Annual Securities Report
filed with the Japanese government pursuant to
the Financial Instruments and Exchange Act of Japan

For the year ended
December 31, 2025

CANON INC.
Tokyo, Japan

This document was prepared for printing by adding a table of contents and pages to the Annual Securities Report, which is in accordance with Article 24, paragraph (1) of the Financial Instruments and Exchange Act, submitted as data on March 25, 2026 using the Electronic Data Processing System for Disclosure (EDINET) prescribed in Article 27-30, paragraph (2) of the aforementioned act.

Cautionary Statement with respect to forward-looking statements:

This document contains forward-looking statements regarding future results, performance and achievements, which are based on management's current views and information available at the time of preparation and are subject to various risks and uncertainties. Statements other than those of historical fact are considered forward-looking statements.

Words such as "anticipate," "believe," "estimate," "expect," "intend," "may," "plan," "project" or "should," and similar expressions, as they relate to Canon, are used to identify forward-looking statements. Actual results may differ materially from those expressed or implied by these forward-looking statements due to various factors, including changes in economic and business conditions, currency exchange rates, interest rates, competitive conditions, customer acceptance of new products or services, the achievement of efficiency and cost reduction initiatives, changes in business strategy, and other factors. For more information on risks and uncertainties that may affect Canon's business, financial condition and results of operations, please refer to Canon's most recent disclosure documents available on its website. These forward-looking statements speak only as of the date of this document, and Canon undertakes no obligation to update them, except as required by applicable laws and regulations.

April	1968	Developed NP System and entered into plain-paper copier (PPC) market.
March	1969	Changed corporate name to Canon Inc.
March	1970	Introduced semiconductor lithography equipment.
June	1970	Established Canon Inc., Taiwan.
November	1971	Merged Canon Camera Sales Co., Inc. and Canon Office Equipment Service Co., Ltd. into Canon Business Machines Sales Inc., and changed corporate name to Canon Sales Co., Inc. (currently Canon Marketing Japan Inc.)
July	1972	Invested in Physotec GmbH. (currently Canon Giessen GmbH)
August	1972	Invested in Dai-ichi Seiki Kogyo Co., Ltd. (currently Canon Finetech Niska Inc.)
May	1975	Succeeded in development of laser printer.
August	1978	Established Canon Australia Pty. Ltd. in Australia.
October	1979	Established Canon Singapore Pte. Ltd. in Singapore.
December	1979	Invested in Copyer Co., Ltd. (currently Canon Finetech Niska Inc.)
May	1980	Established Copyer Sales Co., Ltd. (currently Canon System and Support Inc.) through joint investment from Canon Sales Co., Inc. (currently Canon Marketing Japan Inc.) and Copyer Co., Ltd.
October	1981	Succeeded in development of bubble-jet recording technology.
January	1982	Established Canon Europa N.V. in the Netherlands.
February	1982	Established Oita Canon Inc.
August	1983	Established Canon Bretagne S.A. (currently Canon Bretagne S.A.S.) in France.
January	1984	Established Canon Components Inc.
July	1985	Canon Sales Co., Inc. (currently Canon Marketing Japan Inc.) invested in Nippon Typewriter Co., Ltd. (currently Canon Semiconductor Equipment Inc.)
November	1985	Established Canon Virginia, Inc. in the U.S.
September	1988	Established Nagahama Canon Inc.
December	1988	Established Canon Opto (Malaysia) Sdn. Bhd. in Malaysia.
September	1989	Established Canon Dalian Business Machines, Inc., in China.
August	1990	Established Canon Hi-Tech (Thailand) Ltd. in Thailand.
March	1997	Established Canon (China) Co., Ltd. in China.
January	1998	Established Oita Canon Materials Inc.
September	2000	Listed on the New York Stock Exchange. (delisted in March 2023)
November	2000	Turned Canon Chemicals Inc. to a wholly-owned subsidiary.
January	2001	Established Canon Europe Ltd. in the UK.
April	2001	Established Canon Vietnam Co., Ltd. in Vietnam.

September	2001	Established Canon (Suzhou) Inc. in China.
April	2002	Spun off Ueno Canon Materials Inc. from Canon Inc.
April	2003	Spun off Fukushima Canon Inc. from Canon Inc.
September	2005	Acquired shares of ANELVA Corporation. (currently Canon ANELVA Corporation)
October	2005	Acquired shares of NEC Machinery Corporation. (currently Canon Machinery Inc.)
July	2006	Conducted a stock split at a ratio of 1.5 shares for each common share.
June	2007	Canon Marketing Japan Inc. acquired shares of Argo 21 Corp. (currently Canon IT Solutions Inc.)
December	2007	Acquired shares of Tokki Corporation. (currently Canon Tokki Corporation)
July	2008	Established Nagasaki Canon Inc.
July	2009	Consolidated all headquarter functions of Europe to Canon Europe Ltd.
February	2010	Acquired shares of OPTOPOL Technology S. A. (currently Canon Ophthalmic Technologies Sp. z. o. o.)
March	2010	Acquired shares of Océ N. V. (currently Canon Production Printing Holding B.V.)
April	2014	Acquired shares of Molecular Imprints, Inc. (currently Canon Nanotechnologies, Inc.)
July	2014	Canon Europa N. V. acquired shares of Milestone Group A/S.
April	2015	Acquired shares of Axis AB.
December	2016	Acquired shares of Toshiba Medical Systems (currently Canon Medical Systems Corporation)
March	2017	Acquired shares of Toshiba Medical Finance Co., Ltd. (currently Canon Medical Finance Co., Ltd.)
June	2017	Acquired shares of Miyazaki Daishin Canon Inc. (currently Miyazaki Canon Inc.)
September	2021	Acquired shares of Redlen Technologies Inc.
July	2023	Canon Medical Systems Corporation acquired shares of Minaris Medical Co. Ltd. (currently Canon Medical Diagnostics Corporation)
March	2024	Canon Marketing Japan Inc. acquired shares of Primagest, Inc.

3. Description of Business

Canon prepares consolidated financial statements in accordance with generally accepted accounting principles in the U.S. (U.S. GAAP), and affiliated companies are also disclosed in accordance with the definition of this accounting standard. The same applies to II. "Business Overview" and III. "Equipment and Facilities." The segment information is prepared based on ASC 280("Segment Reporting") issued by the Financial Accounting Standards Board ("FASB").

Canon Group (consisting of Canon Inc., its 321 consolidated subsidiaries and 8 affiliated companies accounted for by the equity method, as of December 31, 2025) engages in business activities ranging from development, production, sales, and services in the fields of Printing, Medical, Imaging, Industrial and Others and Corporate.

From 2025, the Company has changed the method of performance management for intercompany transactions in the Industrial Business Unit to better manage the performance of each reportable segment. For details, please refer to "V. Financial information, 1. Consolidated Financial Statements, etc., (1) Consolidated Financial Statements Notes to the consolidated financial statements, Note 23. Segment information."

Development is primarily conducted by Canon Inc., while production is carried out by Canon Inc., as well as domestic and international manufacturing subsidiaries organized by business content. Additionally, some production-related companies supply parts to each business segment.

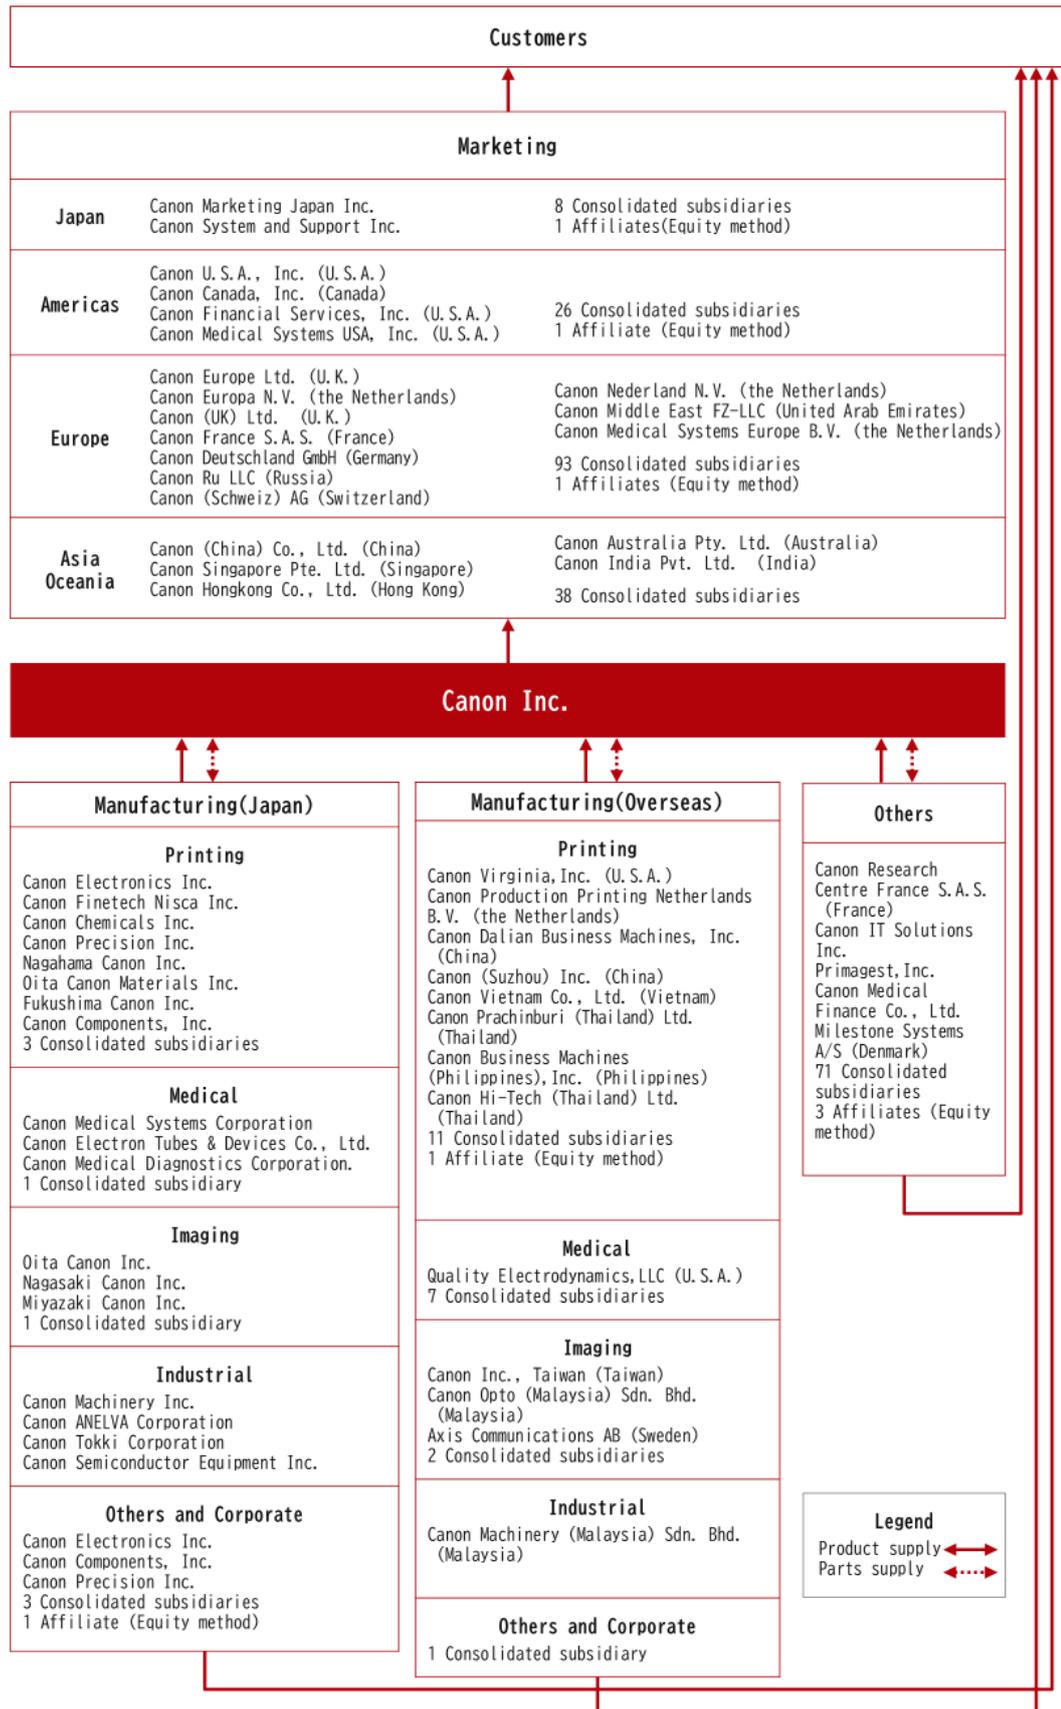

Sales and service activities are conducted mainly by Canon Marketing Japan Inc. in Japan and by sales subsidiaries and affiliates established in each region, including Canon U.S.A., Inc. (U.S.), Canon Europe Ltd. (U.K.), Canon Europa N. V. (Netherlands), Canon (UK) Ltd. (U.K.), Canon France S. A. S. (France), Canon Deutschland GmbH (Germany), Canon (China) Co., Ltd. (China), and Canon Singapore Pte. Ltd. (Singapore), overseas. For products of the Medical Business Unit, Canon Medical Systems Corporation conducts sales activities through direct sales or sales affiliates and distributors established in each region.

Manufacturing subsidiaries such as Canon Electronics Inc. and Canon Components, Inc. supply parts and products to Canon Inc. and also conduct their own sales activities in Japan and overseas.

The main companies responsible for products and production by segment are as follows.

Segment name	Primary products	Major manufacturing companies
Printing	Digital continuous feed presses / Digital sheet-fed presses / Large format printers / Office multifunction devices (MFDs) / Document solutions / Laser multifunction printers (MFPs) / Laser printers / Inkjet printers / Image scanners / Calculators	Canon Inc. 5. Employees

(1) Information about group

As of December 31, 2025

Business Segment	Number of employees (Persons)
Printing Business Unit	105,938
Medical Business Unit	13,347
Imaging Business Unit	26,367
Industrial Business Unit	7,757
Others and Corporate	12,138
Total	165,547

Note: "The number of employees" shows the number of workers, including part-timers and temporary employees.

(2) Information about reporting company

As of December 31, 2025

Number of employees (Persons)	Average age (Years old)	Average length of service (Years)	Average annual salary (Yen)
22,921	44.3	18.9	8,817,253

Business Segment	Number of employees
Printing Business Unit	8,873
Medical Business Unit	604
Imaging Business Unit	3,899
Industrial Business Unit	2,558
Others and Corporate	6,987
Total	22,921

Notes:

1. "The number of employees" shows the number of workers, including part-timers and temporary employees.
2. Average annual salary includes extra wages and bonuses.

(3) Information about labor union

Canon Group primarily organizes labor unions by company.

Canon Inc. and Canon Marketing Japan Inc., which is sales subsidiary, have a Canon Workers' Union and are members of UNION N.E.T. and Japan Optical Industry Association. The relationships between the companies and these labor unions are stable until today. In addition, the relationships between the other companies and these labor unions are stable.

(4) Percentage of female employees in managerial positions, percentages of male employees who took childcare leave, and wage differences between male and female employees

(i) Reporting company

Fiscal year ended December 31, 2025				
Percentage of female employees in managerial positions (%) (Note 1)	Percentage of male employees who took childcare leave (%) (Note 2)	Wage differences between male and female employees (Notes 1・3)		
		All employees (%)	Regular employees (%)	Part-time / Fixed-term Employees (%)
4.6	86.3	76.1	77.1	75.4

Notes:

- 1 These percentages are calculated in accordance with the provisions of the Act on the Promotion of Women's Active Engagement in Professional Life (Act No. 64 of 2015).
- 2 These percentages are calculated based on the ratios of childcare leave, etc. and time off for childcare taken as specified in Article 71-6, item (i) of the Ordinance for Enforcement of the Act on Childcare Leave, Caregiver Leave, and Other Measures for the Welfare of Workers Caring for Children or Other Family Members (Ordinance of the Ministry of Labor No. 25 of 1991) in accordance with the provisions of the Act on Childcare Leave, Caregiver Leave, and Other Measures for the Welfare of Workers Caring for Children or Other Family Members (Act No. 76 of 1991).
3. The higher ratio of men in managerial positions compared to women is a factor causing the wage differences between genders. Improving the ratio of female managers is recognized as an important issue for Canon. Canon has established a company-wide organization to promote diversity and are conducting activities such as female leadership training to develop female managerial candidates and support for balancing work and childcare. As a result, the wage differences for regular employees has improved by 1.5points from the previous fiscal year. For more details, please refer to Part II. Business Overview, 2. Approach to Sustainability and Related Initiatives, (3) Human capital. Additionally, the wage differences between male and female at the same managerial level is 97.2% for department heads and 96.4% for section managers.

(ii) Major domestic consolidated subsidiaries

Fiscal year ended December 31, 2025					
Company name	Percentage of female employees in managerial positions (%) (Note 1)	Percentage of Male employees who took childcare leave(%) (Notes 2 and 3)	Wage differences between male and female employees (Notes 1 and 4)

Notes:

1. These percentages are calculated in accordance with the provisions of the Act on the Promotion of Women's Active Engagement in Professional Life (Act No. 64 of 2015).
2. These percentages are calculated based on the ratios of childcare leave, etc. and time off for childcare taken as specified in Article 71-6, item (i) of the Ordinance for Enforcement of the Act on Childcare Leave, Caregiver Leave, and Other Measures for the Welfare of Workers Caring for Children or Other Family Members (Ordinance of the Ministry of Labor No. 25 of 1991) in accordance with the provisions of the Act on Childcare Leave, Caregiver Leave, and Other Measures for the Welfare of Workers Caring for Children or Other Family Members (Act No. 76 of 1991).
3. "-" indicates that there are no applicable employees (male employees whose spouses gave birth during the fiscal year).
4. "-" indicates that the Company does not have any employees required for the calculation.

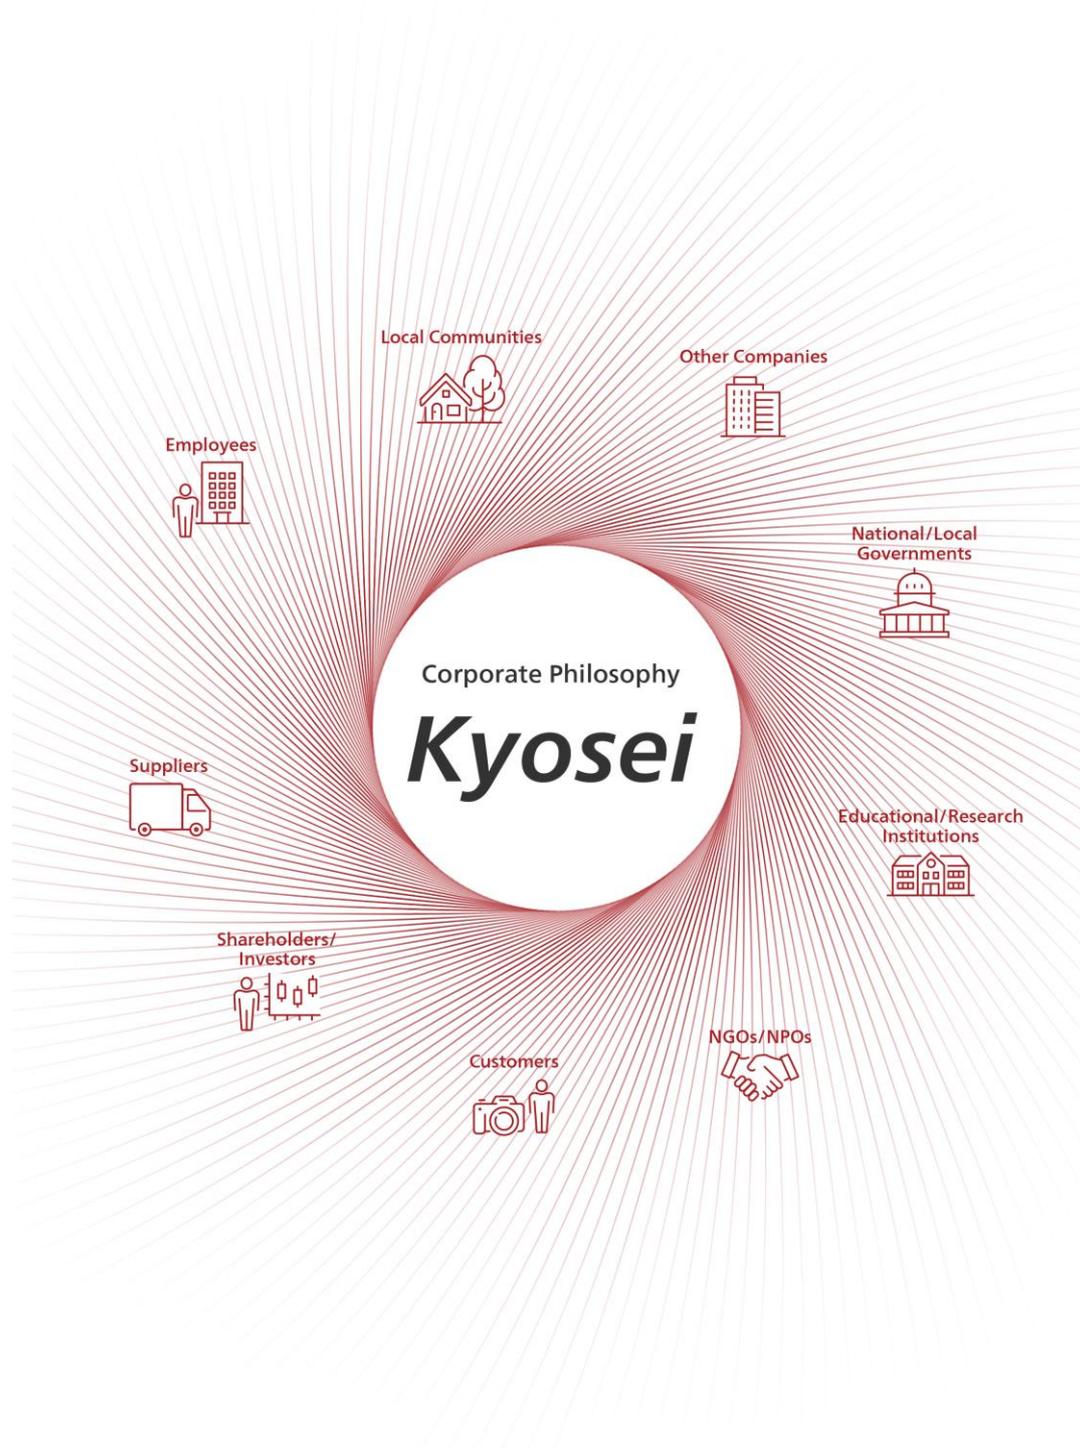

II. Business Overview

1. Management Policy, Management Environment and Issues to be Addressed

Canon Group's management policies, management environment, issues to be addressed, etc. are as follows.
Following description contains forward-looking statements which the Company judged as of Dec 31, 2025.

(1) Corporate Philosophy

Canon Group has established *kyosei* with stakeholders around the world as its corporate philosophy. *Kyosei* conveys our dedication to seeing all people, regardless of culture, customs, language or race, harmoniously living and working together in happiness into the future. Based on this philosophy of *kyosei*, Canon Group is promoting its corporate activities with the aim of corporate growth and development for the prosperity of the world and the happiness of mankind.

(2) Medium- to long-term management program: Excellent Global Corporation Plan Phase VII

Guided by the corporate philosophy of “*kyosei*,” Canon launched its five-year management plan, “Excellent Global Corporation Plan,” in 1996 with the goal of becoming a truly excellent company that is admired and respected around the world.

In the five-year plan, “Excellent Global Corporation Plan – Phase VI” (“Phase VI”), which ran through 2025, Canon Group set forth the basic policy of “promoting portfolio transformation through improved productivity and new business creation” and carried out initiatives to strengthen Canon’s four industry-oriented business groups: Printing, Medical, Imaging, and Industrial. Supported by steady gains in market share across these businesses, Canon Group achieved its Phase VI net sales target of ¥4,500 billion one year ahead of schedule. However, Canon Group’s earnings structure continues to rely heavily on the Printing business and the Imaging business centered on cameras — segments that largely operate in mature market environments. Therefore, Canon Group recognizes the need to further accelerate its portfolio transformation. In addition, external factors such as rising labor costs, inflation, and tariffs adversely impacted profitability, and as a result, the Phase VI operating profit ratio fell short of the 12% target. Therefore, strengthening businesses in growth areas and improving profitability through structural reforms remain key management priorities for the Canon Group.

In light of these challenges, Canon’s new five-year plan beginning in 2026, the “Excellent Global Corporation Plan – Phase VII” (“Phase VII”), adopts the basic policy of “Achieve new growth through innovations in productivity”, and under this policy, Canon will steadily progress the three structural reforms launched in 2024 — sales reform, production reform, and medical business innovation. At the same time, Canon will enhance its focus on strengthening the Medical and Industrial businesses, which offer high market growth potential, while further shifting the emphasis of each industry-based business group toward growth domains. Furthermore, it will advance initiatives for full-scale entry into the space-related business as well as create new business solutions leveraging AI platforms. Through these efforts, Canon aims to realize a new stage of growth and further enhance corporate value.

Three Structural Reforms (Sales, Production, and the Medical Business)

The sales structure reform, which began in the United States in 2024, has already produced tangible results through the optimization of organizational structures. Under Phase VII, Canon will further advance the review of organizational structure of both direct and indirect sales channels in Europe which started in 2025, with the aim of completing these reforms by 2028. At the same time, to expand its business in regions with strong economic growth prospects, Canon will work to increase its market share in emerging markets such as Africa, the Middle East, India, Indonesia, and Latin America.

For production structural reform, Canon will concentrate its in-house manufacturing on high-value-added products, while consolidating underutilized overseas sites and increasing the use of external manufacturing partners. Through these initiatives, it will aim to reduce assets and lower costs. Furthermore, by leveraging robotics in production and promoting automation of in-factory logistics, Canon will build a more competitive and resilient production structure.

Under the leadership of the Medical Business Innovation Committee established in 2024, the Company have advanced reforms across all processes - including development, production, procurement, and logistics - leveraging the expertise accumulated within the Canon Group. As a result, these reforms delivered strong results in improving profitability of the medical business in 2025. In 2026, Canon Medical Systems Corporation, a consolidated subsidiary, will be integrated into the Company. This integration will realize further cost reductions by accelerating reductions in external spending, streamlining unprofitable businesses and subsidiaries, and improving operational efficiency.

The principal strategies for each business group under Phase VII are as follows.

Printing Group

When looking at the printing market as a whole, although the shift toward paperless workflows is expected to continue due to recent changes in societal conditions, certain vertical markets as well as the commercial and industrial printing segments are projected to maintain steady demand for print. These areas remain promising markets.

Within the Printing Group, the Group will leverage the advantage of possessing both electrophotographic and inkjet technologies to strengthen its product platforms, thereby increasing market share and expanding its earnings base. In addition, by enhancing its smart service systems - built upon equipment operating data and the knowledge accumulated within Canon - through the use of AI, the Group aims to provide printing environments that are safe, secure, simple, and comfortable, while also creating new service offerings.

In the commercial printing field, such as catalog printing where growth is expected due to the continued shift from analog to digital, as well as in the industrial printing domain including label and package printing, the Group will pursue a Group-wide expansion of its product lineup and cultivate new markets that will serve as future revenue sources. Moreover, Canon Production Printing began a business alliance in 2024 with Heidelberg, a leading company in offset printing systems. Through OEM supply to Heidelberg, which has a strong customer base in analog printing, the Group will work to expand sales channels in markets where significant printing demand is anticipated.

Medical Group

With the ongoing aging of populations worldwide, medical needs are expected to continue expanding. At the same time, the need to control healthcare expenditures is increasing, prompting medical institutions to pursue cost reductions and greater operational efficiency.

Within the Medical Group, the Group aims to respond to these societal changes by delivering equipment and services that provide high clinical value and strong economic value. Focusing primarily on diagnostic imaging systems, the Group will enhance its product competitiveness through the introduction of next-generation technologies such as multi-position CT and photon-counting CT, thereby achieving major improvements in performance and creating new clinical value. In addition, the Group will expand its offerings of AI-driven diagnostic support solutions and workflow-optimization services. In the field of in-vitro diagnostics, the Group will strengthen its business by leveraging synergies derived from the integrated development of automated analyzers and diagnostics reagents. Looking ahead to future business opportunities, the Group will also pursue research and development of technologies related to regenerative medicine, including manufacturing systems for iPSCs. Through these initiatives, the Group will strengthen the technological foundation that supports the advancement and efficiency of healthcare, create new clinical value, and contribute to the realization of precision medicine, which integrates diverse diagnostic and treatment data to deliver medical solutions optimized for each individual patient.

Furthermore, by establishing “Canon Healthcare USA” to reinforce marketing activities in the United States, and by opening “Canon Medical Academy”, training centers located in Japan, the United States, and Europe, the Group will strengthen its global sales capabilities.

Imaging Group

In recent years, the camera and lens market has seen the widespread adoption of shooting styles that enable both still image and video capture with a single device. In the professional segment, demand for improved shooting efficiency and the downsizing of equipment continues to grow, while in the consumer segment, a shift from smartphones to dedicated cameras, as well as progression from entry-level to high-end models, is underway. In response to the diversification of shooting needs driven by these trends, the Imaging Group will further enhance its comprehensive lineup of cameras and interchangeable lenses. At the same time, the Group will continue to improve product performance by leveraging its advanced optical and image processing technologies, together with the active utilization of AI technologies, with the aim of maximizing the value provided to customers.

The network camera market continues to expand, supported by increasing demand for security. In the network camera business, the Group includes companies with advanced technological capabilities, such as Axis Communications AB, one of the world’s leading manufacturers of network cameras, and Milestone Systems A/S, which develops video management software. By further strengthening the product and solution portfolios of these group companies, the Group will address increasingly sophisticated needs for safety and security. In addition, the Group will seek to expand its

business domains by responding to needs beyond conventional security applications, including image-based digital transformation and improvements in operational efficiency.

Industrial Group

Despite the continued deterioration of the global trade environment due to increasing geopolitical risks and persistent inflation, the semiconductor market, while experiencing cyclical fluctuations, is being driven by growing demand related to AI, and large-scale investment plans are underway in various countries. With regard to the display market, it is moving toward recovery from a phase of supply-demand adjustment, and investments in OLED displays are expected to increase, particularly in automotive, IT, and large-sized television applications.

In the semiconductor manufacturing equipment business, the Group will seek to expand its business by enhancing the precision and productivity of i-line and KrF lithography systems to strengthen its market share, while also entering the ArF lithography systems. In nanoimprint lithography, the Group will build an ecosystem through collaboration with strategic customers and partners, and aims to develop this business into a core pillar by advancing both patterning equipment and wafer planarization equipment that has been commercialized through the application of the same technology. In film deposition equipment, the Group will place the product rollout of its new Adastra platform on a solid footing, enhancing market competitiveness and operational efficiency while responding to expanding demand.

In response to the rapidly expanding package substrate market, the Group will reinforce its dominant market position in i-line lithography systems and steadily capture customer needs through the introduction of new products in substrate processing equipment.

In display manufacturing equipment, the Group will provide new products that address customer needs for higher functionality, higher image quality, and larger panel sizes, while also enhancing profitability through its upgrade business.

In addition to organic growth investments, the Group will seek to expand its business domains beyond existing manufacturing equipment by utilizing M&A, while taking into account market growth and advancements in new process technologies.

Focus areas for future initiatives

Canon leverages AI in product design across its business domains and has launched numerous products whose functionality and performance are enhanced through AI. Looking ahead, Canon aims to build a platform that accelerates value creation through AI by digitizing and centrally managing dispersed data and on-site know-how as intellectual assets, thereby enabling the delivery of new solutions. Canon's products—including printing equipment, medical devices, network cameras, and industrial equipment—are deployed in large numbers at customers' operational sites, generating vast amounts of data across each domain. By analyzing this data using AI, Canon will provide solutions that help address customers' challenges. While capitalizing on its strengths in hardware, Canon will enhance profitability by expanding revenues from software and services.

In addition to these initiatives, Canon is focusing on the space business as a new mid- to long-term growth area. The global space business market is expected to experience significant growth, and in Japan as well, this sector is being actively promoted as a national industrial policy. Within the Canon Group, Canon Electronics has already entered this field, and going forward, Canon will strengthen its space business initiatives on a Group-wide basis.

Specifically, by integrating the satellite-related expertise accumulated by Canon Electronics with Canon's own technologies in optics, sensing, equipment control, and image processing, as well as its manufacturing know-how in precision processing, Canon aims to accelerate growth by developing a business that achieves both high quality and strong cost competitiveness. By expanding its scope to include satellites and their components, as well as solution businesses that utilize captured data, Canon seeks to further scale this business.

(3) Consolidated Performance Targets under the Medium-Term Management Plan

In Phase VII, Canon aims to achieve revenue growth through market share expansion and the expansion of businesses in new growth areas, while improving profitability through a thorough enhancement of productivity, supported by efficient capital allocation. To this end, Canon has set three key performance targets: net sales, operating profit ratio, and return on equity (ROE).

	2025 Actual	2028 Target	2030 Target	Selected reason
Net Sales (billion yen)	4,624.7	5,000	5,600	To measure growth potential
Operating profit ratio	9.8%	12%	15%	To measure profitability
Return on Equity (ROE)	9.7%	12%	15%	To measure capital efficiency

2. Approach to Sustainability and Related Initiatives

Canon Group's views and initiatives on sustainability are as follows.

The forward-looking statements herein are based on the judgment of Canon Group as of December 31, 2025.

< Canon's Sustainability >

Since 1988, Canon Group has been striving to uphold its corporate philosophy of kyosei (living and working together for the common good) in order to contribute to worldwide prosperity and happiness. "A society in which all people live and work together, respecting one another and coexisting happily, regardless of culture, customs, language, ethnicity, or region. And a society in harmony with nature, able to preserve Earth's abundant resources for future generations." To realize such a society, Canon Group will create new value through the power of innovation and technology, providing world-first technologies and world-leading products and services while also contributing to solutions for the problems its society faces. By providing greater value while using fewer resources throughout all product lifecycles, Canon Group aims to enable affluent lifestyles while protecting the environment. Through Canon's corporate activities, Canon Group proactively works toward realizing a sustainable society.

(1) Common Sustainability Matters

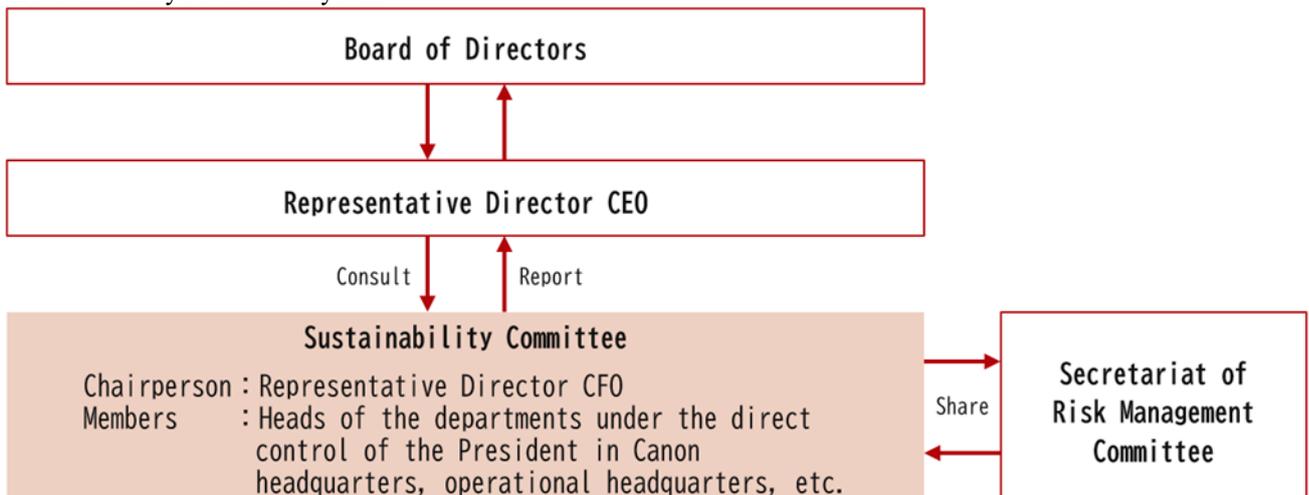

(i) Governance

In January 2026, the Canon Group started Phase VII of its medium- to long-term management program, "Excellent Global Corporation Plan." Under the slogan of "Decisive productivity reforms to drive renewed growth", we have set forth seven strategies, one of which is "Deepen sustainability management." By actively engaging in initiatives for climate change, efficient resource utilization, and respect for human rights, we aim to achieve sustainable growth through reduced environmental impact and maximized resource efficiency.

Canon has established the Sustainability Committee to serve as an advisory body to the CEO, with the aim of organizing sustainability related information and conducting prior deliberation of various topics to support the CEO and Board of Directors in making appropriate and effective decisions related to the sustainability measures and initiatives undertaken in the Canon Group. Committee members are appointed by the CEO from among the heads of the departments under the direct control of the President in Canon headquarters, operational headquarters, etc., and the CFO serves as the chairperson. The committee ordinarily meets once every fiscal half-year, but extraordinary meetings can also be convened if the Chair deems it necessary. In 2025, the committee met three times to discuss non-financial disclosure in the Annual Securities Report; material issues and related metrics and targets; and reporting on sustainability activities. In addition, the committee held sustainability study sessions with invited external experts in order to facilitate deliberations based on changes in the sustainability landscape and the latest domestic and international trends. All matters deliberated by the committee were reported to the CEO.

Canon Inc. established the Sustainability Headquarters to promote sustainability across the Group, headed by the director with responsibility for sustainability. Besides promoting sustainability activities across Canon Group, for specialized issues, departments such as Legal Affairs, Human Resources, Quality Assurance and Procurement undertake initiatives leveraging their expertise.

■ Sustainability Promotion System

■ Sustainability Committee Meetings in 2025

Meeting Month	Key Matters Discussed
February	Deliberation of non-financial disclosure information for the Annual Securities Report for 2024 Deliberation on the identification of material issues
July	Proposal of metrics and targets associated with material issues Sustainability study session
November	Deliberation on metrics and targets associated with material issues Report on sustainability-related activities Sustainability study session

(ii) Strategy

Based on its corporate philosophy of kyosei, Canon Group has worked to grasp evolving social trends and maintain sound governance while developing its businesses by effectively leveraging a corporate DNA that consists of respect for humanity, emphasis on technology and an enterprising spirit, as well as resources including a robust financial base, a wealth of human capital, sophisticated technologies, and other resources.

In 2025, in line with changes to the business environment and in issues facing society, we identified eight material issues on sustainability to help realize kyosei, selecting from various business activities consistent with Canon's medium- to long-term business plans.

■ Material Issues

～Corporate activities to realize kyosei～

- Climate change
- Chemical substance management
- Biodiversity and ecosystems
- Circular economy
- Own workforce
- Supplying trusted products to contribute to society
- Supply chain management
- Business conduct

■ Identification Process

STEP1 Acknowledging issues	STEP2 Evaluating issues	STEP3 Evaluating appropriateness	STEP4 Selecting material issues
The major issues for Canon were identified after considering societal trends, laws, regulations and guidelines relating to sustainability, and with reference to the views of outside experts.	Issues identified were evaluated based on their likelihood and degree of importance, both now and in the future, taking account of the societal and environmental impact of our business activities as well as the financial impact on Canon of environmental and societal factors (risks/opportunities).	From the issues evaluated, candidates for material issues were chosen by taking into consideration the views of stakeholders inside and outside the Group, such as institutional investors, NGOs, non-profits, experts, and our employees, on what will help to realize our corporate philosophy of kyosei.	The material issues identified in the previous step were discussed in the Sustainability Committee and finally selected by the CEO approval.

Canon Group faces a wide range of sustainability issues such as climate change, human capital, human rights, and cyber security. For more information about these issues, please refer to (2) Climate change, (3) Human capital, (4) Human rights, and (5) Cyber security below. For details, including other items, please refer to the Canon Sustainability Report posted on Canon Inc. website.

(iii) Risk Management

Canon Inc. identified sustainability-related material issues through its Sustainability Committee and discloses the risks and opportunities associated with climate change. Going forward, Canon Inc. will also disclose risks and opportunities related to other material issues. Individual risk assessments are conducted by the Sustainability Headquarters and relevant departments.

In addition, Canon Inc. established the Risk Management Committee. The Risk Management Committee plans various measures for the development of the Canon Group’s risk management system and evaluates the state of implementation and maintenance of the risk management systems of Canon’s divisions and group companies with respect to significant risks that Canon Group may face in the course of business, including some of sustainability-related risks. The results of these activities are reported to the CEO and the Board of Directors.

For details of the Risk Management System, please refer to 3. Risk Factors.

(iv) Metrics and Targets

For each of the eight identified material issues, we have established metrics and targets. The status of initiatives and performance against each metric and target are reported to and reviewed by the Sustainability Committee.

< Materiality Metrics and Targets >

■ Climate change

Initiative	Metric	Target	Scope	Deadline	2025 Results
Reduce Scope 1 & 2 GHG emissions	SBT: aggregate Scope 1 & 2 emissions	42% reduction compared to 2022 level	Canon Group	2030	6.3% reduction
Reduce Scope 3 GHG emissions	SBT: aggregate Scope 3 emissions	25% reduction compared to 2022 level	Canon Group	2030	19.4% reduction
Reduce Life Cycle CO2 Emissions	Life Cycle CO2 Emissions Index (average annual improvement per product unit)	Average annual improvement of 3%/ Cumulative 50% improvement over 2008	Canon Group	Annually /2030	Average annual improvement of 3.59% (2008–2025), 45.5% improvement (compared to 2008)

■ Chemical substance management

Initiative	Metric	Target	Scope	Deadline	2025 Results
Ensure environmental regulatory compliance by Group sites	Regulatory value for wastewater effluent applicable to each site	Keep wastewater effluent at 80% of regulatory value	Canon Group*1	Annually	Implemented
Assess, manage, and reduce use of controlled chemical substances in products, and related emissions	Cease the procurement of any items containing prohibited chemical substances	In principle, deliveries by suppliers of items containing prohibited chemical substances to cease 12 months prior to any regulatory ban	Canon Group	Annually	Implemented

■ Biodiversity and ecosystems

Initiative	Metric	Target	Scope	Deadline	2025 Results
Reduce use of water resources	Water usage per basic unit	1% improvement in per-unit usage	Canon Group*2	Annually	0.9% improvement

■ Circular economy

Initiative	Metric	Target	Scope	Deadline	2025 Results
Promote resource efficiency in every direction (Produce, Use, Recycle)	Resource recycling rate for Printing products*3	50%	Canon Group	2030	16.7%
	Reduction of virgin resource usage by recycling toner cartridges in the new cartridge products	Introduction of recycled materials into toner cartridge products	Canon Group	Annually	Recycled materials introduced
	Waste generation from medical business unit	1% reduction in annual rate	Canon Group	Annually	4.2%
	Proportion of interchangeable-lens digital cameras, interchangeable lenses, and digital compact cameras newly released in the year with packaging materials eliminating single-use plastics *4	100%	Canon Group	2030	90%
	Proportion of i-line and KrF lithography equipment shipped in 2001 or later still active	95%	Canon Group	2030	92.6%

■ Own workforce

Initiative	Metric	Target	Scope	Deadline	2025 Results
Promote diversity	Ratio of female managers	10%	Canon Inc.	2030	4.6%
	Rate of men taking childcare leave	100%	Canon Inc.	2030	86.3%
Promote internal recruitment	Number of people recruited internally	Ensure everyone serves as an operational asset by putting the right people in the right jobs and creating a framework to support self-directed career development by employees	Canon Inc.	Annually	281 persons
Increase engagement	Engagement scores	Target continuous improvement in scores via measures to invigorate the workplace culture, such as training managers using feedback from employee surveys and providing support for young employees	Canon Inc.	Biannually	53%
Create safe and secure working environments	Cancer screening attendance rate (40 years and above)	70%	Canon Inc. and domestic Group companies	Annually	52%*5
	Number of machinery-related accidents	0	Canon Inc. and domestic Group companies	Annually	4 cases
	Number of accidents caused by highly hazardous chemical substances	0	Canon Inc. and domestic Group companies	Annually	2 cases
Respecting human rights	Implementation rate of human rights due diligence	100%	Canon Group*6	Annually	100%
	Implementation rate of human rights-related education and awareness activities	100%	Canon Group*7	2027*8	80%

■ Supplying trusted products to contribute to society

Initiative	Metric	Target	Scope	Deadline	2025 Results
Ensure rigorous operation of Proprietary Quality Management System	Achievement level of Quality Standard in product realization process for Canon-branded products	100% at product launch	Canon Group	Annually	100%
Ensure appropriate and thorough response to product security issues	Implement responses to vulnerabilities identified in Canon-branded products	100%	Canon Group	Annually	100%
Raising quality awareness	Implement basic quality training	100% of newly hired employees and newly appointed divisional managers	Canon Inc.	Annually	Newly hired employees: 100% Newly appointed divisional managers: 100%
	Holding quality-related events	Holding continually, Quality Month events and the Quality Awards	Canon Group*9	Annually	Implemented

■ Supply chain management

Initiative	Metric	Target	Scope	Deadline	2025 Results
Request suppliers to adhere Canon sustainability policies	Completion rate of requests to major suppliers to comply with Canon Sustainability Supplier Guidelines	100%	Canon Group*10	Annually	100%
Undertake risk assessments on suppliers	Proportion of major suppliers completing SAQs (Self-Assessment Questionnaires)	At least 95%	Canon Group*10	Annually	99.5%

■ Business conduct

Initiative	Metric	Target	Scope	Deadline	2025 Results
Promoting Corporate Ethics	Number of serious compliance violations	0	Canon Group	Annually	0 results found
	Adoption of Canon Group Code of Conduct by Board of Directors or equivalent entity across all Canon Group companies	Every company in principle	Canon Group *11	Annually	adopted
Institute internal whistleblowing system	Establishment of whistleblower hotline at all Canon Group companies	Every company in principle	Canon Group *11	Annually	established

*1 Sites covered by ISO 14001 certification

*2 Production/development sites within ISO 14001 certification

*3 Excluding OEM products

*4 This refers to petroleum-derived plastics, and excludes the raw materials used for labels, coatings, and adhesives

*5 Reporting period: FY2024 (April 2024–March 2025); FY2025 results due to be disclosed in the next report

*6 Group companies selected by the Human Rights Office to undergo human rights due diligence

*7 Group companies selected by the Human Rights Office to undergo human rights education and awareness activities

*8 Three-year period from 2025 to 2027

*9 Major development/production subsidiaries, and sales headquarters (domestic/overseas)

*10 Major production companies (domestic/overseas)

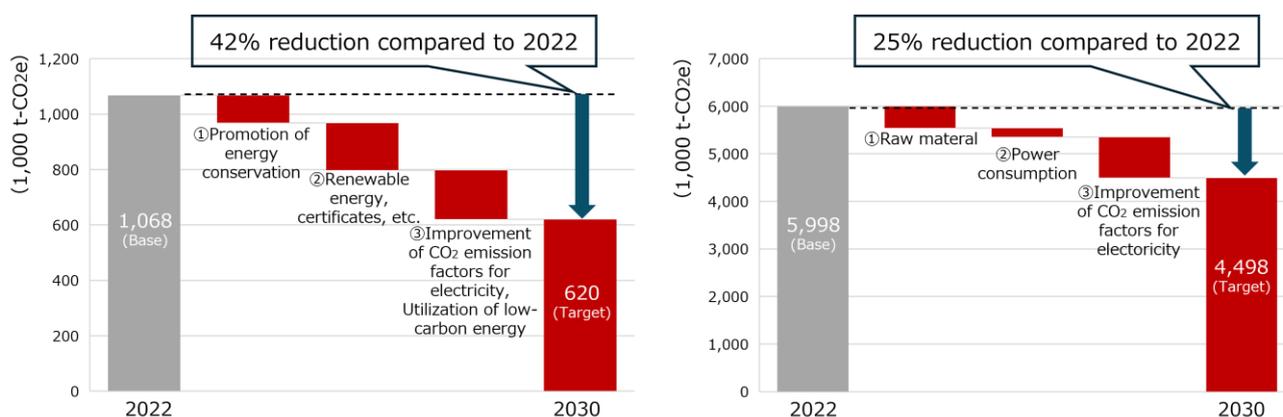

*11 Companies subject to assessment under financial reporting internal controls

(2) Climate change

Canon Group is working to reduce greenhouse gas emissions by assessing the impact of climate changes on the entire product lifecycle, from the manufacturing of materials and parts at suppliers, transportation to retailers, use by customers, and disposal and recycling.

The company aims to reduce its GHG gas emissions to net zero by 2050, and to reduce its Scope 1 and 2 emissions by 42% compared to 2022 and Scope 3 (category 1 and 11) emissions by 25% compared to 2022 by 2030. The target was verified by SBTi, an international initiative that recommends setting scientifically based CO₂ emissions reduction targets. To this end, Canon is promoting various initiatives, including the development of products using recycled materials, product downsizing and weight reduction, energy saving activities at production sites, energy saving during product use, product recycling, and efficient logistics.

Illustration of GHG Emission Reduction

Scope 1 + 2

Scope 1: Direct emissions (city gas, LPG, diesel oil, kerosene, non-energy greenhouse gases, etc.)

Scope 2: Indirect emissions (electricity, steam, etc.)

Scope 3: Emissions in the supply chain (Category 1: purchased goods and services, 11: use of products sold)

Scope 3 (Category 1, 11)

(i) Governance

Details on governance is described in the section “(1) Common Sustainability Matters (i) Governance”. The impact of climate changes on Canon Group, response plans and targets were discussed at the Climate Change Working Group (WG) under the Sustainability Committee. The Climate Change WG is comprised of senior managers from each business and corporate division. The content of discussions is reported to the Sustainability Committee, and after approval, it is reported to the CEO.

(ii) Strategy

Canon Group conducts scenario analysis based on the TCFD* framework recommended for non-financial disclosure, and recognizes the importance of a dual approach that includes “mitigation” to reduce GHG emissions across the value chain as well as “adaptation” to physical risks. Canon group is committed to achieving its GHG emission reduction targets and building a resilient and sustainable business model that can withstand climate-related impacts. Canon uses “Theme-based Sustainability Disclosure Standard No. 2 “Climate-related Disclosures” (Climate Standard)” issued by SSBJ** as a reference for this section on climate change.

* Task force on Climate-related Financial Disclosures

Published disclosure recommendations related to corporate climate risks and opportunities

** Sustainability Standards Board of Japan

Developed sustainability disclosure standards for Japan that are consistent with IFRS (International Financial Reporting Standards) S2 Climate-related Disclosures developed by IFRS which is the International Sustainability Standards Board and develops international sustainability disclosure standards.

■ Scenarios referenced for analysis

In the scenario analysis, the Group selected the “Current Scenario”, in which economic activities are conducted in line with current policies, and the “1.5 °C Scenario,” in which the world will control GHG emissions and policies and technological development related to climate change will progress faster than the current speed toward achieving net zero by 2050, on the premise that the targets of the Paris Agreement will be achieved. The scenarios referred to are as follows.

