570.2 billion, a year-on-year decrease of 16.5%, while income before income taxes totaled ¥28.8 billion, a year-on-year decrease of 67.3%.

Within the Medical System Business Unit, sales of newly launched computed tomography (CT) systems and diagnostic ultrasound systems were strong amid the recovery of overall demand in Japan. Sales of CT systems intended to enhance the product line-up were strong in overseas markets, particularly in Europe. As a result, sales for the business unit increased by 5.9% to ¥113.9 billion year on year, while income before income taxes increased by 17.2% to ¥9.5 billion year on year. Mainly due to a decrease in both sales and profit for the first quarter, sales for the combined first nine months of the year totaled ¥328.5 billion, a year-on-year increase of 2.9%, while income before income taxes totaled ¥19.5 billion, a year-on-year decrease of 5.1%.

For the Industry and Others Business Unit, although investments in semiconductor lithography equipment for image sensors were strong, investments for memory devices remained at a low level. Sales of FPD lithography equipment and OLED panel manufacturing equipment decreased compared with the same period of the previous year due to the continued restraint of investments in the smartphone market. Sales of network cameras were strong, particularly for Axis, amid increasing market demand due to diversifying market needs and replacement demand. Consequently, sales for the business unit decreased by 10.5% to ¥176.2 billion year on year, while income before income taxes decreased by 75.5% year on year to ¥2.7 billion. Sales for the combined first nine months of the year totaled ¥545.1 billion, a year-on-year decrease of 14.1%, while income before income taxes totaled ¥14.8 billion, a year-on-year decrease of 69.4%.

Cash Flow

During the first nine months of 2019, cash flow from operating activities totaled ¥194.5 billion, an increase of ¥0.8 billion compared with the same period of the previous year, owing mainly to improvements in working capital, despite a decrease of profit. Cash flow used in investing activities increased by ¥21.4 billion year on year to ¥157.8 billion mainly due to an increase in investment in production equipment. Accordingly, free cash flow totaled positive ¥36.7 billion, a decrease of ¥20.6 billion compared with the same period of the previous year.

Despite an increase of short-term loans, cash flow used in financing activities recorded an outlay of ¥96.4 billion, mainly owing to the dividend payout and the repurchasing of treasury stock.

Owing to these factors, as well as the impact from foreign currency translation adjustments, cash and cash equivalents decreased by ¥72.3 billion to ¥448.3 billion from the end of the previous year.

Outlook

As for the outlook from the fourth quarter onwards, despite being underpinned by changes in monetary policy and favorable employment conditions, the U.S. economy is expected to slow down due to bearish conditions for manufacturing industries. The pace of recovery of the European economy is expected to slow down due to a prolonged recovery for exports as well as uncertainty surrounding the U.K.'s exit of the EU. The Chinese economy shows clear signs of a slowdown, particularly for manufacturing industries, due to prolonged trade friction with the United States, and the growth rate for emerging countries is expected to decline. With regard to the Japanese economy, the outlook indicates a trend of steady growth supported by relief measures to reduce the impact of an increase of consumption tax and solid domestic demand based on favorable employment conditions. Looking at the global economy, there are concerns of further economic slowdown occurring due to such phenomena as long-drawn-out trade friction between China and the United States and rising political instability.

In the businesses in which Canon is involved, sales of office MFDs are expected to be slightly below level compared with the previous year, supported by the solid demand for color models. Demand for laser printers is expected to remain below that of the previous year due to prolonged economic slowdown. As for interchangeable-lens digital cameras, although demand for entry-class models is expected to continue to shrink, demand for mirrorless cameras is expected to grow steadily, particularly for advanced amateur models, including those equipped with full-frame sensors. Projections indicate the overall inkjet printer market is expected to continue to shrink. As for the medical equipment market, although capital expenditure for medical equipment is expected to be postponed in emerging markets due to sluggish economic conditions, demand is expected to continue growing in developed markets. For semiconductor lithography equipment, the market is expected to improve as the price of memory products shows signs of bottoming out. For OLED panel manufacturing equipment, capital investment in small- and medium-size display panels is expected to recover. As for network cameras, the market is expected to continue expanding due mainly to the increasing demand for enhanced security and replacement demand from users shifting from analogue to digital models.

With regard to currency exchange rates for the fourth quarter onwards, on which Canon's performance outlook is based, Canon anticipates exchange rates of \\$105 to the U.S. dollar and \\$117 to the euro, representing appreciation of approximately \\$2 against the U.S. dollar and appreciation of approximately \\$9 against the euro as the annual average rates of the previous year.