Current Scenario: (Transition risk) IEA APS, NGFS Current Policies (Physical risk) IPCC RCP8.5

1.5 °C Scenario: (Transition risk) IEA NZE, NGFS Net Zero 2050 (Physical risk) IPCC RCP2.6

Factors such as climate-related policies, laws and regulations, technological developments, changes in customer behavior, and market conditions in the major regions where Canon Group operates are also taken into account.

■ Definition of time frame and degree of impact

The time frame is examined in a manner consistent with Canon Group's medium - to long-term management plan.

Short term: to 2025 Medium term: to 2030 Long term: after 2030

The degree of impact is examined in three stages of extremely important, important and minor, and is set as the following standard.

Extremely important: May cause fluctuations in net sales by $\pm 10\%$ or more

Important: May cause fluctuations in net sales by $\pm 5\%$ to 10%

Minor: Impact of less than $\pm 5\%$ on net sales

* The impact criteria for each business unit are judged based on the net sales of the business unit.

■ Business environment assumptions under the Current / 1.5 °C Scenario

As climate-related risks and opportunities differ among the business units (Printing, Medical, Imaging and Industrial), Canon Group reviewed the major climate-related risks and opportunities, their countermeasures and financial impact for Canon Group and each business unit.

Under the Current Scenario, the business environment is expected to include the continuation of existing climate-related regulations, the introduction of carbon pricing, the spread of recycled materials and bioplastics, the introduction of a modal shift, the expansion of customer demand for decarbonization and purchasing behavior conscious of climate change response, and the introduction of industrial policies for decarbonization in each country. Meanwhile, we are currently considering the possibility that this trend may slow down in some countries. Under the 1.5 °C Scenario, the aforementioned environment will become even more severe and developed, and the movement toward carbon neutrality throughout the supply chain will accelerate.

■ Risk and opportunity factors affecting Canon group and estimated financial impact

Overview of Transition Risks and Opportunities (Risks and Opportunities related to the “Transition” to a low-carbon economy)

[Transition risks]		[Opportunities]	
<p>Policies and laws and regulations</p> <ul style="list-style-type: none"> • Increased cost for carbon pricing • Sales decrease when failing to meet regulations • Increase in capital investment to comply with regulations 	<p>Technology</p> <ul style="list-style-type: none"> • Increased R&D expenses to respond to climate change 	<p>Resource efficiency</p> <ul style="list-style-type: none"> • Cost reduction due to energy efficiency improvement • Lower distribution costs due to joint distribution and modal shift 	<p>Energy source</p> <ul style="list-style-type: none"> • Lower carbon pricing impact due to the use of low-carbon energy
<p>Market</p> <ul style="list-style-type: none"> • Increased costs due to the adoption of recycled materials • Sales decrease when other companies' products become dominant • Sales decrease when the price pass-through of costs for responding to climate change is not accepted 	<p>Reputation</p> <ul style="list-style-type: none"> • Sales decrease due to growing concerns of stakeholders when climate change measures are not sufficient 	<p>Market</p> <ul style="list-style-type: none"> • Sales increased due to the improvement of evaluation by stakeholders • Diversify fund procurement 	<p>Products / Services</p> <ul style="list-style-type: none"> • Sales of GX related products and recycling-oriented products increased • Increase sales of low-carbon products • Increase sales of adaptive products

Details of Transition Risks and Opportunities - Canon Group-wide

The scenario analysis revealed that carbon pricing is a risk factor that could affect the entire Canon Group. Based on the emissions forecasts for Scope 1, 2 and 3 of Canon Group, the impact of the introduction of carbon pricing in 2030 and beyond is estimated at approximately 8 to 45 billion yen in 2030 and approximately 4 to 41 billion yen in 2050, using the Current Scenario and the 1.5 °C Scenario. As a risk management measure, Canon is working to decarbonize through the development of green technology. For example, at each of Canon’s sites, Canon has been working to reduce electricity consumption during production in three steps: visualizing electricity consumption, analyzing potential reduction, and implementing reduction measures. These efforts include breaking down electricity consumption into the operational units of production equipment, such as move and processing, to identify hidden inefficiency and highlight targets for improvement. The estimated reduction in electricity costs is estimated at approximately 4.0 to 6.0 billion yen in 2030 and approximately 9.0 to 13.0 billion yen in 2050, and it was confirmed that it will also have a positive impact. Canon is also addressing climate change in logistics in consideration of the characteristics of each business, and Canon sees the results of these efforts as an opportunity.

Furthermore, the Company is working on reducing CO2 emissions (Scope 3 Category 1) in raw material procurement on Canon Group-wide basis, and is considering low-carbon materials in procurement and preparing for future procurement. Canon is introducing life-cycle assessment (LCA) methods in product development, such as incorporating actual data on the CO2 emissions of raw materials and parts collected from its business partners into LCA, and is aiming to reduce the environmental impact throughout the product life cycle.

If sufficient measures to address climate change are not be implemented, the Company recognizes the risk of a deterioration in reputation due to an increase in concerns of stakeholders who place importance on responding to climate change and a decrease in sales due to a loss of sales opportunities. As a countermeasure, the Company will continue to promote effective climate change initiatives and make timely and appropriate disclosures of such activities to stakeholders. Furthermore, the Company recognizes that appropriate disclosure of its response to climate change will improve the understanding and evaluation of stakeholders, including investors and customers, and that it will also provide opportunities to diversify its financing by meeting the investment and financing requirements of financial institutions.

Details of Transition Risks and Opportunities - the business units

Analysis by the business units revealed that the Printing business is expected to be affected by climate-related regulations in the electrical and electronics industries, changes in consumer preferences, competition with competitors, etc. However, risk reduction measures such as understanding regulatory trends, R&D and capital investment to respond to regulations, and acquisition of procurement requirements have already been incorporated into the plan, and as a result of trial calculations, it was confirmed that there will be no significant impact under either the Current Scenario or the 1.5 °C Scenario. Canon expects the positive impact of increased sales opportunities due to increased demand for low-carbon products and cost reductions due to energy efficiency improvements to be an opportunity.

In the Medical Business, there are cases where bidding requirements include power saving due to the increasing interest in sustainability mainly among customers in Europe. In the Imaging and Industrial businesses, although regulations and customer demands are relatively low at present, demands may increase in the future. Therefore, Canon has made trial calculations assuming the possibility that new R&D and capital investment will be required. The results showed that, although there was a risk of increased costs, the impact was relatively small as the Group has started to investigate trends in laws and regulations and take initiatives to improve energy efficiency in the regions where it operates. Canon believes that there are more opportunities in terms of reducing costs through energy efficiency improvements, and increasing sales opportunities for products that contribute to adaptation to climate change using existing technologies and products that match the industrial promotion measures of each country such as the GX related policies.

[Transition risks (Canon Group-wide and the business units)]

Transition risk classification	Risk factors	Canon Group-wide / Business unit	Financial impact	Event occurs period	Impact degree	Measures
Policy laws and regulations	Carbon pricing	Canon Group-wide	Increase in response costs	Mid-term to Long-term	Minor	• Company-wide initiatives to reduce GHG emissions
	Reinforcement of climate-related regulations for existing products	Printing	Decrease in sales when the Company fails to respond	Short-term to Long-term	Minor	• Continue R&D and capital investment in response to various regulations (obtaining environmental label certifications, development of recycled machines, etc.)
		Printing	Increase in R&D expenses for responding to regulations and capital investment	Short-term to Long-term	Minor	• Examination of R&D plans, capital investment plans and cost plans in response to regulatory trends
		Medical	Increase in costs due to responding to regulations	Long-term	Minor	• Continue efforts to improve energy saving performance
		Industrial	Decrease in sales when the Company fails to respond	Long-term	Minor	• Develop products and production technologies in response to regulatory measures (such as PFCs)
Technology	Increasing of customer's needs for climate change response	Medical	Decrease in sales when the Company fails to respond	Long-term	Minor	• Develop products that meet the energy saving related bidding requirements
		Industrial	Sales decrease due to restrictions and curtailment of transactions in the event that the Company fails to respond to the above	Long-term	Minor	• Develop low-carbon products and production technologies to meet changing customer needs
Market	Spread of recycled materials	Printing	Increase in raw material costs due to the use of recycled materials	Short-term to Long-term	Minor	• Consider and evaluate the use of various recycled materials • Price negotiations through the selections of material manufacturers, price guarantees through long-term contracts, and consideration of expanding new adoption • Collect information on alternative materials • Consider in-house production of substitute materials
	Comparison with competitors	Printing	Decrease in sales when products show higher lifecycle CO2 emissions than that of competitor's products	Short-term to Long-term	Minor	• Continue R&D utilizing product life-cycle assessment • Try to reduce GHG emissions throughout the product lifecycle
	Changes in customer preferences	Imaging	Decrease in sales when customers do not accept price pass-through for the cost of addressing climate change	Long-term	Minor	• Continue price acceptance surveys in response to climate change in each country and region

[Opportunities (Canon Group-wide and the business units)]

Opportunities classification	Opportunity factor	Canon Group-wide / Business unit	Financial impact	Event occurs period	Impact degree	Measures
Resources efficiency	Improvement of energy efficiency	Canon Group-wide	Cost reduction due to reduction of power costs	Short-term to Long-term	Minor	<ul style="list-style-type: none"> • Company-wide initiatives to improve energy efficiency
	Lower distribution costs	Canon Group-wide	Lower distribution and selling, general and administrative expenses through joint distribution and modal shift	Short-term to Long-term	Minor	<ul style="list-style-type: none"> • Joint transportation within the Canon Group and with other companies/round transportation • Expand to use of modal shift
Energy source	Switch to low-carbon energy	Canon Group-wide	Cost reduction due to reduction of carbon pricing impact	Mid-term to Long-term	Minor	<ul style="list-style-type: none"> • Continue to consider various low-carbon measures, including the use of low-carbon energy
Products / Service	Increasing demand for low-carbon products	Printing	Sales increase due to increase in sales opportunities	Short-term to Long-term	Minor	<ul style="list-style-type: none"> • Development of low-carbon products (energy-saving products, longer product life, use of recycled materials, etc.) • Meet to newly developed procurement requirements (Environmental evaluation system “EPEAT” registration, environmental label “Blue Angel”, etc.)
	Increase in sales due to changes in customer preferences	Medical	Sales increase due to increase in sales opportunities	Short-term to Long-term	Minor	<ul style="list-style-type: none"> • Develop products that meet the energy saving related bidding requirements
	Increasing demand for products that help adapt to climate change	Imaging	Sales increase due to increase in sales opportunities	Mid-term to Long-term	Minor	<ul style="list-style-type: none"> • Development of products that help adapt to climate change (disaster prevention network cameras, image based infrastructure inspection services, etc.)
	Increasing demand for semiconductor manufacturing equipment due to increase of governmental promotional measures	Industrial	Sales increase due to increased demand for semiconductors as a result of the GX Project	Short-term to Long-term	Important	<ul style="list-style-type: none"> • Expand semiconductor manufacturing equipment for power semiconductors • Develop a system to increase production, including the construction of new plants
	Increase in sales due to changes in customer preferences	Industrial	Sales increase due to increase in sales opportunities	Short-term to Long-term	Minor	<ul style="list-style-type: none"> • Expand sales of low-power consumption products (nanoimprint lithography and model changes of current products, etc.) • Expand sales of products that can recycle plastics (plastic sorting equipment)

Physical risks (risks associated with climate change)

Canon Group's facilities and offices are located around the world, and natural disasters caused by climate changes could affect its businesses. As for physical risks associated with climate change, Canon has verified the risks of river flooding, storm surge, and storm wind at major bases in Japan and overseas using analysis tools such as the World Resources Institute's Aqeduct, local government hazard maps, and XDI's natural disaster risk analysis service. As a result, Canon has found that four of its production bases and offices in Japan and overseas have medium or high risks of river flooding and storm surge. However, Canon has already implemented necessary measures according to the situation of the bases, such as installing water stop boards, remodeling rainwater pipes, and raising the block height of the outer fence. The assets of these four bases account for approximately 3% of the total assets of Canon Group.

Going forward, the Company will continue to consider various measures to reduce the impact of damage and loss from natural disasters.

■ Results of scenario analysis

In the value chain, especially in R&D, procurement and sales, it was clarified through scenario analysis that there are impacts from R&D due to reinforcement of regulations, fluctuations in raw material prices, and customers' and business partners' views and demand trends for low-carbon products.

If no measures are taken, financial risks such as missed sales opportunities and cost increases may occur in either scenario. Although these are risks that should be considered, Canon has already incorporated measures to reduce risks into its plan, such as understanding regulatory trends, R&D and capital investment to respond to regulations, and acquisition of procurement requirements. Through multiple patterns of financial simulations conducted under each scenario, it was confirmed that there were no measures that would have a significant impact on the financial results, including measures currently being implemented and those that are being planned. Therefore, the impact was judged to be limited, and it was reconfirmed that there was no shortage in the measures that had been implemented and that the direction of the initiatives at products and production sites was correct.

In addition, in a world where the transition to decarbonization is progressing, Canon expects a positive impact from changes in consumer preferences, increased demand for adaptive products, and increased sales of low-carbon products and adaptive products of Canon Group due to the progress of industrial measures for the promotion of the GX, products contributing to the promotion of the GX, and cost reductions associated with energy efficiency improvements.

Through scenario analysis, Canon has confirmed that the impact of climate change on the financial performance, including sales and operating income, the financial position and cash flow of the entire Canon Group and major businesses will be limited in the short, medium and long term, and that there is no need to revise the portfolio and business model.

However, Canon is aware that the introduction of carbon pricing and climate-related regulations could affect Canon Group's financial performance and the entire value chain, due to increased response costs, R&D expenses, and capital expenditures. Canon will continue to monitor the business environment while analyzing the impact on climate-related risks and opportunities.

(iii) Risk Management

Canon's response to climate-related risks and opportunities is reflected in its company-wide environmental targets and priority measures. At Canon Group, environmental initiatives are part of its management evaluation. The status of achievement of environmental targets and the results of environmental activities of each division are evaluated twice a year in the Environmental and CSR performance evaluation, which is implemented as an indicator of the Consolidated Performance Evaluation System for evaluating the performance of the Canon Group's overall management. The results of the evaluation are reported to the CEO and other management.

As a framework for continuous improvement of environmental assurance activities, Canon Group has established a common environmental management system in accordance with ISO14001 at all major business sites around the world, and manages identified climatic risks in accordance with the PDCA cycle of ISO14001.

Specifically, the environmental management system determines (PLAN) medium-term and annual "environmental targets" in order to promote (DO) environmental assurance activities in cooperation with the activities of each department, formulates priority measures and implementation plans for realizing them, and reflects them in business activities. Furthermore, the Company conducts environmental audits to confirm the status of initiatives and issues in each division, and Environmental and CSR performance evaluations that incorporate environmental aspects in Consolidated Performance Evaluation System (CHECK), which lead to the continuous improvement and strengthening of environmental assurance activities (ACT).

(iv) Metrics and Targets

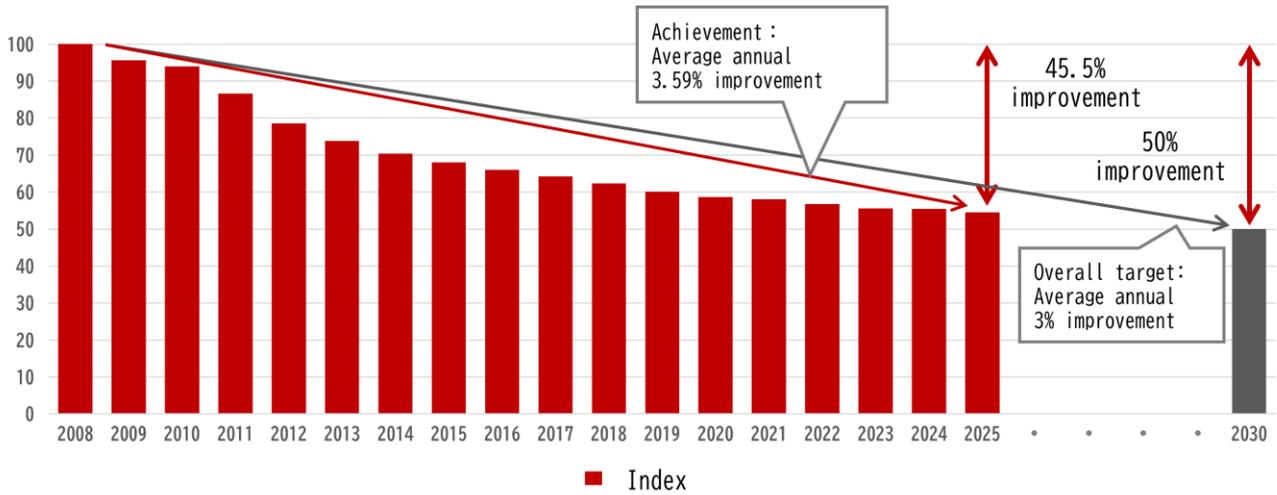

Canon Group aims to reduce its GHG emissions throughout the product lifecycle to net zero by 2050. To achieve this goal, Canon has set gross greenhouse gas emissions targets, covering the Company and its consolidated subsidiaries, to reduce Scope 1 and 2 emissions by 42% in 2030 compared to 2022, and reduce Scope 3 (categories 1 and 11) emissions by 25% in 2030 compared to 2022. In November 2023, these targets have been validated by SBTi (Science Based Targets initiative). To monitor progress towards these targets, Canon Group checks the progress annually using the reduction rate compared to 2022.

Canon Group measures Scope 1, Scope 2, and Scope 3 emissions based on estimation methods. Annual greenhouse gas emissions data is verified by a third party using ISAE3000 (Revised) and ISO14064-3:2019. Greenhouse gas emissions data for 2025 has also been verified by a third party.

Since 2008, Canon has set a target of "an average improvement in life cycle CO₂ emissions per unit of product of 3% per year" (basic unit target), which is calculated by accumulating GHG emissions at each stage of the product lifecycle, as a comprehensive target of the Group's environmental targets. This metrics is established with the aim of measuring the efficiency of all environmental activities, such as energy conservation, resource conservation, and recycling, by using a single index, and from the perspective of balancing business activities and environmental activities. By consistently achieving this target, Canon expects to achieve a 50% improvement in 2030 compared to 2008. Progress towards this target is evaluated twice a year as part of the Consolidated Performance Evaluation System, and the results are reported to the CEO and other management.

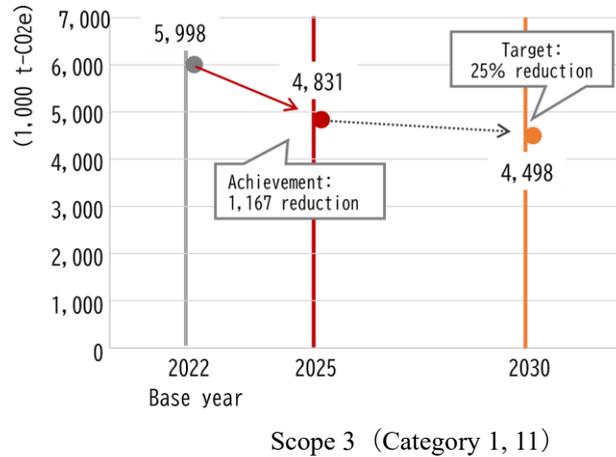

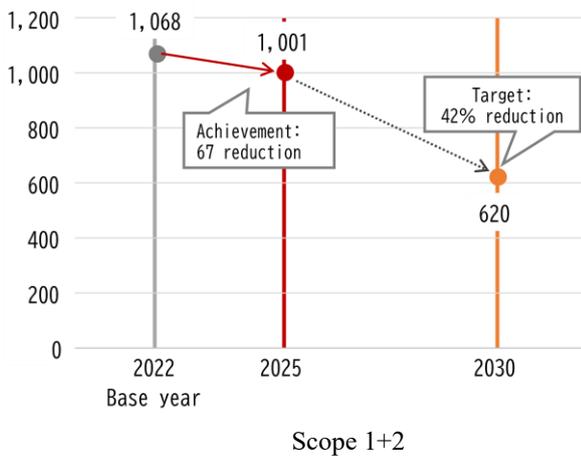

Performance for the fiscal year ended December 31, 2025 was that Scope 1 and 2 emissions were 1.000 million t-CO₂e, Scope 3 (Category 1 and 11) emissions were 4.877 million t-CO₂e. For the lifecycle CO₂ emissions improvement index per product, an annual average improvement was 3.59% and an improvement compared to 2008 was 45.5%.

Improvement in per-unit lifecycle CO2 emissions index

* When 2008(base year) is set at 100

Scope 1, 2, 3 (Category 1, 11) emissions

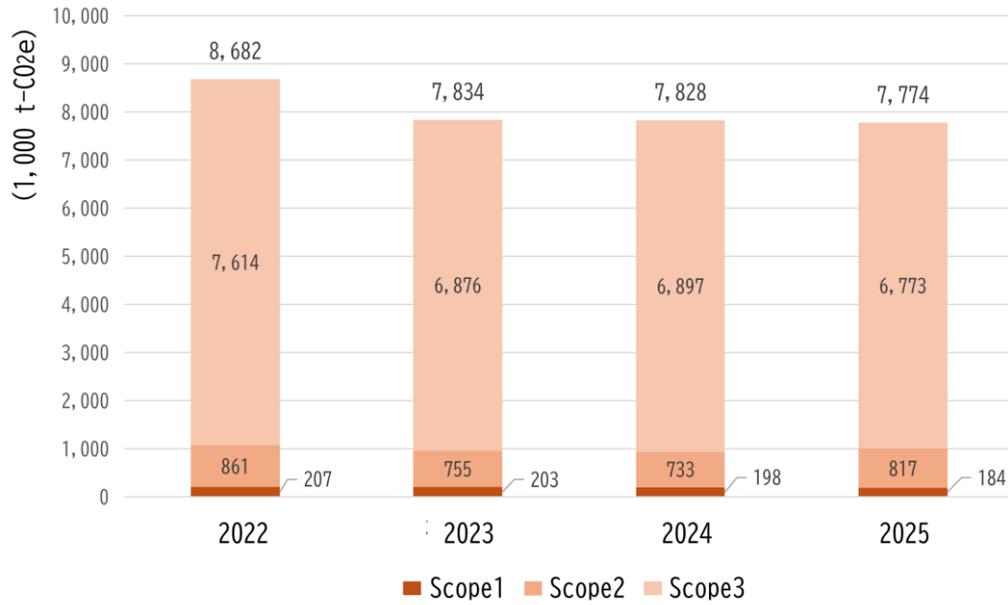

Scope 1: Direct emissions (city gas, LPG, diesel oil, kerosene, non-energy greenhouse gases, etc.)

Scope 2: Indirect emissions (electricity, steam, etc.)

Scope 3: Emissions in the supply chain (Category 1: purchased goods and services, 11: use of products sold)

Lifecycle CO₂e Emissions

Some of the data for 2022, 2023, and 2024 have been recalculated to conform to the 2025 calculation method.

Greenhouse gases : CO₂, PFCs, HFCs, SF₆, N₂O, methane, NF₃

Scope 1 and Scope 2: Compliant with the GHG Protocol (2004)

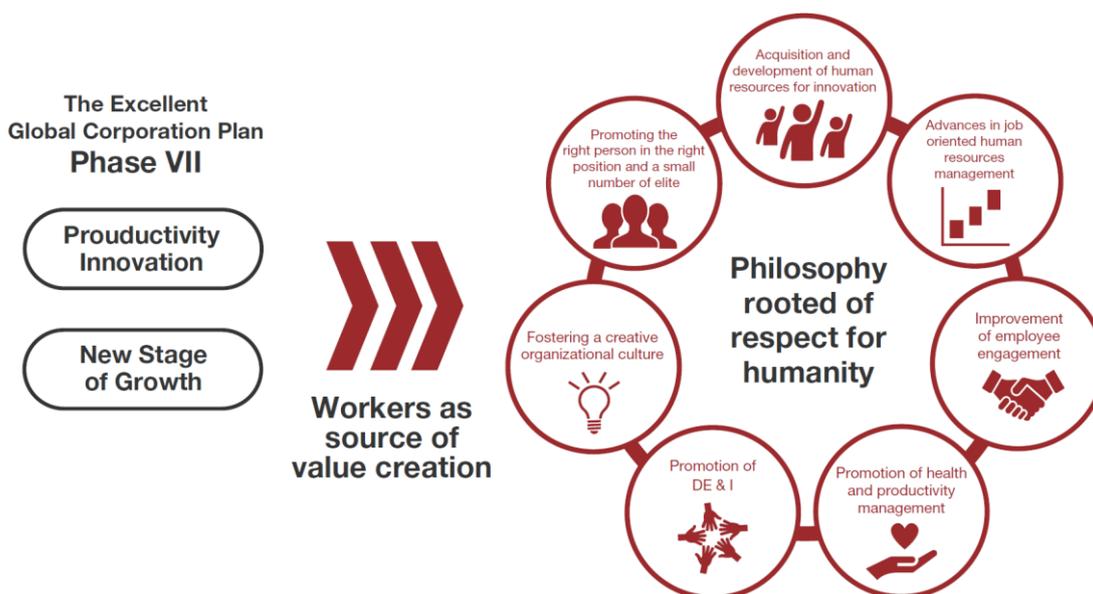

Scope 3 : Compliant with the GHG Protocol Corporate Value Chain (Scope 3) Accounting and Reporting Standard (2011)

(3) Human capital

Based on the corporate DNA of “Respect for Humanity” that has been handed down since its founding, Canon believes that the source of value creation lies in human resources, and it is actively investing in maximizing human resource value. In Phase VII of the Excellent Global Corporate Plan, which commenced in 2026, we aim to achieve a new stage of growth by decisively advancing productivity innovation. To realize this, the Company aims to build a human resource portfolio to promote R&D of new technologies, as well as the company-wide automation and in-house production of operations.

Specifically, the Company is working to recruit and develop human resources who can create innovation, and to foster a free and open organizational culture that makes the most of diverse human resources and ideas. In addition, Canon has introduced a job-based “position-based pay system” and has supported achieving the right combination of talent and job position regardless of age or gender. Furthermore, Canon supports the physical and mental health of its employees through various health support measures to enable each employee to fully demonstrate his or her abilities. Furthermore, the Company is realizing growth for both individuals and the Company by improving engagement through ease of work and job satisfaction.

The following strategies are for Canon Inc. and will be rolled out for the group companies in the future, taking into account the situation of each company.

Strategies, indicators and targets for human resource development and internal environment improvement, including ensuring diversity

(i) Acquisition and development of human resources for innovation

Canon is committed to recruiting and developing talented technical personnel to create innovative products and provide new value to society.

For regular recruitment, the Company promotes the appeal of Canon through internships, which raises student interest, and also enhances direct recruiting, which directly contacts excellent students. In addition, the Company is actively engaged in mid-career hire (hiring of experienced personnel) to recruit personnel with technologies not available in-house.

Additionally, under the Technology and Human Resource Development Committee, Canon has developed more than 300 specialized courses to develop the next generation of technology human resources from a long-term perspective. The effectiveness of technical training (degree of usefulness to practical work) in 2025 was a high level of 4.0 on average on a 5 step scale. In recent years, Canon has built a database of technical human resources that aggregates information on proprietary technologies and patents, etc., and this has led to effective human resource development.

In particular, with respect to the development of digital human resources, which are essential for innovation, the Company established the Canon Institute of Software Technology (CIST) in 2018 as an in-house educational institution dedicated to the development of software engineers, and has put in place a system that enables participants to acquire software skills according to their level. In addition, Canon conducted IT and digital transformation (DX) literacy training for all employees to improve productivity and promote DX (digital transformation), and a total of 28,000 people participated in it by 2025. Furthermore, the Company actively dispatches advanced personnel to external educational and research institutions to learn cutting-edge software technologies.

In 2023, the Company introduced the Advanced Engineer Certification System, under which engineers with advanced technical knowledge are recognized as “Top Scientists” or “Top Engineers” in an effort to improve motivation and train younger engineers.

In addition, the Company has developed a variety of training and trainee systems to develop human resources in business and manufacturing who will lead innovation in various fields, and systematically assigns and develops executive candidates in each field.

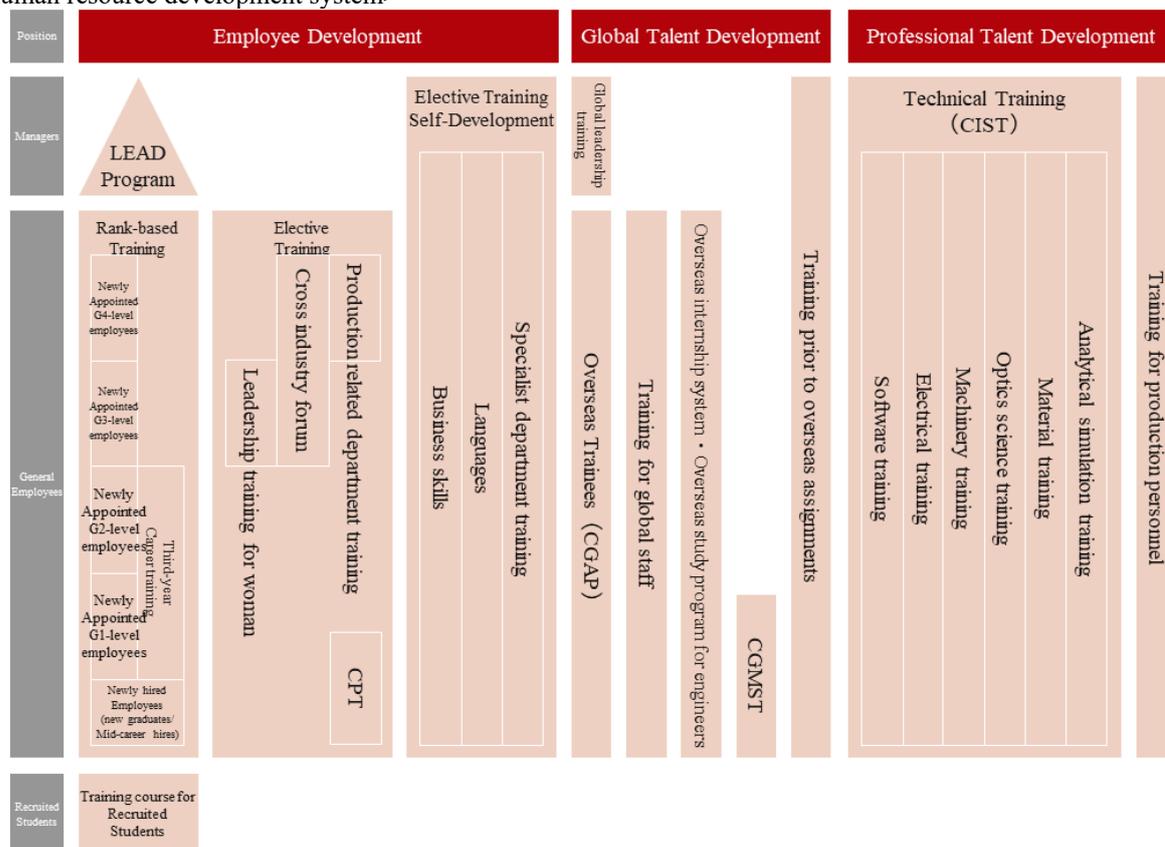

<Training results in 2025>

	Training hours	Training expenses
Total	590,000 hours	3.82 billion yen
Per employee	25.7 hours	167,000 yen

<Basic approach to human resource development>

(ii) Promoting the right person in the right position and a small number of elite

Canon is promoting the right person in the right place through strategic placement of human resources and career development support in order to realize an organization with a small number of highly productive elite.

For new employees, Canon is expanding the employment of the job matching type that promises the place of assignment before joining the company in order to assign personnel that match their specialty and orientation. After three years of service, the suitability of each employee’s position is verified through career training and interviews, and efforts are made to eliminate any mismatch in assignment at an early stage.

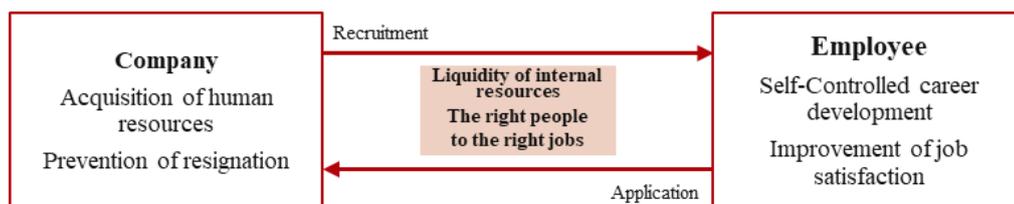

In addition, the Company has introduced a career matching system (internal job posting system) as a mechanism to shift personnel to growth fields and realize independent career development of employees. In 2015, the Company introduced a “Training-type Career Matching System” that combines job transfer training and an internal job posting system to support employees who are taking on the challenge of new job types. Until 2025, a cumulative total of 2,726 employees has been transferred through internal job posting system. In addition, in 2021, the Company expanded the internal job posting system to domestic Group companies, enabling employees to be seconded or transferred between Group companies, thereby promoting the right person in the right place across the Group. Furthermore, the Company regularly introduces a variety of training programs to all employees to strengthen their reskilling.

For senior employees, the Company has established seminars to encourage independent career development and an in-house recruitment system for employees aged 60 and over. In addition, the Company has established a flexible working system that enables employees to demonstrate their abundant knowledge and skills, aiming to empower all employees regardless of age.

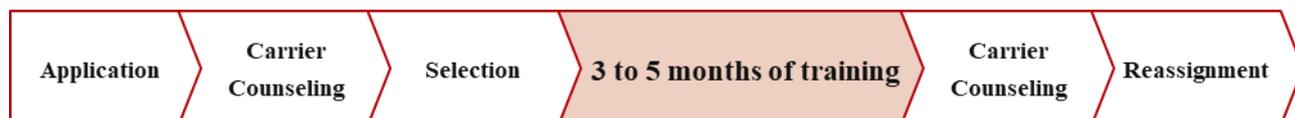

As a result of these initiatives, the turnover rate was 1.2% (excluding mandatory retirement), which is significantly lower than the national average (11.5%) *, and the Company maintains a high retention rate.

* Based on the 2024 Survey on Employment Trends industry, Turnover by employment type, Total of general labor industry, Ministry of Health, Labor and Welfare

<Internal career change by career matching>

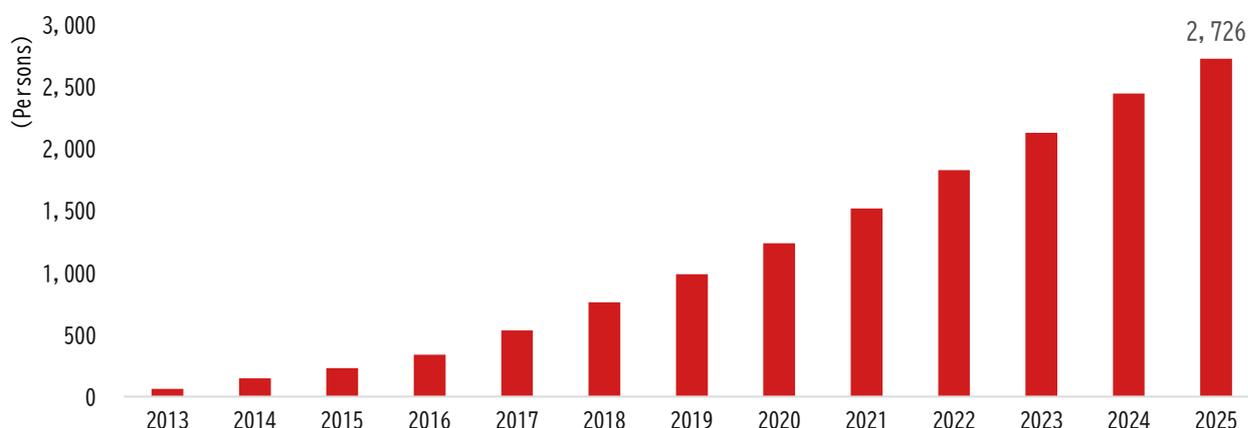

<Training type career matching system>

Open to applicants with no experience. Supporting employees who challenge themselves with new roles.

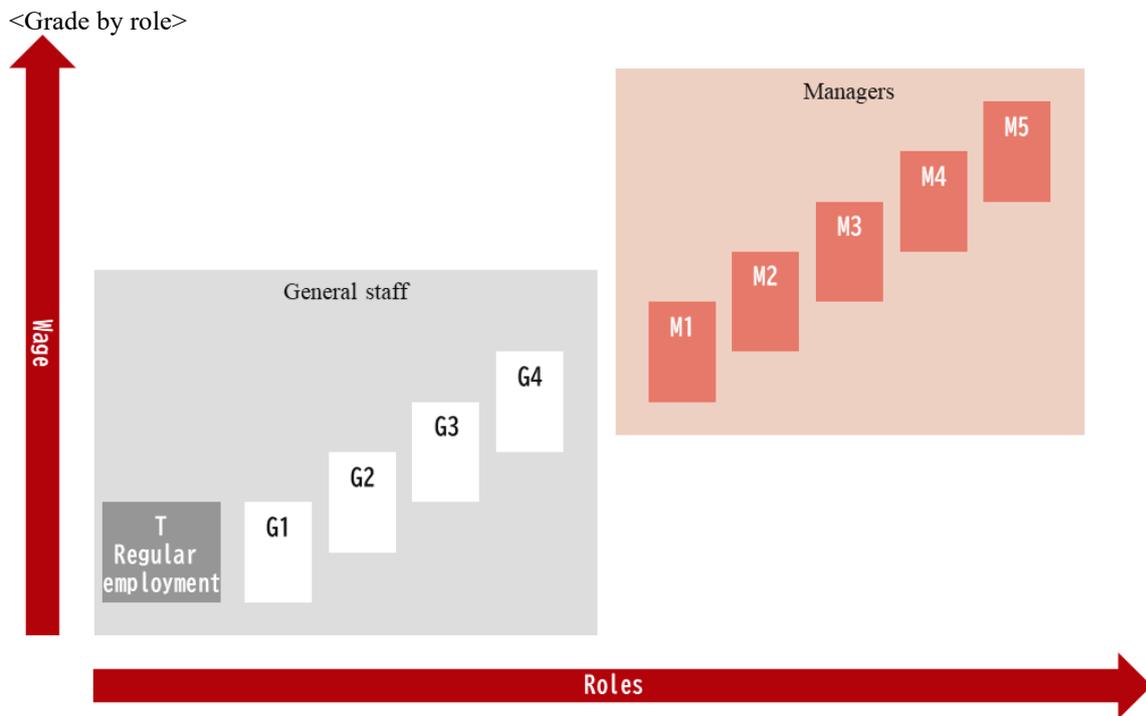

< Transferred personnel by internal job posting system > Cumulative total

(iii) Advances in job oriented human resources management

In 2001, Canon introduced a job-based “position-based pay system” in order to select outstanding human resources and provide fair and just treatment regardless of age or gender. Under the system, Canon enables to support independent career development and achieving the right combination of talent and job position by drafting job descriptions for each position and clarifying the knowledge and skills required for the job. In recent years, Canon has increased recruitment according to job type based on role and career recruitment through an internal job offering, among other methods, and has been enhancing job oriented human resource management.

In terms of compensation, the Company has introduced an outstanding performance evaluation system, under which special compensation is paid to personnel who have made outstanding performance, and a system, under which a higher bonus is paid to personnel who have generated high profits with fewer human resources. In addition, the Company has strengthened its investment in human resources through various improvements to its compensation system, including the continuous implementation of salary increases.

* T:Tentative/Training, G:Job Grade Band, M:Management Mission Band

(iv) Fostering a creative organizational culture

Canon is committed to organizational development to foster a free and open workplace culture that creates innovation. Specifically, the Company is implementing “Canon Knowledge-intensive staff Innovation (CKI)” activities, in which workplace members work to resolve issues such as communication and leadership through dialogue with the support by dedicated in-house consultants.

Furthermore, Canon holds “Canon Inspire Summit” in November of each year as a comprehensive event for human resource development and organizational development, accelerating the initiatives for revitalizing the organization.

In addition, the Company actively supports employees’ voluntary activities for creating value. For example, the Developers Conference, which started in 2018, has become a widely established forum for employees to exchange opinions on product development and technology trends beyond the boundaries of their business unit.

Moreover, the Company is working to create a creative workplace environment, including the creation of an office environment for active communication among employees.

<Basic approach>

Creation of innovation

Active organization
Free and vigorous corporate culture

CKI:Canon Knowledge-intensive staff Innovation
 Canon Inspire Summit
 Developers Conference etc.

(v) Promotion of Diversity, Equity and Inclusion

Canon promotes DE&I * to generate innovation while incorporating diverse values and ideas.

In 2012, the Company established VIVID (Vital workforce and Value Innovation through Diversity), a cross-sectional organization to promote DE&I. It conducts a variety of activities with the promotion of women’s success and support for men’s participation in childcare as key measures.

* Diversity, Equity and Inclusion

Key Initiatives and KPIs

- Ratio of female managers: 10% or more by the end of 2030
- Rate of men taking childcare leave: 100% or more by the end of 2030

To promote the active participation of women, the Company conducts “female leader training” for the purpose of developing female candidates for management positions and engages in systematic development. In addition, the Company has established a support system that includes seminars on returning to work after childcare leave and mentoring by managers to help employees balance work and childcare, and is working to create an environment in which women can play an active role. As a result of these initiatives, the target of “the ratio of female managers: more than triple the 2011 level by the end of 2025,” which is a key performance indicator for the active participation of women, was achieved ahead of schedule in 2024. Furthermore, the number of female general managers and above has increased by approximately 50% over the past five years, steadily expanding the opportunities for success. In recognition of these achievements, the Company has been certified as an excellent company promoting the active participation of women with a “Eruboshi (three-star)” rating by the Ministry of Health, Labor and Welfare. From 2026, the Company has set a new target of “the ratio of female managers: 10% or more by the end of 2030,” and has begun initiatives toward achieving this goal.

On the other hand, the low percentage of female employees is a challenge for Canon. This is because Canon is a company that emphasizes technological development and employs many engineers with a low percentage of female students in general. Therefore, the Company has set targets for the recruitment of women, and is working to further strengthen the recruitment of women. At the same time, the Company aims to make the ratio of female managers equivalent to the ratio of women in the total number of employees (17.1% as of the end of 2025) in the future. In addition, since 2024, Canon has been supporting the “Riko-challe” initiative of the Gender Equality Bureau, which supports female junior and senior high school students to advance to science and engineering, and have held various events.

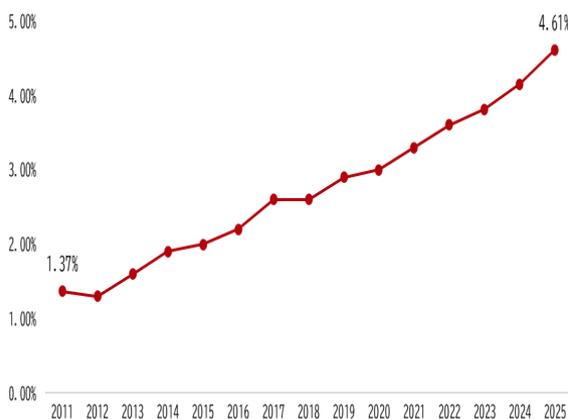

In 2024, the first woman was appointed as an External Director, and the first woman was appointed as an External Audit & Supervisory Board Member for 2025.

To support male participation in childcare, the Company holds round-table discussions and interviews with male employees using the childcare leave system, and conducts seminars related to childcare, etc., and strives to change the awareness of gender equality and foster a workplace culture. As a result of these efforts, the rate of men taking childcare leave reached 86.3% by the end of 2025, and the average period of child-care leave taken increased to a high level of 94 days. In recognition of these achievements, Canon has been certified as a “Platinum Kurumin” by the Ministry of Health, Labor and Welfare as a Child-Rearing Support company since 2019.

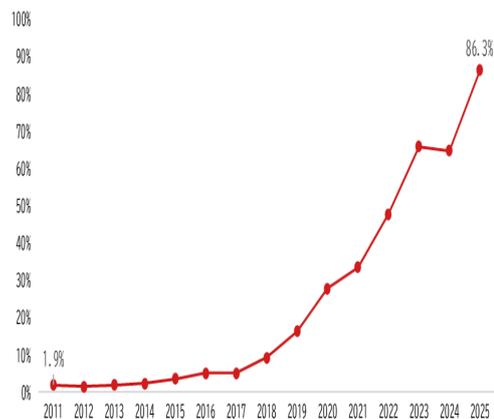

In addition, as an effort to improve DE&I, Canon holds company-wide training and events on minorities such as people with disabilities and LGBTQ +, and Canon is working to deepen employees’ understanding.

For the ratio of female managers, the rate of men taking childcare leave, and the wage difference between men and women at each company including consolidated subsidiaries, please refer to 5. “Employee”, Part I. I “Overview of the Company”.

<Ratio of female managers>

< Rate of men taking childcare leave >

(vi)Improvement of employee engagement

Canon is implementing a variety of measures to ensure that each and every employee understands the Company’s philosophy and strategies and is willing to take on the challenges of his or her duties.

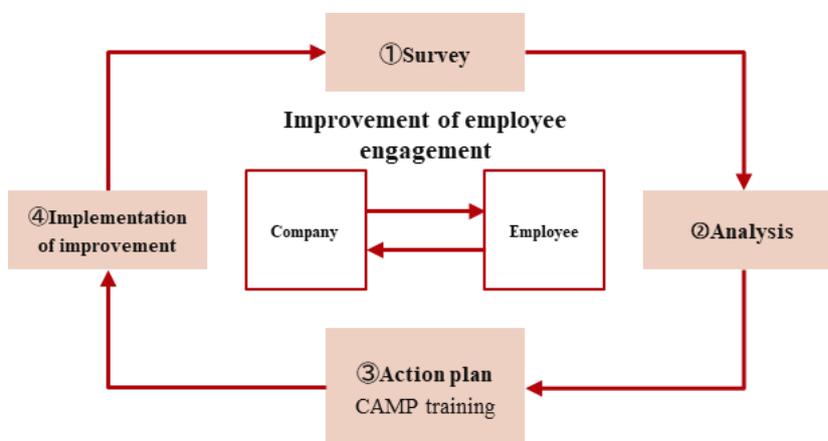

First, to grasp the current situation of the organization and employees, Canon conducts an employee survey once every two years. After analyzing the survey results from various perspectives, the following year Canon held a training session for all line managers under the Canon Active Management Program. In the CAMP training, managers discuss issues of their own organization at each workplace, and connect them to specific measures. The effects of these measures are confirmed in the employee survey in the following year.

In the 2025 employee survey, the percentage of positive responses improved compared with the previous survey in most dimensions, including “self-development” and “overall perceptions of the Company.” In particular, dimensions related to engagement, such as motivation, personal growth, and a comfortable working environment, showed steady improvement. In addition, as a result of initiatives such as conducting “motivation diagnosis” and “pulse survey” for young employees since 2024, the engagement scores of employees in their twenties have significantly improved.

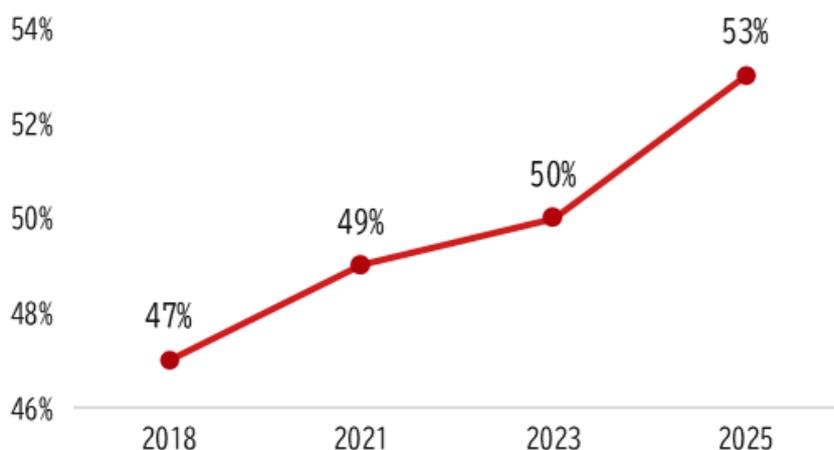

Moreover, in order to enhance the work-life balance, the Company is working to shorten working hours and create a working environment that allows employees to work flexibly according to their life stages. Specifically, the Company is enhancing systems such as shorter working hours for reasons of childcare and nursing care, promoting the scheduled acquisition of leave, and improving operational efficiency by utilizing IT. As a result of these initiatives, the total annual working hours in 2025 were 1,708 hours, which is significantly less than the national average * (1,917 hours).

* Based on the Ministry of Health, Labour and Welfare’s Monthly Labour Survey, General Labour Survey

<Management improvement cycle using employee awareness surveys>

<Employee engagement>

* Percentage of positive responses for dimensions related to engagement, such as motivation, personal growth, and a comfortable working environment

(vii) Promotion of health and productivity management

Since its founding, Canon has been promoting health management under the principle of “Putting Health First” as a code of conduct. Based on detailed analysis of data obtained through health examinations, including employees’ physical and mental conditions, lifestyle habits, and work conditions, the Company has set targets for eight health behaviors (mental health, cancer, exercise, diet, weight, sleep, alcohol consumption, and smoking cessation) in cooperation with the health insurance society, and provides effective health support.

For example, in light of the fact that lifestyle diseases are affected by sleep and smoking, Canon provides individual guidance using specialized equipment and implement smoking cessation programs and ensure good sleep. Moreover, as a result of promoting initiatives such as making all domestic business premises non-smoking from 2016, the smoking rate at the end of 2025 was 14.5%, a decrease of 16.1 percentage points from 2005. In addition, the Company distributes “Health Reports,” which analyze data on health examinations and health behaviors by organization, to support autonomous efforts at the workplace to improve the health of employees.

For mental health, Canon conducts stress checks every year, and Canon holds interviews with industrial physicians and health consultations by public health nurses for people with high stress. Canon also holds discussions with the workplace and strives to improve the workplace as a whole. As a result of these efforts, the percentage of people with high stress levels has been decreasing year by year, and the effects of these efforts are emerging.

To promote the early detection and treatment of cancer, the Company encourages employees to make use of its cancer screening programs. The Company also provides an environment that supports employee participation, including financial assistance from the Canon Health Insurance Society and reservation support provided by health support staff.

In addition, as an effort to improve health literacy, the Company aims to maximize the abilities of its employees through various health support activities, including health seminars and events.

KPI	Target	Actual
Health checkup attendance rate	100%	100%
Stress check attendance rate	100%	96.9%
Cancer screening attendance rate (40 years and above)	70%	52.0%

(4) Human rights

(i) Respect for human rights

Under the corporate philosophy of *kyosei* Canon Group respects the human rights of employees, business partners and other stakeholders involved in its business activities. Canon Group ensures human rights using the following measures: (1) formulating and reviewing the human rights policy; (2) undertaking human rights due diligence; (3) instituting and operating a grievance mechanism; (4) conducting human rights awareness training; (5) activities aimed at engaging with stakeholders on human rights issues; and (6) addressing human rights risks in the supply chain. In 2021, Canon Group Human Rights Policy was established as a part of promoting efforts to respect human rights. This policy is available to Canon's stakeholders in various countries and regions worldwide via Canon website.

Reference: Canon Group Human Rights Policy

<https://global.canon/en/sustainability/society/human-rights/pdf/hr-policy-e.pdf>

(ii) Governance

Human Rights Secretariat, headed by the CFO, who serves as the executive in charge of human rights, to pursue human rights initiatives. The secretariat formulates an overall plan for human rights initiatives, establishes and operates grievance mechanisms, conducts stakeholder engagement, and reports important matters to the executive in charge. Potential human rights violation risks have been identified as a significant risk by the Risk Management Committee established by a resolution of the Board of Directors. Each Canon Inc. division and Group company is implementing initiatives to prevent and mitigate human rights risks. The results of the initiatives are evaluated annually by the Risk Management Committee and reported to the CEO and the Board of Directors.

(iii) Implementation of human rights due diligence

Based on the UN Guiding Principles on Business and Human Rights and the OECD Due Diligence Guidance for Responsible Business Conduct, Canon Inc. undertakes human rights due diligence across the Group, as one of the activities under the Risk Management Committee. Each Canon Inc. division and Group company identifies and assesses the potential adverse human rights impacts in their respective business activities, including the supply chain, and identifies the salient human rights risks. The secretariat subsequently, aggregates, analyzes, and evaluates the risks for the various organizations and, through stakeholder engagement, identifies salient human rights risks for Canon Group.

Canon has identified 11 items as potential salient human rights risks that may arise in Canon Group's business activities, including the supply chain. As shown in the table below, various measures are taken to prevent and mitigate these risks.

Salient Human Rights Risks for Canon Group

	Rights-holders			
	Suppliers/ Contractors	Canon employees	Customers/ Consumers	Local communities
Discrimination based on such factors as race, gender, or religion		●		
Harassment		●		
Child labor	●			
Forced labor	●			
Unpaid wages/low wages	●			
Excessive overtime work	●	●		
Occupational health and safety	●	●		
Protection of privacy		●	●	
Procurement of conflict minerals				●
Noise, environment pollution at operational sites				●
Health damage or accident caused by product			●	

(iv) Grievance mechanism

Canon Inc. has set up an internal reporting system through which employees can report specific human rights concerns. Canon also works to raise awareness of the reporting system via the company intranet and training programs, among other measures, and are taking steps to ensure its appropriate use. Nearly all Group companies in Japan and overseas have also established internal reporting systems to enable employees to report concerns in local languages. Canon Inc. also has a reporting system through which external stakeholders can report specific human rights concerns associated with Canon Group's corporate activities.

(v) Human rights awareness activities

Canon Group has been carrying out human rights awareness training such as an e-learning program for employees to instill basic knowledge about business and human rights and raise awareness of the human rights initiatives at *Canon Group*. Training programs held overseas reflect national and local characteristics, with each company optimizing the content and translating it into each language.

(vi) Stakeholder engagement

In identifying and assessing human rights risks and taking steps to prevent or mitigate such risks, in addition to Canon Workers' Union, Canon Group is engaged in dialogue with institutional investors, suppliers, and business partners.

(vii) Response to human rights risks in the supply chain

Canon Group joined the RBA (Responsible Business Alliance) in 2019, with the aim of further improving the CSR model of its supply chain. Canon formulated Canon Supplier Code of Conduct, based on the RBA Code of Conduct, to promote procurement activities that take proper account of labor, health and safety, environmental concerns, and management systems. Canon also collects letters of agreement concerning adherence to the Code of Conduct from major suppliers. In addition, by conducting annual questionnaire-based risk assessments, Canon is working to identify, assess, and prevent human rights risks among its suppliers, including the use of child or forced labor, unreasonable movement restrictions, or excessive working hours. Furthermore, for some suppliers, Canon checks the actual situation through online meetings and on-site inspections, and work together with them to make improvements.

(5) Cyber security

(i) Governance / Risk Management

In Canon, the Group Executive of Information & Communication Systems Headquarters, who is the Executive Officer in charge of information security, is positioned as the person responsible for making decisions on information security, and the Information & Communication Systems Headquarters in Canon is responsible for information security management of the entire Group as the operational organization. The Executive Officer in charge of information security, the Group Executive of Information & Communication Systems Headquarters, has been responsible for decision-making on information security for seven years and has sufficient experience and knowledge on risk assessment and management. In addition, the Information & Communication Systems Headquarters, which is the operational organization, has appointed personnel who holds “Registered Information Security Specialist,” which is a national qualifications in Japan for professional personnel with practical knowledge and skills related to cybersecurity, to support risk management. The mid-term plan for information security is formulated by Information & Communication Systems Headquarters and approved by the CEO.

Canon has established a Risk Management Committee *1 based on the resolution of the Board of Directors, and has established a risk management system for promptly collecting and reporting information on incidents and accidents related to information security. In the event of an incident or accident relating to information security, the incident or accident is reported to the Information & Communication Systems Headquarters, and then to the CEO and the Board of Directors through the Risk Management Committee depending on the situation. The committee will draft measures for the development of Canon’s risk management system, including the identification of serious risks that Canon may face in the course of conducting its businesses (violations of laws and corporate ethics, errors in financial reporting, environmental problems, quality issues, information leakage, etc.). Canon’s various administrative divisions, such as the legal, logistics, quality management, human resource, and finance & accounting, are responsible for overseeing various risks associated with business activities. Each management division belongs to the relevant subcommittee, controls and supports the risk management activities of Canon’s divisions and group companies in their respective areas of responsibility. Canon’s divisions and group companies independently establish and operate its risk management systems, and report the results of its activities to the Risk Management Committee on an annual basis. The Risk Management Committee receives reports from each subcommittee, each division and each company, evaluates the status of establishment and operation of the risk management system, and reports the evaluation results to the Representative Director and CEO, and the Board of Directors.

* 1 For details, please refer to (1) Risk Management System in 3. Risk Factors.

(ii) Strategy

1. Information system security measures

Canon is implementing measures to maintain the three key elements of information security known as “confidentiality,” “integrity,” and “availability” *2. As a countermeasure against internal information leakage, the most critical information is stored in a dedicated system with enhanced security, with strict access restrictions and thorough logging of usage. In addition, Canon has established a secure environment for accessing to its information assets from outside the company, and manages the sending of e-mail attachments and carrying out of PCs and recording media. Furthermore, as a countermeasure against external cyberattacks, Canon monitors suspicious emails with malware *3 attachments and unauthorized communications from within the company to the internet, striving to prevent the spread of attack damage. On top of these, Canon has participated in cyberattack response training (NCO *4/NCA *5 cross-sectoral exercise) every year since 2017, aiming to strengthen its incident response capabilities. Canon also shares information on trends and countermeasures against cybersecurity risks with security tool vendors on a monthly basis.

* 2 Confidentiality: To ensure that only authorized individuals can access the information

Integrity: Information and processing methods are accurate and protected from tampering

Availability: Ensuring authorized individuals can access to the information when needed

* 3 Malicious software created with the intent to perform unauthorized and harmful actions, such as computer viruses and ransomware.

* 4 The abbreviation for the National Cybersecurity Office (NCO).

* 5 Abbreviation for Nippon CSIRT Association

2. Information security measures for production facilities

Canon is working on information security measures for production facilities to prevent production facilities at plants from having operational problems due to malware or cyberattacks, which could cause problems with production plans. In the past, the targets of cyberattacks were mainly information systems such as corporate business systems and web systems. However, the use of general-purpose operating systems (OS) and the adoption of the Internet of Things (IoT) are also progressing in production facilities, and information security risks equivalent to those of information systems are arising. The operating period of production facilities is longer than the support period of general-purpose OS, and security measures separate from those for information systems are required. Therefore, Canon and domestic and overseas group manufacturing companies monitor the production facilities network for unauthorized communications to prevent operations from being suspended due to virus infections and other factors. In addition, Canon conducts security audits of production facilities to maintain a safe production environment.

3. Information security education to raise employee awareness

Canon is also focused on raising awareness among employees, who are users of Canon's information systems, to maintain and improve information security. Canon ensures thorough implementation of Canon's information security measures and rules through group training for both regular and mid-career hires. Additionally, Canon conducts annual e-learning information security training for all employees. In 2025, approximately 23,000 of Canon's employees participated in this training. The training content aims to improve employees' information security literacy *6, covering topics such as how to identify suspicious emails, vulnerability risks and their countermeasures, and precautions for web conferencing. Furthermore, Canon conducted practical training on handling targeted attack emails for approximately 60,000 employees of Canon Inc. and group companies to ensure proper response to suspicious emails and prevent the spread of damage. Special training is provided separately for new employees who are not yet accustomed to email-based work, with an emphasis on strengthening education.

*6 Knowledge and skills required when implementing security measures

4. Information Security Management System

In 2015, Canon established a dedicated team, CSIRT *7, within the Canon Information & Communication Systems Headquarters to handle information security incidents. At the same time, Canon is a member of the NCA and is working to strengthen cooperation with other CSIRT organizations. In addition, Canon has obtained external certification under ISO27001, the international standard for the establishment and operation of information security management systems, for its information security divisions.

When using third party cloud services, the Information & Communication Systems Headquarters assesses the security risks of the services in advance and operates a process to permit the use. After the start of use, the same process is carried out annually to continuously reduce risks.

*7 Abbreviation for Computer Security Incident Response Team. Name of an organization responsible for handling computer security incidents and accidents.

3. Risk Factors

The major risks that management recognizes as potentially having a significant impact on the financial position, business performance, and cash flow status of the consolidated companies, among the matters related to business and financial conditions described in the annual securities report, are as follows.

The forward-looking statements herein are based on the judgment of the Canon Group as of December 31, 2025.

(1) Risk Management System

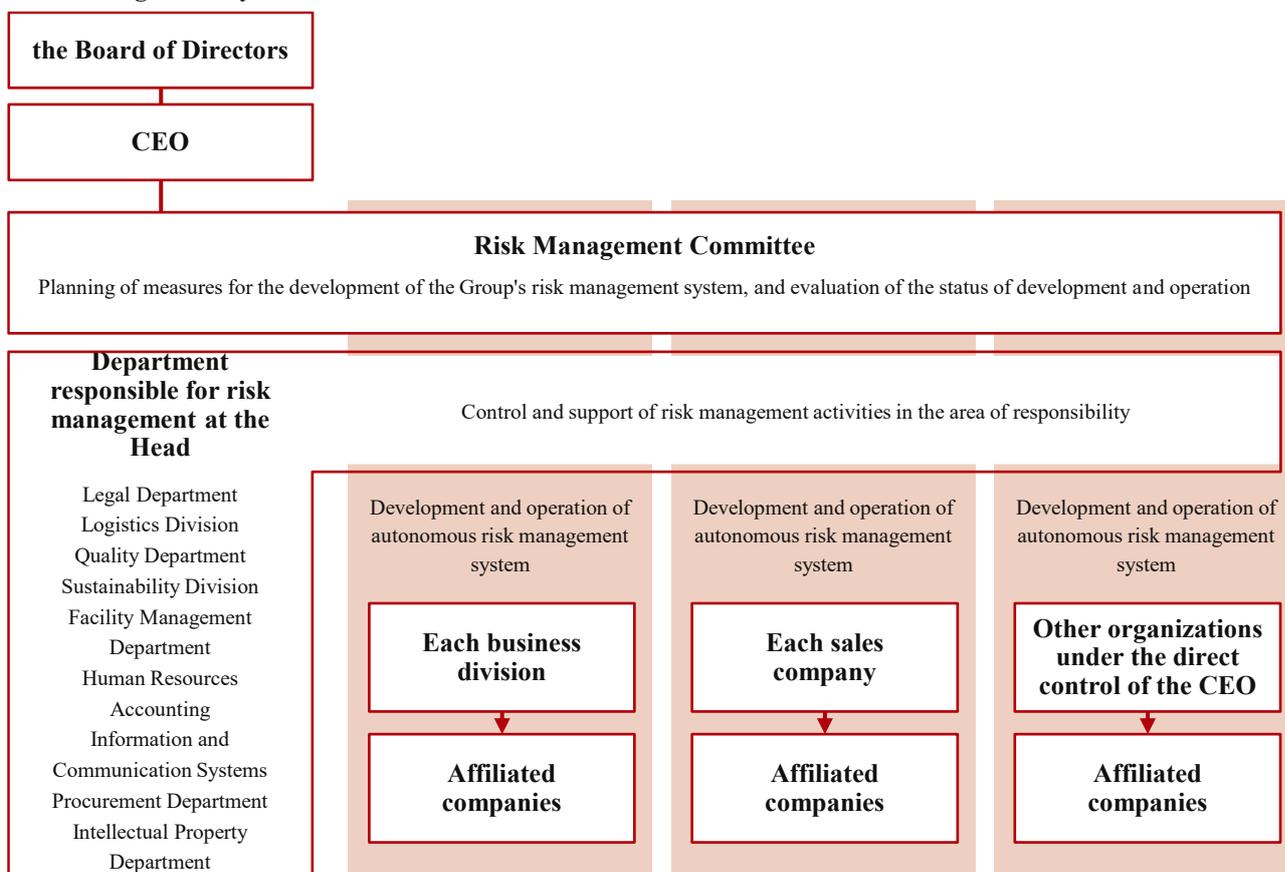

Based on a resolution by the Board of Directors, Canon has established the 'Risk Management Committee' to plan various measures for the development of the Canon Group's risk management system. This committee is composed of three subcommittees: the Financial Risk Subcommittee, responsible for establishing systems to ensure the reliability of financial reporting; the Compliance Subcommittee, responsible for establishing systems to ensure corporate ethics and compliance with major laws and regulations; and the Business Risk Subcommittee, responsible for establishing systems to manage overall business operation risks.

Canon's various administrative divisions, such as the legal, logistics, quality management, human resource, and finance & accounting, belong to the relevant subcommittee, controls and supports the risk management activities of Canon's divisions and group companies in their respective areas of responsibility.

Under the above structure, Canon's divisions and group companies independently establish and operate its risk management systems, and report the results of its activities to the Risk Management Committee on an annual basis.

The Risk Management Committee receives reports from each subcommittee, each division and each subsidiary, and evaluates the status of establishment and operation of the risk management system. The committee reports the results of the evaluation to the CEO and the Board of Directors.

Risk Management System

Risk management process

Identify risks at the Secretariat of the Risk Management Committee, the departments responsible for risk at the Head Office, and the business departments. Identify candidates for material risks.

The Secretariat of Risk Management Committee prepares a draft of the Group's significant risks and risk map, and submits it to the Committee. The CEO approves the identified material risks.

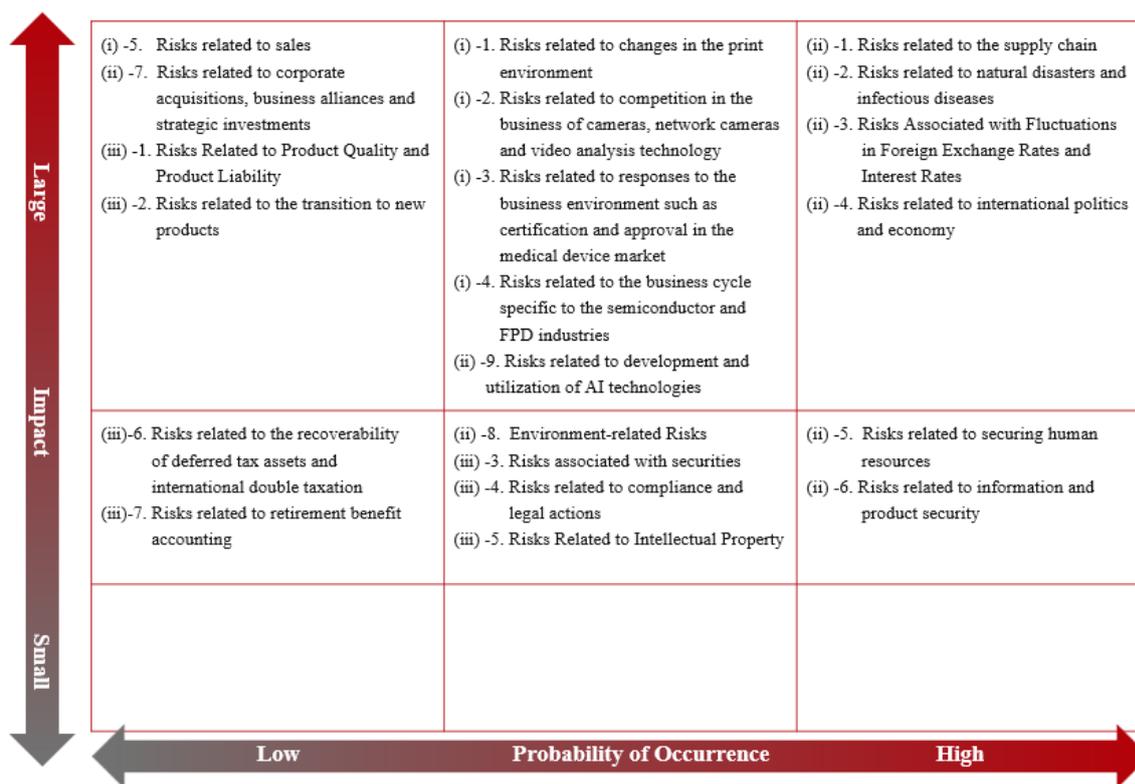

Each division and subsidiary involved in significant risks autonomously conducts risk management activities under the control and support of the division responsible for risk at the head office.

The department in charge of risk management at the head office, the Risk Management Committee and the Audit & Supervisory Board monitor the implementation of risk management activities. Make improvements as necessary.

(2) Business risks

Canon Group (Canon and its consolidated subsidiaries; hereinafter referred to as “Canon” in this section) may be subject to the following major risks that could affect its operating results and financial position. In Canon, the Risk Management Committee, established based on the “Basic Risk Management Regulations”, identifies risks that may have a material impact on Canon operations each year. The following risks were also identified through deliberation by the Risk Management Committee. However, the following risks do not cover all risks associated with Canon, and the measures to deal with them do not completely eliminate these risks. The following items are based on judgments made as of the date of submission of Annual Securities Report (March 25, 2026).

Risk Map

Note: Each risk number on the risk map is assigned in the order of Canon risk, “(i) Risks Specific to Canon’s Industries and Business Operations,” “(ii) Cross-business significant risks,” and “(iii) General risks.”

(i) Risks Specific to Canon's Industries and Business Operations
--

(i) -1. Risks related to changes in the print environment	
Impact: Large	Probability of occurrence: Medium
<p>● Risks</p> <p>The digital transformation driven by the widespread adoption of multifunctional and high-performance smart devices and applications, the penetration of paperless practices driven by environmental considerations, and changes in workstyles resulting from the spread of remote work are expected to lead to a decline in overall print opportunities in the future.</p> <p>If Canon is unable to sufficiently provide products, services and solutions that respond to changes in market conditions, its operating results may be adversely affected.</p>	
<p>☆ Response and Opportunities</p> <p>Canon leverages a wide range of products, from home inkjet printers to office multifunction devices, large-format printers, and high-speed commercial printing, as well as cloud services. This enables Canon to provide optimal choices for customers in various locations and opportunities where printing is needed, even under market environmental changes.</p> <p>Changes in office printing opportunities are attributable to factors such as the shift of printing needs to other locations, including homes, due to the spread of flexible workstyles. In response, Canon is adapting to the new market environment by launching services that utilize inkjet printers and compact laser printers to provide secure business printing and management functions even outside the office.</p> <p>To support the growing adoption of paperless workflows, we are enhancing office multifunction devices with high-speed scanning capabilities and integrating them with document management services to facilitate digital transformation. Canon will position the commercial and industrial printing segments, which are expected to grow over the medium and long term due to the shift from analog to digital printing and rising demand for short-run, high-mix printing, as strategic areas for our company and will introduce new products and services to capture this demand.</p>	

(i) -2. Risks related to competition in the business of cameras, network cameras and video analysis technology	
Impact: Large	Probability of occurrence: Medium
<p>● Risks</p> <p>The camera market faces competition in price and performance across various imaging devices as the imaging capabilities of digital devices, including smartphones, advance and consumer preferences for image capture diversify. As a result, the functional difference between Canon’s products and competing products (including those of smartphone manufacturers) may narrow. If Canon is unable to maintain its competitive advantages, Canon’s relative market position may decline, and as a result, its operating result may be adversely affected.</p> <p>On the other hand, the network camera market is expanding due to the increasing demand for security and video analysis solutions. However, if Canon is unable to provide products and services that maintain competitive edge over other companies amidst intensifying competition, Canon’s relative market position may decline, and as a result, its operating results may be adversely affected.</p>	
<p>☆ Response and Opportunities</p> <p>Canon is pursuing differentiation based on optical technology and is leveraging AI technologies such as deep learning to improve image quality and functionality of still images and videos. Canon is strengthening a broad product lineup from professional to entry level users, and is advancing product deployment centered on video to meet the growing demand for video. In addition, to support creative imaging production especially among the smartphone native generation, Canon is expanding entry level offerings, including compact digital cameras. Moreover, Canon is expanding software and services to enhance shooting workflows. Furthermore, aiming to broaden users’ expressive capabilities, Canon is undertaking efforts to expand the VR (Virtual Reality) imaging system and broaden its range of applications.</p> <p>Network cameras are being increasingly utilized in various fields, not only for growth in security areas such as crime prevention and disaster management but also through the integration with technologies like AI and cloud computing. This includes analyzing customer behavior in stores and improving production processes in factories. To quickly respond to market changes, Canon is combining AI with the optical technologies, image processing and analysis technologies that have been established to date, and fusing them with cloud and network technologies. This will further strengthen the competitiveness of Canon’s existing businesses and expand operations in the DX market using video analysis solutions.</p>	

(i) -3. Risks related to responses to the business environment such as certification and approval in the medical device market	
Impact: Large	Probability of occurrence: Medium
<p>● Risks</p> <p>The medical equipment market for healthcare institutions, primarily focused on diagnostic imaging devices, involves sales activities directed at medical professionals such as doctors and technicians. However, various regulations and codes of conduct are established for sales activities in each country and region, and it is necessary to strive to understand and comply with them. Additionally, verifying the clinical effectiveness of new technologies and products, and responding to medical device regulations in each country and region to obtain certifications and approvals, requires time from product conception and R&D to product sales. If Canon fails to accurately predict the clinical effectiveness of new technologies and products and cannot timely introduce products to the market to maintain competitiveness, or if unforeseen new regulations force significant adjustments to new business ventures, it may result in insufficient returns on investment and may adversely affect Canon's operating results.</p> <p>Furthermore, in addition to the uncertainties in the business environment, including recent geopolitical risks, if Canon is unable to promptly respond to various changes in the business environment, such as cost increases due to U.S. trade policies and the deterioration of hospital management while also addressing the market needs such as demand for early detection of cancer and cardiovascular diseases, reducing burden on medical professionals, and implementing cybersecurity measures in the healthcare sector, it may adversely affect Canon's operating results.</p>	
<p>☆ Response and Opportunities</p> <p>Amid the tightening of various regulations specific to the medical industry in different countries and regions, Canon will work closely with its partners and collaborators to understand customer needs and changes in the business environment. By leveraging AI technology and Canon's core technologies, Canon will provide products and services with high clinical and economic value in a timely manner. Moreover, Canon will take balance the cost increase resulting from various factors and the added value our products and services deliver and make appropriate pricing adjustments to sustain and expand our profits. Furthermore, Canon will promote the improvement of sales productivity and operational efficiency through DX. In exploring new markets, including emerging countries, Canon will minimize the risks of technology leakage and preferential treatment of domestic products.</p> <p>Additionally, as personalized medicine and regenerative medicine gain attention, Canon will quickly grasp the trends in the medical field and take swift measures.</p> <p>As the volume of data increases with the advancement of medical care, the use of medical cloud platforms, which can reduce initial investment and maintenance costs, has become essential. In this context, Canon will support the enhancement of information security, particularly for medical institutions, and build trust with customers by providing both clinical value and safety and security.</p>	

(i) -4. Risks related to the business cycle specific to the semiconductor and FPD industries	
Impact: Large	Probability of occurrence: Medium
<p>● Risks</p> <p>The business cycle of the semiconductor and FPD are characterized by unpredictable fluctuations in amplitude, timing, and duration. During periods of oversupply of semiconductor devices and panels, investments in manufacturing equipment, including Canon's semiconductor lithography equipment, FPD lithography equipment, and OLED deposition equipment, will significantly decrease. In such an environment, Canon needs to continue investing heavily in R&D to maintain and enhance competitiveness. During market downturns, the impact of decreased sales and increased inventory can worsen cash flow, and Canon may not be able to recover all or part of the incurred costs, such as R&D expenses, which could negatively affect Canon's business, financial performance, and financial condition. If market changes differ from Canon's expectations and fail to meet customer needs, it could adversely affect customers' businesses and ultimately damage Canon's trust.</p>	
<p>☆ Response and Opportunities</p> <p>Canon is enhancing the performance of its equipment and strengthening ability to respond to customer needs, thereby capturing a wide range of demand and developing products aimed at diversifying customers, applications, and improving the balance of sales regions. Additionally, for equipment already operating in the market, Canon provides service support to meet customer needs, such as further performance improvements and specification additions, stabilizing its revenue base through both product development and after-sales service. Furthermore, Canon prioritizes early detection of market changes and take measures by consistently conducting preemptive information gathering and analysis.</p> <p>In the semiconductor sector, Canon has constructed new production facilities to achieve medium- to long-term market growth and expand the share of its products. To enhance production capacity, Canon is implementing measures to minimize the impact of future market fluctuations, such as utilizing existing manufacturing equipment and establishing a flexible personnel allocation system within the Group.</p>	

(i) -5. Risks related to sales	
Impact: Large	Probability of occurrence: Low
<p>● Risks</p> <p>Canon's business with HP Inc. is important, and as an OEM partner, Canon has built strong relationship over many years. However, if HP Inc. decides to limit or reduce its relationship with Canon due to changes in policy, business, or financial performance, it may adversely affect Canon's business and operating results.</p> <p>Additionally, Canon has established good relationships with other major business partners. However, if these partners decide to limit or reduce their relationship with Canon due to changes in policy, business, or financial performance, it may adversely affect Canon's business and operating results.</p> <p>Furthermore, if changes in the environment exceed Canon's expectations, it may adversely affect Canon's operating results.</p>	
<p>☆ Response and Opportunities</p> <p>Canon is deploying direct and indirect sales channels in a balanced manner across regions. In response to changes with specific partners, Canon is not only addressing them through existing channels but also actively pursuing new business partners.</p> <p>Additionally, in Canon's business with HP Inc., Canon continues to provide competitive products that respond to diverse work styles and changes in office environments, while maintaining and strengthening a good and strong partnership.</p>	

(ii) Cross-business significant risks

(ii) -1. Risks related to the supply chain	
Impact: Large	Probability of occurrence: High
<p>● Risks</p> <p>Canon strives to build an optimal supply chain for the entire process, from purchasing parts and materials to production and sales of products. However, Canon relies on specific external suppliers for critical parts and materials. If quality issues, supply shortages, or price increases occur with parts and materials used across Canon's products, it could lead to interruptions in production activities or increases in manufacturing costs.</p> <p>In addition, logistics services must function effectively for the procurement of parts and materials and the smooth supply of products to various countries and regions worldwide. However, if any issues arise with computerized logistics systems, or if geopolitical risks such as the U.S.-China conflict, the Ukraine conflict, or Middle East tensions, as well as labor disputes like strikes by port workers, cause disruptions in logistics or supply interruptions, it could negatively impact Canon's supply chain. This includes potential damage to high-value products during transportation that cannot be covered by insurance, and the inability to deliver substitute products to customers, leading to lost sales opportunities and negatively affecting Canon's business performance and customer trust.</p> <p>Furthermore, as a corporate social responsibility, there is an international requirement to respect and protect human rights and environmental conservation in the supply chain. Therefore, if a violation of human rights or environmental laws, regulations, or ethics occurs in Canon's supply chain, Canon's social trust and brand value may be damaged.</p>	
<p>☆ Response and Opportunities</p> <p>Canon strives to build an optimal production system and improve quality while globally operating and managing logistics for the entire group. Canon aims to establish an efficient logistics system and reduce logistics costs, as well as set up a system that can respond quickly to issues when they arise. Regarding the optimal production system, Canon is advancing the construction of an efficient production system using automation and robotics technology, promoting the in-house production of key parts to manage external dependency and reduce manufacturing costs. Furthermore, Canon is promoting the diversification of supply sources by developing new suppliers, alternative parts and materials, thereby increasing resilience against rising raw material costs and disruptions in the supply chain. For quality improvement, Canon has established a specialized quality management organization and is working with external suppliers to promote quality improvement activities, ensuring stable procurement of raw materials and parts.</p> <p>In addition, as part of Canon's efforts to respect and protect human rights within the supply chain, Canon has established a human rights policy and is working on human rights due diligence and the development of remediation mechanisms. Canon has formulated the "Canon Supplier Code of Conduct", which adopts the code of conduct of the Responsible Business Alliance (RBA) of which Canon is a member, to promote procurement activities that consider labor, occupational health and safety, the environment, and management systems. Canon obtains consent forms from major suppliers regarding compliance with the code of conduct. Furthermore, to promote efforts by these suppliers to prevent child labor, forced labor, and excessive working hours, ensure occupational health and safety, reduce greenhouse gas emissions, reduce raw materials, and comply with environmental regulations, Canon conducts annual inspections using its proprietary survey approved by the RBA.</p>	

(ii) -2. Risks related to natural disasters and infectious diseases	
Impact: Large	Probability of occurrence: High
<p>● Risks</p> <p>The headquarters building and core facilities for information systems and R&D in Canon are concentrated in the suburbs of Tokyo. In general, earthquakes occur more frequently in Japan than in other regions of the world, and therefore, it can be said that the area is susceptible to damage associated with them. In addition, Canon's facilities and offices for R&D, procurement, production, logistics, sales and services are scattered around the world, and the infrastructure may be disrupted by natural disasters such as floods and forest fires caused by earthquakes and climate changes, as well as terrorist attacks. Such factors may adversely affect Canon's operating activities and incur expenses for material and personal damage, and they may adversely affect Canon's operating results.</p> <p>If the spread of infectious diseases lead the global economy and Canon's business activities to be stagnated, or the business partners' business activities and investments to be demotivated, or Canon business activities are restricted by the request of governments etc. in each country, it could adversely affect Canon business, operating results and financial condition. In particular, in the market related to Canon's businesses, if printing volume of office equipment does not recover as much as expected due to the increase in remote working, or if the installation of lithography equipment and industrial equipment are less than Canon's forecast due to travel restrictions, it could adversely affect Canon's operating results and financial position.</p> <p>Furthermore, the spread of infectious diseases could disrupt supply chains around the world and Canon's production activities, and production activities at some Canon's plants in South-East Asia and other regions could be stagnated. In addition, sales activities may be adversely affected by restrictions on economic activities in Japan and overseas that could lead to closure of offices and sales stores, international travel restrictions, or tightening supply and demand for international freight transportation.</p>	
<p>☆ Response and Opportunities</p> <p>In Canon, the Company's head office departments continuously conduct risk management activities. Specifically, Canon has partially established a backup system to produce similar models at multiple locations in preparation for the worst case such as the suspension of factory operations. In addition, Canon has confirmed the initial response matters and the division of roles of the related departments, established an emergency contact system and guidelines, and conducted training, etc. in order to realize a prompt recovery in the event of a suspension of operations. Furthermore, Canon has established backup systems for the core systems used for R&D, procurement, production, quality, logistics, sales, and services in preparation for the possible failure of information systems.</p> <p>In addition, in order to maintain stable business operations, Canon has established a remote working system in emergencies such as when it is impossible to go to work due to disasters, and has assigned industrial physicians and public health nurses at each base to appropriately respond to any spread of infectious diseases.</p> <p>Assuming that natural disasters and the resurgence of infectious diseases will occur in the future, Canon is working to rebuild and strengthen its production and sales activities in Japan and overseas.</p>	

(ii) -3. Risks Associated with Fluctuations in Foreign Exchange Rates and Interest Rates	
Impact: Large	Probability of occurrence: High
<p>● Risks</p> <p>Canon earns an important percentage of revenue from international operations, and rapid fluctuations in exchange rates due to changes in the policies of domestic and Canon financial authorities may affect Canon's operating results and financial position, including fluctuations in foreign currency positions. Sales of Canon products denominated in foreign currencies will be adversely affected by the yen's appreciation against foreign currencies, while the yen's depreciation will provide a tailwind. In addition, the yen amounts of Canon assets and liabilities arising from transactions denominated in foreign currencies and foreign currency translation adjustments arising from foreign currency-denominated financial statements of foreign subsidiaries may also fluctuate. In addition, Canon is exposed to the risk of fluctuations in interest rates that affect the valuation of assets and liabilities.</p>	
<p>☆ Response and Opportunities</p> <p>In order to deal with sudden fluctuations in exchange rates, Canon, including Canon subsidiaries, regularly execute exchange rate hedging transactions for short-term exchange contracts. In addition, Canon maintains stable earnings by introducing highly competitive products and takes measures such as introducing products to the market at prices that reflect the recent exchange rate levels. To deal with the risk of interest rate fluctuations, Canon strives to maintain a strong financial structure that is not affected by interest rate trends by minimizing borrowings from external sources.</p>	

(ii) -4. Risks related to international politics and economy	
Impact: Large	Probability of occurrence: High
<p>● Risks</p> <p>Although many of Canon's production and sales activities are conducted outside of the country, there are risks associated with its operations outside of Japan, mainly due to the occurrence of political and diplomatic issues or adverse economic conditions, and unexpected changes in policies, legal systems, regulations, etc.</p> <p>In the event of political or diplomatic problems or unfavorable economic conditions, such as prolonged inflation or economic downturns due to monetary tightening in major markets, or further aggravation of the situation in Ukraine and the Middle-East or trade friction, corporate customers' investment may be restrained or personal consumption may be sluggish, which may adversely affect Canon business results. In particular, if there is a change in the U.S. trade policy and this affects sales in the U.S., which account for a certain percentage of Canon sales, it may adversely affect Canon business results. Restrained investment by corporate customers could lead to lower demand for products for corporate customers, mainly in Canon office multifunction devices, laser printers, medical equipment, lithography systems and industrial equipment, while sluggish consumer spending could lead to lower demand for consumer-oriented products such as cameras and inkjet printers. In this case, the sale of Canon products may decrease, and Canon operating results and financial position may be adversely affected.</p> <p>In addition, there are various issues related to the development of political, administrative and legal systems in various countries and regions around the world, as well as issues related to the situation in Ukraine and the Middle-East, and there is a risk that Canon may face unexpected changes in policies, legal systems, regulations, etc.</p>	
<p>☆ Response and Opportunities</p> <p>In the event of political, diplomatic or adverse economic conditions, Canon reflects relevant information collected through daily communication with Canon's local subsidiaries and regular business overview interviews in its management strategies and earnings forecasts. In addition, when demand in a particular market or the world as a whole is expected to decrease, Canon will adjust production according to the production and supply system of the products.</p> <p>As for unexpected changes in policies, legal systems, regulations, etc., Canon has strengthened measures particularly related to international environmental regulations and international and domestic tax system changes. In addition, Canon strictly complies with laws and regulations such as fair competition, anti-corruption, personal information protection, security trade control, and the environment under the control of each responsible department.</p>	

(ii) -5. Risks related to securing human resources	
Impact: Medium	Probability of occurrence: High
<p>● Risks</p> <p>The future performance of Canon depends in large part on the continuous contribution of talented people to the company. In addition, Canon believes that the ability to recruit and train talented people in Canon activities such as development, production, sales and management and to maintain the employment of talented employees will affect Canon's future operating results. On the other hand, competition for human resources in the labor market of the high-tech industry to which Canon belongs has become increasingly intense in recent years. Furthermore, as technological progress accelerates day by day, it is becoming increasingly important to train new employees to meet the capabilities required in terms of product R&D. One of the most important issues in Canon manufacturing technology is the transmission of skills. It is not possible to acquire special skills such as lens processing in a short period of time.</p> <p>If Canon is unable to recruit and train competent human resources, or if there is an outflow of competent personnel, this may cause delays in development and production, resulting in the outflow of research results and technologies, and the risk of skills not being properly passed down.</p>	
<p>☆ Response and Opportunities</p> <p>Canon is working to ensure that the right people are in the right jobs and to maintain the employment of talented people by strategically allocating human resources and actively supporting employees in their career development. In the hiring activities, Canon has expanded the employment system of job matching, in which the assignment of a department is confirmed before joining Canon based on expertise and the individual's orientation, and Canon assigns the human resources required by each business to the most appropriate department. In addition, the Human Resources Department holds interviews with employees who have been employed for three years or more to confirm their adjustment status with their work and workplace, and Canon has created an environment where each employee can demonstrate his or her ability with peace of mind.</p> <p>In addition, Canon has enhanced its career matching program (in-house recruitment program), and every year many employees take on the challenge of new work on their own volition. Under the “Training-type Career Matching System,” Canon provides employees with training opportunities and enables them to take on the challenge of transforming themselves. By providing opportunities for employees to relearn to acquire specialized knowledge and establishing a structure that enables them to take on the challenge of work for which they have no experience, Canon supports autonomous career development in the era of 100-year life. Furthermore, the Canon Institute of Software Technology (CIST), established in 2018, is engaged in systematic and continuous human resource development, from skill enhancement of engineers focusing on software development of products to basic education for new employees and education for employees aiming at job transition, and at the same time, it supports the transition to technical human resources.</p> <p>In terms of human resource development, Canon has implemented a systematic training program and trainee system to develop professionals in areas such as R&D, manufacturing, sales, and management, including the “LEAD Program” to discover, train, and appoint next-generation leaders.</p> <p>Special skills that are essential for Canon operations are passed on through the “Certification and Award of Excellent Craftsmanship” program.</p> <p>In addition, Canon has established the “Advanced Engineer Certification Program” to identify, appoint and support outstanding engineers in order to respond to rapidly advancing technologies.</p> <p>In addition to these initiatives, Canon strives to prevent the outflow of human resources by realizing a virtuous cycle of fairly and impartially evaluating work performance and assigning and treating competent personnel in more advanced roles.</p> <p>(Note) The views and initiatives on human resource development and diversity are described in (3) “Human capital,” 2. “Approach to Sustainability and Related Initiatives,” Part II. “Business Overview.”</p>	

(ii) -6. Risks related to information and product security	
Impact: Medium	Probability of occurrence: High
<p>● Risks</p> <p>Canon maintains confidential electronic information about its business processes, including manufacturing, research, development, procurement, production, sales and accounting, as well as confidential information about its customers and other stakeholders. Canon uses these electronic data through various systems and networks, including those managed by third parties.</p> <p>With respect to these electronic data, there is a possibility that personal information may be leaked or services may be suspended due to cyber-attacks by hackers or computer viruses, infrastructure failures, natural disasters, etc. In particular, cyber-attacks are becoming increasingly sophisticated and complex, and the targets of such attacks are spreading around the world. If bases of Canon that conducts business activities in Japan and overseas are attacked by vulnerabilities in information technologies, it is possible that Canon networks will be compromised and websites and online services will be suspended.</p> <p>In addition, Canon products and services continues to improve user convenience by connecting to the cloud and smartphones via networks. As the use of electronic data and information service progresses, security risks such as leakage of personal information and confidential information are increasing even in products and services provided to customers as well as Canon's own infrastructure, and relevant incidents may occur.</p> <p>If such a situation occurs, important business operations may be suspended, confidential data such as personal information and business secrets related to customers and other related parties may be leaked, the information service functions of products may be adversely affected, and liability for damages may occur. As a result, Canon's reputation may be damaged, brand value may decline, and Canon operating results and financial position may be adversely affected.</p>	

☆ Response and Opportunities

Canon is working to strengthen information security and information infrastructure to ensure the safe and strict management of electronic data.

Canon positions the Executive Officer in charge of information security as the person responsible for making decisions on information security, and the Information and Communication Systems Division, as a practical organization, is responsible for information security management of the entire Group.

In addition, Canon has formulated the “Group Information Security Policy” and applied them to the Group companies worldwide with the aim of maintaining the same level and the same concept of information security throughout the Group.

As a countermeasure against information security incidents such as cyber-attacks, Canon has established a specialized team, the Computer Security Incident Response Team (CSIRT). As a countermeasure against cyber-attacks from outside, Canon has built an environment for blocking suspicious e-mail, monitoring unauthorized entry into Canon's internal network, and monitoring unauthorized communications on the Internet, etc., and strives to prevent the expansion of damage from cyber-attacks. In addition, Canon regularly conducts cyber-attack response training to strengthen the response system. In addition, Canon conducts investigations and countermeasures for vulnerabilities (security holes) in the websites that are disclosed to the outside on a daily basis to reduce the risk of online service suspension.

Canon also conducts company-wide employee training on the management of software used in business, the handling of information, and cyber-attacks, as well as targeted attack email training, and strive to improve awareness and literacy. In addition, Canon conducts information security audits of Canon and Group companies every year to ensure the application of information security measures and strives to maintain and improve the level of information security on a continuous basis.

In addition, Canon has established an internal PSIRT (Product Security Incident Response Team) to respond to product security issues in the market. PSIRT is constantly monitoring market trends for vulnerabilities and gathering the latest information in collaboration with the Ministry of Economy, Trade, and Industry's Early Warning Partnership framework and external organizations. In addition, Canon has established an external website (<https://psirt.canon>) that serves both to receive reports on vulnerabilities in Canon products and services from researchers around the world and to enable prompt disclosure and posting of information from Canon to customers. Thus, Canon is working to ensure product security at the global standard level.

(Note) The views and initiatives on Cyber security are described in (5) “Cyber security,” 2. “Approach to Sustainability and Related Initiatives,” Part II. “Business Overview.”

(ii) -7. Risks related to corporate acquisitions, business alliances and strategic investments	
Impact: Large	Probability of occurrence: Low
<p>● Risks</p> <p>Canon has been conducting corporate acquisitions for the purpose of expanding its businesses. In addition, Canon has established relationships with other companies in various forms, including business alliances, joint ventures, and strategic investments. These activities are important as measures for the growth of Canon. However, Canon may not be able to achieve the expected business expansion due to a deterioration in economic trends or poor performance of the target company or its partners. It is essential for Canon and its target companies or partners to define common objectives and cooperate to achieve those objectives. However, there is a possibility that it will be difficult to establish a cooperative system, even if a cooperative system is established, there is a possibility that synergy effects and business models in Canon's businesses and the businesses operated by the target companies or partners will not produce sufficient results, and there is a possibility that the business integration will take more time than expected.</p> <p>In addition, due to a decline in the projected future cash flows, goodwill and other intangible assets associated with corporate acquisitions recorded by Canon in the balance sheet may be subject to impairment. Furthermore, if an alliance with a major partner is dissolved, it may cause problems with business plans premised on joint development, and the possibility of a delay in the recovery of investment may arise, or the possibility of recovery may decrease, which may adversely affect Canon operating results and financial conditions.</p>	
<p>☆ Response and Opportunities</p> <p>Canon is shifting its portfolio of businesses to respond to the maturation of existing businesses through aggressive M&A strategies. Canon targets corporate acquisitions, business alliances and strategic investments in areas that have high affinity with its technologies and business in which Canon excels, and Canon focuses its investments on companies that are particularly excellent and have excellent management. Corporate acquisitions, business alliances and strategic investments require Canon board resolutions and CEO approval, but Canon has strengthened the preliminary screening process to ensure sound management decisions. Investment plans are verified from the perspectives of consistency with business strategies, economic rationality, profitability, growth potential, risks, etc., and the administrative departments of the head office conduct preliminary reviews from their respective specialized perspectives. The CEO and the administration department of the head office monitor the progress of resolved and approved investment projects, and investment is managed on an ongoing basis. After the acquisition, Canon has been working to achieve synergy effects such as improving production efficiencies and reducing costs by sharing Canon manufacturing know-how, sharing business partners, and supporting the supply chain.</p>	

(ii) -8. Environment-related Risks	
Impact: Medium	Probability of occurrence: Medium
<p>● Risks</p> <p>Canon recognizes the potential for various environmental risks, including rapid climate changes, depletion of resources, exposure to toxic chemicals, air pollution, and water contamination. In addition, Canon is subject to the environmental regulations of Japan and overseas. The actualization of these risks and the strengthening of regulations may result in the bearing of expenses related to the environment and liability for damages. In this case, there is a possibility that Canon’s business and operating results will be adversely affected.</p> <p>Canon is responsible for investigating and cleaning up environmental contamination at the business premises that it currently owns or operates, or that it previously owned or operated, under applicable laws and regulations. If Canon is required to be liable for damages due to future litigation or other proceedings, the costs may not be covered by insurance. In this case, the impact on Canon may be significant.</p> <p>In addition, if Canon needs to bear more cost than expected to deal with these risks, it may adversely affect Canon’s business and operating results.</p>	
<p>☆ Response and Opportunities</p> <p>Canon is working on reducing greenhouse gas emissions, energy saving activities, developing energy-saving products, etc. At the same time, aiming for advanced recycling of resources, Canon is promoting environmental protection measures such as downsizing and weight reduction of products, remanufacturing, recycling of consumables, efficient use of water resources and recycling of wastes. As the world aims to transition to a decarbonized society, it is expected that sales opportunities will expand for products that reduce CO2 emissions throughout the product life cycle. In addition to strict management of hazardous chemical substances through green procurement, Canon is also engaged in environmental activities such as reducing chemical substances used in production processes and controlling emissions. These activities are promoted by the departments under the jurisdiction of the head office through the method of operating a common environmental management system of the Group in accordance with ISO14001. In order to comply with the environmental regulations of Japan and overseas, the departments under the jurisdiction of the head office control the response of the entire group.</p> <p>(Note) Information disclosed under the framework of the Task Force on Climate-related Financial Disclosures is described in (2) “Climate change,” 2. “Approach to Sustainability and Related Initiatives,” Part II. “Business Overview.”</p>	

(ii) -9. Risks related to development and utilization of AI technologies	
Impact: Large	Probability of occurrence: Medium
<p>● Risks</p> <p>As we develop and utilize rapidly evolving AI technologies for our products and services, it is essential to comply with AI-related laws and regulations that are being established in various countries and regions. If Canon is found to be non-compliant with such laws and regulations, Canon may face penalties or be subject to sales suspension for the relevant products or services.</p> <p>Even in cases where violations of laws and regulations do not occur, ethical considerations surrounding AI must be addressed. For example, if AI-enabled products or services provided by Canon unintentionally generate biased decisions, incorrect information, or unexpected behavior, this could negatively impact users and society, leading to reputational damage and a decline in brand value. Furthermore, such incidents may result in liability for damages.</p> <p>In addition, the use of generative AI may inadvertently produce content that infringes upon third-party copyrights or trademarks, potentially exposing Canon to legal risks. There is also a risk of information leakage or unauthorized access if confidential information is entered into external generative AI services.</p> <p>These risks may adversely affect Canon’s business performance.</p>	
<p>☆ Response and Opportunities</p> <p>Canon strives to enhance product competitiveness by integrating proprietary AI technologies into products and services across business domains. To date, we have introduced products with significantly improved performance and functionality by applying AI technologies, primarily in the Imaging and Medical businesses. We are now further strengthening AI integration and expanding it to all business groups, including the Printing and Industrial businesses. In addition, by developing and providing services that leverage AI technologies in each business, we contribute to transforming our customers’ operational processes. Furthermore, we actively utilize generative AI in internal operations to drive innovation and improve productivity.</p> <p>Canon has established a company-wide policy framework for evaluating and managing AI-related risks, aiming to provide safe and reliable AI products and services in compliance with applicable laws, regulations and ethical standards. Canon has independently developed a comprehensive AI risk assessment checklist, taking into account not only the legal and regulatory requirements of various countries and regions but also ethical perspectives. The checklist includes assessment items addressing fairness, transparency, appropriate use, safety and robustness, privacy, and security. Using the checklist, AI risks are assessed at appropriate stages of the product development process (for example, at the planning stage or upon completion of development), and necessary countermeasures are implemented prior to final approval, thereby minimizing AI-related risks in products and services. A dedicated organization has been established, and it is now working in collaboration with the Quality Assurance and Legal divisions to deploy these AI risk management activities across the Canon Group.</p> <p>Regarding the use of generative AI, Canon has established a company-wide cross-functional organization to develop usage rules and educational programs. Through training provided to all employees across the company, Canon is working to raise awareness and literacy concerning intellectual property rights and information security. Additionally, by selecting and deploying AI services with advanced security features, Canon is mitigating infrastructure-related risks. Through these measures, Canon aims to ensure the secure use of generative AI while enhancing operational efficiency across the company.</p>	

(iii) General risks

(iii) -1. Risks Related to Product Quality and Product Liability

Impact: Large

Probability of occurrence: Low

● Risks

If problems arise with the products and services provided by Canon, it may cause a loss of trust from customers and society, damage brand value, and adversely affect sales.

In particular, if a serious quality problem occurs with a product, it may require a large amount of expenses to address the problem. These factors may have an adverse effect on Canon's operating results.

☆ Response and Opportunities

Canon has established a quality management system that combines the requirements of the international quality management standard ISO9001 with Canon's own mechanisms.

Each business division of Canon is working closely with the quality department at headquarters and Group companies around the world to establish a quality assurance system that is based on a quality management system and that is optimal for the characteristics of each business, while also responding to the laws and regulations of each country and region, and to conduct thorough quality control.

In addition to the safety standards stipulated by law, Canon has established Canon's own safety standards for all Canon products, taking into consideration the safety of customers.

In addition, Canon aims to minimize risks caused by product quality problems by ensuring that the quality of products is confirmed in all processes from development and design to production and shipment, and that only products that meet quality standards are shipped to the market.

If any quality problem occurs, the quality assurance department of each business division receives a report from the sales companies in each country and region that serve as the contact point for customers. The department investigates the cause and considers countermeasures, and for serious quality problems, it discusses appropriate responses with the related departments within the business head office, the quality department at the head office, the legal department, the public relations department, etc., and reports to the CEO, and promptly takes actions upon approval.