Despite the persistently harsh business environment, upon taking into consideration the effect of new products, the continuous expansion of new businesses—including medical equipment and network cameras—and the trend of recovery seen in Canon's third-quarter performance from the first half, Canon projects full-year consolidated net sales in 2019 of \(\frac{\frac{\text{\frac{4}}}{3},625.0\) billion, a year-on-year decrease of 8.3%; operating profit of \(\frac{\text{\frac{4}}}{188.0}\) billion, a year-on-year decrease of 45.2%; income before income taxes of \(\frac{\text{\frac{4}}}{216.0}\) billion, a year-on-year decrease of 44.6%.

^{*}Based on the realignment of Canon's internal reporting and management structure, from the beginning of the first quarter of 2019, Canon has reclassified certain businesses from Imaging System Business Unit to Industry and Others Business Unit. Net sales for the three months ended September 30, 2018 and the nine months ended September 30, 2018 also have been restated.

Notes: 1. The primary products included in each of the segments are as follows:

Office Business Unit:

 $Of fice\ multifunction\ devices\ (MFDs)\ /\ Laser\ multifunction\ printers\ (MFPs)\ /\ Laser\ printers\ /\ Digital\ continuous\ feed\ presses\ presses\$

Digital sheet-fed presses / Wide-format printers / Document solutions

Imaging System Business Unit :

Interchangeable-lens digital cameras / Digital compact cameras / Interchangeable lenses /

Compact photo printers / Inkjet printers / Large format inkjet printers / Commercial photo printers /

Image scanners / Calculators

Medical System Business Unit:

Digital radiography systems / Diagnostic X-ray systems / Computed tomography (CT) systems /

Magnetic resonance imaging (MRI) systems / Diagnostic ultrasound systems / Clinical chemistry analyzers / Ophthalmic equipment Industry and Others Business Unit:

Semiconductor lithography equipment / FPD (Flat panel display) lithography equipment / Vacuum thin-film deposition equipment / Organic LED (OLED) panel manufacturing equipment / Die bonders /

 $Network\ cameras\ /\ Digital\ cameras\ /\ Multimedia\ projectors\ /\ Broadcast\ equipment\ /\ Broadc$

Micromotors / Handy terminals / Document scanners

2. The principal countries and regions included in each regional category are as follows:

Americas: United States of America, Canada, Latin America

Europe: United Kingdom, Germany, France, Netherlands, European countries, Middle East and Africa

Asia and Oceania: China, Asian countries, Australia

5. NOTE FOR GOING CONCERN ASSUMPTION

Not applicable.

6. SIGNIFICANT CHANGES IN CANON INC. SHAREHOLDERS' EQUITY

None.

7. BASIS OF PRESENTATION AND SIGNIFICANT ACCOUNTING POLICIES

SIGNIFICANT ACCOUNTING POLICIES

Canon's consolidated financial statements are prepared in accordance with U.S. generally accepted accounting principles.

Recently Issued Accounting Guidance

In February 2016, the Financial Accounting Standards Board ("FASB") issued ASU No. 2016-02, Leases (Topic 842) Section A – Leases: Amendments to the FASB Accounting Standards Codification, which requires lessees to recognize most leases on their balance sheets but recognize expenses on their income statements in a manner similar to the previous guidance. For lessors, the standard modifies the classification criteria and the accounting for sales-type and direct financing leases. The FASB also modified the definition of lease. Additionally, this guidance expands qualitative and quantitative disclosures related to lease. This guidance is effective for annual reporting periods beginning after December 15, 2018. Canon applied the guidance from the quarter beginning January 1, 2019. Canon applied the package of practical expedients that allows us not to reassess whether any existing contracts at or expired contracts prior to the adoption date are or contain leases, lease classification and whether initial direct costs qualify for capitalization, in addition to short term lease exception. Canon also adopted the transition method which no restatement of comparative periods and no reassessment of land easements not previously accounted for as a lease that exist at or expired prior to the adoption date are required. The right of use assets for operating leases recognized at January 1, 2019 was \(\frac{1}{2}\)125,649 million. The corresponding lease liabilities were also recognized. The adoption of this guidance did not have a material impact on its consolidated results of operation.

In August 2017, the FASB issued ASU No. 2017-12, Derivatives and Hedging (Topic 815): Targeted Improvements to Accounting for Hedging Activities, which amends existing guidance to simplify the application of the hedge accounting in certain situations and enables an entity to better portray the economic results of an entity's risk management activities in its financial statements. This guidance eliminates the requirement to separately measure and report hedge ineffectiveness, and requires an entity to present the earnings effect of the hedging instrument in the same income statement line item in which the earnings effect of the hedged item is reported. Canon adopted this guidance from the quarter beginning January 1, 2019 with the modified retrospective method through a cumulative effect adjustment directly to retained earnings as of the beginning of the period. Gains and losses resulting from derivative financial instruments designated as cash flow hedges associated with forecasted intercompany sales, which were previously included in other income (deductions) in the consolidated statements of income are included in net sales after the adoption of this guidance. The adoption of this guidance did not have a material impact on its consolidated results of operation and financial condition.