(iii) -2. Risks related to the transition to new products	
Impact: Large	Probability of occurrence: Low
<p>● Risks</p> <p>Many of the business areas in which Canon competes are characterized by rapid technological advances in hardware performance and software functionality; frequent introduction of new products; short product life cycles; and continued qualitative improvements to current products at stable price levels.</p> <p>There are several risks in the introduction of new products and services such as delays in development or manufacturing, unsuitable product quality during the introductory period, variations in manufacturing costs, sales cannibalization, uncertainty in predicting customer demand and difficulty in effectively managing inventory levels. Moreover, if Canon is unable to respond quickly to technological innovations with respect to information systems and networks that form the foundation of Canon's products and services, Canon's revenue may be significantly affected as a result of delays associated with the incorporation into its products of such new information technologies.</p> <p>Canon's revenue also may suffer adverse effects because of the timing of product or service introductions by its competitors. It could be particularly affected when a competitor introduces a new product immediately prior to Canon's introduction of a similar product. If this risks materialize, future demand for Canon's products and services could be reduced, and its operating results could decline.</p>	
<p>☆ Response and Opportunities</p> <p>Canon is investing a lot of resources to launch innovative and cost-competitive new products that meet market needs.</p> <p>To address the above risks, Canon is diversifying its businesses by implementing core competency management, which combines core competency technologies that produce industry-leading core products, fundamental elemental technologies that form the basis of accumulated technologies, and value creation platform technologies that form the basis of commercialization technologies, which are the technologies and know-how that support Canon's brand and have been accumulated through growth. At the same time, Canon is working to increase the competitiveness of its businesses and swiftly supply the market with products that meet market needs.</p> <p>(Note) Canon R&D activities are described in 6. "Research and Development Activities," Part II. "Business Overview."</p>	
(iii) -3. Risks associated with securities	
Impact: Medium	Probability of occurrence: Medium
<p>● Risks</p> <p>Canon assets include investments in stocks and other securities. In the event that the value of Canon's investments in the future deviates significantly from the fair value of Canon's investments at present, due to fluctuations in the stock and bond markets caused by volatility in financial markets and uncertainties about the overall economy, Canon's operating results and financial position may be adversely affected.</p>	
<p>☆ Response and Opportunities</p> <p>Canon does not hold shares for the purpose of receiving profits from fluctuations in the share price or receipt of dividends, but mainly holds shares as part of cooperation with companies outside the Group for the purpose of medium- to long-term growth.</p> <p>(Note) The policy on cross-shareholdings and the verification of the rationality of shareholdings are described in (5) "Shareholdings," 4. "Corporate Governance," Part IV. "Information on Reporting Company."</p>	

(iii) -4. Risks related to compliance and legal actions	
Impact: Medium	Probability of occurrence: Medium
<p>● Risks</p> <p>In conducting its businesses in many countries and regions, Canon needs to comply with various laws and regulations. In addition, Canon may be subject to lawsuits and other legal actions by third parties. However, it is difficult to predict the outcome of lawsuits and legal proceedings to which Canon is a party or may become a party in the future. For example, in markets where Canon has a high market share, there is a possibility of antimonopoly litigation or investigation. If the outcome is unfavorable to Canon, or if significant costs are incurred in responding to litigation or investigations, it may adversely affect Canon's operating results. Furthermore, in the event of compliance problems, for example, employee scandals or organizational misconduct, the social trust and brand value of Canon may be damaged.</p>	
<p>☆ Response and Opportunities</p> <p>Canon identifies the major risks of compliance violations that Canon may face, such as violations of the Antimonopoly Act, the Anti-Corruption Act, and security export regulations, by taking into consideration the possibility of the risks arising as actual problems and the degree of impact on management and businesses if they occur. To reduce these risks, Canon has established a legal compliance system, including the establishment of a business flow, the establishment of rules, legal education for relevant employees, and the implementation of audits and inspections. In recent years, in response to the growing concern over quality-related misconduct at other companies, Canon has implemented company-wide preventive measures and is working to foster a corporate culture that does not tolerate such misconduct.</p> <p>In addition, the Compliance Subcommittee of the Canon Risk Management Committee ensures that the Group adheres to the corporate ethics code of conduct.</p> <p>In addition, Canon has established an internal legal department to respond in cooperation with external lawyers, etc. in the event of litigation or other legal acts by third parties.</p>	

(iii) -5. Risks Related to Intellectual Property	
Impact: Medium	Probability of occurrence: Medium
<p>● Risks</p> <p>Because of the emphasis on product innovation in the markets for Canon’s products, many of which are subject to frequent technological innovations, patents and other intellectual property are an important competitive factor. In relation to protection of its technologies, Canon faces risks that: competitors will be able to develop similar technology independently; Canon’s pending patent applications may not be issued; the steps Canon takes to prevent misappropriation or infringement of its intellectual property may be unsuccessful; and intellectual property laws may not adequately protect Canon’s intellectual property, particularly in certain emerging markets. On the other hand, in relation to third party intellectual property rights, if any third party is adjudicated to have a valid infringement claim against Canon, Canon could be required to: refrain from selling the relevant product in certain markets; pay monetary damages; pursue development of non-infringing technologies, or attempt to acquire licenses to the infringed technology and to make royalty payments.</p> <p>Canon may need to litigate in order to enforce its intellectual property rights or in order to defend against claims of infringement, which can be expensive and time-consuming.</p> <p>Canon also licenses its patents to third parties in exchange for payment or licensing. The terms and conditions of such licensing or changes in the renewal conditions of such licenses could affect Canon’s business.</p> <p>With respect to employee inventions, Canon maintains company rules and an evaluation system and has been making adequate payments to employees for the invention rights based on these rules. However, there can be no assurance that disputes will not arise with respect to the amount of these payments to employees.</p> <p>If counterfeit products that infringe Canon’s trademarks or other intellectual property rights circulate in the market, and the use thereof causes accidents, product failures, quality defects and other damage to customers, Canon’s brand value may be tarnished and its business may be harmed.</p> <p>Canon’s businesses, brand image and operating results could be adversely affected by any of these developments.</p> <p>☆ Response and Opportunities</p> <p>Canon has clearly positioned the purpose of its intellectual property activities as support for business development, and has formulated and implemented intellectual property strategies that envision the state of affairs in 10 or 20 years.</p> <p>Canon’s IP activities are characterized by balancing securing competitive advantages and freedom of operation by building a strong portfolio of patents. Canon is focusing on acquiring patents for core technologies, as well as patents for AI, Internet of Things, and standardization technologies, for example, in preparation for lawsuits and negotiations with IT companies that do not compete with us in the businesses but compete with us in intellectual property. In this way, Canon is maintaining a strong patent portfolio by acquiring patents in anticipation of the external environment and future business, and by replacing its patents.</p> <p>As a basic principle of Canon's intellectual property strategies, Canon does not license patents related to core competence technologies as patents that protect businesses in competitive domains, but utilizes them to secure competitive advantages. In addition, patents in the collaborative domain relating to general-purpose technologies such as communications and graphical user interfaces (GUI) are used for cross-licensing, etc., which ensures freedom of R&D and business, and leads to the provision of attractive products and services. While respecting the intellectual properties of others, Canon takes a resolute stance against infringements of Canon intellectual properties. In addition, Canon prevents others from following suit and ensures competitive advantage by concealing and protecting inventions that are difficult to verify and cannot be easily reached by others as know-how.</p> <p>While implementing the basic approach to intellectual property-related activities described above, Canon has changed its tactics with the times and is responding to risks associated with intellectual property.</p> <p>(Note) Canon intellectual property strategies are described in (vi) “Intellectual property strategy,” (2) “Analysis and Examination of the Status of Operating Results, etc. from the Perspective of Management,” 4. “Management Analysis of Financial Position, Operating Results and Cash Flows,” Part II. “Business Overview.”</p>	

(iii) -6. Risks related to the recoverability of deferred tax assets and international double taxation	
Impact: Medium	Probability of occurrence: Low
<p>● Risks</p> <p>If Canon is required to revise its estimates of taxable income due to non-achievement of targets in its business plan due to deterioration in the business environment, or if there are changes in the tax system that result in changes in tax rates, Canon may need to revise deferred tax assets, which may adversely affect Canon's operating results.</p> <p>In addition, if differences of opinion arise between Canon and the tax authorities of other countries or regions, international double taxation may occur, which may adversely affect Canon's operating results and financial position.</p>	
<p>☆ Response and Opportunities</p> <p>Canon regularly checks to promptly identify factors that may affect deferred tax assets, which may affect the taxable income of Canon and Canon subsidiaries, and changes in the tax system of each country and territory.</p> <p>In addition, the Base Erosion and Profit Shifting (BEPS) Project was launched by the Organization for Economic Cooperation and Development (OECD), which was commissioned by the G20, in response to the political issue of international tax avoidance due to excessive tax planning by some multinational companies. Following the release of the final report on BEPS in October 2015, tax laws and tax treaties have been revised in various countries and regions.</p> <p>Furthermore, in recent years, to address tax challenges arising from the digitalization of the economy, an agreement has been reached within the OECD/IF on the introduction of a system for allocating taxing rights to market jurisdictions and the implementation of a global minimum tax regime.</p> <p>Among these, the global minimum tax regime has been progressively adopted by various countries, and in Japan, it was legislated through the 2023 Tax Reform enacted on March 28, 2023.</p> <p>In light of these efforts to strengthen the international tax system, Canon has developed a tax governance system in order to reduce double taxation risk. Together with Canon subsidiaries, Canon has taken measures to respond to changes in tax systems and tax administration execution in each country and area. At the same time, Canon have revised its policies related to international tax as appropriate based on the progress of various OECD reports and the development of new international tax rules to address tax issues associated with the digitization of the economy.</p>	

(iii) -7. Risks related to retirement benefit accounting	
Impact: Medium	Probability of occurrence: Low
<p>● Risks</p> <p>Canon and certain subsidiaries have defined benefit pension plans and recognize accrued retirement and pension expenses by actuarial calculation. Actuarial calculations are based on assumptions such as the discount rate, expected rate of return, salary increase rate, and mortality rate. Actuarial losses arising from differences between these assumptions and actual results are amortized regularly over the average remaining service years of employees and included in pension expenses. Although Canon believes that these actuarial assumptions are appropriate, deviations from the assumptions arising from events that are difficult to predict, such as a decrease in discount rates due to a decline in interest rates and a decrease in pension assets due to a deterioration in investment income, may lead to an increase in actuarial losses and adversely affect future operating results.</p>	
<p>☆ Response and Opportunities</p> <p>Canon reviews and implements the pension plan as appropriate, taking into account the pension funding situation in each country and area, government regulations, and the personnel system.</p>	

4. Management Analysis of Financial Position, Operating Results and Cash Flows

(1) Summary of operating results

A summary of the financial position, operating results and cash flow (Hereinafter referred to as "Operating Results ") of Canon Group (Canon Inc., consolidated subsidiaries and affiliates accounted for by the equity method) for the consolidated fiscal year is as follows.

(i) Operating Results and Financial Position

(Economic Environment Surrounding Management)

Looking back at 2025, the global economy continued to recover moderately overall, even as the impact of U.S. tariffs was observed. By region, in the U.S., although inflation advanced due to the impact of tariffs and other factors, personal consumption remained firm throughout the year. In Europe, although labor market conditions and income growth supported personal consumption, the economic recovery remained modest. In China, real estate investment continued to stagnate, and personal consumption slowed as the effects of consumer stimulus measures diminished. In other emerging markets, economic conditions remained firm overall, as domestic demand was steady thanks to fiscal policies implemented in each country and exports also remained at high levels. In Japan, personal consumption continued to recover moderately, supported by stable labor market conditions.

In the markets in which Canon operates, demand for office multifunction devices (MFDs) and commercial printing softened overall, particularly in the U.S., where sluggish market conditions continued due to the impact of tariffs, resulting in postponement of investments. The market for laser printers continued to shrink, mainly in Europe and China. For medical equipment, the market remained strong in the U.S. and emerging markets, while in Japan, the market continued to shrink due to deteriorating financial conditions at hospitals. For cameras, demand for mirrorless cameras continued to expand, and the market for network cameras remained firm in each region. As for the semiconductor lithography equipment, while the recovery of demand for memory devices for smartphones and PCs was delayed and there was also a tendency for investments in power semiconductors to be postponed, AI-related demand continued to expand. For FPD (Flat Panel Display) lithography equipment, demand increased thanks to large investments in panels for computer monitors and digital device screens, as well as additional investments for smartphone panels driven by advancements in functionality.

The average value of the yen against the U.S. dollar for the year was ¥149.71, a year-on-year appreciation of approximately ¥2. The average value of the yen against the euro was ¥169.41, a year-on-year depreciation of approximately ¥5.

(Operating results)

Management Indicators	Billions of yen		
	2025	2024	Change(%)
Net sales	4,624.7	4,509.8	2.5%
Gross profit	2,162.0	2,143.1	0.9%
Operating expenses	1,706.6	1,863.3	(8.4%)
Operating profit	455.4	279.8	62.8%
Other income (deductions):	26.7	21.4	24.6%
Income before income taxes	482.1	301.2	60.1%
Net income attributable to Canon Inc.	332.1	160.0	107.5%

Net income attributable to Canon Inc. shareholders per share

Basic	367.48	165.53	122.0%
Diluted	367.25	165.44	122.0%

As for the performance in 2025, although sales of the Printing Business Unit decreased compared to the previous year due to the continuing trend of postponing investment in Europe and the U.S., the Medical Business Unit remained solid in the U.S. and emerging markets. Sales were strong for network cameras, a market that continues to grow, and for cameras that captured demand such as for video shooting. As a result, net sales for 2025, the final year of Phase VI of the Excellent Global Corporation Plan, increased by 2.5% year-on-year to ¥4,624.7 billion, achieving record-high sales for the second consecutive year.

Although gross profit as a percentage of net sales decreased by 0.8 points year-on-year to 46.7%, gross profit increased by 0.9% year-on-year to ¥2,162.0 billion due to the sales increase.

Operating expenses decreased by 8.4% year-on-year to ¥1,706.6 billion, reflecting the absence of the impairment loss on goodwill recorded in the Medical Business Unit in 2024, as well as the effects of structural reforms overseas and thorough expense management in 2025.

As a result, operating profit increased by 62.8% year-on-year to ¥455.4 billion, income before income taxes increased by 60.1% year-on-year to ¥482.1 billion, and net income attributable to Canon Inc. increased by 107.5% year-on-year to ¥332.1 billion. Profit increased at each level compared with the previous year's adjusted profit excluding impairment loss on goodwill as well.

Basic net income attributable to Canon Inc. shareholders per share was ¥367.48 for the year, a year-on-year increase of ¥201.95.

(Operating results by segment)

The following information is based on segment information. For details of segment information, please refer to "V. Financial Information, 1. Consolidated Financial Statements, etc., (1) Notes to Consolidated Financial Statements, Note 23. Segment information."

Printing Business Unit

Management Indicators	Billions of yen		
	2025	2024	Change(%)
Production	436.3	440.7	(1.0%)
Office	1,061.3	1,052.5	0.8%
Prosumer	990.3	1,022.3	(3.1%)
Total sales to external customers	2,487.9	2,515.5	(1.1%)
Inter segment	6.5	7.2	(9.3%)
Total Sales	2,494.4	2,522.7	(1.1%)
Cost of sales and operating expenses	2,238.6	2,232.8	0.3%
Operating profit	255.8	289.9	(11.8%)
Income before income taxes	273.6	304.1	(10.0%)

In the Printing Business Unit, sales of equipment for the production printing market decreased year-on-year due to the impact of postponed investments in the U.S. As for office MFDs, although there was an increase in sales of imageFORCE, a new series launched in the second half of the year, unit sales decreased overall mainly in Europe and the U.S. As for inkjet printers, unit sales increased compared with the previous year due to solid sales of refillable ink tank models. Sales of laser printers decreased year-on-year mainly in Europe and China, where market shrinkage continued.

As a result, total sales for the Printing Business Unit decreased by 1.1% year-on-year to ¥2,494.4 billion, while income before income taxes decreased by 10.0% year-on-year to ¥273.6 billion.

Medical Business Unit

Management Indicators	Billions of yen		
	2025	2024	Change(%)
Total sales to external customers	579.7	568.3	2.0%
Inter segment	0.9	0.5	64.1%
Total Sales	580.6	568.8	2.1%
Cost of sales and operating expenses	547.8	709.2	(22.8%)
Operating profit	32.8	(140.4)	-
Income before income taxes	34.1	(139.5)	-

In the Medical Business Unit, sales were firm overall. Sales in Japan and Europe were sluggish, but in the U.S., sales through newly contracted distributors began in earnest in the second half of the year, and sales also increased in emerging markets such as the Middle East and South America, which are priority regions for the business unit.

As a result, total sales for the Medical Business Unit increased by 2.1% year-on-year to ¥580.6 billion, while adjusted income before income taxes excluding impairment loss on goodwill increased by 33.1% year-on-year to ¥34.1 billion, partly thanks to the ongoing efforts of the Medical Business Innovation Committee.

Imaging Business Unit

Management Indicators	Billions of yen		
	2025	2024	Change(%)
Cameras	625.4	579.6	7.9%
Network cameras and Others	429.1	357.4	20.1%
Total sales to external customers	1,054.5	937.0	12.5%
Inter segment	0.4	0.4	6.6%
Total Sales	1,054.9	937.4	12.5%
Cost of sales and operating expenses	882.0	786.1	12.2%
Operating profit	172.9	151.3	14.3%
Income before income taxes	176.8	154.3	14.5%

In the Imaging Business Unit, sales increased due to the favorable performance of products for video creators such as the EOS R50 V and PowerShot V1, which captured demand from younger customers, as well as increased sales of the full-frame model EOS R6 Mark III launched at the end of the fiscal year. Sales of network cameras also grew steadily during the fiscal year, partly thanks to the introduction of new products equipped with newly developed chips that significantly improved functionality.

As a result, total sales for the Imaging Business Unit increased by 12.5% year-on-year to ¥1,054.9 billion, while income before income taxes increased by 14.5% year-on-year to ¥176.8 billion.

Industrial Business Unit

Management Indicators

Billions of yen

	2025	2024	Change(%)
Optical equipment	256.3	253.2	1.2%
Industrial machinery	101.6	92.7	9.7%
Total sales to external customers	357.9	345.9	3.5%
Inter segment	3.2	5.8	(45.4%)
Total Sales	361.1	351.7	2.7%
Cost of sales and operating expenses	298.6	282.8	5.6%
Operating profit	62.5	68.9	(9.3%)
Income before income taxes	64.8	70.4	(7.9%)

In the Industrial Business Unit, although demand for semiconductor lithography equipment for producing memory and power semiconductors was weak, AI-related demand remained strong, and unit sales of Canon's advanced back-end lithography systems, which have become the industry standard, exceeded those of the previous year. As for FPD lithography equipment, unit sales also exceeded those of the previous year as the business unit captured additional investment demand resulting from higher functionality in smartphone panels.

As a result, total sales for the Industrial Business Unit increased by 2.7% year-on-year to ¥361.1 billion, while income before income taxes decreased by 7.9% year-on-year to ¥64.8 billion partly due to a negative impact from the product mix.

(Financial Position)

Billions of Yen

	December 31, 2025	December 31, 2024	Change
Total assets	6,135.0	5,766.2	368.8
Total liabilities	2,360.9	2,121.2	239.7
Canon Inc. shareholders' equity	3,491.8	3,380.3	111.5
Noncontrolling interests	282.3	264.8	17.5
Total equity	3,774.1	3,645.1	129.1
Total liabilities and equity	6,135.0	5,766.2	368.8
Canon Inc. shareholders' equity as a percentage of total assets (%)	56.9%	58.6%	(1.7%)

As of December 31, 2025, total assets increased by ¥368.8 billion to ¥6,135.0 billion, compared to the end of the previous year, mainly from an increase in foreign-currency-denominated assets due to the depreciation of the yen, and an increase in cash and cash equivalents.

Total liabilities increased by ¥239.7 billion to ¥2,360.9 billion from the end of the previous year mainly due to additional borrowing to meet working capital requirements.

The balance of total equity increased by ¥129.1 billion to ¥3,774.1 billion compared to the end of the previous year, due to an increase in net income attributable to Canon Inc. shareholders, and an increase in foreign currency translation adjustments caused by the depreciation of the yen, partially offset by dividends to Canon Inc. shareholders and three rounds of treasury stock repurchases.

As a result, Canon Inc.'s shareholders' equity as a percentage of total assets decreased by 1.7 points to 56.9% compared to the end of the previous year.

(ii) Cash flows

Adding the effects of foreign exchange fluctuations to the cash and cash equivalents for the fiscal year ended December 31, 2025 increased by ¥84.4 billion from the previous fiscal year to ¥586.0 billion.

(Cash flows from operating activities)

Cash flow from operating activities resulted in an inflow of ¥475.9 billion, a year-on-year decrease of ¥130.9 billion, as decreases in inventories resulting from efforts to optimize work in process were more than offset by a decrease in trade payables due in part to revisions to payment terms with suppliers.

(Cash flows from investing activities)

Cash flow from investing activities were lower by ¥59.9 billion year-on-year, totaling ¥237.4 billion. Although the amount of fixed asset purchases increased, including investment in a new plant for semiconductor lithography equipment at the Utsunomiya Office, the increase was more than offset by proceeds from sales of property, plant and equipment and by a decrease in acquisition-related cash outflows from the previous year (which included the acquisition of Primagest, Inc.).

(Cash flows from financing activities)

Cash flow from financing activities resulted in an outflow of ¥179.2 billion, a decrease of ¥46.8 billion compared with the previous year. This was mainly due to an increase in loans in response to higher working capital requirements, despite proactive shareholder return measures, such as dividend increases and three rounds of treasury stock repurchases.

Free cash flow as cash flows from operating activities less cash flows from investing activities for 2025 decreased by ¥71.0 billion to ¥238.5 billion.

For further information, please refer to “(2) Analysis and evaluation of the status of operating results, etc., from management’s perspective (v) Liquidity and capital resources”.

(iii) Results of production, orders, and sales

a. Production results

The actual production results by segment for the current consolidated fiscal year are as follows:

Segment name	Amount (Millions of yen)	(Prior fiscal year) (%)
Printing	2,049,770	95.6
Medical	611,374	102.4
Imaging	1,032,494	117.9
Industrial	346,610	94.1
Others and Corporate	62,044	97.2
Eliminations	(102,044)	-
Total	4,000,248	101.5

Notes 1. The amounts are calculated based on the selling price.

2. The amounts do not include consumption tax, etc.

b. Orders results

The production of Canon Group is mainly based on the estimated production taking into account the demand forecast between the Company and each sales company, so the ratio of production to order in sales is small. Therefore, actual orders received are not stated.

c. Sales results

Actual sales results by segment in the current consolidated fiscal year are as follows:

Segment name	Amount (Millions of yen)	(Prior fiscal year) (%)
Printing	2,494,398	98.9
Medical	580,622	102.1
Imaging	1,054,900	112.5
Industrial	361,128	102.7
Others and Corporate	237,116	101.4
Eliminations	(103,437)	-
Total	4,624,727	102.5

Notes 1. The amounts do not include consumption tax, etc.

2. Sales to major customers and the ratio of such sales to total sales for the past two fiscal years are as follows:

Major customers	2025		2024	
	Sales (Millions of yen)	Percentage (%)	Sales (Millions of yen)	Percentage (%)
HP Inc.	444,740	9.6	471,604	10.5

(2) Analysis and evaluation of the status of operating results, etc., from management's perspective

The following is an overview of Canon Group's operating results and financial position from the management's perspective. Forward-looking statements contained in this document are judgments made as of the date of submission of the Annual Securities Report (March 25, 2026).

Introduction

Canon is a group of companies operating printing, medical, imaging, industrial and other products worldwide. In addition, its corporate philosophy is to contribute to the prosperity of the world and the well-being of humanity by achieving corporate growth and development.

(i) Key performance indicators

Canon aims to become a truly global excellent company, and has established the following key performance indicators (the "KPIs") for its business management in pursuit of this goal.

(Net sales and profit ratio)

One indicator upon which Canon's management places strong emphasis is revenue. The following are some of the KPIs related to revenue that management considers to be important.

Net sales is one such KPI. Canon derives net sales primarily from the sale of products and, to a lesser extent, provision of services associated with its products. Sales vary depending on such factors as product demand, the number and size of transactions within the reporting period, market acceptance for new products, and changes in sales prices. Other factors involved are market share and market environment. In addition, management considers the evaluation of net sales by product to be important for the purpose of assessing Canon's sales performance in various products, taking into account recent market trends.

Gross profit ratio is also positioned as an important KPI that indicates the value creation capability of Canon's business activities as well as the soundness of earnings structure. Not only sales growth, but this metric also directly reflects the profitability of the business, including pricing strategy and cost structure, and can be effective in evaluating the quality of growth.

Operating profit to net sales ratio, income before income taxes to net sales ratio, and R&D expense to net sales ratio are also considered to be KPIs by Canon. From this aspect, Canon is focusing on two areas for improvement. Canon is striving to control and reduce its selling, general and administrative expenses as its first key point. Secondly, Canon's R&D policy is designed to maintain adequate spending in core technology to sustain Canon's leading position in its current business areas and to exploit opportunities in other markets. Canon believes such investments will create the basis for future success in its business and operations.

(Cash flow management)

Canon also places significant emphasis on cash flow management. The following are the KPIs relating to cash flow management that Canon's management believes to be important.

Inventory turnover measured in days is a KPI as it measures the efficiency of supply chain management. Inventories have inherent risks of becoming obsolete, physically damaged or otherwise decreasing significantly in value, which may adversely affect Canon's operating results. To mitigate these risks, management believes that it is crucial to continue reducing inventories by shortening production lead times in order to promptly collect product related expenses, while maintaining finished goods at appropriate level in order to avoid losing potential sales opportunities.

The debt to total assets ratio is also one of the KPIs. For a manufacturing company like Canon, it generally takes considerable amount of time to bear fruit from the business due to lead times required for R&D, manufacturing and sales. Therefore, management believes that it is important to build sufficient financial strength. Canon will continue to maintain liquidity and manage capital investments within the cash flow generated from operation, however it is possible that Canon utilizes debt following a decision to invest on a large scale for future growth.

The equity ratio, which indicates the proportion of shareholders' equity to total assets, is another KPIs. Having ample shareholders' equity allows to continue making high-level investments from a long-term perspective, and enables stable business operations that are not shaken by short-term performance declines. Ensuring financial stability is particularly important for Canon which places a strong emphasis on R&D activities. On the other hand, Canon will also pay attention to optimizing its capital structure, such as effectively utilizing debt for growth investments.

(Return on equity)

Return on Canon Inc. shareholders' equity, calculated as the ratio of net income divided by shareholders' equity, is one of the KPIs for Canon. While working to improve profitability through a review of its business structure and enhanced cost efficiency, Canon will also seek to improve asset efficiency by optimizing inventory levels and consolidating production sites. In addition, while maintaining financial soundness, Canon will make growth investments and appropriately utilize debt to build an optimal capital structure, thereby enhancing the profitability of shareholders' equity.

(ii) Critical accounting policies and estimates

The consolidated financial statements are prepared in accordance with U.S. generally accepted accounting principles ("U.S. GAAP") and based on the selection and application of significant accounting policies which require management to make significant estimates and assumptions. These estimates and assumptions include future market conditions, net sales growth rate, gross margin and discount rate. Though Canon believes that the estimates and assumptions are reasonable, actual future results may differ from these estimates and assumptions. In addition, actual results and outcomes may differ from management's estimates and assumptions due to pandemic, geopolitical risk and economic slowdown risk in response to inflation. Canon believes that the following are the more critical judgment areas in the application of its accounting policies that currently affect its financial condition and results of operations.

a. Impairment of long-lived assets

Long-lived assets, such as property, plant and equipment, and acquired intangibles subject to amortization, are reviewed for impairment based on ASC 360 whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. If the carrying amount of the asset exceeds its estimated sum of undiscounted future cash flows, an impairment loss is recognized in the amount by which the carrying amount of the asset exceeds the fair value of the asset. Determining the fair value of the asset involves the use of estimates and assumptions.

b. Property, plant and equipment

Property, plant and equipment are stated at cost less accumulated depreciation. Depreciation is calculated principally by the declining-balance method, except for certain assets which are depreciated by the straight-line method over the estimated useful lives of the assets.

c. Inventories

Inventories are stated at the lower of cost or net realizable value. Cost is determined by the average method for domestic inventories and principally by the first-in, first-out method for overseas inventories.

d. Leases

As for lessor accounting, Canon provides leasing arrangements to its customers primarily for the sale of office products. Revenue from the sale of these products under sales-type leases is recognized at the inception of the lease. Interest income on sales-type leases and direct-financing leases is recognized over the life of each respective lease using the interest method. Leases not qualifying as sales-type leases or direct-financing leases are accounted for as operating leases and related revenue is recognized ratably over the lease term. When product leases are bundled with maintenance contracts, revenue is allocated based upon the estimated standalone selling prices of the lease and non-lease components. Lease components generally include product and financing while non-lease components generally consist of maintenance contracts and supplies. Some of the contracts include options to extend or to terminate the lease. Canon takes such options into account to determine the lease term when it is reasonably certain that customers will exercise these options. The majority of Canon's lease contracts do not contain bargain purchase options for their customers.

As for lessee accounting, Canon has operating and finance leases for various assets including office buildings, warehouses, employees' accommodations, and vehicles. Canon determines if an arrangement is a lease at the inception of each contract. Some of the contracts include options to extend or to terminate the lease. Canon takes such options into account to determine the lease term when it is reasonably certain that it will exercise these options.

Canon's lease arrangements do not contain material residual value guarantees or material restrictive covenants. As a rate implicit in the most of Canon's leases cannot be determined, Canon uses incremental borrowing rates based on the information available at commencement to determine the present values of lease payments. Canon has lease contracts with lease and non-lease components, which are accounted for separately. Canon allocates the consideration in the lease contract to the lease and non-lease components based upon the estimated standalone prices. Costs associated with operating lease assets are recognized on a straight-line basis over the term of the lease.

e. Business combinations

Acquisitions are accounted for using the acquisition method of accounting. The acquisition method of accounting requires the identification and measurement of all acquired tangible and intangible assets and assumed liabilities, excluding acquired contract assets and contract liabilities, at their respective fair values, as of the acquisition date. The determination of the fair value of net assets acquired involves significant judgment and estimates, such as future cash flow projections, appropriate discount and capitalization rates and other estimates based on available market information. Estimates of future cash flows are based on a number of factors including operating results, known and anticipated trends, as well as market and economic conditions. Acquired contract assets and contract liabilities are recognized and measured in accordance with ASC 606 "Revenue from Contracts with Customers".

f. Goodwill and Other Intangible Assets

Goodwill and other intangible assets with indefinite useful lives are not amortized, but are instead tested for impairment annually in the fourth quarter of each year, or more frequently if indicators of potential impairment exist. All goodwill is assigned to the reporting unit or units that benefit from the synergies arising from each business combination. If the carrying amount assigned to the reporting unit exceeds the fair value of the reporting unit, Canon recognizes an impairment loss in an amount equal to that excess, limited to the total amount of goodwill allocated to that reporting unit. Fair value of a reporting unit is determined primarily based on the discounted cash flow analysis which involves estimates of projected future cash flows and discount rates. Estimates of projected future cash flows are primarily based on Canon's forecast of future growth rates. Estimates of discount rates are determined based on the weighted average cost of capital, which considers primarily market and industry data as well as specific risk factors. Based on the impairment test performed in the fourth quarter of 2024, Canon recognized a goodwill impairment loss for the Medical Reporting unit, as its fair value was below its carrying amount. In contrast, the impairment test conducted in the fourth quarter of 2025 indicated that the fair value of each reporting unit exceeded its carrying amount, and therefore no impairment was recognized. For further information, please refer to "V. Financial Information, 1. Consolidated Financial Statements, etc. (1) Consolidated Financial Statements, Note 8 Goodwill and Other Intangible Assets" and "Note 22 Fair Value Measurement". A significant amount of goodwill was allocated to the Medical Reporting Unit, which was ¥405,882 million in the consolidated balance sheet for the current fiscal year. Future cash flows for the Medical Reporting Unit were based on a mid-term management plan that considered the future market growth of medical equipment and growth in geographies where Canon operates its medical business.

Intangible assets with finite useful lives consist primarily of software, trademarks, patents and developed technology, license fees and customer relationships, which are amortized using the straight-line method. The estimated useful lives of software are primarily from 3 years to 9 years, trademarks are 15 years, patents and developed technology are from 5 years to 21 years, license fees are 7 years, and customer relationships are from 10 years to 19 years, respectively.

g. Income tax uncertainties

Canon considers many factors when evaluating and estimating income tax uncertainties. These factors include an evaluation of the technical merits of the tax positions as well as the amounts and probabilities of the outcomes that could be realized upon settlement. The actual resolutions of those uncertainties will inevitably differ from those estimates, and such differences may be material to the financial statements.

h. Valuation of deferred tax assets

Canon assesses the recoverability of deferred tax assets periodically. Realization of Canon's deferred tax assets is principally dependent upon its achievement of projected future taxable income. Canon's judgments regarding future profitability may change due to future market conditions, its ability to continue to successfully execute its operating activities and other factors. Any changes in these factors may require possible recognition of valuation allowances. When Canon determines that certain deferred tax assets may not be recoverable, the amounts, which may not be realized, are charged to income tax expense and will adversely affect net income.

i. Employee retirement and severance benefit plans

Canon has significant employee retirement and severance benefit obligations that are recognized based on actuarial valuations. Inherent in these valuations are key assumptions, including discount rates and expected return on plan assets. Management must consider current market conditions, including changes in interest rates, in selecting these assumptions. Other assumptions include assumed rate of increase in compensation levels, mortality rate. Changes in assumptions inherent in the valuation are reasonably likely to occur from period to period.

Actual results that differ from the assumptions are accumulated and amortized over future periods and, therefore, generally affect future pension expenses. While management believes that the assumptions used are appropriate, the differences may affect employee retirement and severance benefit costs in the future.

In preparing its financial statements for 2025, Canon estimated a weighted-average discount rate used to determine benefit obligations of 2.9% for Japanese plans and 4.3% for foreign plans and a weighted-average expected long-term rate of return on plan assets of 3.2% for Japanese plans and 5.3% for foreign plans. In estimating the discount rate, Canon uses available information about rates of return on high-quality fixed-income government and corporate bonds currently available and expected to be available during the period to the maturity of the pension benefits. Canon establishes the expected long-term rate of return on plan assets based on management's expectations of the long-term return of the various plan asset categories in which it invests. Management develops expectations with respect to each plan asset category based on actual historical returns and its current expectations for future returns.

Decreases in discount rates lead to increases in actuarial pension benefit obligations which, in turn, could lead to an increase in service cost and amortization cost through amortization of actuarial gain or loss, a decrease in interest cost, and vice versa. For 2025, a decrease of 50 basis points in the discount rate increases the projected benefit obligation by approximately ¥66.2 billion. The net effect of changes in the discount rate, as well as the net effect of other changes in actuarial assumptions and experience, is deferred until subsequent periods.

Decreases in expected returns on plan assets may increase net periodic benefit cost by decreasing the expected return amounts, while differences between expected value and actual fair value of those assets could affect pension expense in the following years, and vice versa. For 2025, a decrease of 50 basis points in the expected long-term rate of return on plan assets would increase approximately ¥6.3 billion in net periodic benefit cost. Canon multiplies management's expected long-term rate of return on plan assets by the value of its plan assets to arrive at the expected return on plan assets that is included in pension expense. Canon defers recognition of the difference between this expected return on plan assets and the actual return on plan assets. The net deferred amount affects future pension expense.

Canon recognizes the funded status (i.e., the difference between the fair value of plan assets and the projected benefit obligations) of its pension plans in its consolidated balance sheet, with a corresponding adjustment to an accumulated other comprehensive income (loss), net of tax.

j. Revenue recognition

Canon generates revenue mainly through the sale of products of the Printing Business Unit, the Medical Business Unit, the Imaging Business Unit and the Industrial Business Unit, supplies and related services under separate contractual arrangements. Revenue is recognized when, or as, control of promised goods or services transfers to customers in an amount that reflects the consideration to which Canon expects to be entitled in exchange for transferring these goods or services.

Revenue from sales of products of the Printing Business Unit, such as office MFDs, laser printers and inkjet printers, and the Imaging Business Unit, such as digital cameras, is primarily recognized at a point in time upon shipment or delivery, depending upon when the customer obtains control of these products.

Revenue from sales of equipment of the Medical Business Unit and the Industrial Business Unit that are sold with customer acceptance provisions related to their functionality, including certain medical equipment such as CT systems and MRI systems, and lithography equipment such as semiconductor and FPD lithography equipment, is recognized at a point in time when the equipment is installed at the customer site and the agreed-upon specifications are objectively satisfied and confirmed.

Most of Canon's service revenue is generated from maintenance service in the products of the Printing Business Unit and the Medical Business Unit which is recognized over time. For the service contracts of the Printing Business Unit, the customer typically pays a variable amount based on usage, a stated fixed fee or a stated base fee plus a variable amount which frequently includes the provision of consumables as well as break fix activities. The majority portion of service revenue from the products of the Printing Business Unit is recognized as billed since the invoiced amount directly correlates with the value to the customer of the underlying performance obligation delivered to date. For the service contracts of the Medical Business Unit, the customer typically pays a stated fixed fee for the stand ready maintenance service and revenue is recognized ratably over the contract period.

The majority of service arrangements for the products are executed in combination with related products. Transaction prices for products and services need to be allocated to each performance obligation on a relative standalone selling price basis where judgements are required. Canon estimates the standalone selling price using a range of prices that would meet the allocation objective based on all the information that is reasonably available including market conditions and other observable inputs. If transaction prices of the product or service contracts are not within the acceptable range then the revenue is subject to allocation based on the estimated standalone selling prices. Canon recognizes the incremental costs of obtaining a contract as an expense when related products of the Printing Business Unit are sold.

Revenue from sales of certain industrial equipment which do not have alternative use and for which Canon has enforceable right to payment to the customers for the performance completed to date is recognized over time with progress towards completion measured using the cost based input method as the basis to recognize revenue and an estimated margin. Provisions for estimated losses on uncompleted contracts are made in the period in which such losses become evident. Changes in job performance, job conditions, estimated margin and final contract settlements may result in revisions to projected costs and revenue and are recognized in the period in which the revisions to estimates are identified and the amounts can be reasonably estimated. Factors that may affect future project costs and margins include, production efficiencies, availability and costs of labor and materials. These factors can impact the accuracy of Canon's estimates and materially impact future reported revenue and cost of sales.

The transaction prices that Canon is entitled to receive in exchange for transferring goods or services to the customer include certain forms of variable consideration, including product discounts, customer promotions and volume-based rebates mainly for the products of the Imaging Business Unit, which are sold predominantly through distributors and retailers. Canon includes estimated amounts in the transaction price only to the extent it is probable that a significant reversal of cumulative revenue recognized will not occur when the uncertainty associated with the variable consideration is resolved. Variable consideration is estimated based upon historical trends and other known factors at the time of sale, and is subsequently adjusted in each period based on current information. In addition, Canon may provide a right of return on its products for a short time period after a sale. These rights are accounted for as variable consideration when determining the transaction price, and accordingly Canon recognizes revenue based on the estimated amount to which Canon expects to be entitled after considering expected returns.

Taxes collected from customers and remitted to governmental authorities are excluded from revenues in the consolidated statement of income.

k. Allowance for credit losses

Allowance for credit losses for trade and lease receivables is maintained for all customers based on ASC 326 “Financial Instruments – Credit Losses,” based on historical experiences of credit losses and reasonable and supportable forecasts. An additional reserve for individual accounts is recorded when Canon becomes aware of a customer’s inability to meet its financial obligations, such as in the case of bankruptcy filings. If circumstances related to customers change, estimates of the recoverability of receivables would be further adjusted. When all collection options are exhausted including legal recourse, the accounts or portions thereof are deemed to be uncollectable and charged against the allowance.

l. Environmental Liabilities

Liabilities for environmental remediation and other environmental costs are accrued when environmental assessments or remedial efforts are probable and the costs can be reasonably estimated, and are included in other noncurrent liabilities in the consolidated balance sheet. Such liabilities are adjusted as further information develops or circumstances change. Costs of future obligations are not discounted to their present values.

m. Recently Issued Accounting Guidance

Please refer to “V. Financial Information, 1. Consolidated Financial Statements, etc. (1) Consolidated Financial Statements, Note 1 (x) Recent Accounting Guidance”.

(iii) Analysis and examination of the consolidated operating results for the fiscal year ended December 31, 2025.

a. Sales

In the current business term, the global economy continued to recover moderately overall, even as the impact of U.S. tariffs was observed. Under these circumstances, although sales of the Printing Business Unit decreased compared to the previous year due to the continuing trend of postponing investment in Europe and the U.S., the Medical Business Unit remained solid in the U.S. and emerging markets. Sales were strong for network cameras, a market that continues to grow, and for cameras that captured demand such as for video shooting. As a result, net sales for 2025, the final year of Phase VI of the Excellent Global Corporation Plan, increased by 2.5% year-on-year to ¥4,624.7 billion, achieving record-high sales for the second consecutive year. Net sales of products and equipment totaled ¥3,673.2 billion, a year-on-year increase of 2.2%, while net sales of services totaled ¥951.5 billion, a year-on-year increase of 3.9%.

Overseas operations are significant to Canon’s operating results and generated 79.2% of total net sales in 2025. Such sales are denominated in the applicable local currencies and are subject to fluctuations in the value of the yen relative to those currencies. Despite efforts to reduce the impact of currency fluctuations on operating results, including localization of manufacturing in some regions along with procuring parts and materials from overseas suppliers, Canon believes such fluctuations have had and will continue to have a significant effect on its results of operations.

The average value of the yen during the year was ¥149.71 against the U.S. dollar, a year-on-year appreciation of approximately ¥2, and ¥169.41 against the euro, a year-on-year depreciation of approximately ¥5. The effects of foreign exchange rate fluctuations positively affected net sales by ¥6.9 billion in 2025. This impact consisted of approximately ¥35.8 billion favorable impact on EURO-denominated sales, and unfavorable impact of ¥23.1 billion on USD-denominated sales, as well as ¥5.8 billion on sales denominated in other currencies.

b. Cost of sales

Cost of sales principally reflects the cost of raw materials, parts and labor used by Canon in the manufacture of its products. A portion of the raw materials used by Canon is imported or includes imported materials. Many of these raw materials are subject to fluctuations in world market prices accompanied by fluctuations in foreign exchange rates that may affect Canon’s cost of sales. Other components of cost of sales include depreciation expenses, maintenance expenses, light and fuel expenses, and rent expenses. In 2025, although cost of sales increases were incurred due to the impact of U.S. tariffs, cost reduction efforts for components progressed steadily throughout the year. As a result, the ratio of cost of sales to net sales for 2025 was 53.3%, an increase of 0.8 points compared with 52.5% in 2024.

c. Gross profit

Canon's gross profit in 2025 increased by 0.9% to ¥2,162.0 billion from 2024. The gross profit to net sales ratio decreased by 0.8 points to 46.7%. The increase in the gross profit was mainly due to the sales increase.

d. Operating expenses

The major components of operating expenses are payroll, R&D, advertising expenses and other marketing expenses. Operating expenses in 2025 decreased by 8.4% year-on-year to ¥1,706.6 billion, reflecting the absence of the impairment loss on goodwill recorded in the Medical Business Unit in 2024, as well as the effects of structural reforms overseas and thorough expense management in 2025.

e. Operating profit

Operating profit in 2025 increased by 62.8% to ¥455.4 billion from 2024. The operating profit to net sales ratio increased by 3.6 points to 9.8% from 2024.

f. Other income (deductions)

Other income (deductions) for 2025 was a gain of ¥26.7 billion, an increase of ¥5.3 billion from 2024 mainly due to the favorable impact from receivables of foreign currencies and valuation of securities.

g. Income before income taxes

Income before income taxes in 2025 was ¥482.1 billion, an increase of 60.1% from 2024, and constituted 10.4% of net sales.

h. Income taxes

Income taxes in 2025 increased by ¥5.6 billion from 2024. The effective tax rate for 2025 was 25.7%, which was lower than the statutory tax rate in Japan. This resulted from a combination of factors such as the increase in tax credits of R&D expenses and the lower effective tax rates at foreign subsidiaries compared to the statutory tax rate in Japan.

i. Net income attributable to Canon Inc.

As a result, net income attributable to Canon Inc. in 2025 increased by 107.5% to ¥332.1 billion, which represents 7.2% of net sales.

(iv) Foreign operations and foreign currency transactions

Canon's marketing activities are performed by subsidiaries in various regions in local currencies, while the cost of sales is generally in yen. Given Canon's current operating structure, appreciation of the yen has a negative impact on net sales and the gross profit to net sales ratio. To reduce the financial risks from changes in foreign exchange rates, Canon utilizes derivative financial instruments, which consist principally of foreign currency exchange contracts.

The operating profit on foreign operation sales is usually lower than that from domestic operations because foreign operations consist mainly of marketing activities. Marketing activities are generally less profitable than production activities, which are mainly conducted by the Company and its domestic subsidiaries.

For further information, please refer to "V. Financial Information, 1. Consolidated Financial Statements, etc. (1) Consolidated Financial Statements, Note 23 Segment Information.

(v) Liquidity and capital resources

a. Basic Policy of Financial Activities

Canon's basic financial policy is to further enhance cash-generating capability and increase corporate value through proactive investments in growth areas.

The aim is to maximize cash flows by improving profitability through sales growth and by enhancing asset efficiency, thereby strengthening Canon's ability to generate cash that serves as the foundation for future growth. At the same time, while maintaining financial discipline, Canon will secure diversified funding options to support proactive investments in growth areas that form the core of each business's growth strategy.

Sources of Funds (Cash-In)

Canon's primary internal sources of funds are cash flows from operating activities and cash and cash equivalents. In addition, depending on funding requirements, Canon raise funds such as from borrowings from financial institutions and the issuance of bonds, and other financing options. When utilizing debt financing, Canon will select the most appropriate funding method from a range of options while taking into account financial discipline indicators such as the debt-to-equity (D/E) ratio and the debt-to-EBITDA ratio, with the aim of maintaining a sound financial position.

Use of Funds (Cash-Out)

The principal uses of funds are determined in accordance with the following priorities.

1. Investment for growth areas:

Canon will proactively invest in growth areas through capital expenditures and R&D investments in existing businesses. In addition, Canon will utilize M&As to expand the business domains of existing businesses.

2. Return to shareholders:

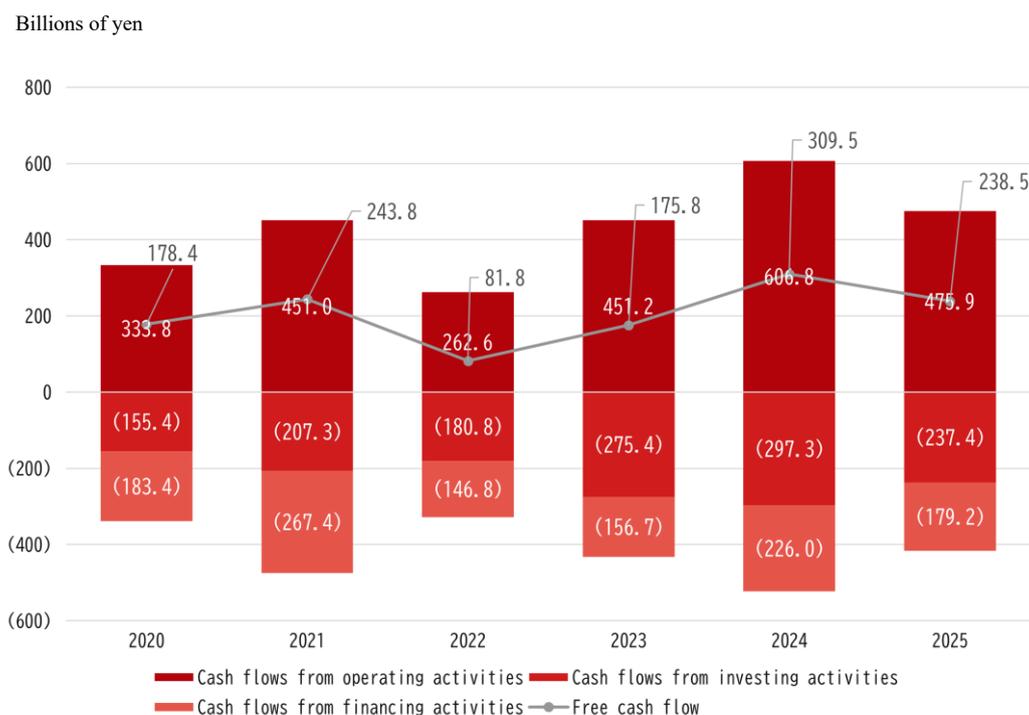

Taking into consideration medium-to long-term business performance prospects, planned future investments, cash flows and other factors, Canon will provide stable shareholder returns. Canon's basic dividend policy is progressive dividends, with a target payout ratio of approximately 40%, while maintaining the current dividend level. Treasury stock repurchases will be carried out flexibly, taking into account the financial condition, cash flows, and Canon's stock price level.

3. Strategic Investments:

As a flexible cash allocation reserve, Canon will utilize funds, as appropriate, for M&As, additional investments in growth areas, and supplementary shareholder returns.

b. Cash and cash equivalents

Changes in Cash Flows

Cash and cash equivalents increased by ¥84.4 billion to ¥586.0 billion in fiscal 2025 compared to the previous year. Canon's cash and cash equivalents are primarily denominated in Japanese yen and in U.S. dollars, with the remainder denominated in other currencies.

Net cash provided by operating activities

Net cash provided by operating activities for the fiscal year ended Dec 31, 2025 decreased by ¥ 130.9 billion from the previous fiscal year to ¥ 475.9 billion, as decreases in inventories resulting from efforts to optimize work in process were more than offset by a decrease in trade payables due in part to revisions to payment terms with suppliers. Cash flows from operating activities consist mainly of cash inflows from cash receipts from customers and cash outflows from payments of parts and materials, selling, general and administrative expenses, R&D expenses, and income taxes. The increase in cash inflows for the fiscal year ended Dec 31, 2025 was mainly due to an increase in cash collection from customers in line with the increase in net sales. There is no significant change in the Company's collection rate. The increase in cash outflows was mainly due to an increase in payments for parts and materials in line with the increase in sales and the revision of payment terms with suppliers. The increase in cash outflows due to the payment of corporate income taxes was due to an increase in taxable income.

Net cash used in investing activities

In the fiscal year ended Dec 31, 2025, purchases of fixed assets increased by ¥25.2 billion to ¥262.2 billion, mainly due to investments in a new plant for semiconductor lithography equipment at the Utsunomiya Office. Meanwhile, as the acquisition of Primagest, Inc. was carried out in 2024 and proceeds were also generated from the sale of fixed assets, net cash used in investing activities for the fiscal year ended Dec 31, 2025 decreased by ¥59.9 billion from the previous consolidated fiscal year to ¥237.4 billion.

Free cash flow

Canon defines "free cash flow" as cash flows from operating activities less cash flows from investing activities. Free cash flow for the fiscal year ended Dec 31, 2025 decreased by ¥71.0 billion to ¥238.5 billion as compared with ¥309.5 billion for fiscal 2024.

Canon's management places importance on cash flow management and frequently monitors this indicator. Furthermore, Canon's management believes that this indicator is significant in understanding Canon's current

liquidity and the alternatives of use in financing activities and believes that such indicator is beneficial to investors. Canon analyzes “Free Cash Flow”, a financial indicator other than U.S. GAAP together with the consolidated statement of cash flows and consolidated balance sheet in accordance with U.S. GAAP to clarify funding and capital resources. Adjustment sheet of “Free Cash Flow” and the most directly comparable measure calculated and presented in accordance with U.S. GAAP is set forth on the following table.

(Billions of yen)

	2025	2024	Change
Net cash provided by operating activities	475.9	606.8	(130.9)
Net cash used in investing activities	(237.4)	(297.3)	+59.9
Free cash flow	238.5	309.5	(71.0)
Net cash used in financing activities	(179.2)	(226.0)	+46.8
Effect of exchange rate changes on cash and cash equivalents	25.2	16.7	+8.5
Net change in cash and cash equivalents	84.4	100.2	(15.8)
Cash and cash equivalents at beginning of year	501.6	401.3	+100.3
Cash and cash equivalents at the end of the year	586.0	501.6	+84.4

Net cash used in financing activities

Cash flow from financing activities resulted in an outflow of ¥179.2 billion, a decrease of ¥46.8 billion compared with the previous year. This was mainly due to an increase in loans in response to higher working capital requirements, despite proactive shareholder return measures, such as dividend increases and three rounds of treasury stock repurchases. The company paid dividends in fiscal 2025 of ¥160.00 per share, representing an increase of ¥15 per share compared with the previous fiscal year.

To the extent Canon relies on external funding for its liquidity and capital requirements, it generally has access to various funding sources, including the issuance of additional share capital, issuance of corporate bond or loans. While Canon has been able to obtain funding from its traditional financing sources and from the capital markets, and believes it will continue to be able to do so in the future, there can be no assurance that adverse economic or other conditions will not affect Canon’s liquidity or long-term funding in the future.

Canon’s long-term debt mainly consists of bank borrowings and finance lease obligations.

Rating

In order to facilitate access to global capital markets, Canon obtains a credit rating from S&P Global Ratings (“S&P”). In addition, Canon maintains a rating from Rating and Investment Information, Inc. (“R&I”), a rating agency in Japan, for access to the Japanese capital market.

As of February 28, 2026, Canon’s debt ratings are: S&P: A (long-term), A-1 (short-term); and R&I: AA (long-term). Canon does not have any rating downgrade triggers that would accelerate the maturity of a material amount of its debt. A downgrade in Canon’s credit ratings or outlook could, however, increase the cost of its borrowings.

c. Optimization of inventory

Canon's policy for optimizing its current inventory level is to maintain an appropriate balance between minimizing working capital and avoiding the risk of inventory obsolescence, while ensuring that sales activities can continue even in the event of an unexpected natural disaster. The inventory turnover days of the Company were 63 days at the end of the fiscal year ended Dec 31, 2025 and 65 days at the end of the previous fiscal year. Although foreign-currency-denominated assets increased due to the depreciation of the yen, inventory levels declined as a result of thorough efforts to strengthen inventory management. In addition, net sales increased year on year, leading to a decrease in inventory turnover days.

d. Capital expenditures

Canon is committed to cash flow management to strengthen its financial base, including the stable generation of free cash flow by keeping the total amount within the range of depreciation expenses, while making investments that contribute to the aggressive expansion of business performance. Capital expenditures for the fiscal year ended Dec 31, 2025 decreased by ¥7.5 billion from ¥219.2 billion for the previous fiscal year to ¥211.7 billion. For the next fiscal year, the Company's capital investment is expected to be ¥230.0 billion yen as it continues to invest in growth.

e. Employer contributions to retirement benefit obligations

The amount of contributions to defined benefit pension plans by the Company for the fiscal year ended Dec 31, 2025 was ¥17.9 billion and that for the fiscal year ended Dec 31, 2024 was ¥28.9 billion. The amount of contributions to defined contribution pension plans by the Company for the fiscal year ended Dec 31, 2025 was ¥32.7 billion and that for the fiscal year ended Dec 31, 2024 was ¥29.3 billion. Contributions to the multi-employer pension plan in which some subsidiaries participate were ¥6.8 billion for the fiscal year ended Dec 31, 2025 and ¥6.4 billion for the fiscal year ended Dec 31, 2024.

f. Working capital

Working capital (current assets less current liabilities) for the fiscal year ended Dec 31, 2025 increased by ¥ 9.2 billion from ¥ 903.8 billion for the previous fiscal year to ¥ 913.0 billion. The increase in working capital was mainly due to a decrease of trade payable, which is a current liability. The Company recognizes that its working capital is sufficient for its foreseeable future needs. The capital requirements of the Company are based on the company-wide business plan, such as the level and timing of expenditures related to capital investment. The current ratio (ratio of current assets to current liabilities) was 1.54 for the fiscal year ended Dec 31, 2025 and 1.58 for the fiscal year ended Dec 31, 2024.

g. Return on the current period profit attributable to shareholders

Return on assets (calculated by dividing profit attributable to owners of the current period by the average of total assets at the end of the previous fiscal year and the end of the current fiscal year) was 5.6% for the current fiscal year and 2.9% for the previous fiscal year.

h. Shareholders' equity the current period profit attributable to owners of parent

Return on equity (calculated by dividing profit attributable to owners of the current period by the average shareholders' equity at the end of the previous fiscal year and the end of the current fiscal year) was 9.7% for the current fiscal year and 4.8% for the previous fiscal year.

i. Interest-bearing debt dependency

In the fiscal year ended Dec 31, 2025, long-term loan payable increased in line with an increase in working capital. As a result, the total of short-term loans payable, short-term operating lease liabilities, long-term loans payable, and long-term operating lease liabilities increased by ¥282.7 billion from ¥663.5 billion at the end of the previous fiscal year to ¥946.2 billion, and the interest-bearing debt dependency (the ratio of interest-bearing debt to total assets) increased by 3.9% from 11.5% in the previous fiscal year to 15.4%.

j. Shareholders' equity to total assets ratio

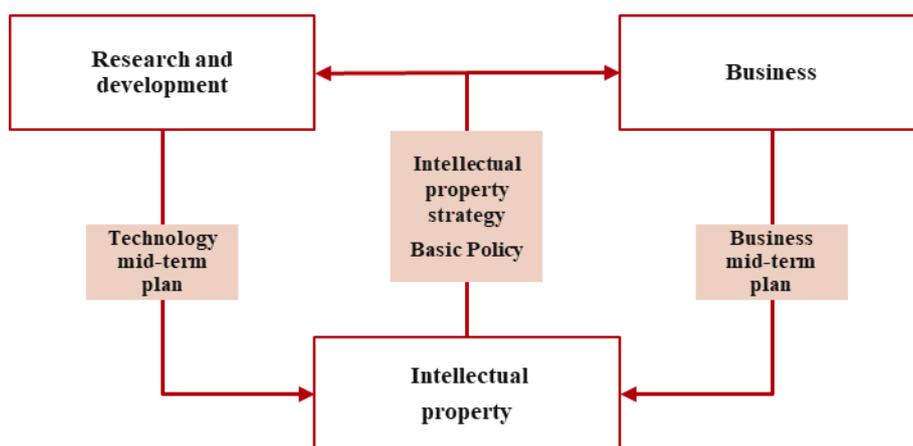

The shareholders' equity ratio (shareholders' equity divided by total assets) for the fiscal year ended Dec 31, 2025, was 56.9%. While it decreased by 1.7 percentage points from 58.6% in the previous fiscal year due to a reduction in shareholders' equity resulting from dividend increases and treasury stock repurchases, the ratio remains at a solid level overall, and the financial soundness has been maintained.

(vi) Intellectual Property Strategy

<Governance>

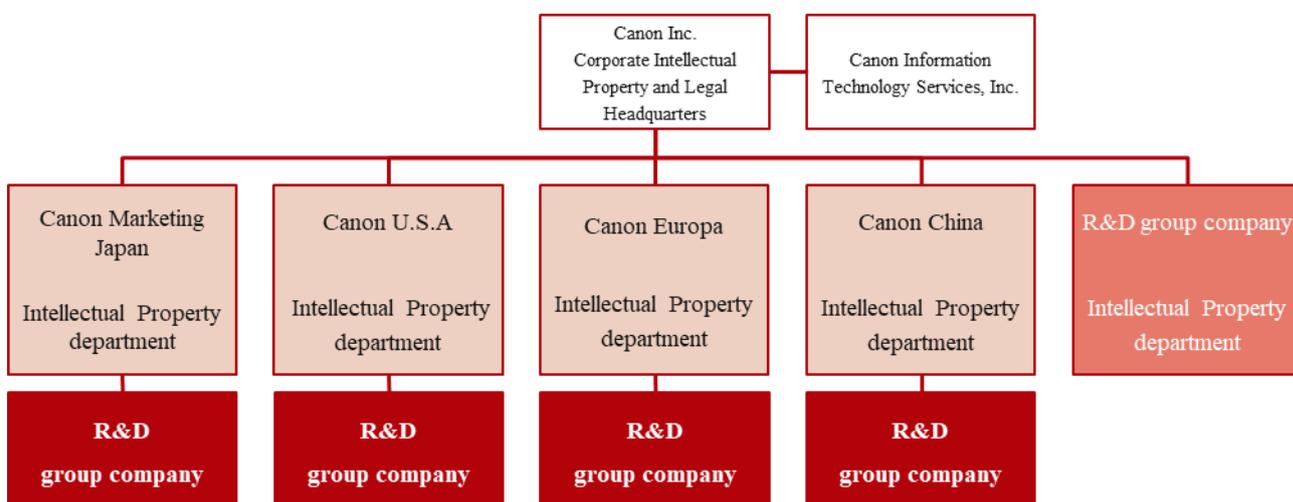

In Canon, the IP division is an organization directly under the CEO, and the Group Executive, Corporate Intellectual Property and Legal Headquarters serves as a dedicated executive. This allows the Group Executive, Intellectual Property Legal Affairs to directly report strategies and thoughts related to intellectual property, such as mid-term plans, to the CEO, and to convey and share important information regarding intellectual property with other executives during daily meetings. This structure enables swift management decision-making on intellectual property.

In addition, the Company regularly holds inter-divisional top meetings attended by executives who are also Company officers, including the heads of the Corporate Intellectual Property and Legal Headquarters, business divisions, and R&D divisions, to discuss intellectual property strategies and decide on actual intellectual property activities in the business and R&D divisions, thereby realizing timely intellectual property activities integrated with the business and R&D divisions. In this way, the cycle of formulating intellectual property strategies linked to the technology and business medium-term plans and incorporating the ideas of the IP division and investment in intellectual property into the technology and business medium-term plans is functioning.

In Canon, the Corporate Intellectual Property and Legal Headquarters and the intellectual property departments of each Group company have established global management rules that stipulate roles and responsibilities for handling intellectual property, as well as the process for formulating activity policies.

Through this system, the Corporate Intellectual Property and Legal Headquarters Division and each group company work together to maximize profits by conducting lawsuits and licensing activities as necessary, while controlling the intellectual property activities of the entire group and optimizing the intellectual property portfolio.

<Strategy>

1. Basic policy

Canon has developed as an R&D-oriented company that develops new markets and customers with attractive and high-quality products and services differentiated by its proprietary technologies. The intellectual property department places the highest priority on supporting business development, and with contributing to this as its mission, it prepares and executes intellectual property strategies by anticipating the future era.

Canon's four basic strategies for intellectual property strategies are as follows.

- (1) Patents on core competence technologies are not licensed as patents that protect business in the competitive domain, but are used to secure competitive advantages.
- (2) Canon secures freedom in R&D and business by using patents in collaborative fields related to common technologies (including standard technologies) such as communications, AI, and the Internet of Things for cross-licensing.
- (3) Canon respects the intellectual property rights of other companies. On the other hand, Canon takes a resolute stance against infringements of Canon's intellectual property rights.
- (4) Inventions that are difficult to verify and that cannot be easily reached by other companies are kept secret as know-how, thereby ensuring competitive advantage without allowing other companies to follow.

2. Basic Approach to the Intellectual Property Portfolio

Canon is formulating and implementing intellectual property strategies by assessing the social and economic trends of the next generation from various environmental changes. The IP portfolio is positioned as a platform to be fully utilized to support changing management and businesses and enhance enterprise value. The composition of the portfolio is constantly changing in tandem with management and operational strategies, looking ahead to the next era from various environmental changes (supply chain, economic security, environmental requirements, technological innovations through AI/IoT, expansion of digital services, etc.). In recent years, the Company has been particularly increasing the number of applications for technologies that support new businesses with growth potential and for common technologies that are expected to be used in common across business fields and that will also play an important role in license negotiations with other companies, and is working to strengthen its patent portfolio that will support future business.

Canon invests significant resources in acquiring intellectual property rights that are ahead of the times (for example, intellectual property rights related to AI/IoT technologies, common technologies, environment-related technologies, and intellectual property rights for partner creation), as well as acquiring intellectual property rights related to its core business competencies, and Canon is also preparing for negotiations with companies in various industries to create new businesses. By utilizing the intellectual property portfolio thus established, the Company is able to secure both competitive advantages and freedom for future business.

Canon holds approximately 80,000 patents and utility models worldwide (as of December 2025). Canon places importance on obtaining patents not only in Japan but also overseas, and Canon promotes the acquisition of patent rights based on business strategies, technological trends, and product trends in each region. In particular, the U.S. market is large, with many companies possessing the world's most advanced technologies. Therefore, the Company focuses on patent applications from the perspectives of both business expansion and technology alliances. As a result, Canon has maintained a ranking of top 10 in the number of patent registrations for 42 consecutive years in the U.S.

In addition, the value of the intellectual property portfolio is realized by utilizing it, and the active utilization of the intellectual property portfolio will provide maximum support for business development and contribute to the improvement of corporate value. A specific example of the use of this system is cross-licensing with other companies. This enables us to access intellectual property held by other companies. Canon has access to approximately 1 million patents of other companies worldwide, which gives it a high degree of freedom in R&D and business. Additionally, Canon Group has a number of patents in the useful collaboration domain that it has obtained from other companies, which enables it to obtain advantageous cross-licensing rights without granting the use of core competence patents, and thus maintains its competitive advantage in the business. In addition, the Company is controlling license fee payments by implementing thorough patent clearance and active portfolio utilization.

3. Intellectual Property Portfolio to Support Business Development

Under the Excellent Global Corporation Plan Phase VI (2021-2025), Canon has set a goal of strengthening the competitiveness of the printing, medical, imaging and industrial groups, and is also focusing on creating future businesses such as commercial printing, industrial printing, next-generation healthcare, advanced surveillance, next-generation semi-conductor manufacturing and digital solution services. In order for these businesses to develop and grow, the Intellectual Property Department has been focusing on the creation and acquisition of intellectual property rights related to core competence technologies such as optical technology, video processing, and analysis technology, technologies for cyber & physical systems incorporating AI/IoT, standard technologies, environmentally friendly technologies, and other areas. Furthermore, the Intellectual Property Department is proactively working to anticipate future trends and create and acquire intellectual property rights in promising technological fields, thereby supporting the company's continuous growth from an intellectual property perspective.

Under Phase VII of the Excellent Global Corporation Plan (2026-2030), which begins this year, Canon will systematically implement intellectual property activities to support the expansion of its business domains.

I. Printing Group

In addition to the commercial printing and industrial printing fields, Canon is creating intellectual property that supports cyber & physical systems that work with various equipment, including office equipment. In addition to the basic technologies for the controllers and engines commonly installed in various printer models and the basic technologies for the cloud that provides added value to printers, Canon is building a patent portfolio related to technologies that respond to the coming era, such as environmentally friendly printer technologies and new printing solutions utilizing artificial intelligence.

II. Medical Group

Canon has built an intellectual property portfolio that protects technologies that create new value, such as AI solutions that support the realization of precision medicine (individualized medicine), photon counting CT that is expected to improve diagnostic accuracy and reduce exposure dose compared to conventional equipment, and other technologies that are continuously provided to medical sites. In addition, through collaboration among group companies, the Group is combining its accumulated technologies, such as optical technologies and image processing technologies, with diagnostic imaging technologies and solutions unique to the medical field, and strengthening its intellectual property portfolio that supports business expansion into new domains such as healthcare IT and bioscience with diagnostic imaging as its core.

III. Imaging Group

In the fields of mirrorless cameras, video cameras, surveillance cameras, and other products, Canon is creating intellectual property by focusing on video-compatible technologies, network technologies, and AI application technologies that use machine learning to recognize subjects and their movements in addition to advanced optical technologies. In addition, the Group is strengthening its patents portfolio in the areas of next-generation entertainment and social safety and security, including 3D imaging technologies such as Volumetric Video and XR, and SPAD sensors that can capture subjects with clarity even in the dark over a few kilometers.

IV. Industrial Group

In addition to the production equipment such as lithography equipment, die bonders, organic electroluminescent display production equipment, and sputtering equipment, Canon is also focusing on the creation of intellectual property related to manufacturing solution services such as Lithography Plus.

In addition, the Company is strengthening its patent portfolio for Raman spectroscopy technology, which enables the recycling of black plastic, and Nanoimprint Lithography technology, which realizes low power consumption, and supporting the expansion of new businesses.

V. Technologies that open the way to the future

Canon is focusing on forming a patent portfolio of world-first and cutting-edge core technologies in fields researched by the Research & Development Department of the head office, including new materials and device technologies for sustainability such as ceramics for 3D printers, lead-free piezoelectric materials, and materials for all-solid-state batteries, as well as immersion diffraction elements for large telescopes and space science technologies such as artificial satellites.

VI. Standardization initiatives

Contribute to the development of technology worldwide by actively participating in standardization organizations in collaboration with standardization experts from overseas research laboratories. Canon is strengthening its intellectual property competitiveness by expanding its patent portfolio that comprises next-generation technology standards such as mobile communications (5G, etc.), wireless LAN (Wi-Fi, etc.), video compression (HEVC, VVC, etc.), wireless power transfer (Qi, etc.), and file formats (HEIF, OMAF, etc.).

4. Activities as an Opinion Leader

Canon is actively engaged in activities that lead the intellectual property industry, with the aim of contributing to the promotion of Japanese industry and, by extension, the promotion of industry around the world. In 2014, the Company established the License on Transfer (LOT) network together with other companies, and established a mechanism to protect member companies from unjust patent lawsuits by Patent Assertion Entities (PAEs) that do not conduct business and profit from threatening patent lawsuits. As of January 2026, more than 5,800 companies were members. In addition, since 2019, Canon has been participating as a partner in WIPO GREEN, a platform operated by the World Intellectual Property Organization (WIPO) to promote the use of environmental technologies, and Canon is working with WIPO to promote environmental technologies.

Canon is also focusing on building partnerships, and in 2023, it joined the AIST Innovation Ecosystem Program, which is implemented by the National Institute of Advanced Industrial Science and Technology (AIST) in cooperation with private companies, as a founding member. Canon supports the implementation of new technologies in society, and also gain access to the technologies created through the program, which leads to the promotion of further innovation.

Through these activities, the Company reduces the risk of patent infringement by other companies, creates opportunities to utilize its patents, expands accessible technologies and patents, and provides business support from the intellectual property perspective, while contributing to the establishment of the global intellectual property ecosystem.

<Risk Management>

For risks related to intellectual property and measures to deal with them, please refer to “3. Risks Factors.”

<Target>

In Canon, the Group conducts intellectual property activities with the aim of contributing to the development of its businesses by claiming intellectual property that will make them earn money. Canon is building an intellectual property portfolio that takes into account the utilization of intellectual property, and by utilizing the portfolio that has been built, Canon is improving the profitability of the business. The portfolio of over 80,000 properties is undergoing a period of renewal, and the Company aims to strategically increase the ratio of applications in the technological fields that support new businesses, and to contribute to the expansion of new businesses and improvement of earnings. In the U.S., where there are many companies with the most advanced technologies and the market is large, the Group aims to remain within the top 10 in the number of patents granted in the U.S. from the perspectives of business expansion and license negotiations with other companies.

For other Canon intellectual property-related activities, please refer to Canon’s website (<https://global.canon/en/intellectual-property/>).

5. Material Agreements, etc.

(1) Licenses Canon has granted

Counterparty	Country	Contract details	Period of contract
Kyocera Document Solutions Inc.	Japan	Licensing of patent rights related to electrophotography	Since April 1, 2002 until the expiration date of the patent

(2) Cross-licensing agreements Canon has entered

Counterparty	Country	Contract details	Period of contract
HP Inc.	U.S.A.	Licensing of patent rights related to bubble jet printers	Since February 19, 1993 until the expiration date of the patent
International Business Machines Corporation	U.S.A.	Licensing of patent rights related to information handling systems and manufacturing equipment	Since December 15, 2005 until the expiration date of the patent
Eastman Kodak Company	U.S.A.	Licensing of patent rights related to electrophotography and image processing technology	Since November 1, 2006 until the expiration date of the patent
Seiko Epson Corporation	Japan	Licensing of patent rights related to information-related instruments	Since August 22, 2008 until the expiration date of the patent

6. Research and Development Activities

Canon, which started out as a camera manufacturer, has promoted the diversification of its business in line with the needs of the times, centered on optical technology, and has expanded its business fields to include office equipment and optical products. Today, Canon operates in four industry-oriented groups: Printing, Medical, Imaging, and Industrial. During this period, management and R&D have been working together to develop technology management and build an optimal R&D system.

Although Canon is composed of various businesses, we continue to grow as one unified company thanks to a system that enables us to make use of our accumulated technologies across the entire Group. The Canon Group's technologies are classified into Technologies that go into products (Core Competency Technologies and Fundamental Technologies), Technologies that support products (Value Creation Technologies), and Technologies that commercialize products. Technologies that commercialize products do not exist independently. Through their use in product design in close combination with the platform of the Technologies that support products, they contribute to creation of competitive products that are difficult to be imitated by competitors.

This development environment, in which we are able to combine technologies to create synergies, is also effective in integrating newly acquired technologies and those of companies acquired through M&A, serving as a driving force for Canon's continuing evolution and creation of new value.

R&D expenses for the entire Canon Group were ¥339,288 million in 2025. The major results of R&D by segment are as follows.

I. Printing Business Unit

For large multifunction printers aimed at commercial printing, Canon has been selling the "imagePRESS V series" equipped with the "Print on Demand-Surface Rapid Fusing (POD-SURF)" system, which enhances thermal efficiency to achieve high-speed printing, since 2022. The "V1350" achieves the highest speed in the series at 135 pages per minute, contributing to shorter delivery times for printed materials and strongly supporting businesses that need efficient mass output. The "V1000" reduces downtime by minimizing the frequency of switching fusing temperatures for mixed media printing, maintaining high productivity for continuous printing without separating thick and regular paper. The "V900" offers diverse printing capabilities with a compact design, expandable options, and wide paper compatibility. High-precision color adjustment is possible with the inline spectrophotometer option, previously only available in higher-end models, reducing operator workload. Additionally, the remote printing management app "PRISMAremote Manager" allows real-time monitoring of paper replenishment timing and operational status from a distance, preventing errors like paper shortages and reducing downtime to improve operational efficiency. In addition, newly developed options for the imagePRESS V series, such as a high-capacity full-air deck equipped with an air feeding mechanism that enables stable feeding of synthetic paper prone to sticking, heavy thick paper, and magnetic paper, as well as an inline inspection system that automates the inspection process and enables full inspection that would be labor-intensive if done manually, support the stabilization of print quality, labor-saving, and workforce reduction.

For large-format inkjet printers, Canon has newly developed desktop models "TC-21" and "TC-21M" with compact bodies that are easy to use even in limited spaces, meeting diverse large-format output needs in business and educational fields. For the graphic arts market, Canon developed the "LUCIA PRO II" pigment ink, which improves image quality while enhancing lightfastness and scratch resistance on glossy and semi-glossy paper, and has strengthened models which have this ink since 2024. The "PRO-6600/PRO-4600/PRO-2600" models combine the highest photo quality in the imagePROGRAF series with long-term print preservation. The "GP-6600S/GP-4600S/GP-2600S" models for printing service providers and in-house printing departments produce vibrant posters quickly while minimizing scratches during post-printing processes like cutting and display. These models, along with the "TZ-32000/TX-4200/TX-3200/TX-2200" for the CAD and poster markets, feature the "Smart Roll Paper Set" function, which automates paper feeding, type detection, and remaining amount estimation, speeding up roll paper setup. In addition, "ink sensing system" periodically monitors ink ejection status and automatically optimizes ink placement positions to maintain high image quality, contributing to work efficiency and productivity improvement.

For office multifunction devices, Canon strengthened the lineup of the new “imageFORCE” brand launched in 2024, introducing five series and fifteen new models. The core A3 multifunction devices for offices, the “C5100,” “C6100,” and “C3150” series, are equipped with the next-generation exposure device “D² Exposure” using LED multi-chips, achieving the highest resolution for Canon office multifunction devices at 4,800×2,400 dpi. In addition, the high-speed “8100” series incorporates exposure technology from commercial printers, and the A4 “C431” series features renewed toner, enabling high-quality printing across the lineup. In terms of security, robust encryption functions designed under the zero trust policy, and AI-based network environment analysis recommend optimal security settings, supporting secure operations even for companies without IT administrators. The combination of high-performance, user-friendly multifunction printers and the cloud-based MFP function expansion platform “uniFLOW Online” strongly supports the digital transformation of office operations.

For business inkjet printers, Canon has strengthened the lineup of high-capacity ink tank products that achieve low running costs. The “GX2030/GX1030” models are optimized for remote work with full front operation, while the “GX5530” supports a wide range of paper types and sizes used in logistics, pharmacies, and retail, enabling versatile printing with a single device. The “GX6530” is designed for front operation with an ADF (Automatic Document Feeder), improving efficiency for reception and counter operations. With these products, Canon supports customers’ businesses from various angles.

For home inkjet printers, Canon has improved functionality and usability to meet various use scenes such as work, hobbies, and learning. The “PIXSUS XK510/XK140/TS8930/TS7630” models are suitable for photo and document printing, while the “G3390” with high-capacity ink tank is ideal for users who print large volumes of documents. The UI (user interface) that can be customized according to each use scene allows user quickly to access needed functions. The “PIXSUS TS5530/TS5630” models meet a wide range of user needs as models that combine ease of use and efficiency, with intuitive operation and new mechanisms that shorten print waiting times. In addition, the new Canon printer linkage service “MyPrint With” provides an environment where printers can be used more conveniently and with greater peace of mind over the long term.

Canon has developed a high-performance material that is expected to improve the durability and mass-production stability of perovskite solar cells, which are attracting attention as next-generation solar cells. Because perovskite solar cells are lightweight and flexible, and can generate electricity even with room light, they offer greater flexibility in installation than the silicon type, which is currently the mainstream, and are expected to reduce capital investment costs. The newly developed high-performance material is characterized by its ability to significantly enhance durability and suppress degradation over time, compared to conventional configurations, by applying material technology cultivated through the development of photoconductors, which are the core components of multifunction devices and laser printers. At present, Canon plans to begin production in 2026 in line with the schedule of panel manufacturers who are considering adopting the material.

R&D expenses for the Business Unit were ¥94,762 million.

II. Medical Business Unit

In February 2025, Canon installed the world’s first whole-body multi-position CT scanner, “Aquilion Rise,” at Keio University Hospital, marking the start of its clinical operation. The product was jointly developed with the Department of Radiology at Keio University School of Medicine through industry-academia collaboration. Based on the clinical insights and needs accumulated from the standing and seated CT scanner that have been in clinical use at Keio University Hospital since May 2017, this new system enables not only conventional supine CT examinations but also standing and seated scans. It is the first whole-body X-ray CT system in the world capable of multi-position imaging. Since its domestic launch, the system has garnered significant interest not only in Japan but also globally. We will expand its global sales as we comply with the laws and regulations in each country. Additionally, we have introduced photon-counting CT systems at the National Cancer Center Hospital East / Center for Advanced Medical Development in Japan, as well as at the University of Pennsylvania, a leading medical institution in the United States, where clinical research trials have begun. There is a plan for introduction in Europe and Canada in 2026, and preparation is underway to commence sales in each country as soon as possible.

In the field of diagnostic ultrasound systems, Canon released “Aplio beyond.” Featuring advanced imaging technology in a small footprint, it brings enhanced examination efficiency and supports medical institutions that are addressing the challenges arising from changes in physicians’ workstyle. We also introduced new general X-ray imaging system and mammography system that incorporate “Advanced intelligent Clear-IQ Engine (AiCE),” a noise reduction feature developed using AI. The new products provide low-noise and high image quality resulting in greater accuracy in diagnostic imaging. Canon is committed to continue delivering clinical value by developing products featuring cutting edge technologies. Under the new R&D structure as part of the Medical Business Innovation initiative, we will focus on maintaining efficient R&D investment while pursuing further cost reduction.

R&D expenses for the Business Unit were ¥46,971 million.

III. Imaging Business Unit

In digital cameras (including digital cinema cameras), to address diversifying video needs, Canon introduced the digital cinema camera “EOS C50” and, under the “EOS/PowerShot V series,” the video-creator-oriented mirrorless camera “EOS R50 V” and the compact digital camera “PowerShot V1.” Canon also expanded the RF lens lineup for video shooting, strengthening its video-focused product offerings across both cameras and lenses. In addition, Canon launched the hybrid high-amateur model “EOS R6 Mark III,” which not only enhances video capabilities but also still photography performance, and added affordable telephoto lenses as well as compact, lightweight, large-aperture prime lenses, thereby raising the overall value of the EOS R system. Furthermore, Canon launched the “IXUS 285 HS A,” marketed as the “ELPH 360 HS A” depending on the region, in response to a renewed appreciation for camera-specific shooting experiences and visual expression, particularly among smartphone-native generations, and the growing demand for compact digital cameras.

In broadcast lenses, Canon began offering a service that adds new functionality to field zoom lenses for 4K broadcast cameras. By integrating optical units into field zoom lenses, the service enables the “Novel Look,” an expressive imaging effect that blurs the background to emphasize the subject.

Regarding the remote camera system, Canon released the “Camera Color Matching Application” to simplify color matching between remote cameras and main cameras, and Canon enhanced the functionality of the “Auto Tracking Application,” which automatically follows subjects in motion, thereby supporting shooting across a wide range of video production environments.

For products for the advanced surveillance market, Canon is continuing to develop products that take advantage of the characteristics of the SPAD sensor, and have further upgraded the ultra-high-sensitivity camera “MS-500,” which is equipped with a SPAD sensor and can capture clear images even in low-light environments. The gain and shutter speed ranges have been expanded to improve image quality in a wider range of scenes, and the correction functions have been enhanced to cover more use cases.

In the video analytics software, “Vision Edition,” which supports the automation of inspections and examinations in manufacturing and distribution, it now uses AI processing to understand the movements of the workers. This helps determine whether work procedures are correct or not, visualizes quality, and contributes to the advancement of education and the transfer of technical skills. Furthermore, Canon is also promoting the expansion into areas such as public and social infrastructure.

In the field of 3D imaging, Canon has introduced the “Volumetric Video System,” which enables free-viewpoint video that is not constrained by camera positions. This technology was applied to Yomiuri Giants games and the MLB Opening Series at the Tokyo Dome. Canon has enhanced the appeal of watching baseball by expanding the viewing range to the outfield and by overlaying the ball’s trajectory. The “Volumetric Video Studio - Kawasaki,” which provides a one-stop solution from shooting to editing 3D content, has accumulated a track record in producing music videos and AR/VR 3D content. Additionally, in Mixed Reality (MR), Canon has provided new visual experiences in a wide range of fields, including manufacturing, healthcare, and events.

R&D expenses for the Business Unit were ¥112,298 million.

IV. Industrial Business Unit

In semiconductor lithography equipment, the nano imprint semiconductor manufacturing equipment “FPA-1200NZ2C” which enables the formation of fine circuit patterns with a simple mechanism of pressing like a stamp, contributes to the manufacture of advanced semiconductor devices. In contrast to conventional photolithography equipment, this equipment does not require miniaturization by the wavelength of the light source, and thus contributes to reducing power consumption and CO2 emissions. The i-line stepper FPA-3030i6 which uses a new projection lens featuring high transmittance and durability, will support the production of power devices and green devices.

In FPD lithography equipment, the MPAsp-E1003 H for 6th generation glass substrates contributes to the expansion of applications for display panels. This equipment is installed with an optical system for 8th generation glass substrates that can expose 65 inch panels in a single operation. This increases the exposure width by approximately 1.2 times and achieves both high resolution and high productivity. In addition, large special displays for automotive applications can also be exposed in two shots without a connection, contributing to productivity improvement during mass production.

In the measurement equipment field, Canon has developed equipment for plastic sorting and analysis that uses “tracking Raman spectroscopy” to accurately sort black plastic pieces and other plastic pieces that are difficult to distinguish. By maximizing the amount of reusable plastic, Canon will contribute to the creation of a circular economy.

R&D expenses for the Business Unit were ¥32,286 million.

R&D expenses for other, such as basic research, and company-wide R&D expenses were ¥52,971 million.

Note: Product names are those used in Japan.

III. Equipment and Facilities

1. Overview of Capital Expenditures

Capital expenditures in the fiscal year were made in a wide range of areas, mainly for the purpose of establishing R&D bases, strengthening production technologies, and enhancing the production system for high-value-added products. As a result, total capital expenditures for the fiscal year were ¥ 211,673 million. There is no sale, removal or loss of important equipment.

Business Segment	Capital expenditures (Millions of yen)	Purpose and content of major capital investment
Printing Business Unit	66,669	Expansion of production facilities
Medical Business Unit	11,803	Expansion of production facilities
Imaging Business Unit	39,022	Expansion of production facilities
Industrial Business Unit	14,137	Expansion of production facilities
Others and Corporate	80,042	Rationalize and expand R&D facilities and facilities for management services
Total	211,673	

(Note) The above amounts do not include consumption tax, etc.

2. Major Facilities

The status of major facilities of Canon Group as of the end of the current consolidated fiscal year is as follows.

(1) Information about reporting company

As of December 31, 2025

Office name (Location)	Segment	Details of equipment	Carrying amount (Millions of yen)				Number of employees (Persons)
			Land (Area in m ²)	Buildings and structure	Machinery and other assets	Total	
Headquarters (Ohta-ku, Tokyo)	Printing, Medical, Imaging, Industrial, Others and Corporate	R&D facilities and facilities for management services	36,986 (115,201)	45,798	4,152	86,936	6,084
Toride Office (Toride City, Ibaraki Prefecture)	Printing	Production facilities	1,156 (259,957)	17,050	10,951	29,157	4,118

Canon Business Machines (Philippines), Inc. (Batangas, Philippines)	Same as above	Same as above	- (195,077)	5,831	291	6,122	1,423

Notes:

1. "Machinery and other assets" include machinery and equipment, vehicles, tools, furniture and fixtures, construction in progress and finance leases.
2. The above amounts include assets leased within the Group.
3. The above amounts do not include consumption tax, etc.
- 4 Land of Canon Dalian Business Machines, Inc., Canon (Suzhou) Inc., Canon Vietnam Co., Ltd., Canon Business Machines (Philippines), Inc. is leased from non-consolidated companies.

3. Plans for Establishment, Disposals, etc. of Facilities

Canon Group is engaged in a wide range of businesses both in Japan and overseas, and plans for new facilities and facility expansions have not been decided on an individual project basis as of the end of the fiscal year. Therefore, Canon discloses the figures for each segment. Canon Group's capital expenditure plan (new facilities and expansion) for the year ending December 31,2025 as follows.

Segment	Planned capital expenditures (Millions of yen)	Purpose and content of major capital expenditures
Printing Business Unit	63,900	Expansion of production facilities
Medical Business Unit	20,100	Expansion of production facilities
Imaging Business Unit	38,100	Expansion of production facilities
Industrial Business Unit	20,600	Expansion of production facilities
Others and Corporate	87,300	Rationalize and expand R&D facilities and facilities for management services
Total	230,000	

Notes:

1. The funds required for the above plan will be covered by the funds of Canon.
2. There are no plans for the disposal or sale of significant facilities, except for the disposal or sale for the purpose of routine renewal of facilities.

IV . Information on Reporting Company

1. Company's Shares, etc.

(1) Total number of shares, etc.

(i) Total number of shares

Class	Total number of shares authorized to be issued (Shares)
Common shares	3,000,000,000
Total	3,000,000,000

(ii) Issued shares

Class	Number of issued shares at the end of the fiscal year (December 31, 2025) (Shares)	Number of issued shares as of the filing date (March 25, 2026) (Shares)	Name of stock exchange on which the Company is listed or names of authorized financial instruments firms associations	Description
Common shares	1,333,763,464	1,333,763,464	Tokyo, Nagoya, Fukuoka, Sapporo	This is the standard of the Company's shares, whose holders have unlimited rights. The number of shares constituting one unit is 100 shares.
Total	1,333,763,464	1,333,763,464	—	—

(2) Stock acquisition rights, etc.

(i) Stock option plans

Date of resolution	March 29, 2018
Category and number of individuals covered by the plan (Persons)	Directors (excluding Independent Outside Director) 5 Executive Officers 28 Total 33
Number of Stock Acquisition Rights (Units)*	484
Class of shares and Number of shares subject to Stock Acquisition Rights (Shares)*	Common stock 48,400 (Note 1)
Amount to be paid in to exercise Stock Acquisition Rights (Yen)*	The exercise price per share issuable upon exercise of each share acquisition right shall be ¥1, which shall be multiplied by the Number of Granted Shares.
Period for exercising Stock Acquisition Rights*	From May 2, 2018 To May 1, 2048
Share issue price and capital stock per share in the event of issuance of shares upon exercise of Stock Acquisition Rights (Yen)*	Issue price 2,949 (Note 2) Amount incorporated into capital stock 1,475 (Note 3)
Conditions for exercising the Stock Acquisition Rights*	As a general rule, the terms and conditions of the exercise of share acquisition rights shall be determined by a resolution of the Board, including (i) those to whom stock acquisition rights are allotted (the "Holder(s)") shall be entitled to exercise all the stock acquisition rights together within 10 days (in case the last day is not a business day, the following business day) from the day immediately following the day when they cease to hold any position as a Director or an Executive Officer of Canon, and (ii) in the event that Canon recognizes any violation of laws and regulations, misconduct of the duties, act conflicting with the duty of due care or duty of loyalty, or any other act equivalent thereto of the Holder, Canon may limit, subject to a resolution by the Board of Directors of Canon, the number of offered stock acquisition rights that may be exercised by such Holder.
Transfer of the Stock Acquisition Rights*	Acquisition of the Stock Acquisition Rights by transfer shall be required to be approved by the resolution of the Company's Board of Directors.
Matters relating to grants of Stock Acquisition Rights in association with organizational restructuring actions*	(Note 4)

* The information presented is as of the end of the fiscal year (December 31, 2025). As of the end of the month before the submission date (February 28, 2026) since there are no changes in the content to be stated from the content as of the end of the fiscal year, the description as of the end of the previous month of the submission date is omitted.

Notes:

- The class of shares to be acquired upon exercise of the stock acquisition rights shall be shares of common stock of Canon, and the number of shares to be acquired upon exercise of each stock acquisition right (the "Number of Shares Acquired") shall be 100 shares; provided. However, that in the case that Canon conducts a share split (including an allotment without consideration of shares of common stock of Canon; the same shall apply to all references to the share split herein) or share consolidation on and after the date on which the stock acquisition rights shall be allotted (the "Allotment Date"), the Number of Shares Acquired shall be adjusted in accordance with the following formula, rounding down any fraction of less than one share resulting from such adjustment.

Number of Shares Acquired after adjustment

= Number of Shares Acquired before adjustment × Ratio of share Split or share consolidation

In addition to the above, in any event that makes it necessary to adjust the Number of Shares Acquired, including a merger and company split, on and after the Allotment Date, Canon may make appropriate adjustment to the Number of Shares Acquired within a reasonable range.

2. The issue price shall be the sum of the paid-in amount at the time of exercise of the share acquisition rights (1 yen per share) and the fair value of the share acquisition rights on the allotment date.
3. The amount of capital stock to be increased when shares are issued upon exercise of share acquisition rights shall be one half of the maximum amount of increase in capital stock which is calculated in accordance with Article 17, Paragraph 1 of the Ordinance on Accounting of Companies, and any fraction less than one yen resulting from the calculation shall be rounded up to the nearest whole yen.
4. Matters related to granting Stock Acquisition Rights in corporate reorganization
If Canon conducts a merger (limited to the case where Canon is dissolved due to the merger), or a share exchange or transfer (both, limited to the case where Canon becomes a wholly-owned subsidiary) (collectively, the “Structural Reorganization”), Canon shall, allot stock acquisition rights of any of the relevant companies listed in “a” through “e” of Article 236, Paragraph 1, Item 8 of the Company Act (the “Reorganized Company”) to the Holders holding the stock acquisition rights remaining at the time immediately preceding the effective date of the relevant Structural Reorganization (the “Remaining Stock Acquisition Rights”) (the effective date of the relevant Structural Reorganization shall mean, in the case of a merger, the date on which the merger becomes effective; in the case of a consolidation; the date of establishment of a newly-incorporated company through consolidation; in the case of an absorption-type company split, the date on which the absorption-type company split becomes effective; in the case of an incorporation-type company split, the date of establishment of a newly-incorporated company through the incorporation-type company split; in the case of a share exchange, the date on which the share exchange becomes effective; and in the case of a share transfer, the date of establishment of a wholly-owning parent company through the share transfer; hereinafter the same shall apply). Provided, however, that the foregoing shall be on the condition that allotment of such stock acquisition rights by the Reorganized Company in accordance with each of the following items is stipulated in a merger agreement, a company split agreement, a share exchange agreement or a share transfer plan.
 - a. Number of stock acquisition rights of the Reorganized Company to be allotted:
A number equal to the number of the Remaining Stock Acquisition Rights held by the Holder shall be transferred to such Holder.
 - b. Class of shares of the Reorganized Company to be acquired upon exercise of stock acquisition rights:
Common stock of the Reorganized Company.
 - c. Number of shares of the Reorganized Company to be acquired upon exercise of stock acquisition rights:
To be determined in accordance with Note 1. above, taking into consideration, among others, the conditions of Structural Reorganization.
 - d. Value of assets to be contributed upon exercise of each stock acquisition right:
The value of assets to be contributed upon the exercise of each share acquisition right to be delivered shall be the amount obtained by multiplying the post-reorganization exercise price specified below by the number of shares of the Reorganized Company underlying the share acquisition rights determined in accordance with c, above. Exercise price after reorganization is 1 yen per share of Reorganized company which can be issued by exercise of stock acquisition right to shares issued.
 - e. Exercise period for the stock acquisition rights:
The exercise period shall begin on either the first date of the exercise period for the Stock Acquisition Rights, or the date that the Restructuring Actions take effect, whichever comes later, and shall continue to the expiration date of the exercise period for the Stock Acquisition
 - f. Matters regarding stated common stock and capital reserves increased due to the issuance of shares upon exercise of stock acquisition rights
 - (i) The increased amount of stated capital to be increased due to the issuance of shares upon exercise of the stock acquisition rights will be one half of the maximum amount of increase of stated capital, etc. to be calculated in accordance with Article 17, Paragraph 1 of the Ordinance on Accounting of Companies. Any fractional amount of less than one yen resulting from such calculation will be rounded up to one yen.

- (ii) The increased amount of capital reserves to be increased due to the issuance of shares upon exercise of the stock acquisition rights shall be the maximum amount of increases of stated capital, etc., mentioned in (i) above, after the subtraction of increased amount of stated capital mentioned in (i) above.
- g. Restrictions on acquisition of stock acquisition rights by transfer
The stock acquisition rights cannot be acquired through transfer, unless such acquisition is expressly approved by a resolution of the Board of Directors.
- h. Conditions for exercise of stock acquisition rights
 - (i) Those to whom stock acquisition rights are allotted (the “Holder(s)”) shall be entitled to exercise all the stock acquisition rights together within 10 days (in case the last day is not a business day, the following business day) from the day immediately following the day when they cease to hold any position as a Director or an Executive Officer of Canon.
 - (ii) In the event that Canon recognizes any violation of laws and regulations, misconduct of the duties, act conflicting with the duty of due care or duty of loyalty, or any other act equivalent thereto of the Holder, Canon may limit, subject to a resolution by the Board of Directors of Canon, the number of offered stock acquisition rights that may be exercised by such Holder.
 - (iii) Besides the above, other conditions shall be stipulated in an agreement to be executed between Canon and the Holder, based on the resolution of the Board of Directors’ meeting.
- i. Matters regarding the acquisition of stock acquisition rights
If a proposal for approval of a merger agreement under which Canon becomes a disappearing company, a proposal for the approval of a company split agreement or a company split plan under which Canon becomes a split company, or a proposal for approval of a share exchange agreement or share transfer plan under which Canon becomes a wholly-owned subsidiary is approved at the Canon General Meeting of Shareholders (or resolved by Canon’s Board of Directors if a resolution of the General Meeting of Shareholders is not required), Canon may acquire the share acquisition rights without consideration on a date separately determined by the Board of Directors.

1, 2 and 3 are the same as Notes 1, 2 and 3 of the resolution of the Board of Directors meeting held on March 29, 2018.

4. Matters related to granting Stock Acquisition Rights in corporate reorganization

If Canon conducts a merger (limited to the case where Canon is dissolved due to the merger), an absorption-type or incorporation-type company split (both, limited to the case where Canon becomes a split company), or a share exchange or transfer (both, limited to the case where Canon becomes a wholly-owned subsidiary) (collectively, the “Structural Reorganization”), Canon shall, in each of the above cases, allot stock acquisition rights of any of the relevant companies listed in “a” through “e” of Article 236, Paragraph 1, Item 8 of the Company Act (the “Reorganized Company”) to the Holders holding the stock acquisition rights remaining at the time immediately preceding the effective date of the relevant Structural Reorganization (the “Remaining Stock Acquisition Rights”) (the effective date of the relevant Structural Reorganization shall mean, in the case of a merger, the date on which the merger becomes effective; in the case of a consolidation; the date of establishment of a newly-incorporated company through consolidation; in the case of an absorption-type company split, the date on which the absorption-type company split becomes effective; in the case of an incorporation-type company split, the date of

establishment of a newly-incorporated company through the incorporation-type company split; in the case of a share exchange, the date on which the share exchange becomes effective; and in the case of a share transfer, the date of establishment of a wholly-owning parent company through the share transfer; hereinafter the same shall apply). Provided, however, that the foregoing shall be on the condition that allotment of such stock acquisition rights by the Reorganized Company in accordance with each of the following items is stipulated in a merger agreement, a consolidation agreement, a company split agreement, a company split plan, a share exchange agreement or a share transfer plan.

- a. Number of stock acquisition rights of the Reorganized Company to be allotted:
A number equal to the number of the Remaining Stock Acquisition Rights held by the Holder shall be transferred to such Holder.
- b. Class of shares of the Reorganized Company to be acquired upon exercise of stock acquisition rights:
Common stock of the Reorganized Company.
- c. Number of shares of the Reorganized Company to be acquired upon exercise of stock acquisition rights:
To be determined in accordance with Note 1. above, taking into consideration, among others, the conditions of Structural Reorganization.
- d. Value of assets to be contributed upon exercise of each stock acquisition right:
The value of assets to be contributed upon the exercise of each share acquisition right to be delivered shall be the amount obtained by multiplying the post-reorganization exercise price specified below by the number of shares of the Reorganized Company underlying the share acquisition rights determined in accordance with c, above. Exercise price after reorganization is 1 yen per share of Reorganized company which can be issued by exercise of stock acquisition right to shares issued.
- e. Exercise period for the stock acquisition rights:
The exercise period shall begin on either the first date of the exercise period for the Stock Acquisition Rights, or the date that the Restructuring Actions take effect, whichever comes later, and shall continue to the expiration date of the exercise period for the Stock Acquisition
- f. Matters regarding stated common stock and capital reserves increased due to the issuance of shares upon exercise of stock acquisition rights
 - (i) The increased amount of stated capital to be increased due to the issuance of shares upon exercise of the stock acquisition rights will be one half of the maximum amount of increase of stated capital, etc. to be calculated in accordance with Article 17, Paragraph 1 of the Ordinance on Accounting of Companies. Any fractional amount of less than one yen resulting from such calculation will be rounded up to one yen.
 - (ii) The increased amount of capital reserves to be increased due to the issuance of shares upon exercise of the stock acquisition rights shall be the maximum amount of increases of stated capital, etc., mentioned in (i) above, after the subtraction of increased amount of stated capital mentioned in (i) above.
- g. Restrictions on acquisition of stock acquisition rights by transfer
The stock acquisition rights cannot be acquired through transfer, unless such acquisition is expressly approved by a resolution of the Board of Directors.
- h. Conditions for exercise of stock acquisition rights
 - (i) Those to whom stock acquisition rights are allotted (the "Holder(s)") shall be entitled to exercise all the stock acquisition rights together within 10 days (in case the last day is not a business day, the following business day) from the day immediately following the day when they cease to hold any position as a Director or an Executive Officer of Canon.
 - (ii) In the event that Canon recognizes any violation of laws and regulations, misconduct of the duties, act conflicting with the duty of due care or duty of loyalty, or any other act equivalent thereto of the Holder, Canon may limit, subject to a resolution by the Board of Directors of Canon, the number of offered stock acquisition rights that may be exercised by such Holder.
- i. Matters regarding the acquisition of stock acquisition rights
If a proposal for approval of a merger agreement under which Canon becomes a disappearing company, a proposal for the approval of a company split agreement or a company split plan under which Canon becomes a split company, or a proposal for approval of a share exchange agreement or share transfer plan under which Canon becomes a wholly-owned subsidiary is approved at the Canon General Meeting of Shareholders (or resolved by the Board of Directors of Canon if a resolution of the General Meeting of

Shareholders is not required), Canon may acquire the share acquisition rights without consideration on a date separately determined by the Board of Directors.

Notes:

- 1 Disposals treasury shares during the current period does not include shares constituting less than one unit of shares sales during the period from March 1, 2026 to the filing date of this Annual Securities Report.
- 2 Treasury shares held during the current period does not include shares constituting less than one unit of shares purchased and sales during the period from March 1, 2026 to the filing date of this Annual Securities Report.

3. Dividend policy

The basic policy of the Company is to provide a stable return and actively return profits to shareholders, mainly in the form of a dividend, taking into consideration medium-term profit forecasts along with planned future investments, cash flow and other factors.

In 2025, the global economy continued to grow at a moderate pace. While the European economy, which was affected by geopolitical risks, saw only a gradual recovery, and the economic slowdown in China persisted, the U.S. economy remained solid despite the impact of tariff policies. We were also affected by U.S. tariff policies. However, we posted sales growth in our medical, network camera, and semiconductor manufacturing equipment businesses, where medium- to long-term market expansion is expected. Sales also grew for interchangeable-lens cameras with the launch of new products. As a result, net sales grew for the fifth consecutive year, enabling us to achieve the target we set in our five-year management initiative, Phase VI (2021 to 2025) of the “Excellent Global Corporation Plan.” Operating profit ratio also improved to nearly 10%. Over these five years, we have achieved substantial growth in both sales and profits. In light of this situation, the annual dividend for the current fiscal year has been set at ¥160 per share, exceeding the previous year's dividend of ¥155 per share. This includes an interim dividend of ¥80, which has already been paid, and a year-end dividend of ¥80.

The basic policy of the Company is to pay dividends twice a year, interim and year-end dividends. Decisions on these dividends are made at the General Meeting of Shareholders for the year-end dividends and at the Board of Directors meeting for the interim dividends. Canon stipulates in its Articles of incorporation that it may pay interim dividends by resolution of the Board, with a record date of June 30 of each year.

Dividends of surplus for the current fiscal year are as follows.

Date of resolution	Total dividends (Millions of yen)	Dividend per share (Yen)
July 24, 2025 Resolution of Board of Directors	72,124	80.00
March 27, 2026 Resolution of Ordinary General Meeting of Shareholders (Scheduled)	70,290	80.00

4. Corporate Governance

(1) Overview of Corporate Governance

(i) Basic Policies for Corporate Governance

In order to establish a sound corporate governance structure and continuously raise corporate value, Canon believes that it is essential to improve management transparency and strengthen management supervising functions. At the same time, a sense of ethics and mission held by each executive and employee of a company is very important in order to achieve continuous corporate growth and development. For details, please refer to the "An Overview of Corporate Governance at Canon Inc." (<https://global.canon/en/ir/strategies/governance.html>) on Canon's website.

(ii) Summary of the Canon's corporate governance structure and the reason for adopting this structure

(Basic Policy)

Canon is globally expanding its businesses in various business fields, including printing, medical, imaging, and industrial, and aims to aggressively expand into new business fields in the future. In order to make prompt decisions in each business field, and make important decisions for the entire Canon Group or matters that straddle several business fields from a company-wide perspective and at the same time secure appropriate decision making and execution of operation, Canon judges the corporate governance structure below to be effective.

(Board of Directors)

While the focus of the organizational structure of the Board of Directors is on Representative Directors that oversee company-wide business strategies or execution such as the CEO, COO, CFO, CTO, and Representative Directors or Executive Directors that oversee multiple business fields or headquarters functions, at least two Independent Outside Directors are appointed while also assuring that they account for one third or more of the total number of Directors, in order to secure sound management. The Board of Directors, in accordance with laws and regulations, makes important decisions and supervises the execution of duties.

Except for the above, the CEO and other Representative Directors are active in decision making and execution, and under the command and supervision of the Representative Directors, Executive Officers that are elected through resolution of the Board of Directors make decisions and execute operations of each business field or function.

As of the date of submission of this report, the Board of Directors consists of 10 members, 6 internal members of which 3 are Representative Directors, and 4 Independent Outside Directors. The CEO serves as the chairman of the board. The names and other details of each Director are listed in this report under "(i) List of Directors" in "(2) Information about directors" in "4. Corporate Governance". As of April 1, 2026, there are 40 Executive Officers, including 1 female and 1 foreign national.

Note: As an agenda item (proposal) for the Ordinary General Meeting of Shareholders scheduled to be held on March 27, 2026, the Company plans to submit a proposal for the election of Eleven Directors. If this proposal is approved as originally proposed, the Board of Directors will consist of Eleven members, including six internal members (of whom four will serve as Representative Directors) and five Outside Directors who serve as independent officers.

• Activities of the Board of Directors

The number of meetings of the Board of Directors held during the fiscal year was 10, and the attendance of each Directors and Auditors was as follows.

Position	Name	Attendance/ number of meetings held	Attendance ratio
Chairman & CEO	Fujio Mitarai	10 / 10	100%
Executive Vice President & CFO	Toshizo Tanaka	10 / 10	100%
Executive Vice President & CTO	Toshio Homma	10 / 10	100%
Executive Vice President & Director	Kazuto Ogawa	10 / 10	100%
Senior Managing Director	Hiroaki Takeishi	10 / 10	100%
Senior Managing Director	Minoru Asada	10 / 10	100%
Director	Yusuke Kawamura	10 / 10	100%
Director	Masayuki Ikegami	10 / 10	100%
Director	Masaki Suzuki	10 / 10	100%

Position	Name	Attendance/ number of meetings held	Attendance ratio
Director	Akiko Ito	10 / 10	100%
Audit & Supervisory Board Member	Chikahiro Okayama	10 / 10	100%
Audit & Supervisory Board Member	Hideya Hatamochi	3 / 3	100%
Audit & Supervisory Board Member	Takeshi Morikawa	7 / 7	100%
Audit & Supervisory Board Member	Yutaka Tanaka	10 / 10	100%
Audit & Supervisory Board Member	Hiroshi Yoshida	3 / 3	100%
Audit & Supervisory Board Member	Koichi Kashimoto	10 / 10	100%
Audit & Supervisory Board Member	Yuka Shigetomi	3 / 3	100%

Note: Hideya Hatamochi, Audit & Supervisory Board Member, and Hiroshi Yoshida, Audit & Supervisory Board Member, retired upon the conclusion of the Ordinary General Meeting of Shareholders held on March 28, 2025.

In addition, Takeshi Morikawa, Audit & Supervisory Board Member, and Yuka Shigetomi, Audit & Supervisory Board Member, were elected and assumed their respective offices at the same Ordinary General Meeting. The differences in the total number of meetings attended are attributable to the respective dates of appointment and retirement.

In 2025, the Board of Directors received reports on the status of the execution of duties, performance (quarterly), and plans for sales and profits of each division of the Company as well as annual reports on the status of the development and operation of the risk management system. Based on these reports, the Board of Directors accordingly discussed the direction of the business strategy and the method of risk management. The Board of Directors also deliberated on and resolved specific important business execution matters stipulated in laws and regulations or the Company's Regulations of the Board of Directors, including the acquisition of treasury stock and making Canon Electronics Inc. a wholly-owned subsidiary, in addition to regular agenda matters, including the evaluation of the effectiveness of the Board of Directors, executive positions and other important human resource matters, important organizational changes, the convening of the Ordinary General Meeting of Shareholders, the examination of strategic share holdings.

(Audit & Supervisory Board)

As a body which is in charge of the audit of operations, under the principles of autonomy, which is independent from the Board of Directors, Canon Inc. has full-time Audit & Supervisory Board Members that are familiar with Canon Inc.'s businesses or its management structure, and Independent Outside Audit & Supervisory Board Members that have extensive knowledge in specialized areas such as law, finance and accounting, and internal control. The Audit & Supervisory Board, which is composed of these individuals, cooperates with Canon Inc.'s Accounting Auditors and Internal Audit Division, oversees the status of duty execution of operations and corporate assets to secure the soundness of management.

In accordance with auditing policies and plans decided at Audit & Supervisory Board meetings, the Audit & Supervisory Board Members attend Board of Directors' meetings and other important gatherings such as Corporate Strategy Committee meetings. They are also able to listen to reports from Directors and employees, review documents related to important decisions, and conduct audits by investigating, etc., the situation of businesses and property of Canon Inc. and its affiliated companies. Additionally, the Office of Audit & Supervisory Board Members is independent from the control of the Directors etc., and it has a dedicated staff. The Audit & Supervisory Board Members can order headquarter management and other operations to conduct investigations in cases of necessity. In this way, the Audit & Supervisory Board plays a role in monitoring management, conducting strict audits of directors' execution of duty, including the status of development of the internal control system. Furthermore, the Audit & Supervisory Board Members cooperate closely with the Accounting Auditors and the Company's internal auditing arm, and such cooperation services to improve each monitoring function.

Currently, there are 5 auditors, 3 of whom are Outside Auditors serving as Independent Officers. The Board of Corporate Auditors is chaired by full-time Audit & Supervisory Board Members. The names and other details of each Audit & Supervisory Board Member are as described in "(i) List of Directors" in "(2) Information about directors" in "4. Corporate Governance" of this report.

Note: As a proposal (agenda item) for the Ordinary General Meeting of Shareholders scheduled to be held on March 27, 2026, the Company intends to submit a proposal for the election of Two Audit & Supervisory Board Members. If this proposal is approved as originally proposed, the Audit & Supervisory Board will continue to consist of five members, including three Outside Audit & Supervisory Board Members who serve as independent officers.

(Nomination and Remuneration Advisory Committee)

Canon has established a voluntary "Nomination and Remuneration Advisory Committee" to ensure the fairness of the selection process for candidates for Directors, Audit & Supervisory Board Members and Executive Officers, as well as transparency and objectivity of the compensation determination process.

As of the date of submission of this Report, the Committee consisted of 6 members: Executive Vice President & CFO Toshizo Tanaka, Outside Directors Yusuke Kawamura and Masayuki Ikegami, Masaki Suzuki, Akiko Ito, and Outside Audit & Supervisory Board Member Yutaka Tanaka. A secretariat has been established in the Secretarial Office to prepare materials for deliberation, prepare minutes, and perform other duties related to supporting the operation of the Committee.

Note: As an agenda item (proposal) for the Ordinary General Meeting of Shareholders scheduled to be held on March 27, 2026, the Company plans to submit a proposal for the election of Eleven Directors. If this proposal is approved as originally proposed, the Committee is expected to consist of seven members: Executive Vice President & CFO Toshizo Tanaka, Outside Directors Yusuke Kawamura and Masayuki Ikegami Masaki Suzuki, Akiko Ito, Atsumi Arima, and Outside Audit & Supervisory Board Member Yutaka Tanaka.

•Procedures for Appointment, etc. of Directors and Successor Plan for CEO

When nominating candidates for Directors and Audit & Supervisory Board Members, and appointing Executive Officers (including the appointment of the successor to the Chief Executive Officer), the Chairman & CEO recommends candidates from among those who are deemed to meet the prescribed requirements, and the Nomination and Remuneration Advisory Committee confirms the fairness and appropriateness of the recommendation, which is then submitted as a proposal to the Board of Directors for deliberation.

In particular, Canon regards the succession plan for the CEO as one of the important themes that lead to sustainable growth and the enhancement of corporate value over the mid- to long-term. Through the scheme to accumulate management experience through training system for senior management, selection training for Executive Officers, and personnel changes and involvement in company-wide projects after appointment as Executive Officer, the CEO assigns tasks under their own responsibility, confirms and evaluates the progress, and selects and develops candidates. The Nomination and Remuneration Advisory Committee confirms the process.

In addition, candidates for Audit & Supervisory Board Members are deliberated by the Audit & Supervisory Board and their consent is obtained prior to deliberation by the Board of Directors.

•Procedures for dismissal of the executive management

Directors and Audit & Supervisory Board Members may, at any time, request the Nomination and Remuneration Advisory Committee to discuss the necessity of dismissing Representative Directors including the CEO and Executive Directors ("executive management"), if they are found to have committed illegal, fraudulent, or disloyal acts, or found not to have fulfilled their role, or are otherwise deemed inappropriate for the duties of the executive management.

The results of the discussions at the Nomination and Remuneration Advisory Committee, regardless of their content, are reported to the Board of Directors, which then deliberates on the necessity of dismissal. The relevant executive management subject to deliberation will not be able to participate in the deliberation.

•Status of most recent activities of the Nomination and Remuneration Advisory Committee regarding the selection of candidates for Directors

Date:	Details of activities
Jan 17, 2025 (Note)	Confirmation and deliberation regarding appointment of Directors, Audit & Supervisory Board Members and Executive Officers
Aug 27, 2025 (Note)	Confirmation and deliberation regarding appointment of Directors
Jan 15, 2026 (Note)	Confirmation and deliberation regarding appointment of Directors, Audit & Supervisory Board Members and Executive Officers

Note: In addition to Toshizo Tanaka who served as chairman, Yusuke Kawamura, Masayuki Ikegami, Masaki Suzuki, Akiko Ito, and Yutaka Tanaka, all members of the Committee attended.

(Corporate Strategy Committee, Sustainability Committee, Risk Management Committee, Disclosure Committee)

A Management Strategy Meeting, composed of Directors including Independent Outside Directors, Audit & Supervisory Board Members, and some Executive Officers, is established to conduct prior deliberations on important matters related to the Group's strategy among the CEO's decision.

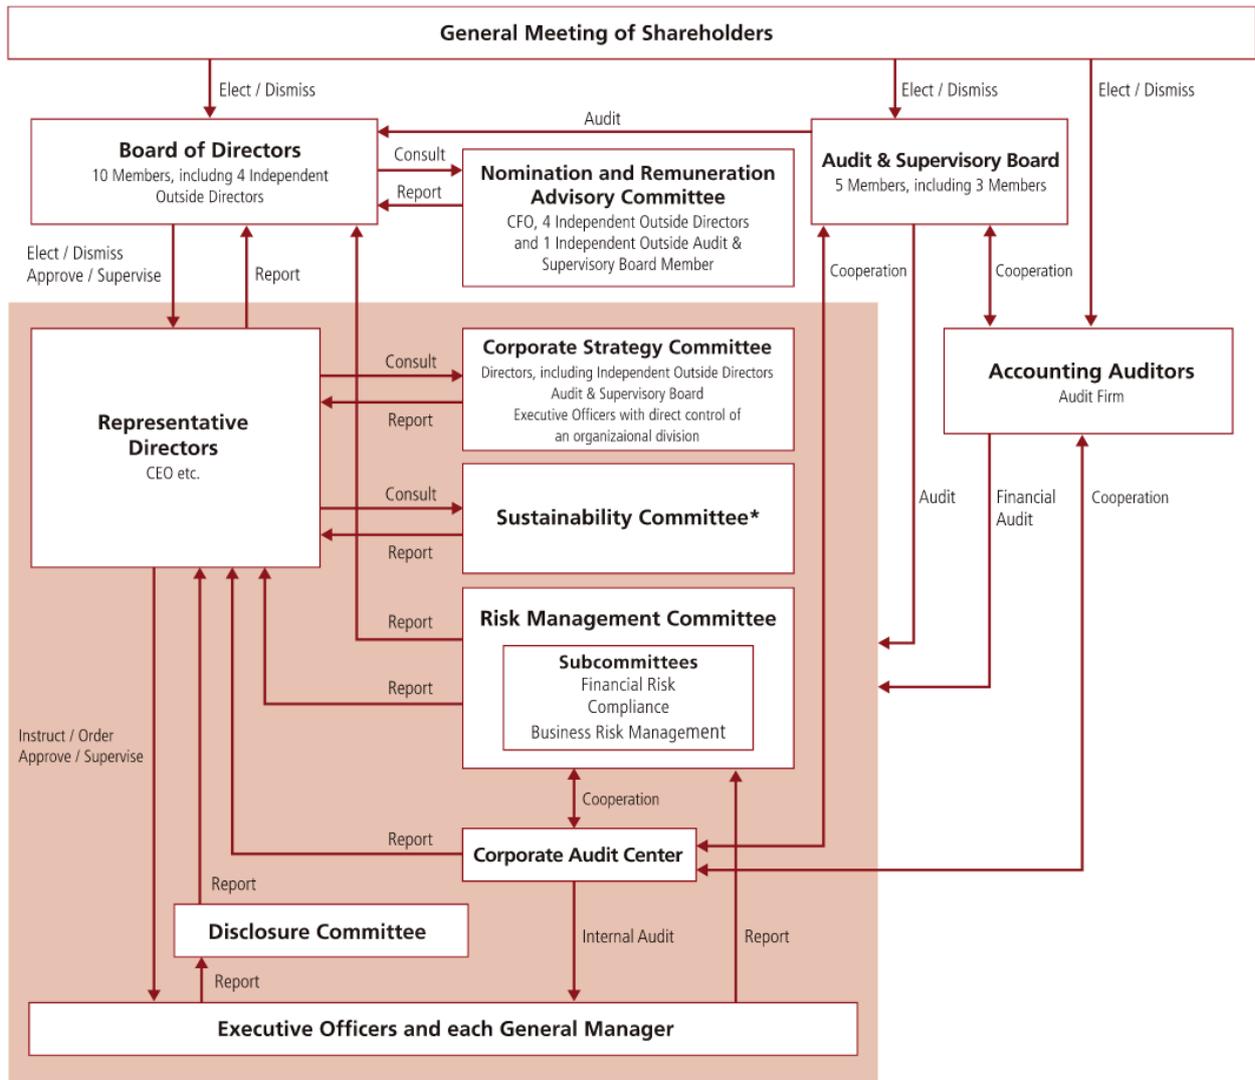

Canon established the Sustainability Committee to share information and conduct preliminary deliberations with the aim of ensuring appropriate and effective judgment by the CEO or Board of Directors regarding the sustainability-related matters that the Canon Group should respond to or address.

In addition, Canon has established a Risk Management Committee based on the resolution of the Board, to formulate policies and measures for the development of the Group's risk management system.

The committee consists of 3 subcommittees: the Financial Risk Subcommittee, responsible for establishing systems to ensure the reliability of financial reporting; the Compliance Subcommittee, responsible for ensuring corporate ethics and establishing compliance systems; and the Business Risk Subcommittee, responsible for establishing systems to manage overall risks in business operations. The Risk Management Committee is responsible for verifying the status of the development and operation of the risk management system and reporting the results to the CEO and the Board of Directors.

Furthermore, to ensure timely and accurate disclosure of important company information, Canon has established a Disclosure Committee to deliberate on the content and timing of disclosure.

As of the date of submission of this Report, the schematic diagram of Canon's corporate governance structure is as follows.

Note: As an agenda item (proposal) for the Ordinary General Meeting of Shareholders scheduled to be held on March 27, 2026, the Company plans to submit a proposal for the election of Eleven Directors. If this proposal is approved as originally proposed, the Board of Directors will consist of Eleven members, including Five Independent Outside Directors, and all Five Independent Outside Directors will serve as members of both the Nomination Committee and the Compensation Committee.

(iii) Other Matters Related to Corporate Governance
(Internal Control)

Basic Concept and Development Status of Internal Control System

The content of the resolution of the Board of Directors regarding the systems necessary to ensure the properness of the Company's operations (basic policy) as well as the outline of activities for the aforementioned systems, are as follows:

<p>Basic Policy Regarding Systems Necessary to Ensure the Properness of Operations (the "Internal Control System")</p>	<p>[Content of Basic Policy Resolution]</p> <p>To ensure the properness of operations and to work for continuous improvement in corporate value, Canon Inc. (the "Company") and the enterprises consisting of the Company and its subsidiaries (the "Canon Group"), shall foster a sound corporate culture based on the Spirit of "Three Selves" (Self-motivation, Self-management, and Self-awareness) – guiding principles dating back to the founding of the Company. The Canon Group shall also work to foster a law-abiding awareness through the "Canon Group Code of Conduct." Furthermore, the Canon Group shall firmly strive to ensure management transparency through clearly defined approval processes and authorities of the CEO and Chief/Group Executives of the Company as well as executive officers of each subsidiary of the Company.</p>
<p>1. System for Compliance (Article 362, Paragraph 4, Item 6 of the Corporation Law of Japan, and Article 100, Paragraph 1, Item 4 of the Enforcement Regulations of the Corporation Law of Japan)</p>	<p>[Content of Basic Policy Resolution]</p> <p>(1). The Board of Directors, in accordance with regulations prescribed by the Board of Directors (the "Regulations of the Board of Directors"), shall make decisions on important Canon Group managerial matters after careful deliberation. Additionally, the Board of Directors shall have representative directors, executive directors and executive officers (collectively the "Officers") give reports regarding their execution of duties.</p> <p>(2). The Board of Directors shall thoroughly instill compliance awareness through training and other programs geared towards new employees, managers, and newly-appointed board members and executive officers, utilizing the "Canon Group Code of Conduct," prescribed by the Board of Directors as a standard to be adhered to in the execution of duties.</p> <p>(3). As a part of the Company's risk management system, the Company shall put in place business procedures/checking systems that prevent violation of laws and regulations and the Company's articles of incorporation in the course of daily business. It shall also maintain a compliance education system.</p> <p>(4). The internal audit division of the Company, which has the authority to audit the execution of duties by Officers and employees, shall also conduct audits regarding the status of compliance with laws and regulations and the Company's articles of incorporation.</p> <p>(5). If an act that violates laws and regulations, or the Company's articles of incorporation is discovered in the Canon Group, employees have the ability to anonymously report such fact to any director or officer, including Outside Directors and Outside Audit & Supervisory Board Members by means of a whistleblowing system. Additionally, the Company shall prohibit any disadvantageous treatment of any whistleblower.</p>

	<p>[Outline of Activities]</p> <ol style="list-style-type: none"> (1). During the current business term, 10 Board of Directors meetings were held. At these meetings, in addition to deliberating and deciding on important matters, the Board of Directors received reports from Officers in charge of major divisions concerning the execution of business. (2). In addition to implementing compliance training that follows the Canon Group Code of Conduct, the Company established “Compliance Week,” an event to provide an opportunity for discussion on familiar risks of law-and-regulation violations by each respective workplace. (3). The activity is described in item (1) of Outline of Activities in 2 below. (4). Supported by about 60 personnel, the internal audit division conducts audits of each division and subsidiary including in its scope of inquiry not only compliance but also the usefulness and efficiency of operations. When necessary, proposals for improvement are given, and then the results of these audits are reported to the CEO and CFO. In addition, a summary of audit results is also periodically reported to the Outside Directors, Audit & Supervisory Board Members and Audit & Supervisory Board. (5). The regulations of the whistleblowing system and the rules on its use, including the explicit prohibition of the disadvantageous treatment of whistleblowers, are disseminated via the intranets of the Company, along with information on the contact counter for reporting internal problems. In the current business term, there were no whistleblower reports relating to serious violations of laws and regulations, or the like.
--	---

<p>2. System for Risk Management (Article 100, Paragraph 1, Item 2 of the Enforcement Regulations of the Corporation Law of Japan)</p>	<p>[Content of Basic Policy Resolution]</p> <p>(1). The Company established the Risk Management Committee as a deliberation body that is in direct control of the CEO, in accordance with the “Regulations of Risk Management” prescribed by the Board of Directors. This Committee shall develop various measures with regard to improving the risk management system. These measures include the system for grasping any significant risks (violation of laws and regulations, inappropriate financial reporting, quality issues, work-related injuries, disasters, etc.) that the Canon Group may face in the course of business, and all measures shall be approved by the CEO and the Board of Directors. Additionally, this Committee shall evaluate the status of improvement and implementation of the risk management system that are autonomously carried out by each organization such as business divisions and subsidiaries, and report its findings to the CEO and the Board of Directors.</p> <p>(2). The Company established the Corporate Strategy Committee in accordance with the “Regulations of the Corporate Strategy Committee” prescribed by the Board of Directors. Even if the authority to decide certain items is delegated from the Board of Directors to the CEO, the Committee shall carefully deliberate those items in cases that are considered particularly important.</p>
	<p>[Outline of Activities]</p> <p>(1). Established under the Risk Management Committee are the following three subcommittees: the Financial Risk Management Subcommittee, which is in charge of improving systems to ensure the reliability of financial reporting, the Compliance Subcommittee, which is in charge of improving systems to ensure compliance of corporate ethics and major laws and regulations, and the Business Risk Management Subcommittee, which is in charge of improving systems to manage all aspects of risks associated with business operations. These subcommittees carried out evaluation based on their respective roles of the status of improvement and implementation of risk management system by each organization in 2025. The result of such evaluation did not discover any major flaws in the system and the Risk Management Committee reported this to the CEO and the Board of Directors.</p> <p>(2). The Corporate Strategy Committee was held 8 times in the current business term. In addition to the Officers in charge of executing business operations, the Outside Directors and full-time Audit & Supervisory Board Members also attended, as necessary, and provided opinions.</p>

<p>3. System for Efficient Execution of Duties (Article 100, Paragraph 1, Item 3 of the Enforcement Regulations of the Corporation Law of Japan)</p>	<p>[Content of Basic Policy Resolution]</p> <p>(1). Based on regulations regarding the division of duties and administrative authorities prescribed by the Board of Directors, the CEO and other Officers shall execute shared duties under the supervision and direction of the CEO.</p> <p>(2). The CEO shall formulate 5-year management goals (the “Excellent Global Corporation Plan”) and 3-year priority measures, contained in mid-term management plans. Based upon these plans, the CEO shall manage operations from a unified group approach.</p>
	<p>[Outline of Activities]</p> <p>(1). The CEO and other Officers execute the duties allocated to them in accordance with the related regulations. The Company has established a framework for engaging in business activities whereby the Representative Directors and Executive Officers other than the CEO assume responsibility for the four industry-oriented business groups of “Printing,” “Medical,” “Imaging,” and “Industrial,” as well as sales subsidiaries that engage in oversight of sales in respective major regions worldwide. They are accordingly assigned such duties under the command and supervision of the CEO.</p> <p>(2). The CEO decides on a mid-term management plan, which is decided based on close discussions with Officers of the Company and the executive officers of the major subsidiaries in Japan and overseas, and ensures the cohesion of the Group’s corporate management.</p>

<p>4. System for Group Management (Article 100, Paragraph 1, Item 5 of the Enforcement Regulations of the Corporation Law of Japan)</p>	<p>[Content of Basic Policy Resolution]</p> <p>The Company strengthens the internal control system of the Canon Group by requiring subsidiaries to follow the respective items:</p> <ul style="list-style-type: none"> (a). to obtain prior approval from the Company or report to the Company on important decisions in accordance with the “Regulations of Group Companies Management,” prescribed by the Board of Directors of the Company, (b). to grasp significant risks that the subsidiary may face in the course of business and to verify and evaluate the status of improvement and implementation of the risk management system and report their findings to the Company in accordance with the “Regulations of Risk Management,” (c). to design an appropriate organization under the governing law of incorporation and to clearly define approval processes and authorities of executive officers, (d). in addition to thoroughly instilling compliance awareness through the Canon Group Code of Conduct, to put in place business procedures/checking systems that prevent violation of laws and regulations and subsidiaries’ articles of incorporation in the course of daily business and prepare a compliance education system as a part of the subsidiary’s risk management system, and (e). to establish a whistleblowing system and prohibit any disadvantageous treatment of any whistleblower.
	<p>[Outline of Activities]</p> <ul style="list-style-type: none"> (a). The Company received reports from subsidiaries and provided prior approval to subsidiaries in accordance with the “Regulations of Group Companies Management.” (b). In order to conduct evaluation of the status of improvement and implementation of the risk management system described in item (1) of Content of Basic Policy Resolution in 2 above, the subsidiaries being evaluated implemented evaluation of the respective targeted risks. (c). Each subsidiary performs, as appropriate, a review of the appropriateness of organizational design, and approval criteria and processes in accordance with the applicable laws and regulations and the nature of business and other factors. (d). Each subsidiary performed an inspection of the compliance system in the process of evaluating improvement and implementation of the risk management system (as described in item (1) of Outline of Activities in 2 above), and furthermore fosters a culture of compliance through training and other such means as necessary. (e). Each company has established a whistleblowing system and totally prohibits any disadvantageous treatment of any whistleblower.
<p>5. System for Storing and Managing Information (Article 100, Paragraph 1, Item 1 of the Enforcement Regulations of the Corporation Law of Japan)</p>	<p>[Content of Basic Policy Resolution]</p> <p>Information related to the execution of duties of the CEO and other Officers, including meeting minutes of the Board of Directors and settlement documents, shall be maintained and managed by respective divisions in charge of such management in accordance with laws and regulations, the “Regulations of the Board of Directors,” and other related rules. Directors, Audit & Supervisory Board Members, and members of the internal audit division have the ability to inspect this information at any time.</p> <p>[Outline of Activities]</p> <p>Whenever deemed necessary, Directors, Audit & Supervisory Board Members and members of the internal audit division peruse or obtain copies of meeting minutes of the Board of Directors and the Corporate Strategy Committee, and other records such as settlement documents of the CEO.</p>

<p>6. System for Auditing by Audit & Supervisory Board Members (Article 100, Paragraph 3 of the Enforcement Regulations of the Corporation Law of Japan)</p>	<p>[Content of Basic Policy Resolution]</p> <ol style="list-style-type: none"> (1). The Company established and assigns dedicated full-time employees of an appropriate number to the Office of Audit & Supervisory Board Members. The Office of Audit & Supervisory Board Members is established as an independent entity that is outside the control of Officers. Any change in dedicated full-time employee personnel shall require the prior consent of the Audit & Supervisory Board. (2). Audit & Supervisory Board Members shall grasp the execution of duties by Officers, attending not only meetings of the Board of Directors, but also other important meetings such as meetings of the Corporate Strategy Committee and Risk Management Committee. (3). The administrative divisions of the headquarters, such as human resources, finance & accounting, and legal affairs, shall hold meetings with Audit & Supervisory Board Members and report on the execution of duties in a timely manner. Additionally, if any material breach of laws and regulations occurs, the relevant division shall immediately report this to Audit & Supervisory Board Members. (4). Audit & Supervisory Board Members shall have accounting auditors periodically give reports. (5). Audit & Supervisory Board Members shall hold periodic meetings with counterparts of domestic subsidiaries of the Company and work to improve the auditing system from a unified group perspective by sharing information. Additionally, Audit & Supervisory Board Members shall grasp the execution of duties by Officers of subsidiaries, sharing responsibility for the auditing of major subsidiaries in Japan and overseas. (6). The Company prohibits any disadvantageous treatment of any person that reports to Audit & Supervisory Board Members. The Company also seeks its subsidiaries to prohibit any disadvantageous treatment. (7). The Audit & Supervisory Board shall draw up an annual audit plan and an annual budget covering the audit of the Company and its subsidiaries. And the Company shall secure necessary funds for the annual budget. When an outlay outside the budget is incurred, due to a special audit, etc., the expense shall be reimbursed by the Company.
--	--

	<p>[Outline of Activities]</p> <ol style="list-style-type: none"> (1). The Company established the Office of Audit & Supervisory Board Members to be independent from the directives and commands of Officers and it assigns dedicated full-time employee(s) of an appropriate number to the Office of Audit & Supervisory Board Members. (2). Audit & Supervisory Board Members, including Outside Audit & Supervisory Board Members, attend all the Board of Directors meetings, and full-time Audit & Supervisory Board Members attend all meetings of the Corporate Strategy Committee and the Risk Management Committee, overseeing the execution of duties by Officers. (3). Audit & Supervisory Board Members and the Audit & Supervisory Board periodically receive reports from the internal audit division on the results of audits. In addition, full-time Audit & Supervisory Board Members periodically receive reports from the managers in charge of the administrative divisions of the headquarters on the execution of duties. (4). Audit & Supervisory Board Members receive reports from the Accounting Auditor on the status of audits at least once a month and receive reports from the Accounting Auditor on the results of the audit of the business term in accordance with laws and regulations. (5). Audit & Supervisory Board Members periodically hold meetings with Audit & Supervisory Board Members of domestic subsidiaries and share information. In addition, at the time of audits at subsidiaries, Audit & Supervisory Board Members receive reports from the Directors of subsidiaries and share information with Audit & Supervisory Board Members of the subsidiaries, overseeing the execution of duties by Officers of subsidiaries. (6). Information is disseminated in the Company and its subsidiaries concerning the prohibition of disadvantageous treatment of any person that reports to Audit & Supervisory Board Members. (7). In the current business term, there were no shortfalls in the budget allocated for the implementation of audits in accordance with the audit plan.
--	--

(Outline of Contracts for Limitation of Liability)

The Company stipulates in its Articles of Incorporation that Directors and Audit & Supervisory Board Members may be partially exempted from liability by a resolution of the Board to the extent permitted by law. In addition, pursuant to Article 427, Paragraph 1 of the Companies Act and the provisions of the Company's Articles of Incorporation, the Company has entered into agreements with Outside Directors and Outside Audit & Supervisory Board Members to limit their liability for damages due to negligence of their duties. The maximum amount of liability under these contracts is the maximum amount stipulated by laws and regulations. The purpose of these rules is to enable Directors and Audit & Supervisory Board Members to adequately fulfill their expected roles without becoming overly intimidated in the performance of their duties.

(Outline of a Directors and Officers Liability Insurance Contract)

The Company has entered into a directors and officers liability insurance contract with an insurance company as specified in the provision of Article 430-3, Paragraph 1 of the Corporation Law of Japan. The scope of insured parties of the insurance covers Directors, Audit & Supervisory Board Members, and Executive Officers of the Company, and the full cost of insurance premiums for all the insured parties is borne by the Company. The insurance covers damages that could arise under situations where an insured party bears liability in regard to performance of his or her duties or where the insured party becomes subject to a claim seeking to hold him or her liable in that regard. However, the Company has taken measures to ensure that the appropriateness of the execution of duties by Directors, Audit & Supervisory Board Members, and other officers is not impaired, such as by exempting coverage in cases of criminal acts or intentionally committed illegal acts.

(Prescribed number of Directors)

The Company stipulates in its Articles of Incorporation that the number of Directors shall be 30 or less.

(Requirements for a resolution to appoint Directors)

The Company stipulates in its Articles of Incorporation that a resolution for the appointment of Directors shall require shareholders holding one-third or more of the voting rights who can exercise their voting rights must be present, and the resolution must be passed by a majority of those voting rights. Additionally, the Articles of Incorporation stipulate that resolutions on the appointment of Directors shall not be conducted by cumulative voting.

(Matters for resolution at the Shareholders' Meetings that may be resolved by the Board of Directors)

A. Decision-making organization for interim dividends

In accordance with Article 454, Paragraph 5 of the Corporation Law of Japan, the Company has stipulated in its Articles of Incorporation that interim dividends may be processed by a resolution of the Board of Directors. The purpose of this provision is to provide returns to the Company's shareholders in a prompt manner.

B. Decision-making organization for the repurchase of the treasury stock

In accordance with Article 165, Paragraph 2 of the Corporation Law of Japan, the Company has stipulated in its Articles of Incorporation that it may repurchase treasury stock through market transactions, etc. by resolution of the Board of Directors. The purpose of this is to repurchase treasury stock in a flexible manner.

(Requirements for a special resolution at a Shareholders' Meeting)

The Company's Articles of Incorporation stipulate that the requirement for a special resolution at Shareholder's Meeting set forth in Article 309, Paragraph 2 of the Corporation Law of Japan are that shareholders holding one-third or more of the voting rights who can exercise their voting rights must be present, and the resolution must be passed by two-thirds or more of those voting rights. The purpose of relaxing the quorum for special resolutions at the Shareholders' Meeting is to ensure that the meeting proceeds smoothly.

(Timely Disclosure)

In accordance with relevant laws and regulations and the disclosure rules of the stock exchange, the Company established the "Disclosure Information Committee" in April 2005 to strengthen the system for accurately and comprehensively disclosing information to shareholders and the capital market. This committee is responsible for examining and deciding on the necessity, content, and timing of timely disclosures of important company information. Additionally, it has established a system for promptly and comprehensively collecting important company information from each division. Furthermore, the Company continues to provide timely and accurate information on its management status to shareholders and investors through Corporate Strategy Conference, quarterly financial results briefings, and enhancing Canon website.

Executive Officer	Eisuke Katsuyama	Senior General Manager of Public Affairs center
Executive Officer	Kazuhiro Tomoi	Deputy Group Executive of Procurement HQ

(ii) Status of Outside Directors

a. Number of outside directors and outside corporate auditors

As of the date of submission of this report, the Company has four Outside Directors and three Outside Audit & Supervisory Board Members.

In addition, as proposals (matters to be resolved) for the Ordinary General Meeting of Shareholders scheduled to be held on March 27, 2026, the Company has submitted proposals for “Election of Eleven Directors” and “Election of Two Audit & Supervisory Board Members”. If these proposals are approved as originally submitted, the Company will have five Outside Directors and three Outside Audit & Supervisory Board Members.

b. The Company’s view on Function, Role, Independency and Appointment of Outside Directors and Outside Audit & Supervisory Board Members

The Company establishes the “Independence Standards for Independent Directors/Audit and Supervisory Board Members” resolved by the Board of Directors with the consent of all Audit and Supervisory Board Members, in order to clarify the standards for ensuring independence of Independent Directors/Audit and Supervisory Board Members of the Company, taking into consideration Japan’s Corporate Governance Code (Principle 4.9) and the independence criteria set by securities exchanges in Japan. The standards are posted on the Company’s website at (<https://global.canon/en/ir/strategies/governance.html>). All of the Company’s Outside Directors and Outside Audit & Supervisory Board Members satisfy the standards for independence, and assume roles that contribute to the maintenance and improvement of Board of Directors’ transparency and accountability. In addition, the Company has notified Tokyo Stock Exchange, Nagoya Stock Exchange, Fukuoka Stock Exchange and Sapporo Securities Exchange that all Outside Directors and Outside Audit & Supervisory Board Members are Independent Directors / Audit & Supervisory Board Members as stipulated by the exchanges.

As of the date of submission of this report, the reasons for electing the Company’s Outside Directors and Outside Audit & Supervisory Board Members are as follows.

• Outside Director Yusuke Kawamura (Independent Director)

Mr. Yusuke Kawamura has a wealth of experience as an Outside Director along with capacity as an expert with respect to financial and securities systems as well as strategy for managing financial institutions, given that he worked at a securities company and subsequently served in various positions, including as a university professor, a commissioner of councils of Japan's Ministry of Finance and Financial Services Agency, and an Executive Counselor of the Japan Securities Dealers Association. Based on his extensive experience and advanced knowledge of finance and securities, he is expected to provide valuable advice when participating in discussions on M&A and ESG matters, and he is appropriately performing his duties as an Outside Director.

• Outside Director Masayuki Ikegami (Independent Director)

After serving in key positions such as Chief Prosecutor of the Nagoya and Osaka High Public Prosecutors Offices and as a Justice of the Supreme Court, he has been involved in various cases, including corporate matters, for many years as a legal professional. Based on his extensive experience and advanced knowledge, he is expected to provide valuable opinions and supervision, particularly regarding the internal control systems and corporate governance, including ensuring corporate compliance. He has appropriately performed his duties as an Outside Director.

• Outside Director Masaki Suzuki (Independent Director)

After working at the Ministry of Finance for many years, he was transferred to the Ministry of the Environment and held key positions such as Administrative Vice-Minister. After retiring from the Ministry, he served as Representative Director of a private financial institution. As such, he is expected to provide useful opinions particularly regarding corporate finance and the environmental field, and to provide advice and supervision of business execution based on his management experience at a financial institution that requires a high degree of appropriateness and compliance. Accordingly, he appropriately executed his duties as an Outside Director.

• Outside Director Akiko Ito (Independent Director)

Ms. Akiko Ito joined the Ministry of Construction (currently the Ministry of Land, Infrastructure, Transport and Tourism) as a technical official, and served as Director of Housing Bureau. After serving in charge of policies for regional revitalization, including human resource development, work and urban development, she served as Secretary General of the Consumer Affairs Agency. After retiring from the Ministry, she continued to engage in research in these fields and served as an Outside Director of companies. She is expected to provide valuable advice and supervision, particularly from the perspectives of clients, consumers, and organizational management, as well as advice on promoting the utilization of diverse human resources. She is appropriately performing her duties as an outside director.

• Audit & Supervisory Board Member Yutaka Tanaka (Independent Director)

After serving as a judge in charge of civil cases for many years, he engaged in corporate legal affairs as a lawyer and has also served as a professor at a law school. As such, he possesses extensive experience and advanced expertise in legal affairs, which he utilizes to appropriately execute his duties as an Outside Audit & Supervisory Board Member.

• Audit & Supervisory Board Member Koichi Kashimoto (Independent Director)

Mr. Koichi Kashimoto has been engaged in the business management of The Dai-ichi Life Insurance Company, Ltd for many years. He also served as the general manager of general affairs, including legal affairs. He also has a wealth of international experience. He appropriately performs his duties as an Outside Audit & Supervisory Board Member, leveraging his expertise and experience in audits that overlook the Canon Group, including overseas operations. Dai-ichi Life Insurance Co., Ltd. is a stockholder of Canon, and its shareholding ratio is approximately 1.4% (calculated by deducting the number of treasury shares from the total number of issued shares). In addition, although there are transactions between Dai-ichi Life Insurance Company, Ltd and Canon based on insurance contracts, etc., the annual transaction amount is less than 1% of the consolidated net sales of both Canon and Dai-ichi Life Insurance Company, Ltd.

• Audit & Supervisory Board Member Yuka Shigetomi (Independent Director)

Ms. Yuka Shigetomi has many years of practical experience in corporate accounting as a certified public accountant in Japan, the United States, and Hong Kong, as well as a wealth of international experience from working in overseas offices of the world's largest audit corporation. The Company expects that her expertise in corporate accounting as well

as her extensive knowledge of risk management and ESGs from a global perspective will effectively contribute to further proper auditing of Canon, and the Company has judged that she will appropriately perform her duties as an Outside Audit & Supervisory Board Member.

In addition, as proposals (matters to be resolved) for the Ordinary General Meeting of Shareholders scheduled to be held on March 27, 2026, the Company has submitted proposals for “Election of Eleven Directors” and “Election of Two Audit & Supervisory Board Members”. If these proposals are approved as originally proposed, Mr. Koichi Kashimoto, Outside Audit & Supervisory Board Member, will retire from his position, and Ms. Atsumi Arima will assume office as an Outside Director, while Ms. Kaori Asakura will assume office as an Outside Audit & Supervisory Board Member.

• Audit & Supervisory Board Member Atsumi Arima (Independent Director)

Ms. Atsumi Arima has abundant practical experience and specialized knowledge from her time spent working at a major financial institution, where she served critical roles in its corporate advisory and international business departments. She also has plentiful experience as an outside director. The Company expects that she will apply her advanced knowledge and experience in risk management in the financial field to provide appropriate advice on the Company’s management and oversight of business execution, and has determined that she is capable of appropriately fulfilling her duties as an Outside Audit & Supervisory Board Member.

• Audit & Supervisory Board Member Kaori Asakura (Independent Director)

Ms. Kaori Asakura has been engaged for many years in securities analysis and other roles at The Dai-ichi Life Insurance Company, Ltd., and possesses highly specialized knowledge relating to economics and finance. She also manages overall business administration, including human resources, at the corporate group’s think tank within the same group. The Company expects that she will apply her advanced knowledge and experience in risk management in the financial field to provide appropriate advice on the Company’s management and oversight of business execution, and has determined that she is capable of appropriately fulfilling her duties as an Outside Audit & Supervisory Board Member. Dai-ichi Life Insurance Co., Ltd. is a stockholder of Canon, and its shareholding ratio is approximately 1.4% (calculated by deducting the number of treasury shares from the total number of issued shares). In addition, although there are transactions between Dai-ichi Life Insurance Company, Ltd and Canon based on insurance contracts, etc., the annual transaction amount is less than 1% of the consolidated net sales of both Canon and Dai-ichi Life Insurance Company, Ltd.

(iii) Supervision and Audit by Outside Director or Outside Audit & Supervisory Board Member, Collaboration among internal audit, audit by Audit & Supervisory Board Members and Accounting Audit, Relationship with internal control division

Outside Directors receive reports on the results of audits by Audit & Supervisory Board Members and accounting audits, as well as the status of internal control operations at meetings of the Board of Directors. They also strive to deepen their understanding of management issues by attending Corporate Strategy Committee and Risk Management Committees, and by exchanging information with Audit & Supervisory Board Members, enabling to provide sufficient supervision and advice.

Outside Audit & Supervisory Board Members fully demonstrate their independence, neutrality and expertise, and monitor management while constantly sharing information with full-time Audit & Supervisory Board Members. In addition, the Audit & Supervisory Board receives explanations from the internal audit division and the accounting auditors regarding their respective audit plans and audit items, etc., and confirms their validity from an objective perspective. After each audit is conducted, the Audit & Supervisory Board receives an explanation of the results. Furthermore, Outside Directors and Outside Audit & Supervisory Board Members exchange information with the internal control division as needed on matters such as the status of the construction and operation of internal control systems and risk assessments, and provide guidance and advice based on their experience and deep insight gained from outside of Canon.

(3) Status of audit

(i) Status of audit by Audit & Supervisory Board Members

a. Organization, personnel and procedures

For the organization, personnel and procedures of audit by Audit & Supervisory Board Members, please refer to "4. Corporate Governance (1) Overview of Corporate Governance (ii) Summary of the Canon's corporate governance structure and the reason for adopting this structure (Audit & Supervisory Board)."

b. Activities of Audit & Supervisory Board Members and the Audit & Supervisory Board

(1) Frequency of meetings of the Audit & Supervisory Board and attendance of Individual Audit & Supervisory Board Members

• Number of meetings and intervals between meetings

Held 18 times a year (12 regular monthly meetings and 6 other meetings). The average necessary time is one hour.

In addition, Audit & Supervisory Board Members' liaison meetings are held as appropriate (14 times in the current period) for the purpose of sharing information, etc.

• Number of attendance and attendance rate of Audit & Supervisory Board Members

Chikahiro Okayama (Full-time Audit & Supervisory Board Member): Attended all 18 meetings, attendance rate 100%

Hideya Hatamochi (Full-time Audit & Supervisory Board Member): Attended all 6 meetings, attendance rate 100%

Takeshi Morikawa (Full-time Audit & Supervisory Board Member): Attended all 12 meetings, attendance rate 100%

Yutaka Tanaka (Audit & Supervisory Board Member): Attended all 18 meetings, attendance rate 100%

Hiroshi Yoshida (Audit & Supervisory Board Member): Attended all 6 meetings, attendance rate 100%

Koichi Kashimoto (Audit & Supervisory Board Member): Attended all 18 meetings, attendance rate 100%

Yuka Shigetomi (Audit & Supervisory Board Member): Attended all 12 meetings, attendance rate 100%

Note: Mr. Hideya Hatamochi, Full-time Audit & Supervisory Board Member, and Mr. Hiroshi Yoshida, Audit & Supervisory Board Member, retired upon the conclusion of the Ordinary General Meeting of Shareholders for 2024 held on March 28, 2025. In addition, Mr. Tsuyoshi Morikawa, Full-time Audit & Supervisory Board Member, and Ms. Yuka Shigetomi, Audit & Supervisory Board Member, were elected and assumed office at the same Ordinary General Meeting of Shareholders. The differences in the number of meetings attended are attributable to the respective timing of their appointments and retirements.

(2) Specific matters to be considered by the Audit & Supervisory Board

- Formulation of audit policies and audit plans, etc.
- Preparation of audit report
- Confirmation of the adequacy of Accounting Audits
- Confirmation of the status of development and operation of the internal control system
- Confirmation of agenda items for the General Meeting of Shareholders
- Decisions on appointment / dismissal reappointment / non-reappointment of accounting auditors
- Confirmation of resolutions and matters reported at important meetings
- Confirmation of the status of audits by Audit & Supervisory Board Members
- Prior approval of non-assurance services by the accounting auditor
- Other matters specified by laws and regulations

(3) Activities of Audit & Supervisory Board Members

In the Audit & Supervisory Board held at the beginning of the fiscal year, the allocation of duties among individual Audit & Supervisory Board Members was decided, and the following activities were carried out

- Attendance at important meetings (Board of Directors, Corporate Strategy Committee, Risk Management Committee, etc.)
- Implementation of audits and interviews (19 affiliated companies in Japan, 21 affiliated companies overseas, 22 internal divisions)

- Attendance at meetings of the Nomination and Remuneration Advisory Committee
- Evaluation of the effectiveness of the Board of Directors
- Sharing information and exchanging opinions with Outside Directors
- Interview of reports from administrative divisions (Human Resources, Finance & Accounting, Legal, Information Security, Quality Management, Public Affairs, Sustainability, etc.)
- Inspection of important documents (approval documents, minutes of the Board of Directors, minutes of the Corporate Strategy Committee, etc.)
- Audit of business reports, etc. and receiving reports of financial results, etc.
- Receiving semi-annual and annual financial reports of unlisted affiliated companies in Japan (27 companies)
- Receiving reports on internal control evaluation results
- Confirmation of the status of development and operation of the whistleblowing system
- Interview of audit reports from the internal audit division
- Interview on the status of audits from the accounting auditor and receiving reports on the results of audits
- Confirmation of the accounting auditor's audit structure, independence, and audit contract

(ii) Status of Internal Audits

The Corporate Audit Center, which is the internal audit division, is an independent, and dedicated organization that, in accordance with the Internal Audit Regulations, audits each division and subsidiary with respect to compliance with laws and the effectiveness and efficiency of the internal control system, and makes recommendations for improvement as necessary.

In addition, in accordance with the policies of top management, the Corporate Audit Center is planning to increase the number of personnel from the current structure of approximately 60 in order to evaluate all operations from an expert perspective, and is working to strengthen the audit function.

a. Cooperation between Audit & Supervisory Board Members and the Internal Audit Division

As an initiative to ensure the effectiveness of internal audits, Audit & Supervisory Board Members and the Audit & Supervisory Board receive an overview of the internal audit plan and audit items from the Internal Audit Division in advance, and directly receive reports on all audit results and evaluations after the internal audit has been conducted. In addition, opinions and information are exchanged as needed with close collaboration.

b. Cooperation between Audit & Supervisory Board Members and the Accounting Auditor

Audit & Supervisory Board Members and the Audit & Supervisory Board receive an overview of the audit plan and explanations of key audit items, etc., from the accounting auditor before the start of audits, and confirm the validity of the audit plan. In addition, the Audit & Supervisory Board receives reports on the implementation status of accounting audits, quarterly reviews, and audits of internal controls, etc., from the Accounting Auditors at least once a month, as well as reports on the results of audits before representation of audit opinion. With regard to "Key Audit Matters," Audit & Supervisory Board regularly receives reports on the implementation status of risk response procedures and exchanges opinions.

The Audit & Supervisory Board Members accompany the accounting auditor to the physical inventory count, hold meetings with the accounting auditor in charge of auditing major affiliated companies, and strive to understand the status of audit situation. The Audit & Supervisory Board receives detailed explanations on the audit quality control system of the accounting auditor and requests information as necessary to confirm its validity.

c. Relationship between Internal Audits, audits by Audit & Supervisory Board Members, and Accounting Audits, and the Internal Control Division

With regard to risk management, which is one of the key aspects of internal control, the secretariat of the Risk Management Committee and the relevant divisions regularly exchange information with the Internal Audit division, the Audit & Supervisory Board Members, and the accounting auditor on matters such as risk assessment and the status of the management system. The results of this exchange are reflected in subsequent activities, and through this cycle, Canon strives to maintain and strengthen appropriate risk management. In addition, the relationship between Internal Audits, audits by Audit & Supervisory Board Members, Accounting Audits and the internal control division is as described in "4. Corporate Governance, etc. (1) Overview of Corporate Governance

(iii) Other Matters Related to Corporate Governance (Internal Control)."

(iii) Status of Accounting Audits

a. Name of audit firm:

Deloitte Touche Tohmatsu LLC

b. Continuous audit period

6 years

c. Certified Public Accountants who performed the audit;

Name, etc. of the certified public accountants		Name of the audit firm	Continuous Auditing Years
Designated Engagement Partner, Certified Public Accountant	Shuichi Morishige	Deloitte Touche Tohmatsu LLC	1 year
Designated Engagement Partner, Certified Public Accountant	Susumu Nakamura	Deloitte Touche Tohmatsu LLC	6 years
Designated Engagement Partner, Certified Public Accountant	Hideaki Takagi	Deloitte Touche Tohmatsu LLC	6 years
Designated Engagement Partner, Certified Public Accountant	Masayoshi Nakai	Deloitte Touche Tohmatsu LLC	2 years

d. Composition of support staff in auditing team

32 Certified Public Accountants and 100 Others

e. Policy for selection of audit firm, reason evaluation

The Company has established the following policies for the selection of accounting auditors.

In order to ensure that the independence of the accounting auditor and the Company is ensured and that effective audits are conducted based on a good relationship of trust, the Audit & Supervisory Board shall select the accounting auditor after receiving proposals from multiple audit firms at regular intervals from the perspectives of independence, expertise, quality control system, global audit system, etc.

If the accounting auditor is found to fall under any of the items of Article 340, Paragraph 1 of the Companies Act, the Audit & Supervisory Board will dismiss the accounting auditor as necessary with the consent of all Audit & Supervisory Board Members. In addition to the above cases, if it is deemed that it is difficult to conduct an appropriate audit due to the occurrence of reasons that harm the eligibility and independence of the accounting auditor, the Audit & Supervisory Board will determine the content of proposals regarding the dismissal or non-reappointment of the accounting auditor to be submitted to the General Meeting of Shareholders.

The Audit & Supervisory Board received reports from the accounting auditor on the status of execution of duties and the quality control system, and confirmed whether the accounting auditor met the requirements for an auditor as stipulated in the Companies Act, the results of inspections and reviews of the accounting auditor, and whether there were any significant disputed cases in which the accounting auditor was a defendant. In addition, the Audit & Supervisory Board evaluated the status of execution of duties by the accounting auditor from the perspective of responding to global audits in a disciplined and consistent manner, promptly addressing issues through good communication, and conducting efficient and effective audits utilizing advanced technologies, which were expected when the Accounting Auditor was appointed.

Based on the above, the Audit & Supervisory Board has decided to reappoint Deloitte Touche Tohmatsu LLC as accounting auditor for 2025.

(iv) Details of audit remuneration, etc.

a. Remuneration paid to audit certified public accountants, etc.

Categories	Previous Consolidated Fiscal Year		Current Consolidated Fiscal Year	
	Remuneration for audit services (Millions of yen)	Remuneration for non-audit services (Millions of yen)	Remuneration for audit services (Millions of yen)	Remuneration for non-audit services (Millions of yen)
Reporting company	591	10	579	64
Consolidated subsidiary	569	11	581	3
Total	1,160	21	1,160	67

b. Remuneration for the same network as audit certified public accountants, etc. (excluding a.)

Categories	Previous Consolidated Fiscal Year		Current Consolidated Fiscal Year	
	Remuneration for audit services (Millions of yen)	Remuneration for non-audit services (Millions of yen)	Remuneration for audit services (Millions of yen)	Remuneration for non-audit services (Millions of yen)
Reporting company	-	0	-	0
Consolidated subsidiary	2,827	236	2,944	322
Total	2,827	236	2,944	322

The content of non-audit services related to the remuneration in the above a. and b. in the previous fiscal year and the current fiscal year are various advisory services.

c. Details of remuneration based on other significant audit and attestation services

No items to be reported.

d. Policy on determining audit remuneration

The Company verifies the adequacy of the audit plan (including the scope, method, and time of audits) and determines the audit remuneration for the audit certified public accountants.

e. Reason for the Audit & Supervisory Board's consent to the remuneration, etc. of the Accounting Auditor

The Audit Committee reviews the previous fiscal year's audit plan and its implementation status, as well as the current fiscal year's audit plan, and requests explanations as needed to confirm the appropriateness of the current fiscal year's remuneration estimates. As a result, the committee determined that the remuneration for the accounting auditor is at a reasonable level to maintain and improve audit quality and agreed to them based on Paragraph 1, Article 399 of the Companies Act of Japan.

(4) Compensation for Directors, etc.

(i) Matters relating to policy to determine the amount of compensation, etc., for Directors or the calculation method thereof

(a) Details of policy regarding decisions on individual compensation, etc. for Directors

1. Basic Policy of Remuneration

The Company, for the healthy and sustainable growth of Canon Group, is working to design a Director remuneration system that effectively encourages Directors and Audit & Supervisory Board Members to fully demonstrate their abilities and fulfill their roles and responsibilities. Moreover, the total value of Director and Audit & Supervisory Board Member remuneration is based on an appropriate standard, taking into consideration the recruiting and holding on to top-class people that can effectively meet the Company's expectations.

2. Details of Each Element of the Remuneration System

a. Representative Directors and Executive Directors

The remuneration of Representative Directors and Executive Directors consists of a basic remuneration, a bonus, and a stock-type compensation stock option.

Basic Remuneration

Basic remuneration consists of a fixed amount of monetary remuneration paid monthly as consideration for the performance of duties of Directors. The amount is prescribed according to each Director's position and the degree to which the Director contributes in this role and the total remuneration amount is within the limit approved at the General Meeting of Shareholders. (Total remuneration amount here refers to the total basic remuneration of all Directors including Outside Directors.)

Bonus

As a reward for Director service over a one-year term, Directors receive a bonus once a year for which "consolidated income before income taxes" is used as a financial indicator to measure the results of annual group-wide corporate activities. The total amount of the Director's bonus is determined by multiplying such consolidated income with a given predetermined coefficient that corresponds with the Director's position. It is also determined through individual assessment based on the degree to which the Director contributes in this role.

As such, matters including whether a payment is allowed or the total amount of bonus as calculated above, are deliberated during the General Meeting of Shareholders every year.

Bonuses along with dividend and internal reserves are essentially subjects of corporate profit distribution.

Stock-Type Compensation Stock Options

Once a year, stock acquisition rights on Canon's shares are granted with the intent of providing an incentive for Directors to further contribute to the improvement of medium- and long-term performance and raising corporate value through sharing the benefits and risks of share price fluctuations with Canon's shareholders. The total amount of the stock acquisition rights is within the amount approved at the General Meeting of Shareholders and the number of those stock acquisition rights granted is calculated based on the amount determined by the Director's position, the consolidated income before income taxes in the previous year, as well as the degree to which the Director has contributed in this role (the amount of monetary compensation claims granted to Directors for the payment in exchange for the stock acquisition rights), and the stock price level at the time of grant. As remuneration is linked to the achievements throughout one's term in office, Canon has a system in place that allows the exercising of stock acquisition rights at the time of retirement. As for the grantee, if Canon recognizes any misconduct of duty, act conflicting with the duty of due care, etc., Canon may limit the exercise of all or a portion of the stock acquisition rights.

Determining the proportion of basic remuneration, bonus, and stock-type compensation stock options enlists a basic approach of emphasizing the level and stability of basic remuneration given that we believe it is important to engage with management from the medium- to long-term perspective. At the same time, taking into account the need for enhancing performance over the course of a single fiscal year and pursuing shareholder returns, the proportion of total remuneration for Directors is arranged such that basic remunerations, bonuses and stock-type compensation stock options may account for approximately 50%, 30%, and 20%, respectively. As for consolidated income before income tax, which is used as an indicator of bonuses, the outlook was ¥536,000 million (announced in January 2025) at the beginning of the fiscal year 2025, but the actual results were ¥482,100 million.

b. Outside Directors and Audit & Supervisory Board Members

The remuneration received by Outside Directors who maintain a position independent from the execution of business consists entirely of a basic remuneration, i.e., monetary remuneration of a fixed amount paid monthly as consideration for the performance of duties, and is determined within the range of the amount approved by the General Meeting of Shareholders as described in (i) Basic Policy of Remuneration above and within the range of the amount predetermined by Canon in consideration of the general level.

3. Remuneration Decision-Making Process

Canon, with the aim of ensuring the transparency and objectivity of the remuneration decision-making process as well as the validity of the remuneration system, established the “Nomination and Remuneration Advisory Committee,” a non-statutory committee, which consists of the CFO, four Independent Outside Directors, and one Independent Outside Audit & Supervisory Board Member. The Committee, after examining the rationale of the remuneration system, including calculation standards of the basic remuneration, the bonus and the granting standards of stock-type compensation stock option plan, reports to the Board of Directors to the effect that the system is reasonable.

Decisions regarding the amount and content of remuneration (the amount of basic remuneration and bonus as well as the number of stock-type compensation stock options) of each Director are delegated to the CEO. However, the CEO must compile the proposals based on the prescribed criteria in accordance with the policy described in 2. a. above. And prior to submitting the proposal to the Board of Directors, the CEO must present it to the Nomination and Remuneration Advisory Committee for confirmation of adequacy of the proposal. As for bonuses, as described in 2. a. above, Canon consults with the General Meeting of Shareholders regarding whether or not bonuses can be paid and the total amount to be paid.

Note: At the Ordinary General Meeting of Shareholders scheduled to be held on March 27, 2026, the Company has proposed the “Election of Eleven Directors”. If these proposals are approved as originally proposed, the Committee will consist of the Representative Director & CFO, five Independent Outside Directors, and one Independent Outside Audit & Supervisory Board Member.

(b) Method of Determining Policy on Decisions

Canon adopted the “Policy on Decisions on the Content of Remunerations for Individual Directors” by resolution at the Board of Directors meeting. Before making this resolution, the Board of Directors consulted the Nomination and Remuneration Advisory Committee, which is mainly comprised of Independent Outside Directors and Audit & Supervisory Board Members, about the content of the resolution and received its response. Moreover, if it is deemed necessary to make revisions to this policy in the future, the same process shall be followed. And the remuneration received by Outside Directors who maintain a position independent from the execution of business consists entirely of a basic remuneration, i.e., monetary remuneration of a fixed amount paid monthly as consideration for the performance of duties, and is determined within the range of the amount approved by the General Meeting of Shareholders.

(c) Reasons the Board of Directors Judged the Details of Individual Director Remuneration for This Term to be Corresponding with the Policy on Decisions

Decisions regarding the amount and content of remuneration (the amount of basic remuneration and bonus as well as the number of stock-type compensation stock options) of each Director are made in accordance with the policy on decisions described above, and such decisions are made after the “Nomination and Remuneration Advisory Committee” has furnished its confirmation beforehand. Accordingly, the Board of Directors judges that the content is in line with the policy on decisions.

(Resolution at the General Meeting of Shareholders regarding Officers' Remuneration and Details of Most Recent Activities of Nomination and Remuneration Advisory Committee)

<General Meeting of Shareholders>

General Meeting of Shareholders	Details of the resolution / Number of Directors and Audit & Supervisory Board Members subject to the resolution (Number of members at the conclusion of the General Meeting of Shareholders)
The Ordinary General Meeting of Shareholders for 2003 (Held on March 30, 2004)	Total remuneration of “200 million yen or less annually” was approved and adopted for Audit & Supervisory Board Members / 4 persons (of which, 2 persons were Outside Audit & Supervisory Board Members)
The Ordinary General Meeting of Shareholders for 2012 (Held on March 28, 2013)	Total remuneration of “1,800 million yen or less annually” was approved and adopted for Directors / 21 persons
The Ordinary General Meeting of Shareholders for 2017 (Held on March 29, 2018)	Of the above total remuneration for Directors, “300 million yen or less annually” was approved and adopted as the total amount of stock acquisition rights as stock-type compensation stock options / 5 persons (excluding Outside Directors)
The Ordinary General Meeting of Shareholders for 2020 (Held on March 30, 2021)	Details of stock-type compensation stock options to be granted to Directors were approved and adopted / 3 persons (excluding Outside Directors)
The Ordinary General Meeting of Shareholders for 2023 (Held on March 28, 2024)	Raising “300 million yen or less annually” to “400 million yen or less annually” as the total amount of stock acquisition rights as stock-type compensation stock options to be granted to Directors and other details were approved and adopted / 6 persons (excluding Outside Directors)
The Ordinary General Meeting of Shareholders for 2024 (Held on March 28, 2025)	Paying bonuses to Directors was approved and adopted / 6 (excluding Outside Directors)

Note: At the Ordinary General Meeting of Shareholders scheduled to be held on March 27, 2026, the Company has proposed “Grant of Bonus to Directors”. The six Directors subject to this resolution exclude Outside Directors.

The activities of the Nomination and Remuneration Advisory Committee regarding the selection of candidates for Directors are as described in (1) Overview of Corporate Governance (ii) Summary of the Canon's corporate governance structure and the reason for adopting this structure (Nomination and Remuneration Advisory Committee).

(ii) Content of Non-Monetary Remuneration, etc.

The content of non-monetary remuneration, etc. and the main conditions for exercise, etc. are as described in (i) (a) 2. a. *Stock-Type Compensation Stock Options* above. During the term, 538 units of stock acquisition rights (53,800 shares of common stock of Canon) were delivered to six Directors, excluding Outside Directors.

(iii) Delegation of Decisions on the Content of Remuneration for Individual Directors

Delegated person	Chairman & CEO Fujio Mitarai
Content of delegated authority and measures taken to ensure that authority is appropriately executed	As described in (i) (c) above
Reason for delegation	Decisions on remuneration for Directors should be made based on assessment conducted by a person equipped with precise understanding regarding Canon's management and the status of duties executed by each Director, in alignment with the policy on decisions. Accordingly, authority has been delegated to the above delegated person upon having deemed that the individual is able to most appropriately perform such assessment.

(iv) Remuneration by executive category, remuneration by classification, and number of Directors and Audit & Supervisory Board Members

Category of Position	Number of Directors and Audit & Supervisory Board Members (Persons)	Remuneration and Other Amounts (Millions of yen)	Remuneration and Other Amounts by Classification (Millions of yen)		
			Monetary Remuneration, etc.		Non-Monetary Remuneration, etc.
			Basic Remuneration	Bonus (Performance-Linked Remuneration)	Stock-Type Compensation Stock Options
Directors (excluding Outside Directors)	6	1,726	946	581	199
Outside Directors	4	96	96	-	-
Audit & Supervisory Board Members (excluding Outside Audit & Supervisory Board Members)	3	43	43	-	-
Outside Audit & Supervisory Board Members	4	50	50	-	-

Notes: 1. The above number of Audit & Supervisory Board Members and Outside Audit & Supervisory Board Members include one Audit & Supervisory Board Member and one Outside Audit & Supervisory Board Member who retired at the conclusion of the Ordinary General Meeting of Shareholders for 2024 held on March 28, 2025.

2. The bonuses represent the provision for directors' bonuses recorded for the fiscal year, and correspond to the amount planned to be paid if the proposal entitled "Grant of Bonus to Directors" to be submitted at the Ordinary General Meeting of Shareholders for 2025 scheduled for March 27, 2026, is approved as originally proposed.
3. In the column Stock-type Compensation Stock Options, expense for this term is presented.

(v) Total amount of consolidated compensation, etc. of persons whose total amount of consolidated compensation, etc. is 100 million yen or more

Name	Category of Position	Category of Company	Consolidated Remunerations, etc. amount (Millions of yen)	Consolidated Remuneration and Other Amounts by Classification (Millions of yen)		
				Monetary Remuneration, etc.		Non-Monetary Remuneration, etc.
				Basic Remuneration	Bonus (Performance-Linked Remuneration)	Stock-Type Compensation Stock Options
Fujio Mitarai	Director	Reporting company	693	407	214	72
Toshizo Tanaka	Director	Reporting company	296	152	108	36
Toshio Homma	Director	Reporting company	289	147	107	36
Kazuto Ogawa	Director	Reporting company	180	97	59	24
Hiroaki Takeishi	Director	Reporting company	135	71	48	16
Minoru Asada	Director	Reporting company	132	71	45	16

- Notes: 1. The bonuses represent the provision for directors' bonuses recorded for the fiscal year, and correspond to the amount planned to be paid if the proposal entitled "Grant of Bonus to Directors" to be submitted at the Ordinary General Meeting of Shareholders for 2025 scheduled for March 27, 2026, is approved as originally proposed.
2. In the column Stock-Type Compensation Stock Options, expenses for this term are presented.
 3. Figures are rounded to the nearest million yen. Therefore, the sum of each column does not match the total amount column.

(5) Shareholdings

(i) Classification of investment securities

Canon classifies invested shares held solely for the purpose of receiving profits from fluctuations in stock prices or the receipt of dividends as purely invested shares, and classifies other shares as invested shares held for purposes other than purely invested purposes. Canon does not hold investment shares that are purely for investment purposes.

(ii) Investment securities held for purpose other than pure investment

1. Policy on shareholdings, methods for verifying the rationality of shareholdings, and verification by the Board of Directors, etc. of whether it is appropriate to hold individual stocks.

(a) Policy Regarding Strategic Holdings

For the medium- to long-term growth of Canon, ceaseless improvement of respective systems like development, production, and sales, is essential. It is, however, difficult to achieve all of them solely through the management resources of Canon Group. Canon decides in some cases to hold shares of companies outside Canon Group as part of cooperation with such companies, when it determines that such shareholding would be beneficial to strengthening of those systems.

(b) Details of Examining the Rationale of Strategic Share Holdings

Canon evaluates each of its strategic shareholdings from qualitative aspects, such as the purpose of the holding, and quantitative aspects, whether the return on investment from the holding exceeds Canon's cost of capital and reports the results annually to the Board of Directors to verify the rationale for the holdings from a medium- to long-term perspective. As for current share holdings, the rationale for the holdings were recognized at the Board of Directors meeting held in February 2026.

2. Number of stocks and balance sheet amounts

	Number of stocks (Company)	Balance sheet amounts (Millions of yen)
Unlisted stocks	20	1,751
Other than unlisted stocks	11	9,759

(Stocks for which the number of stocks increased in the fiscal year)

	Number of stocks (Company)	Total acquisition cost for the increase in number of stocks (Millions of yen)	Reason for increasing number of stocks
Unlisted stocks	-	-	-
Other than unlisted stocks	-	-	-

(Stocks for which the number of stocks decreased in the fiscal year)

	Number of stocks (Company)	Total sale amount related to the decrease in the number of stocks (Millions of yen)
Unlisted stocks	1	0
Other than unlisted stocks	3	23

Note: The number of shares does not include securities whose share counts have changed because of stock consolidations, stock splits, share transfers, share exchanges, mergers, or any other corporate restructuring events.

3. Information on the number of specific investment stocks and deemed shareholdings by stock, and the amount recorded on the balance sheet.

- Notes: 1. Although it is difficult to provide detailed information on the quantitative holding effects for each stock, the rationality of holding shares of each stock has been reported and verified at the Board of Directors meeting in February 2026, taking into account the quantitative aspects as described above.
2. The balance sheet amount of "deemed shareholdings " is the number of shares subject to voting rights multiplied by the market value as of the end of the fiscal year.
3. The increase in the number of shares is attributable to a stock split.

(iii) Investment securities held for pure investment

Not applicable.

(iv) Investment securities for which the holding purpose has changed from pure investment to other than pure investment in the fiscal year ended December 31, 2025

Not applicable.

V. Financial Information

1. Preparation of Consolidated Financial Statements and Financial Statements

- (1) The consolidated financial statements of the Company are prepared in accordance with the accounting principles generally accepted in the United States of America, pursuant to Paragraph 3, Supplementary Provisions of the “Cabinet Office Ordinance for Partial Revision of the Ordinance on Terminology, Forms and Preparation Methods of Consolidated Financial Statements”, the Ordinance of the Cabinet Office No. 11 of 2002.
- (2) The non-consolidated financial statements of the Company are prepared in accordance with the Ordinance of the Ministry of Finance No. 59 of 1963 “Ordinance on Terminology, Forms and Preparation Methods of Financial Statements, etc.” (hereinafter “Ordinance on Financial Statements, etc.”).
Also, the Company is qualified as a company submitting financial statements prepared in accordance with special provision and prepares financial statements in accordance with the provision of Article 127 of the Ordinance on Financial Statements, etc.

2. Audit certification

Pursuant to Article 193-2, paragraph 1 of the Financial Instruments and Exchange Act of Japan, the consolidated financial statements for the fiscal year from January 1, 2025 to December 31, 2025 and the non-consolidated financial statements for the fiscal year from January 1, 2025 to December 31, 2025 were audited by Deloitte Touche Tohmatsu LLC.

3. Particular efforts to secure the appropriateness of the consolidated financial statements, etc.

Canon carries out special measures for ensuring the appropriateness of the consolidated financial statements, etc. Specifically, Canon collects information from Financial Accounting Standards Board and Financial Accounting Standards Foundation, etc., in order to properly grasp the contents of accounting standards, etc., or to appropriately respond to changes in accounting standards, etc., and strives to ensure appropriateness.

1. Basis of Presentation and Significant Accounting Policies

(a) Basis of Presentation

The Company issued convertible debentures in the United States in May 1969 and established a program in which its American Depositary Receipts (ADRs) are traded in the U.S. over-the-counter market. Since then, under the U.S. Securities Act of 1933 and the U.S. Securities Exchange Act of 1934, as amended, the Company has prepared its annual consolidated financial statements in accordance with U.S. GAAP and filed them with the U.S. Securities and Exchange Commission on Form 20-F. The Company's ADRs were listed on the NYSE in September 2000 after being quoted on NASDAQ from February 1972 to September 2000. In March 2023, the Company was delisted from the NYSE. The Company filed a Form 15F for the termination of registration of its ADRs and underlying common shares with the SEC and termination of ongoing reporting obligations under the U.S. Securities Exchange Act (the "Exchange Act") on March 7, 2024. The company's ongoing reporting obligations under the Exchange Act was immediately suspended upon filing the Form 15F with the SEC and were terminated on June 5, 2024, 90 days after the Form 15F was filed.

Canon's consolidated financial statements are prepared in accordance with U.S. GAAP.

The number of consolidated subsidiaries and affiliated companies that were accounted for by the equity method as of December 31, 2025 and 2024 are summarized as follows:

	December 31, 2025	December 31, 2024
Consolidated subsidiaries	321	334
Affiliated companies	8	10
Total	329	344

The main accounting principles, procedures, and presentation methods adopted by Canon (Canon Inc. and its subsidiaries) that differ from the Japanese consolidated financial statement principles and regulations are as follows. For items of significant monetary importance, Canon also disclose the impact on income before income tax based on Japanese standards.

- (i) The retirement benefits and pension plan are in accordance with ASC 715 "Compensation-Retirement Benefits" and are recorded the pension cost based on actuarial calculation. The effect of this change was ¥14,280 million (decrease in profit) and ¥3,202 million (decrease in profit) for the years ended December 31, 2025 and 2024, respectively.
- (ii) Share issuance cost is deducted from additional paid-in capital after tax effects adjustment.
- (iii) Derivatives is in accordance with ASC 815 "Derivatives and Hedging Activities".
- (iv) Goodwill and other intangible assets with indefinite useful lives are in accordance with ASC 350 "Intangibles - Goodwill and Other", they are not amortized but are instead tested for impairment at least annually. For the year ended December 31, 2024, Canon recognized a goodwill impairment loss of ¥165,100 million in the Medical Business Unit.
- (v) Equity securities, in accordance with ASC 321 "Investments - Equity securities" are measured at fair value in principle, and the changes are recorded in income before income taxes.
- (vi) Leases, in accordance with ASC 842 "Leases", operating lease right-of-use assets and liabilities are recognized in the balance sheet based on the present value of lease payments over the term of the lease. Lease costs are recognized on a straight-line basis over the term of the lease.
- (vii) Canon has changed the presentation of "Prepaid pension and severance cost" separated from "Other assets" in the consolidated balance sheet as of December 31, 2025. To conform with this change, the same reclassification has been made on the balances as of December 31, 2024.

(b) Description of Business

Canon reports in four reportable segments: the Printing Business Unit, the Medical Business Unit, the Imaging Business Unit and the Industrial Business Unit, with Others and Corporate. Products of the Printing Business Unit consist mainly of digital continuous feed presses, digital sheet-fed presses, large format printers, MFDs, document solutions, MFPs, laser printers, inkjet printers, image scanners and calculators. Products of the Medical Business Unit consist mainly of CT Systems, diagnostic ultrasound systems, diagnostic X-ray systems, MRI systems, digital radiography systems, ophthalmic equipment, in vitro diagnostic systems and reagents and healthcare IT solutions. Products of the Imaging Business Unit consist mainly of interchangeable-lens digital cameras, interchangeable lenses, digital compact cameras, compact photo printers, MR systems, network cameras, video management software, video content analytics software, digital camcorders, digital cinema cameras and broadcast equipment. Products of the Industrial Business Unit consist mainly of semiconductor lithography equipment, FPD lithography equipment, OLED display manufacturing equipment, vacuum thin-film deposition equipment and die bonders. Others consist mainly of handy terminals and document scanners.

Sales are made principally under the Canon brand name, almost entirely through sales subsidiaries. These subsidiaries are responsible for marketing and distribution, and primarily sell to retail dealers in their geographic areas. Further segment information is described in Note 23.

Canon sells laser printers on an OEM basis to HP Inc.; such sales constituted 9.6% and 10.5% of consolidated net sales for the years ended December 31, 2025 and 2024, respectively.

Canon's manufacturing operations are conducted mainly in Asia including Japan, and also in Europe and Americas.

(c) Principles of Consolidation

The consolidated financial statements include the accounts of the Company, its majority owned subsidiaries and those variable interest entities where the Company or its consolidated subsidiaries are the primary beneficiaries. All intercompany balances and transactions have been eliminated.

(d) Use of Estimates

The preparation of the consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the period. Significant estimates and assumptions are reflected in valuation and disclosure of accounts including: revenue recognition, allowance for credit losses, inventories, securities, long-lived assets, leases, goodwill and other intangible assets with indefinite useful lives, environmental liabilities, deferred tax assets, uncertain tax positions, employee retirement and severance benefit obligations, accrued product warranty costs and business combinations. Actual results could differ materially from those estimates. In addition, actual results and outcomes of the Company may differ from management's estimates and assumptions due to pandemic, geopolitical risk and economic slowdown including impacts of rising inflation.

(e) Translation of Foreign Currencies

Assets and liabilities of the Company's subsidiaries located outside Japan with functional currencies other than Japanese yen are translated into Japanese yen at the rates of exchange in effect at the balance sheet date. Income and expense items are translated at the average exchange rates prevailing during the year. Gains and losses resulting from translation of financial statements are excluded from earnings and are reported in other comprehensive income (loss).

Gains and losses resulting from foreign currency transactions and translation of assets and liabilities denominated in foreign currencies are included in other income (deductions) in the consolidated statement of income. Foreign currency exchange gains and losses were net losses of ¥9,113 million and ¥12,196 million for the years ended December 31, 2025 and 2024, respectively.

(f) Cash Equivalents

All highly liquid investments acquired with original maturities of three months or less are considered to be cash equivalents. Certain debt securities with original maturities of less than three months, classified as available-for-sale debt securities of ¥500 million and ¥1,500 million at December 31, 2025 and 2024, respectively, are included in cash and cash equivalents in the consolidated balance sheet.

(g) Investments

Investments consist primarily of time deposits with original maturities of more than three months, debt and equity securities and investments in affiliated companies.

Canon classifies investments in debt securities as held-to-maturity debt securities and available-for-sale securities. Canon does not hold any trading securities which are bought and held primarily for the purpose of sale in the near term. Canon reports investments with maturities of less than one year as short-term investments.

Available-for-sale debt securities and equity securities with readily determinable fair value that are not accounted for under the equity method are recorded at fair value which is determined based on quoted market prices, projected discounted cash flows or other valuation techniques as appropriate. The changes in fair value for equity securities are included in other, net in the consolidated statement of income. The changes in fair value for available-for-sale debt securities are included in net unrealized gains and losses on securities in the consolidated statement of comprehensive income.

Held-to-maturity debt securities are recorded at amortized cost. The fair values of held-to-maturity debt securities are mainly measured at the quoted market price.

Available-for-sale debt securities are regularly reviewed for other-than-temporary declines in the carrying amount based on criteria that include the length of time and the extent to which the market value has been less than cost, the financial condition and near-term prospects of the issuer and Canon's intent and ability to retain the investment for a period of time sufficient to allow for any anticipated recovery in market value. For available-for-sale debt securities for which the declines are deemed to be other-than-temporary and there is no intent to sell, the impairment is separated into the amount related to credit loss, which is recognized in earnings and the amount related to all other factors is recognized in other comprehensive income (loss). For available-for-sale debt securities for which the declines are deemed to be other-than-temporary and there is an intent to sell, the impairment in its entirety is recognized in earnings. Canon recognizes an impairment loss to the extent the cost basis of the investment exceeds the fair value of the investment.

Canon measures non-marketable equity securities without readily determinable fair value at cost, minus impairment, if any, plus or minus changes resulting from observable price changes in orderly transactions for an identical or a similar investment of the same issuer.

Realized gains and losses are determined by the average cost method and reflected in earnings.

Investments in affiliated companies over which Canon has the ability to exercise significant influence, but does not hold a controlling financial interest, are accounted for using the equity method.

(h) Allowance for Credit Losses

Allowance for Credit Losses for trade and lease receivables is maintained for all customers based on ASC 326 "Financial Instruments – Credit Losses", based on historical experiences of credit losses and reasonable and supportable forecasts. An additional reserve for individual accounts is recorded when Canon becomes aware of a customer's inability to meet its financial obligations, such as in the case of bankruptcy filings. If circumstances related to customers change, estimates of the recoverability of receivables would be further adjusted. When all collection options are exhausted including legal recourse, the accounts or portions thereof are deemed to be uncollectable and charged against the allowance.

(i) Inventories

Inventories are stated at the lower of cost or net realizable value. Cost is determined by the average method for domestic inventories and principally by the first-in, first-out method for overseas inventories.

(j) Impairment of Long-Lived Assets

Long-lived assets, such as property, plant and equipment, and acquired intangible assets subject to amortization, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of the asset and the estimated undiscounted future cash flows expected to be generated by the asset. If the carrying amount of the asset exceeds its estimated sum of undiscounted future cash flows, an impairment loss is recognized in the amount by which the carrying amount of the asset exceeds the fair value of the asset. Assets to be disposed of by sale are reported at the lower of the carrying amount or fair value less costs to sell, and are no longer depreciated.

(k) Property, Plant and Equipment, net

Property, plant and equipment are stated at cost less accumulated depreciation. Depreciation is calculated principally by the declining-balance method, except for certain assets which are depreciated by the straight-line method over the estimated useful lives of the assets.

The depreciation period ranges from 3 years to 60 years for buildings and 1 year to 20 years for machinery and equipment.

Gains and losses from the sale of property, plant and equipment are included in selling, general and administrative expenses in the consolidated statement of income.

(l) Leases

As for lessor accounting, Canon provides leasing arrangements to its customers primarily for the sale of office products. Revenue from the sale of these products under sales-type leases is recognized at the inception of the lease. Interest income on sales-type leases and direct-financing leases is recognized over the life of each respective lease using the interest method. Leases not qualifying as sales-type leases or direct-financing leases are accounted for as operating leases and related revenue is recognized ratably over the lease term. When product leases are bundled with maintenance contracts, revenue is allocated based upon the estimated standalone selling prices of the lease and non-lease components. Lease components generally include product and financing while non-lease components generally consist of maintenance contracts and supplies. Some of the contracts include options to extend or to terminate the lease. Canon takes such options into account to determine the lease term when it is reasonably certain that customers will exercise these options. The majority of Canon's lease contracts do not contain bargain purchase options for their customers. Assets leased to others under operating leases are stated at cost and depreciated to the estimated residual value of the assets by the straight-line method over a period of generally 2 years to 50 years.

As for lessee accounting, Canon has operating and finance leases for various assets including office buildings, warehouses, employees' accommodations, and vehicles. Canon determines if an arrangement is a lease at the inception of each contract. Some of the contracts include options to extend or to terminate the lease. Canon takes such options into account to determine the lease term when it is reasonably certain that it will exercise these options. Canon's lease arrangements do not contain material residual value guarantees or material restrictive covenants. As a rate implicit in the most of Canon's leases cannot be determined, Canon uses incremental borrowing rates based on the information available at commencement to determine the present values of lease payments. Canon has lease contracts with lease and non-lease components, which are accounted for separately. Canon allocates the consideration in the lease contract to the lease and non-lease components based upon the estimated standalone prices. Costs associated with operating lease assets are recognized on a straight-line basis over the term of the lease.

(m) Goodwill and Other Intangible Assets

Goodwill and other intangible assets with indefinite useful lives are not amortized, but are instead tested for impairment annually in the fourth quarter of each year, or more frequently if indicators of potential impairment exist. All goodwill is assigned to the reporting unit or units that benefit from the synergies arising from each business combination. If the carrying amount assigned to the reporting unit exceeds the fair value of the reporting unit, Canon recognizes an impairment loss in an amount equal to that excess, limited to the total amount of goodwill allocated to that reporting unit.

Intangible assets with finite useful lives consist primarily of software, trademarks, patents and developed technology, license fees and customer relationships, which are amortized using the straight-line method. The estimated useful lives of software are from 3 years to 9 years, trademarks are 15 years, patents and developed technology are from 5 years to 21 years, license fees are 7 years, and customer relationships are from 10 years to 19 years. Certain costs incurred in connection with developing or obtaining internal-use software are capitalized. These costs consist primarily of payments made to third parties and the salaries of employees working on such software development. Costs incurred in connection with developing internal-use software are capitalized at the application development stage. In addition, Canon capitalizes the cost which was incurred subsequent to the stage of assuring the technological feasibility of the software, either developed or acquired, for marketing purposes.

(n) Environmental Liabilities

Liabilities for environmental remediation and other environmental costs are accrued when environmental assessments or remedial efforts are probable and the costs can be reasonably estimated, and are included in other noncurrent liabilities in the consolidated balance sheet. Such liabilities are adjusted as further information develops or circumstances change. Costs of future obligations are not discounted to their present values.

(o) Income Taxes

Deferred tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. Canon records a valuation allowance to reduce the deferred tax assets to the amount that is more likely than not realizable.

Canon recognizes the financial statement effects of tax positions when it is more likely than not, based on the technical merits, that the tax positions will be sustained upon examination by the tax authorities. Benefits from tax positions that meet the more-likely-than-not recognition threshold are measured at the largest amount of benefit that is greater than 50% likely of being realized upon settlement. Interest and penalties accrued related to unrecognized tax benefits are included in income taxes in the consolidated statement of income.

(p) Stock-Based Compensation

Canon measures stock-based compensation cost at the grant date, based on the fair value of the award, and recognizes the cost on a straight-line basis over the requisite service period, which is the vesting period.

(q) Net Income Attributable to Canon Inc. Shareholders per Share

Basic net income attributable to Canon Inc. shareholders per share is computed by dividing net income attributable to Canon Inc. shareholders by the weighted-average number of common shares outstanding during each year. Diluted net income attributable to Canon Inc. shareholders per share includes the effect from potential issuances of common stock based on the assumptions that all stock options were exercised.

(r) Revenue Recognition

Canon generates revenue mainly through the sale of products of the Printing Business Unit, the Medical Business Unit, the Imaging Business Unit and the Industrial Business Unit, supplies and related services under separate contractual arrangements. Revenue is recognized when, or as, control of promised goods or services transfers to customers in an amount that reflects the consideration to which Canon expects to be entitled in exchange for transferring these goods or services. For further information, please refer to Note 15.

(s) R&D Costs

R&D costs are expensed as incurred.

(t) Advertising Costs

Advertising costs are expensed as incurred. Advertising expenses were ¥42,990 million and ¥44,384 million for the years ended December 31, 2025 and 2024, respectively, and are included in selling, general and administrative expenses in the consolidated statement of income.

(u) Shipping and Handling Costs

Shipping and handling costs totaled ¥71,088 million and ¥69,956 million for the years ended December 31, 2025 and 2024, respectively, and are included in selling, general and administrative expenses in the consolidated statement of income.

(v) Derivative Financial Instruments

All derivatives are recognized at fair value and are included in prepaid expenses and other current assets, or other current liabilities in the consolidated balance sheet.

Canon uses and designates certain derivatives as a hedge of a forecasted transaction or the variability of cash flows to be received or paid related to a recognized asset or liability (“cash flow” hedge). Canon formally documents all relationships between hedging instruments and hedged items, as well as its risk-management objective and strategy for undertaking various hedge transactions. Canon also formally assesses, both at the hedge’s inception and on an ongoing basis whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in cash flows of hedged items. When it is determined that a derivative is not highly effective as a hedge or that it has ceased to be a highly effective hedge, Canon discontinues hedge accounting prospectively. Changes in the fair value of a derivative that is designated and qualifies as a cash flow hedge are recorded in other comprehensive income (loss), until earnings are affected by the variability in cash flows of the hedged item, and reclassified in the same income statement line item in which the earnings effect of the hedged item is reported.

Canon also uses certain derivative financial instruments which are not designated as hedges. The changes in fair values of these derivative financial instruments are immediately recorded in earnings.

Canon classifies cash flows from derivatives as cash flows from operating activities in the consolidated statement of cash flows.

(w) Guarantees

Canon recognizes, at the inception of a guarantee, a liability for the fair value of the obligation it has undertaken in issuing guarantees.

(x) Recent Accounting Guidance

Recently adopted accounting guidance

In December 2023, ASU No. 2023-09, “Improvements to Income Tax Disclosures”-ASC 740 (“Income Taxes”), was issued by FASB. The standard requires us to disclose certain categories in the tax rate reconciliation table, the amount of corporate income tax paid (domestic and foreign), income from continuing operations before income tax (domestic and foreign), and income tax expense from continuing operations (domestic and foreign). Canon adopted the standard from the end of the year beginning January 1, 2025 and retrospectively to all prior periods presented in the financial statements. The adoption of this standard did not have an effect on the consolidated results of operation and financial condition.

Recently issued accounting guidance not yet adopted

In July 2025, ASU No. 2025-05, “Measurement of Credit Losses for Account Receivable and Contract Assets”-ASC 326 (“Financial Instruments – Credit Losses”), was issued by FASB. This standard allows us to elect the practical expedient to assume that current conditions as of the balance sheet date do not change for the remaining life of the asset when developing an estimate of expected credit losses on current accounts receivable and current contract asset balances arising from transactions accounted for under ASC 606 on revenue from contracts with customers. The standard is effective for annual reporting periods beginning after December 15, 2025, and interim reporting periods within those annual reporting periods. Canon is currently evaluating the effect that the adoption of the standard will have on its consolidated results of operation and financial condition.

Canon intends to replace the currently applied U.S.GAAP and voluntarily adopt IFRS for its consolidated financial statements in order to maintain the quality of Canon’s financial and management reporting systems over the medium- to long-term and improve the international comparability of financial information in the capital markets. Canon plans to start disclosing information in accordance with IFRS from the first quarter of fiscal year 2027. Accordingly, recently issued accounting guidance under U.S.GAAP that is scheduled to be adopted from 2027 onward has been excluded from this disclosure.

2. Investments

There were no held-to-maturity debt securities at December 31, 2025. Held-to-maturity debt securities included in short-term investments in the accompanying consolidated balance sheet were ¥142 million at December 31, 2024, and their fair value approximated their carrying amount.

The cost, gross unrealized holding gains, gross unrealized holding losses and fair value for available-for-sale debt securities included in short-term investments and investments in the consolidated balance sheet by major security type at December 31, 2025 and 2024 are as follows:

	Millions of yen			
	December 31, 2025			
	Cost	Gross unrealized holding gains	Gross unrealized holding losses	Fair value
Short-term investments:				
Corporate bonds	169	1	—	170
Investments:				
Corporate bonds	25,533	143	34	25,642
Total	25,702	144	34	25,812

	Millions of yen			
	December 31, 2024			
	Cost	Gross unrealized holding gains	Gross unrealized holding losses	Fair value
Short-term investments:				
Corporate bonds	—	—	—	—
Investments:				
Corporate bonds	16,636	96	53	16,679
Total	16,636	96	53	16,679

Maturities of available-for-sale debt securities included in short-term investments and investments in the accompanying consolidated balance sheet at December 31, 2025 are as follows:

	Millions of yen
	Fair value
Due within one year	170
Due after one year through five years	25,642
Total	25,812

The unrealized and realized gains and losses related to equity securities for the years ended December 31, 2025 and 2024 are as follows:

	Millions of yen	
	2025	2024
Net gains (losses) recognized during the period on equity securities	5,624	(3,081)
Less: Net gains (losses) recognized during the period on equity securities sold during the period	1,615	(6)
Unrealized gains (losses) recognized during the period on equity securities still held at December 31	<u>4,009</u>	<u>(3,075)</u>

The carrying amount of non-marketable equity securities without readily determinable fair value totaled ¥12,818 million and ¥11,067 million at December 31, 2025 and 2024, respectively. The impairment or other adjustments resulting from observable price changes recorded during the years ended December 31, 2025 and 2024 were not significant.

Time deposits with original maturities of more than three months from the date of investment and with original maturities of one year or less from the balance sheet date amounted to ¥32,276 million and ¥4,633 million at December 31, 2025 and 2024, respectively, and are included in short-term investments in the accompanying consolidated balance sheet. Time deposits with original maturities of more than one year from the balance sheet date amounted to ¥313 million and ¥26,665 million at December 31, 2025, and 2024, are included in investments in the accompanying consolidated balance sheet.

Investments in affiliated companies accounted for by the equity method for the years ended December 31, 2025 and 2024 are as follows:

	Millions of yen, except percentage data		
	2025	2025	2024
Voting rights held by Canon Inc.			
Canon Korea Inc.	50%	16,261	15,485
Affiliated companies, others	-	14,449	13,496
Total	-	<u>30,710</u>	<u>28,981</u>

The difference between the carrying amount of investment in each affiliate and Canon's share of its net assets is immaterial. Share of profit of investments accounted for equity method included in other income (deductions) of consolidated statement of income, were gains of ¥106 million for the year ended December 31, 2025, and gains of ¥729 million for the years ended December 31, 2024.

3. Trade Receivables

Trade receivables at December 31, 2025 and 2024 are as follows:

	Millions of yen	
	December 31 2025	December 31 2024
Notes receivable	27,919	33,541
Accounts receivable	705,890	672,050
Trade receivables	733,809	705,591
Allowance for credit losses	(15,216)	(14,856)
Total	718,593	690,735

4. Inventories

Inventories at December 31, 2025 and 2024 are as follows:

	Millions of yen	
	December 31 2025	December 31 2024
Finished goods	543,256	521,961
Work in process	230,629	250,939
Raw materials	66,560	68,936
Total	840,445	841,836

5. Property, Plant and Equipment

Property, plant and equipment at December 31, 2025 and 2024 are as follows:

	Millions of yen	
	December 31 2025	December 31 2024
Land	287,167	286,826
Buildings	1,985,101	1,905,387
Machinery and equipment	2,121,606	2,043,569
Construction in progress	91,613	105,917
Finance lease right-of-use assets	9,197	9,008
Cost	4,494,684	4,350,707
Less accumulated depreciation	(3,304,002)	(3,203,327)
Total	1,190,682	1,147,380

Depreciation expenses for the years ended December 31, 2025 and 2024 were ¥176,715 million, and ¥175,636 million, respectively.

Amounts due for purchases of property, plant and equipment were ¥33,558 million and ¥46,010 million at December 31, 2025 and 2024, respectively, and are included in other current liabilities in the accompanying consolidated balance sheet. Fixed assets presented in the consolidated statement of cash flows include property, plant and equipment and intangible assets.

6. Lessor Accounting

Lease income is included in products and equipment sales in the accompanying consolidated statement of income. Income statement information about lease income is as follows:

	Millions of yen	
	2025	2024
Lease income – sales-type and direct financing leases		
Revenue at lease commencement	149,916	159,132
Interest income on lease receivables	34,982	32,680
Sales-type and direct financing leases income total	184,898	191,812
Lease income – operating leases	39,646	41,890
Variable lease income	7,651	7,438
Total lease income	232,195	241,140

Lease Receivables

Lease receivables represent financing leases, which consist of sales-type leases and direct financing leases. These receivables typically have terms ranging from 1 year to 20 years. Lease receivables within one year and more than one year are presented in current lease receivables and noncurrent lease receivables in the accompanying consolidated balance sheet, respectively. The components of the lease receivables are as follows:

	Millions of yen	
	December 31 2025	December 31 2024
Total minimum lease payments receivable	599,238	585,136
Unguaranteed residual values	13,429	14,337
Executory costs	-	-
Unearned income	(71,135)	(68,112)
Subtotal	541,532	531,361
Less allowance for credit losses	(6,612)	(6,861)
Subtotal	534,920	524,500
Less current portion	(173,602)	(165,245)
Total	361,318	359,255

Allowance for Credit Losses

The activities in the allowance for credit losses for the years ended December 31, 2025 and 2024 are as follows:

	Millions of yen	
	2025	2024
Balance at beginning of year	6,861	5,871
Write-offs	(2,927)	(4,456)
Provision	2,535	4,096
Translation adjustments and other	143	1,350
Balance at end of year	6,612	6,861

Canon has policies in place to ensure that its products are sold to customers with an appropriate credit history and continuously monitors its customers' credit quality based on information including length of period in arrears, macroeconomic conditions, initiation of legal proceedings against customers and bankruptcy filings. The allowance for credit losses of lease receivables is evaluated collectively based on historical experiences of credit losses and reasonable and supportable forecasts. An additional reserve for individual accounts is recorded when Canon becomes aware of a customer's inability to meet its financial obligations, such as in the case of bankruptcy filings. Lease receivables which are past due or individually evaluated for impairment at December 31, 2025 and 2024 are not significant.

Equipment leased to customers

The costs of equipment leased to customers under operating leases included in property, plant and equipment, net at December 31, 2025 and 2024 were ¥199,455 million and ¥183,343 million, respectively. Accumulated depreciation on equipment under operating leases at December 31, 2025 and 2024 were ¥118,980 million and ¥102,887 million, respectively.

Maturity Analysis

The following is a schedule by year of the future minimum lease payments to be received under finance leases and non-cancellable operating leases at December 31, 2025.

	Millions of yen	
	Financing leases	Operating leases
Year ending December 31:		
2026	203,223	13,204
2027	162,105	7,901
2028	116,951	4,502
2029	70,379	2,175
2030	31,715	965
Thereafter	14,865	670
Total	599,238	29,417

Information about transferring lease receivables

Canon has syndication arrangements to sell its entire interests in lease receivables to the third-party financial institutions. The transactions under the arrangements are accounted for as sales in accordance with ASC 860 “Transfers and Servicing.” The transfers of lease receivables for the year ended December 31, 2025 and 2024 were ¥51,467 million and ¥34,007 million. The amount that remained uncollected was ¥95,653 million and ¥72,969 million at December 31, 2025 and 2024, respectively. Cash proceeds from the transactions are included in increase in lease receivables under the cash flow from operating activities in the consolidated statement of cash flows. Canon continues to provide collection and administrative services for the financial institutions. The amount associated with the servicing liability measured at fair value was not significant at December 31, 2025 and 2024. Canon also retains limited recourse obligations which cover credit defaults. The recourse obligations were not significant at December 31, 2025 and 2024.

7. Acquisitions

On March 29, 2024, Canon Marketing Japan Inc., a subsidiary of the Company, acquired 100% of the issued shares of Primagest, Inc. for cash consideration of ¥37,000 million so that Primagest, Inc. and its three subsidiaries (hereinafter referred to collectively as “Primagest”) became its owned subsidiaries.

The acquisition will enable Canon to further expand BPO business by enhancing operational efficiency and service quality through the use of Primagest's knowledge and know-how, and to create new services by combining its technology and system development capabilities cultivated through video solutions and digital document services.

The acquisition was accounted for using the acquisition method of accounting. Acquisition-related costs were expensed as incurred and were not material.

The final allocation of the purchase price to the assets acquired and the liabilities assumed on the acquisition date was as follows:

	<u>Millions of yen</u>
Current assets	<u>8,617</u>
Intangible assets	17,259
Goodwill	19,715
Others	<u>3,734</u>
Assets acquired	49,325
Liabilities assumed	<u>12,307</u>
Noncontrolling interests	<u>(18)</u>
Net assets acquired	<u><u>37,000</u></u>

The intangible assets acquired, which are subject to amortization, are composed of ¥16,219 million of customer relationships and ¥1,040 million of software. The weighted average useful lives of the customer relationships and software are approximately 19 years and approximately 5 years, respectively. The weighted average useful life of the total intangible assets is approximately 18 years.

Goodwill is composed of future excess profitability expected from business development which is not tax deductible. For management reporting purposes, goodwill is not allocated to the business unit. The goodwill is allocated to the reporting unit belonging to the Printing Business Unit for impairment testing. Net sales and net income of Primagest generated from the acquisition date which is reflected in the consolidated statement of income for the year ended December 31, 2024 was not material. The operating results with the assumption of including the financial statements of Primagest in Canon's consolidated financial statements for the year beginning on January 1, 2024 were not disclosed because the impact was not material.

8. Goodwill and Other Intangible Assets

Intangible assets subject to amortization acquired during the year ended December 31, 2025 totaled ¥37,857 million, which primarily consist of software of ¥34,379 million. The weighted average amortization periods for intangible assets in total acquired during the year ended December 31, 2025 are approximately 5 years. The weighted average amortization period for software acquired during the year ended December 31, 2025 is approximately 5 years.

Intangible assets subject to amortization acquired during the year ended December 31, 2024, including those recorded from business acquired as stated in Note 7, totaled ¥49,961 million, which primarily consist of software of ¥33,501 million. The weighted average amortization periods for intangible assets in total acquired during the year ended December 31, 2024 are approximately 9 years. The weighted average amortization period for software acquired during the year ended December 31, 2024 is approximately 5 years.

The components of intangible assets subject to amortization at December 31, 2025 and 2024 were as follows:

	Millions of yen			
	December 31, 2025		December 31, 2024	
	Cost	Accumulated amortization	Cost	Accumulated amortization
Software	530,728	409,817	490,350	376,658
Customer relationships	193,882	110,542	192,672	97,407
Patents and developed technology	134,290	102,257	129,278	88,792
Trademarks	60,637	43,692	53,409	34,326
License fees	5,204	4,441	6,124	4,713
Other	13,430	10,001	16,635	11,194
Total	938,171	680,750	888,468	613,090

Aggregate amortization expenses for the years ended December 31, 2025 and 2024 were ¥62,834 million, and ¥61,259 million, respectively. Estimated amortization expense of intangible assets for the next five years from December 31, 2025, are ¥60,019 million in 2026, ¥45,817 million in 2027, ¥39,417 million in 2028, and ¥31,895 million in 2029, and ¥24,242 million in 2030.

Intangible assets not subject to amortization other than goodwill at December 31, 2025 and 2024 were not significant.

For management reporting purposes, goodwill is not allocated to the reporting unit. Goodwill has been allocated to its respective reporting unit for impairment testing.

The changes in the carrying amount of goodwill by segment for the years ended December 31, 2025 and 2024 were as follows:

	Millions of yen					Total
	Printing	Medical	Imaging	Industrial	Others and Corporate	
Goodwill - gross	203,081	568,231	337,391	13,083	683	1,122,469
Accumulated impairment losses	(42,111)	(165,100)	—	—	—	(207,211)
Balance at beginning of year	160,970	403,131	337,391	13,083	683	915,258
Goodwill acquired during the year	—	—	—	—	—	—
Translation adjustments and other	11,250	2,751	56,650	(134)	31	70,548
Goodwill - gross	219,287	570,982	394,041	12,949	714	1,197,973
Accumulated impairment losses	(47,067)	(165,100)	—	—	—	(212,167)
Balance at end of year	<u>172,220</u>	<u>405,882</u>	<u>394,041</u>	<u>12,949</u>	<u>714</u>	<u>985,806</u>

	Millions of yen					
	2024					
	Printing	Medical	Imaging	Industrial	Others and Corporate	Total
Goodwill - gross	176,067	565,687	331,334	11,730	701	1,085,519
Accumulated impairment losses	(40,119)	–	–	–	–	(40,119)
Balance at beginning of year	135,948	565,687	331,334	11,730	701	1,045,400
Goodwill acquired during the year	19,715	–	–	–	–	19,715
Impairment loss *	–	(165,100)	–	–	–	(165,100)
Translation adjustments and other	5,307	2,544	6,057	1,353	(18)	15,243
Goodwill - gross	203,081	568,231	337,391	13,083	683	1,122,469
Accumulated impairment losses	(42,111)	(165,100)	–	–	–	(207,211)
Balance at end of year	160,970	403,131	337,391	13,083	683	915,258

* Canon considers the medical-related market to be stable and growing in the long term. However, in the short term, achieving the plan established at the time of acquisition has become difficult due to restrictions on certain businesses resulting from rising geopolitical risks, the prolonged economic downturn in China, and the deterioration of the financial condition of medical institutions in Japan. In response to these circumstances, Canon established the Medical Business Advancement Committee in February 2024 and has been promoting fundamental structural reforms aimed at improving profitability, based on the realization of synergies between CMSC and Canon. Reflecting these changes in the business environment, in the annual goodwill impairment test conducted with October 1, 2024 as the measurement date, Canon revised its sales forecasts, particularly with respect to the growth rates of major markets, and incorporated these revisions into its future plans. As a result, the profitability of this business declined compared to initial expectations. Consequently, as the fair value of the medical reporting unit, calculated based on a discounted cash flow analysis, was determined to be lower than its carrying amount, Canon recognized a goodwill impairment loss of ¥165,100 million, representing the excess of the carrying amount over fair value, in accordance with the accounting policy for goodwill impairment described in Note 1.

9. Short-Term Loans and Long-Term Debt

Short-term loans related to financial services are external loans held by Canon's lease subsidiaries for the purpose of financing its customers through loans. Short-term loans related to financial services consisting of bank loans at December 31, 2025 and 2024 were ¥38,100 million and ¥40,400 million, and other short-term loans consisting of bank loans were ¥371,112 million and ¥276,106 million, respectively. The weighted average interest rate on short-term loans outstanding at December 31, 2025 and 2024 were 0.78% and 0.38%, respectively. Unused overdraft facilities at December 31, 2025 were ¥680,000 million. The overdraft facilities bear interest at a rate equal to a base rate plus a spread.

Long-term debt at December 31, 2025 and 2024 are as follows:

	Millions of yen	
	December 31 2025	December 31 2024
Loan from banks; bearing interest rates of 1.04% at December 31, 2025 * ¹	401,699	201,909
Other debt * ²	5,199	4,990
	406,898	206,899
Less current portion	(101,928)	(1,824)
Total	304,970	205,075

*¹ Loans included ¥400,000 million in syndicated loans. This amount consisted of ¥100,000 million procured in the fiscal year ended December 31, 2024, and will be matured in the fiscal year ended December 2026; ¥100,000 million procured in the fiscal year ended December 31, 2024, and will be matured in the fiscal year ended December 2027; and ¥200,000 million procured in the fiscal year ended December 31, 2025, will be matured in the fiscal year ended December 2030.

*² Other debt consisted of long-term loans and finance lease obligations.

The aggregate annual maturities of long-term debt outstanding at December 31, 2025 were as follows:

	Millions of yen
Year ending December 31:	
2026	101,928
2027	102,354
2028	1,145
2029	1,077
2030	200,262
Thereafter	132
Total	406,898

Both short-term and long-term bank loans are primarily made under general agreements which provide that security and guarantees for present and future indebtedness shall be given upon request of the bank, and that the bank shall have the right to offset cash deposits against obligations that have become due or, in the event of default, against all obligations due to the bank.

10. Trade Payables

Trade payables at December 31, 2025 and 2024 are as follows:

	Millions of yen	
	December 31 2025	December 31 2024
Notes payables	44,757	78,485
Accounts payables	266,075	271,643
Total	310,832	350,128

Canon has supplier finance programs with particular third-party financial institutions where Canon agrees to pay the financial institutions after 60 to 180 days based on the contracts agreed to with the suppliers. The financial institutions offer earlier payment of the invoices at the sole discretion of the supplier for a discounted amount. Canon does not provide assets pledged as security or any other forms of guarantees under the arrangements. Canon is not a party to any arrangement between its suppliers and the financial institutions. The amount of liabilities under these programs, which is included in the above trade payables, as of December 31, 2025 and 2024 were ¥54,545 million and ¥91,407 million, respectively.

The activities in the liabilities under supplier finance programs are as follows:

	Millions of yen	
	2025	2024
Balance at beginning of year	91,407	87,026
Increase	279,855	293,949
Decrease	(316,724)	(289,575)
Others	7	7
Balance at end of year	54,545	91,407

11. Accrued Pension and Severance Cost

The Company and certain of its subsidiaries have contributory and noncontributory defined benefit pension plans covering substantially all of their employees. Benefits payable under the plans are based on employee earnings and years of service. The Company and certain of its subsidiaries also have defined contribution pension plans covering substantially all of their employees.

Obligations and funded status

Reconciliations of beginning and ending balances of the projected benefit obligations and the fair value of the plan assets are as follows:

	Millions of yen			
	Japanese plans		Foreign plans	
	2025	2024	2025	2024
Change in benefit obligations:				
Projected benefit obligations at beginning of year	719,568	765,725	423,525	410,599
Service cost	20,423	22,723	3,339	2,318
Interest cost	13,902	11,700	15,832	15,528
Plan participants' contributions	–	–	978	932
Actuarial (gain) loss	(69,135)	(30,495)	(20,310)	(18,773)
Benefits paid	(49,564)	(46,720)	(16,576)	(16,311)

Foreign currency exchange rate changes	–	–	35,246	29,232
Projected benefit obligations at end of year	635,612	719,568	438,097	423,525
Change in plan assets:				
Fair value of plan assets at beginning of year	807,351	749,219	372,552	346,125
Actual return on plan assets	73,262	79,465	8,912	(649)
Employer contributions	11,604	13,212	6,252	15,638
Plan participants' contributions	–	–	978	932
Benefits paid	(37,379)	(34,789)	(15,913)	(16,265)
Acquisition	–	244	–	–
Settlements	–	–	(1,773)	–
Foreign currency exchange rate changes	–	–	29,562	26,771
Fair value of plan assets at end of year	854,838	807,351	400,570	372,552
Funded status at end of year	219,226	87,783	(37,527)	(50,973)

Amounts recognized in the consolidated balance sheet at December 31, 2025 and 2024 are as follows:

As of December 31	Millions of yen			
	Japanese plans		Foreign plans	
	2025	2024	2025	2024
Prepaid pension and severance cost	294,239	176,556	42,747	32,568
Accrued expenses	(4,034)	(4,637)	(1,750)	(1,524)
Accrued pension and severance cost	(70,979)	(84,136)	(78,524)	(82,017)
Total	219,226	87,783	(37,527)	(50,973)

Amounts recognized in accumulated other comprehensive income (loss) at December 31, 2025 and 2024 before the effect of income taxes are as follows:

As of December 31	Millions of yen			
	Japanese plans		Foreign plans	
	2025	2024	2025	2024
Actuarial (gain) loss	(149,364)	(32,774)	87,137	105,437
Prior service credit	(6,171)	(8,253)	(4,999)	(6,562)
Total	(155,535)	(41,027)	82,138	98,875

The accumulated benefit obligation for all defined benefit plans was as follows:

As of December 31	Millions of yen			
	Japanese plans		Foreign plans	
	2025	2024	2025	2024
Accumulated benefit obligation	626,581	705,204	422,432	407,160

The projected benefit obligations and the fair value of plan assets for the pension plans with projected benefit obligations in excess of plan assets, and the accumulated benefit obligations and the fair value of plan assets for the pension plans with accumulated benefit obligations in excess of plan assets are as follows:

As of December 31	Millions of yen			
	Japanese plans		Foreign plans	
	2025	2024	2025	2024
Plans with projected benefit obligations in excess of plan assets:				
Projected benefit obligations	119,440	135,025	403,837	389,669
Fair value of plan assets	48,775	48,680	362,948	335,785
Plans with accumulated benefit obligations in excess of plan assets:				
Accumulated benefit obligations	80,960	122,511	63,207	64,495
Fair value of plan assets	12,641	42,157	26,974	24,840

Components of net periodic benefit cost and other amounts recognized in other comprehensive income (loss)

Net periodic benefit cost for Canon's employee retirement and severance defined benefit plans for the years ended December 31, 2025 and 2024 consisted of the following components:

	Millions of yen			
	Japanese plans		Foreign plans	
	2025	2024	2025	2024
Service cost	20,423	22,723	3,339	2,318
Interest cost	13,902	11,700	15,832	15,528
Expected return on plan assets	(25,534)	(23,261)	(19,371)	(21,138)
Amortization of prior service credit	(1,664)	(3,113)	(1,383)	(1,352)
Amortization of actuarial (gain) loss	(161)	7	8,449	8,828
(Gain) loss on curtailments and settlements	(112)	(145)	—	(17)
Total	6,854	7,911	6,866	4,167

Service cost component of net periodic benefit cost for Canon's employee retirement and severance defined benefit plans is included in cost of sales and operating expenses in the consolidated statement of income. The components other than the service cost component are included in other, net of other income (deductions) in the consolidated statement of income.

Other changes in plan assets and benefit obligations recognized in other comprehensive income (loss) for the years ended December 31, 2025 and 2024 are summarized as follows:

	Millions of yen			
	Japanese plans		Foreign plans	
	2025	2024	2025	2024
Current year actuarial (gain) loss	(116,863)	(86,699)	(9,851)	3,014
Current year prior service credit	418	(3,695)	180	7
Amortization of actuarial gain (loss)	161	(7)	(8,449)	(8,828)
Amortization of prior service credit	1,664	3,113	1,383	1,352
Curtailments and settlements	112	145	—	17
Total	(114,508)	(87,143)	(16,737)	(4,438)

Assumptions

Weighted-average assumptions used to determine benefit obligations are as follows:

As of December 31	Japanese plans		Foreign plans	
	2025	2024	2025	2024
Discount rate	2.9%	1.9%	4.3%	3.9%
Assumed rate of increase in future compensation levels	2.3%	2.3%	2.1%	2.2%
Interest crediting rate for cash balance plans	1.7%	1.7%	1.5%	1.8%

Weighted-average assumptions used to determine net periodic benefit cost are as follows:

	Japanese plans		Foreign plans	
	2025	2024	2025	2024
Discount rate	1.9%	1.5%	3.9%	3.7%
Assumed rate of increase in future compensation levels	2.3%	2.3%	2.2%	2.1%
Expected long-term rate of return on plan assets	3.2%	3.1%	5.3%	6.0%
Interest crediting rate for cash balance plans	1.7%	1.7%	1.8%	1.7%

Canon determines the expected long-term rate of return based on the expected long-term return of the various asset categories in which it invests. Canon considers the current expectations for future returns and the actual historical returns of each plan asset category.

Plan assets

Canon's investment policies are designed to ensure adequate plan assets are available to provide future payments of pension benefits to eligible participants. Taking into account the expected long-term rate of return on plan assets, Canon formulates a model portfolio which comprises of the optimal combination of equity securities and debt securities. Plan assets are invested in individual equity and debt securities using the guidelines of the model portfolio in order to produce a total return that will match the expected return on a mid-term to long-term basis. Canon evaluates the gap between expected return and actual return of invested plan assets on an annual basis to determine if such differences necessitate a revision in the formulation of the model portfolio. Canon revises the model portfolio when and to the extent considered necessary to achieve the expected long-term rate of return on plan assets.

Canon's model portfolio for Japanese plans consists of three major components: approximately 30% is invested in equity securities, approximately 50% is invested in debt securities, and approximately 20% is invested in other products, such as investments in insurance contracts including life insurance company general accounts.

Outside Japan, investment policies vary by country, but Canon's model portfolio for foreign plans consists of three major components: approximately 10% is invested in equity securities, approximately 50% is invested in debt securities, and approximately 40% is invested in other products, such as investments in real estate assets.

The target allocation percentages of plan assets set by Canon's investment policies approximate the actual allocation percentages of plan assets at December 31, 2025 and 2024.

The equity securities are selected primarily from stocks that are listed on securities exchanges. Prior to investing, Canon investigates the business condition of the investee companies, and appropriately diversifies investments by type of industry and other relevant factors. The debt securities are selected primarily from government bonds, public debt instruments, and corporate bonds. Prior to investing, Canon investigates the quality of the issue, including rating, interest rate, and repayment dates, and appropriately diversifies the investments. Pooled funds are selected using strategies consistent with the equity and debt securities described above. As for insurance contracts, there are several types of insurance contracts between Canon and the life insurance companies including life insurance company general accounts which guarantee the payments of interest based on expected interest rates and return of capital, and insured pension plans which cover future designated contractual benefit payments to covered participants. With respect to investments in foreign financial products, Canon investigates the stability of the underlying governments and economies, and the market characteristics such as settlement systems and the taxation systems. For each such investment, Canon selects the appropriate investment country and currency.

The three levels of input used to measure fair value are more fully described in Note 22. The fair values of Canon's pension plan assets at December 31, 2025 and 2024, by asset category, are as follows:

As of December 31	Millions of yen							
	2025							
	Japanese plans				Foreign plans			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total

- (e) The plan's equity securities include common stock of the Company and certain of its subsidiaries in the amounts of ¥359 million.
- (f) These funds invest in listed equity securities consisting of approximately 20% Japanese companies and 80% foreign companies for Japanese plans, and mainly foreign companies for foreign plans.
- (g) This class includes approximately 75% Japanese government bonds and 25% foreign government bonds for Japanese plans.
- (h) These funds invest in approximately 30% Japanese government bonds, 55% foreign government bonds, 5% Japanese municipal bonds, and 10% corporate bonds for Japanese plans. These funds invest in approximately 50% foreign government bonds and 50% corporate bonds for foreign plans.

Each level into which assets are categorized is based on inputs used to measure the fair value of the assets, and does not necessarily indicate the risks or ratings of the assets.

Level 1 assets are comprised principally of equity securities and government bonds, which are valued using unadjusted quoted market prices in active markets with sufficient volume and frequency of transactions.

Level 2 assets are comprised principally of pooled funds that invest in equity and debt securities, corporate bonds, investments in life insurance company general accounts and other assets. Pooled funds are valued at their net asset values that are calculated by the sponsor of the fund and have daily liquidity. Corporate bonds are valued using quoted prices for identical assets in markets that are not active. Investments in life insurance company general accounts are valued at conversion value. Other assets are comprised principally of interest bearing cash and hedge funds.

The fair values of Level 3 assets, consisting of investments in insured pension plans and hedge funds, were ¥35,428 million and ¥36,433 million at December 31, 2025 and 2024, respectively. Actual returns on, purchases and sales of these assets during the years ended December 31, 2025 and 2024 were not significant.

Contributions

Canon expects to contribute ¥11,255 million to its Japanese defined benefit pension plans and ¥6,542 million to its foreign defined benefit pension plans for the year ending December 31, 2026.

Estimated future benefit payments

The estimated future benefit payments as of December 31, 2025 are as follows:

	Millions of yen	
	Japanese plans	Foreign plans
Years ending December 31:		
2026	47,991	18,951
2027	50,988	19,538
2028	50,075	21,065
2029	48,072	22,646
2030	45,984	23,224
2031 – 2035	213,177	125,832

Multiemployer pension plans

The amounts of cost recognized for the multiemployer pension plans primarily in the Netherlands for the years ended December 31, 2025 and 2024 were ¥6,837 million and ¥6,353 million, respectively. The multiemployer pension plan in which the subsidiaries in the Netherlands participated was 113.0% funded as of December 31, 2024. The terms of the collective bargaining agreements are negotiated on a regular basis between the local labor unions and participating employers. Canon is not liable for other participating employers' obligations under the terms and conditions of the agreements.

Defined contribution plans

The amounts of cost recognized for the defined contribution pension plans of the Company and certain of its subsidiaries for the years ended December 31, 2025 and 2024 were ¥32,656 million and ¥29,302 million, respectively.

12. Income Taxes

Domestic and foreign components of income before income taxes and the current and deferred income tax expense attributable to such income are summarized as follows:

Year ended December 31	Millions of yen		
	2025		
	Domestic	Overseas	Total
Income before income taxes	291,676	190,383	482,059
Income taxes:			
Current	87,542	45,520	133,062
Deferred	(2,860)	(6,296)	(9,156)
Total	84,682	39,224	123,906

Year ended December 31	Millions of yen		
	2024		
	Domestic	Overseas	Total
Income before income taxes	120,709	180,452	301,161
Income taxes:			
Current	91,361	41,497	132,858
Deferred	(4,597)	(9,974)	(14,571)
Total	86,764	31,523	118,287

The Company and its domestic subsidiaries are subject to a number of income taxes, which, in the aggregate, represent a statutory income tax rate of approximately 31% for the years ended December 31, 2025 and 2024.

A reconciliation of the Japanese statutory income tax rate, which is the statutory rate in the country where the parent company is domiciled, and the effective income tax rate as a percentage of income before income taxes for the years ended December 31, 2025 and 2024 is as follows:

	Millions of yen, %			
	2025		2024	
	Amount	Percent	Amount	Percent
Japanese statutory tax rate	149,438	31.0%	93,360	31.0%
Increase (reduction) in income taxes resulting from:				
Overseas tax effects				
United States				
Statutory tax rate difference between United States and Japan	(5,280)	(1.1)	(5,550)	(1.8)
Other	4,172	0.9	(483)	(0.2)
United Kingdom

Other adjustments	(4,104)	(0.9)	(3,965)	(1.4)
Effective income tax rate	123,906	25.7%	118,287	39.3%

The amount of income taxes paid for the year ended December 31, 2025 is as follows:

	Millions of yen
Domestic	90,063
Overseas	
United states	23,364
Other foreign jurisdictions	37,623
Total	151,050

Net deferred income tax assets and liabilities are included in the accompanying consolidated balance sheet under the following captions:

	Millions of yen	
	2025	2024
As of December 31		
Other assets	77,170	101,705
Other noncurrent liabilities	(44,881)	(37,346)
Total	32,289	64,359

The tax effects of temporary differences that give rise to the deferred tax assets and deferred tax liabilities at December 31, 2025 and 2024 are presented below:

	Millions of yen	
	2025	2024
As of December 31		
Deferred tax assets:		
Inventories	15,115	14,082
Accrued business tax	4,001	4,114
Accrued pension and severance cost	48,048	2,635
Research and development – costs capitalized for tax purposes	12,504	9,491
Property, plant and equipment	50,219	48,392
Operating lease liabilities	23,337	25,375
Accrued expenses	30,699	28,687
Net operating losses carried forward	36,829	38,745
Other	67,321	60,158
Subtotal	288,073	231,679
Less valuation allowance	(17,943)	(18,272)
Total deferred tax assets	270,130	213,407
Deferred tax liabilities:		
Undistributed earnings of foreign subsidiaries	(22,103)	(19,526)
Tax deductible reserve	(3,556)	(3,292)
Prepaid pension and severance cost	(90,273)	-
Financing lease revenue	(19,857)	(19,670)
Operating lease right-of-use assets	(22,898)	(24,683)
Intangible assets	(31,936)	(37,892)
Other	(47,218)	(43,985)
Total deferred tax liabilities	(237,841)	(149,048)
Net deferred tax assets (After the deduction of deferred tax liabilities)	32,289	64,359

The net changes in the total valuation allowance were a decrease of ¥329 million and a decrease of ¥2,958 million for the years ended December 31, 2025 and 2024, respectively.

Based on the level of historical taxable income and projections for future taxable income over the periods, management believes it is more likely than not that Canon will realize the benefits of these deferred tax assets, net of the valuation allowance, at December 31, 2025.

At December 31, 2025, Canon had net operating losses which can be carried forward for income tax purposes to reduce future taxable income. Periods available to reduce future taxable income vary in each tax jurisdiction and generally range from one year to an indefinite period as follows:

	<u>Millions of yen</u>
2026	863
2027 to 2030	28,301
2031 to 2035	18,329
2036 to 2045	8,818
Indefinite period	<u>118,238</u>
Total	<u><u>174,549</u></u>

Income taxes have not been accrued on undistributed earnings of domestic subsidiaries as the tax law provides a means by which the dividends from a domestic subsidiary can be received tax free.

Canon has not recognized deferred tax liabilities of ¥16,451 million for a portion of undistributed earnings of foreign subsidiaries of ¥699,337 million as of December 31, 2025 because Canon intends to permanently reinvest such undistributed earnings of foreign subsidiaries. Deferred tax liabilities will be recognized when such undistributed earnings are no longer permanently reinvested.

A reconciliation of the beginning and ending amount of unrecognized tax benefits at December 31, 2025 and 2024 are as follows:

Years ended December 31	<u>Millions of yen</u>	
	<u>2025</u>	<u>2024</u>
Balance at beginning of year	950	8,796
Additions for tax positions of the current year	161	575
Reductions for tax positions of the current year	(161)	(8,911)
Additions for tax positions of prior years	-	101
Other	<u>112</u>	<u>389</u>
Balance at end of year*	<u><u>1,062</u></u>	<u><u>950</u></u>

* The unrecognized tax benefits were offset by deferred tax assets in the amount of ¥586 million and ¥524 million as of December 31, 2025 and 2024, respectively, and reported under “other noncurrent liabilities” on the consolidated balance sheet.

The total amounts of unrecognized tax benefits that would reduce the effective tax rate, if recognized, were ¥1,062 million and ¥950 million at December 31, 2025 and 2024, respectively.

Although Canon believes its estimates and assumptions of unrecognized tax benefits are reasonable, uncertainty regarding the final determination of tax examination settlements and any related litigation could affect the effective tax rate in a future period. Based on each of the items of which Canon is aware at December 31, 2025, no significant changes to the unrecognized tax benefits are expected within the next twelve months.

Canon recognizes interest and penalties related to unrecognized tax benefits in income taxes. Both interest and penalties accrued are included in the consolidated balance sheet at December 31, 2025 and 2024, and interest and penalties included in income taxes in the consolidated statement of income for the years ended December 31, 2025 and 2024 were not significant.

Canon files income tax returns in Japan and various foreign tax jurisdictions. In Japan, Canon is no longer subject to regular income tax examinations by the tax authority for years before 2021. Canon is also no longer subject to a transfer pricing examination by the tax authority for years before 2021. In other major foreign tax jurisdictions, including the United States and the Netherlands, Canon is no longer subject to income tax examinations by tax authorities for years before 2014 with a few exceptions.

13. Legal Reserve and Other Retained Earnings

The Corporation Law of Japan provides that an amount equal to 10% of distributions from other retained earnings paid by the Company and its Japanese subsidiaries be appropriated as a legal reserve. No further appropriations are required when the total amount of the additional paid-in capital and the legal reserve equals 25% of their respective stated capital. The Corporation Law of Japan also provides that additional paid-in capital and legal reserve are available for appropriations by resolution of the shareholders. Certain foreign subsidiaries are also required to appropriate their earnings to legal reserves under the laws of their respective countries.

The amounts of dividends and the appropriations of retained earnings to the legal reserve are recorded based on the amounts determined during the consolidated fiscal year.

Retained earnings as of December 31, 2025 do not reflect the year-end dividend of ¥70,290 million for the fiscal year ended December 31, 2025, which will be paid on or after March 2026 pursuant to a resolution of the shareholders' meeting.

The amount available for dividends under the Corporation Law of Japan is based on the amount recorded in the Company's non-consolidated financial statements in accordance with financial accounting standards of Japan. Such amount was ¥1,020,811 million at December 31, 2025.

Retained earnings at December 31, 2025 included Canon's equity in undistributed earnings of affiliated companies accounted for by the equity method in the amount of ¥25,278 million.

14. Other Comprehensive Income (Loss)

Changes in accumulated other comprehensive income (loss) for the years ended December 31, 2025 and 2024 are as follows:

Millions of yen

	Foreign currency translation adjustments	Net unrealized gains and losses on securities	Net gains and losses on derivative instruments	Pension liability adjustments	Total
Balance at December 31, 2024	519,361	31	(1,519)	(46,976)	470,897

Other comprehensive income (loss)	234,868	(24,582)	210,286

15. Revenue

Revenue from sales of products of the Printing Business Unit, such as office MFDs, laser printers and inkjet printers, and the Imaging Business Unit, such as digital cameras, is primarily recognized at a point in time upon shipment or delivery, depending upon when the customer obtains controls of these products.

Revenue from sales of equipment of the Medical Business Unit and the Industrial Business Unit that are sold with customer acceptance provisions related to their functionality, including certain medical equipment such as CT systems and MRI systems, and lithography equipment such as semiconductor and FPD lithography equipment, is recognized at a point in time when the equipment is installed at the customer site and the agreed-upon specifications are objectively satisfied and confirmed.

Most of Canon's service revenue is generated from maintenance service in the products of the Printing Business Unit and the Medical Business Unit which is recognized over time. For the service contracts of the Printing Business Unit, the customer typically pays a variable amount based on usage, a stated fixed fee or a stated base fee plus a variable amount which frequently include the provision of consumables as well as break fix activities. The majority portion of service revenue from the products of the Printing Business Unit is recognized as billed since the invoiced amount directly correlates with the value to the customer of the underlying performance obligation to date. For the service contracts of the Medical Business Unit, the customer typically pays a stated fixed fee for the stand ready maintenance service and revenue is recognized ratably over the contract period.

The majority of service arrangements for the products of the Printing Business Unit are executed in combination with related products. Transaction prices for products and services need to be allocated to each performance obligation on a relative standalone selling price basis where judgements are required. Canon estimates the standalone selling price using a range of prices that would meet the allocation objective based on all the information that is reasonably available including market conditions and other observable inputs. If transaction prices of the product or service contracts are not within the acceptable range then the revenue is subject to allocation based on the estimated standalone selling prices. Canon recognizes the incremental costs of obtaining a contract as an expense when related products of the Printing Business Unit are sold.

Revenue from sales of certain industrial equipment which do not have alternative use and for which Canon has enforceable right to payment to the customers for the performance completed to date is recognized over time with progress towards completion measured using the cost based input method as the basis to recognizing revenue including an estimated margin. Provisions for estimated losses on uncompleted contracts are made in the period in which such losses become evident. Changes in job performance, job conditions, estimated margin and final contract settlements may result in revisions to projected costs and revenue and are recognized in the period in which the revisions to estimates are identified and the amounts can be reasonably estimated. Factors that may affect future project costs and margins include, production efficiencies, availability and costs of labor and materials. These factors can impact the accuracy of Canon's estimates and materially impact future reported revenue and cost of sales.

The transaction prices that Canon is entitled to receive in exchange for transferring goods or services to the customer include certain forms of variable consideration, including product discounts, customer promotions and volume-based rebates mainly for the products of the Imaging Business Unit, which are sold predominantly through distributors and retailers. Canon includes estimated amounts in the transaction price only to the extent it is probable that a significant reversal of cumulative revenue recognized will not occur when the uncertainty associated with the variable consideration is resolved. Variable considerations are estimated based upon historical trends and other known factors at the time of sale, and are subsequently adjusted in each period based on current information. In addition, Canon may provide a right of return on its products for a short time period after a sale. These rights are accounted for as variable consideration when determining the transaction price, and accordingly Canon recognizes revenue based on the estimated amount to which Canon expects to be entitled after considering expected returns.

Disaggregated revenue by timing is as follows. Disaggregated revenue by business unit, product and geographic area are described in Note 23.

	Total	2,522,725	568,808	937,391	351,730	233,746	(104,579)	4,509,821

In order to manage the performance of each reportable segment more appropriately, Canon has changed its performance management method regarding intercompany transactions for Industrial Business Unit from the beginning of the first quarter of 2025. Operating results for the year ended December 31, 2024 have also been reclassified.

Revenue recognized over time includes primarily revenue from maintenance service in the products of the Printing Business Unit and the Medical Business Unit and sales of certain equipment of the Industrial Business Unit which do not have alternative use and for which Canon has enforceable right to payment to the customers for the performance completed to date.

Canon recognizes contract assets primarily for unbilled receivables mainly arising from services contracts for the products of the Printing Business Unit. Contract assets are reclassified to trade receivables when they are billed under the terms of the contract. The difference between the opening and closing balances of contract assets primarily results from the timing difference of Canon's performance and billing to customers. Contract assets at December 31, 2025 and 2024 were ¥52,151 million and ¥46,046 million, respectively, and are included in prepaid expenses and other current assets in the consolidated balance sheet.

Canon typically bills to the customer when the performance obligation is satisfied and collects the payment in relatively short term except for certain maintenance service of the products of the Printing Business Unit and the Medical Business Unit and certain industrial equipment for which Canon occasionally receives the payment in advance from customers. The amount received in excess of revenue recognized is recorded as deferred revenue until the performance obligation for distinct goods or services are satisfied. Deferred revenue at December 31, 2025 and 2024 were ¥158,636 million and ¥178,436 million, respectively, ¥138,505 million and ¥159,326 million of which is included in other current liabilities, and ¥20,131 million and ¥19,110 million in other non-current liabilities in the accompanying consolidated balance sheet. Revenue recognized for the year ended December 31, 2025, which had been included in the deferred revenue balance at December 31, 2024, was ¥135,210 million.

Remaining performance obligations for products and equipment at December 31, 2025 primarily arise from the sales of certain industrial equipment, amounting to ¥79,832 million, 87% of which is expected to be recognized as revenue within one year and the remaining 13% is within two years. Remaining performance obligations from the fixed maintenance service contracts with original expected duration of more than one year at December 31, 2025 amounting to ¥266,469 million, 37% of which is expected to be recognized as revenue within one year and the average remaining period for these fixed contracts is about 3 years. Disclosure of remaining performance obligations is not required for the majority of services since the related revenue is recognized on an as billed basis applying the right to invoice practical expedient or is generated from the contracts with original expected duration of less than one year.

Taxes collected from customers and remitted to governmental authorities are excluded from revenues in the consolidated statement of income.

16. Stock-Based Compensation

On April 30, 2025, based on the approval of the board of directors held on March 28, 2025, the Company granted stock options to its directors and executive officers to acquire 123,800 shares of common stock. Those to whom stock acquisition rights are granted (the “Holder(s)”) shall be entitled to exercise all the stock acquisition rights together within 10 days (in case the last day is not a business day, the following business day) from after the date when they cease to hold any position as a director or an executive officer of the Company. These option awards have a 30 year exercisable period. The grant-date fair value per share of the stock options was ¥3,704.

On March 24, 2025, based on the approval of the board of directors held on February 13, 2025, the Company granted stock options to its executive officers to acquire 19,200 shares of common stock. Those to whom stock acquisition rights are granted (the “Holder(s)”) shall be entitled to exercise all the stock acquisition rights together within 10 days (in case the last day is not a business day, the following business day) from after the date when they cease to hold any position as a director or an executive officer of the Company. These option awards have a 30 year exercisable period. The grant-date fair value per share of the stock options was ¥4,353.

On April 30, 2024, based on the approval of the board of directors held on March 28, 2024, the Company granted stock options to its directors and executive officers to acquire 65,900 shares of common stock. Those to whom stock acquisition rights are granted (the “Holder(s)”) shall be entitled to exercise all the stock acquisition rights together within 10 days (in case the last day is not a business day, the following business day) from after the date when they cease to hold any position as a director or an executive officer of the Company. These option awards have a 30 year exercisable period. The grant-date fair value per share of the stock options was ¥3,762.

On March 25, 2024, based on the approval of the board of directors held on February 9, 2024, the Company granted stock options to its executive officers to acquire 20,400 shares of common stock. Those to whom stock acquisition rights are granted (the “Holder(s)”) shall be entitled to exercise all the stock acquisition rights together within 10 days (in case the last day is not a business day, the following business day) from after the date when they cease to hold any position as a director or an executive officer of the Company. These option awards have a 30 year exercisable period. The grant-date fair value per share of the stock options was ¥3,945.

The compensation cost recognized for these stock options for the years ended December 31, 2025 and 2024 were ¥542 million and ¥328 million, respectively and is included in selling, general and administrative expenses in the consolidated statement of income.

The fair value of the option award was estimated on the date of grant using the Black-Scholes option pricing model that incorporates the assumptions presented below:

Years ended December 31

	2025		2024	
	*1	*2	*3	*4
Expected term of option (in years)	3.0	5.0	4.0	4.0
Expected volatility	23.73%	28.22%	27.43%	27.21%
Dividend yield	3.18%	3.46%	3.09%	3.22%
Risk-free interest rate	0.92%	0.89%	0.31%	0.40%

*1 Granted on March 24, 2025

*2 Granted on April 30, 2025

*3 Granted on March 25, 2024

*4 Granted on April 30, 2024

A summary of option activity under the stock option plans as of and for the years ended December 31, 2025 and 2024 is presented below:

	Shares	Weighted- Average exercise price	Weighted- average remaining contractual term	Aggregate intrinsic value
		Yen	Year	Millions of yen
Outstanding at January 1, 2024	418,200	1	26.9	1,513
Granted	86,300	1		
Exercised	(19,400)	1		
Outstanding at December 31, 2024	485,100	1	26.4	2,503
Granted	143,000	1		
Exercised	(51,400)	1		
Outstanding at December 31, 2025	576,700	1	26.3	2,671
Exercisable at December 31, 2025	576,700	1	26.3	2,671

The total fair values of shares vested were ¥542 million and ¥328 million for the years ended December 31, 2025 and 2024, respectively. Cash received from the exercise of stock options for the years ended December 31, 2025 and 2024 were not significant.

17. Net Income Attributable to Canon Inc. Shareholders per Share

A reconciliation of the numerators and denominators of basic and diluted net income attributable to Canon Inc. shareholders per share computations at December 31, 2025 and 2024 are as follows:

	Millions of yen	
	2025	2024
Basic net income attributable to Canon Inc.	332,053	160,025
Diluted net income attributable to Canon Inc.	332,045	160,018
	Number of shares	
	2025	2024
Weighted average common shares outstanding	903,589,986	966,762,583
Effect of dilutive securities:

Diluted common shares outstanding	904,145,263	967,234,173
	Yen	
	2025	2024
Net income attributable to Canon Inc. shareholders per share:		
Basic	367.48	165.53
Diluted	367.25	165.44

18. Derivatives and Hedging Activities

Risk management policy

Canon operates internationally, exposing it to the risk of changes in foreign currency exchange rates. Derivative financial instruments are comprised principally of foreign exchange contracts utilized by the Company and certain of its subsidiaries to reduce the risk. Canon assesses foreign currency exchange rate risk by continually monitoring changes in the exposures and by evaluating hedging opportunities. Canon does not hold or issue derivative financial instruments for speculative purposes. Canon is also exposed to credit-related losses in the event of non-performance by counterparties to derivative financial instruments, but it is not expected that any counterparties will fail to meet their obligations. Most of the counterparties are internationally recognized financial institutions and selected by Canon taking into account their financial condition, and contracts are diversified across a number of major financial institutions.

Foreign currency exchange rate risk management

Canon's international operations expose Canon to the risk of changes in foreign currency exchange rates. Canon uses foreign exchange contracts to manage certain foreign currency exchange exposures principally from the exchange of U.S. dollars and euros into yen. These contracts are primarily used to hedge the foreign currency exposure of forecasted intercompany sales and intercompany trade receivables that are denominated in foreign currencies. In accordance with Canon's policy, a specific portion of foreign currency exposure resulting from forecasted intercompany sales is hedged using foreign exchange contracts which principally mature within three months.

Cash flow hedge

Changes in the fair value of derivative financial instruments designated as cash flow hedges, including foreign exchange contracts associated with forecasted intercompany sales, are reported in accumulated other comprehensive income (loss). These amounts are subsequently reclassified into earnings in the same period as the hedged items affect earnings. All amounts recorded in accumulated other comprehensive income (loss) as of December 31, 2025 are expected to be recognized in net sales over the next twelve months. Changes in the fair value of a foreign exchange contract for the period between the date that the forecasted intercompany sales occur and its maturity date are recognized in earnings.

Derivatives not designated as hedges

Canon has entered into certain foreign exchange contracts to primarily offset the earnings impact related to fluctuations in foreign currency exchange rates associated with certain assets denominated in foreign currencies. Although these foreign exchange contracts have not been designated as hedges as required in order to apply hedge accounting, the contracts are effective from an economic perspective. The changes in the fair value of these contracts are recorded in earnings immediately.

Contract amounts of foreign exchange contracts at December 31, 2025 and 2024 are as follows:

	Millions of yen	
	December 31 2025	December 31 2024
To sell foreign currencies	173,977	180,366
To buy foreign currencies	7,289	18,836

Fair value of derivative instruments in the consolidated balance sheet

The fair value of derivative instruments at December 31, 2025 and 2024 are as follows:

Derivatives designated as hedging instruments

		Millions of yen	
		Fair value	
Account		December 31	December 31
		2025	2024
Assets:			
Foreign exchange contracts	Prepaid expenses and other current assets	760	184
Liabilities:			
Foreign exchange contracts	Other current liabilities	467	1,690

Derivatives not designated as hedging instruments

		Millions of yen	
		Fair value	
Account		December 31	December 31
		2025	2024
Assets:			
Foreign exchange contracts	Prepaid expenses and other current assets	23	42
Liabilities:			
Foreign exchange contracts	Other current liabilities	2,292	1,690

Effect of derivative instruments in the consolidated statement of income

The following tables present the effect of Canon's derivative instruments in the consolidated statement of income for the years ended December 31, 2025 and 2024.

Derivatives in cash flow hedging relationships

	Millions of yen		
	Gain (loss) recognized in OCI	Gain (loss) reclassified from accumulated OCI into income

19. Lessee Accounting

Lease costs are included in cost of sales or selling general and administrative expense in accompanying consolidated statement of income. Income statement information about lease costs is as follows:

	Millions of yen	
	2025	2024
Operating lease cost	56,014	55,461
Short-term lease cost	16,509	15,156
Other lease cost	345	296
Total	72,868	70,913

Operating lease cash flow

Cash flow information about lease is as follows.

	Millions of yen	
	2025	2024
Cash paid for amount included in the measurement of lease liabilities		
Operating cash flows from operating leases	52,542	50,232
Noncash activity - Rights of use assets obtained in exchange for lease liabilities		
Operating leases	37,760	53,692

Maturity Analysis

The following is a schedule by year of the future minimum lease payments under operating leases at December 31, 2025.

	Millions of yen
Year ending December 31:	
2026	45,031
2027	31,614
2028	21,017
2029	14,100
2030	9,306
Thereafter	16,881
Total future minimum lease payments	137,949
Less Imputed Interest	(7,899)
Total of lease liabilities	130,050

Remaining lease term and discount rate

The following is remaining lease term and discount rate under operating leases.

	2025	2024
Weighted-average remaining lease term	50 months	55 months
Weighted-average discount rate	3.0%	3.0%

20. Commitments and Contingent Liabilities

Commitments

As of December 31, 2025, commitments outstanding for the purchase of property, plant and equipment approximated ¥82,719 million, and commitments outstanding for the purchase of parts and raw materials approximated ¥194,432 million.

Guarantees

Canon occupies sales offices and other facilities under lease arrangements accounted for as operating leases. Deposits mainly for restoration made under such arrangements aggregated ¥12,555 million and ¥12,328 million as of December 31, 2025 and 2024, respectively, and are included in noncurrent receivables in the accompanying consolidated balance sheet.

Canon provides guarantees for its employees, affiliates and other companies. The guarantees for the employees are principally made for their housing loans. The guarantees for affiliates and other companies are made for their lease obligations and bank loans to facilitate financing.

Canon would have to perform under a guarantee if the borrower defaults on a payment within the contract terms. The contract terms are 1 year to 9 years in case of employees with housing loans, and 1 year to 5 years in case of affiliates and other companies with lease obligations and bank loans. The maximum amount of undiscounted payments Canon would have had to make in the event of default is ¥2,349 million at December 31, 2025. The carrying amounts of the liabilities recognized for Canon's obligations as a guarantor under those guarantees as of December 31, 2025 were not significant.

Canon also offers assurance-type warranties under which it generally guarantees the performance of products delivered and services rendered for a certain period or term. Estimated product warranty costs are recorded at the time revenue is recognized and are included in selling, general and administrative expenses in the accompanying consolidated statement of income. Estimates for accrued product warranty costs are based on historical experience. Accrued product warranty costs are included in accrued expenses in the accompanying consolidated balance sheet and the changes for the years ended December 31, 2025 and 2024 are summarized as follows:

	Millions of yen	
	2025	2024
Balance at beginning of the year	23,685	23,290
Additions	19,864	20,039
Utilization	(16,253)	(16,867)
Other	(846)	(2,777)
Balance at end of the year	26,450	23,685

Legal proceedings

Canon is involved in various claims and legal actions arising in the ordinary course of business. Canon has recorded provisions for liabilities when it is probable that liabilities have been incurred and the amount of loss can be reasonably estimated. Canon reviews these provisions at least quarterly and adjusts these provisions to reflect the impact of the negotiations, settlements, rulings, advice of legal counsel and other information and events pertaining to a particular case. Based on its experience, although litigation is inherently unpredictable, Canon believes that any damage amounts claimed in outstanding matters are not a meaningful indicator of Canon's potential liability. In the opinion of management, any reasonably possible range of losses from outstanding matters would not have a material adverse effect on Canon's consolidated financial position, results of operations, and cash flows.

21. The Fair Value of Financial Instruments and Concentrations of Credit Risk

Fair value of financial instruments

The estimated fair values of Canon's financial instruments as of December 31, 2025 and 2024 are set forth below. Liabilities are presented in ().

The following summary excludes cash and cash equivalents, time deposits, trade receivables, noncurrent receivables, short-term loans, trade payables and accrued expenses, and the fair values of these instruments approximate their carrying amounts. The summary also excludes investments and derivative instruments which are disclosed in Note 2 and Note 22, and Note 18, respectively.

	Millions of yen			
	December 31, 2025		December 31, 2024	
	Carrying amount	Estimated fair value	Carrying amount	Estimated fair value
Long-term debt, including current portion of long-term debt	(402,468)	(399,623)	(202,031)	(201,944)

The following methods and assumptions are used to estimate the fair value in the above table.

Long-term debt

Canon's long-term debt instruments are classified as Level 2 instruments and valued based on the present value of future cash flows associated with each instrument discounted using current market borrowing rates for similar debt instruments of comparable maturity. The levels are more fully described in Note 22.

Limitations of fair value estimates

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instruments. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Concentrations of credit risk

No single customer accounted for more than 10 percent of consolidated trade receivables as of December 31, 2025 or 2024.

22. Fair Value Measurements

Fair value is the price that would be received to sell an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants at the measurement date. A three-level fair value hierarchy that prioritizes the inputs used to measure fair value is as follows:

Level 1 – Inputs are quoted prices in active markets for identical assets or liabilities.

Level 2 – Inputs are quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable, and inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 – Inputs are derived from valuation techniques in which one or more significant inputs or value drivers are unobservable, which reflect the reporting entity's own assumptions about the assumptions that market participants would use in establishing a price.

Assets and liabilities measured at fair value on a recurring basis

The following tables present Canon's assets and liabilities that are measured at fair value on a recurring basis consistent with the fair value hierarchy as of December 31, 2025 and 2024.

	Millions of yen			
	December 31, 2025			
	Level 1	Level 2	Level 3	Total
Assets:				
Cash and cash equivalents	–	500	–	500
Short-term investment:				
Available-for-sale:				
Corporate bonds	–	170	–	170
Investments:				
Available-for-sale:				
Corporate bonds	–	25,642	–	25,642
Fund trusts and others	4,636	535	–	5,171
Equity securities	28,948	–	–	28,948
Prepaid expenses and other current assets:				
Derivatives	–	783	–	783
Total assets	<u>33,584</u>	<u>27,630</u>	<u>–</u>	<u>61,214</u>
Liabilities:				
Other current liabilities:				
Derivatives	–	2,759	–	2,759
Total liabilities	<u>–</u>	<u>2,759</u>	<u>–</u>	<u>2,759</u>

	Millions of yen			
	December 31, 2024			
	Level 1	Level 2	Level 3	Total
Assets:				
Cash and cash equivalents	–	1,500	–	1,500
Short-term investment:				
Available-for-sale:				
Corporate bonds	–	–	–	–
Investments:				
Available-for-sale:				
Corporate bonds	–	16,679	–	16,679
Fund trusts and others	3,944	450	–	4,394
Equity securities	25,455	–	–	25,455
Prepaid expenses and other current assets:				
Derivatives	–	226	–	226
Total assets	<u>29,399</u>	<u>18,855</u>	<u>–</u>	<u>48,254</u>
Liabilities:				
Other current liabilities:				
Derivatives	–	3,380	–	3,380
Total liabilities	<u>–</u>	<u>3,380</u>	<u>–</u>	<u>3,380</u>

Level 1 investments are comprised principally of Japanese equity securities, which are valued using an unadjusted quoted market price in active markets with sufficient volume and frequency of transactions.

Level 2 assets and liabilities are comprised principally of cash and cash equivalents, corporate bonds included in investments or short-term investments, and derivatives. Cash and cash equivalents, corporate bonds included in investments or short-term investments are valued using quoted prices for identical assets in markets that are not active or quotes obtained from counterparties or third parties. Derivative financial instruments are comprised of foreign exchange contracts. Level 2 derivatives are valued using quotes obtained from counterparties or third parties, which are periodically validated by pricing models using observable market inputs, such as foreign currency exchange rates and interest rates, based on market approach.

Assets and liabilities measured at fair value on a nonrecurring basis

Assets and liabilities measured at fair value on a nonrecurring basis during the year ended December 31, 2024 as follows. There were no significant assets or liabilities to be measured at fair value on a nonrecurring basis during the year ended December 31, 2025.

	Millions of yen				
	2024				
	Impairment Loss	Level 1	Level 2	Level 3	Total
Assets :					
goodwill	(165,100)	–	–	403,131	403,131

Goodwill is classified as Level 3 and is valued based on an income approach using unobservable inputs. Our company conducted an annual goodwill impairment test as of October 1, 2024, which resulted in the fair value of the reporting unit containing the above assets being less than its carrying amount. Our company recognizes the difference between fair value and carrying amount as an impairment loss on goodwill. The fair value of the reporting unit is measured using the

discounted cash flow method using a weighted average cost of capital of 6.0% and future cash flows. Future cash flows are calculated based on management's estimates of sales, gross profit, operating expenses and growth in perpetuity, taking into account industry trends and market conditions.

23. Segment Information

Canon reports in four reportable segments: the Printing Business Unit, the Medical Business Unit, the Imaging Business Unit and the Industrial Business Unit with Others and Corporate, which are based on the organizational structure and information reviewed by Canon's management to evaluate results and allocate resources.

In order to manage the performance of each reportable segment more appropriately, Canon has changed its performance management method regarding intercompany transactions for Industrial Business Unit from the beginning of the first quarter of 2025. Operating results for the year ended December 31, 2024 have also been reclassified.

The primary products included in each segment are as follows:

Printing Business Unit:	Digital continuous feed presses / Digital sheet-fed presses / Large format printers / Office MFDs / Document solutions / Laser MFPs / Laser printers / Inkjet printers / Image scanners / Calculators
Medical Business Unit:	CT systems / Diagnostic ultrasound systems / Diagnostic X-ray systems / MRI systems / Digital radiography systems / Ophthalmic equipment / In vitro diagnostic systems and reagents / Healthcare IT Solutions
Imaging Business Unit:	Interchangeable-lens digital cameras / Interchangeable lenses / Digital compact cameras / Compact photo printers / MR Systems / Network cameras / Video management software / Video content analytics software / Digital camcorders / Digital cinema cameras / Broadcast equipment
Industrial Business Unit:	Semiconductor lithography equipment / FPD lithography equipment / OLED Display Manufacturing Equipment / Vacuum thin-film deposition equipment / Die bonders
Others:	Handy terminals / Document scanners

The accounting policies of the segments are substantially the same as those described in the significant accounting policies in Note 1. Canon evaluates results and allocates resources for each segment based on income before income taxes.

Information about operating results and assets for each segment as of and for the years ended December 31, 2025 and 2024 is as follows:

	Millions of yen

The CEO as chief operating decision maker (CODM) uses Net sales, Gross profit to net sales ratio, Operating expense to net sales ratio, Operating profit to net sales and Income before income taxes to net sales ratio to assess segment performance and make decisions about resource allocation.

Intersegment sales are recorded at the same prices used in transactions with third parties. Expenses not directly associated with specific segments are allocated based on the most reasonable measures applicable. Corporate expenses include certain corporate R&D expenses. Amortization costs of identified intangible assets resulting from the purchase price allocation of Toshiba Medical Systems Corporation (currently, Canon Medical Systems Corporation) are also included in corporate expenses. Segment assets are based on those directly associated with each segment. Corporate assets primarily consist of cash and cash equivalents, investments, deferred tax assets, goodwill, identified intangible assets from acquisitions and corporate properties. Capital expenditures represent the additions to property, plant and equipment and intangible assets measured on an accrual basis.

Other operating expense includes personnel expenses.

Information about sales by product and service to external customers for each segment for the years ended December 31, 2025 and 2024 is as follows:

Total	<u>1,577,339</u>	<u>1,559,487</u>

Net sales are attributed to areas based on the location where the products are shipped and the services are performed to the customers. Other than in Japan and the United States, Canon does not conduct business in any individual country in which its sales in that country exceed 10% of consolidated net sales. Net sales in the United States were ¥1,381,621 million and ¥1,311,397 million for the years ended December 31, 2025 and 2024, respectively.

Long-lived assets represent property, plant and equipment, intangible assets, and operating lease right-of-use assets for each geographic area.

24. Subsequent Event

Canon evaluated the subsequent events up to March 25, 2026, the filing date of Annual Securities Report.

Tender Offer for Shares of Canon Electronics Inc.

Canon Inc.(the“Company”) resolved at the meeting of its Board of Directors held on November 28, 2025, to acquire the common stock of its consolidated subsidiary, Canon Electronics Inc. (“Canon Electronics”), for the purpose of making Canon Electronics a wholly-owned subsidiary of the Company, through a tender offer (the “Tender Offer”) conducted pursuant to the Financial Instruments and Exchange Act. The Tender Offer was implemented during the period from December 1, 2025 to January 19, 2026.

As a result of the Tender Offer, the total number of shares tendered exceeded the minimum number of shares to be purchased, and accordingly, the Tender Offer was successfully completed. As a result, the Company’s shareholding ratio in Canon Electronics increased to 87.94%.

Furthermore, based on the results of the Tender Offer, the Company plans to implement a series of procedures to acquire all of the shares of Canon Electronics to make Canon Electronics a wholly-owned subsidiary of the Company. The common shares of Canon Electronics are currently listed on the Prime Market of Tokyo Stock Exchange. However, upon completion of the procedures for making it a wholly-owned subsidiary, the shares will meet the delisting criteria of the Tokyo Stock Exchange and are expected to be delisted following the prescribed procedures.

1. Results of the Tender Offer

Tender Offer Period:	December 1, 2025 – January 19, 2026
Tender Offer Price:	¥3,650 per share of common stock
Number of Shares Purchased:	13,470,819 shares
Total Purchase Amount:	¥49,168 million
Settlement Commencement Date:	January 26, 2026

2. Funding for the Tender Offer

Fund Purpose:	Funds required for the Tender Offer
Lender:	Mizuho Bank, Ltd.
Loan Amount:	¥49,400 million
Loan Interest:	Base rate plus a spread
Loan Execution Date:	January 23, 2026
Loan Period:	Within one year
Collateral Situation:	No collateral

Acquisition of treasury stock by Canon Marketing Japan Inc.

Canon Marketing Japan Inc.(“CMJ”), a subsidiary of Canon Inc., passed a Board of Directors resolution on January 28, 2026, to acquire treasury stock in accordance with Article 459, Paragraph 1 of the Companies Act and its Articles of Incorporation.

1. Purpose of acquisition of own shares

CMJ will acquire treasury stock to increase shareholder returns and enhance capital efficiency.

2. Details of acquisition

(i) Type of shares to be acquired	Share of common stock
(ii) Total number of shares to be acquired	Up to 5,000,000 shares * (Equivalent to 4.66% of issued shares (excluding treasury stock))
(iii) Total cost of acquisition	Up to ¥30,000 million
(iv) Period of acquisition	From February 2, 2026 to October 30, 2026
(v) Method of acquisition	Market purchases on the Tokyo Stock Exchange

* As described in the “Significant Subsequent Events: Share Split by Canon Marketing Japan Inc.”, CMJ also approved at the same meeting to conduct a share split. The total number of shares for the acquisition shown in (ii) above after the effective date of the share split (April 1, 2026) will be 10,000,000 shares (maximum).

Share Split of Canon Marketing Japan Inc.

CMJ, a subsidiary of Canon Inc., passed a Board of Directors resolution on January 28, 2026, to conduct share split.

1. Purpose of share split

The purpose of the share split is to reduce the investment unit of CMJ common stock, thereby creating an environment that encourages investors to invest in shares of CMJ, increasing the liquidity of the shares, and expanding the investor base.

2. Overview of share split

(i) Method of share split

CMJ will split the shares of its common stock owned by the shareholders recorded on the final register of shareholders as of March 31, 2026, the record date, in the proportion of two shares for one share.

(ii) Number of shares to be increased by share split

Total number of issued shares before the share split	111,079,972 shares
Number of shares to be increased by this share split	111,079,972 shares
Total number of issued shares after the share split	222,159,944 shares
Total number of shares authorized to be issued after the share split	299,500,000 shares

(iii) Timetable

Date of public notice of the record date	March 16, 2026
Record date	March 31, 2026
Effective date	April 1, 2026

(iv) Other

The above share split will not result in a change to the amount of CMJ share capital or to the Articles of its Incorporation.

Acquisition of treasury stock

The Company at a meeting of the Board of Directors held on January 29, 2026, passed a Board of Directors resolution regarding the acquisition of its own shares under Article 156, as applied pursuant to paragraph 3, Article 165, of the Companies Act, as follows.

1. Purpose of acquisition of own shares

The Company aims to further raise corporate value through active growth investment. At the same time, to enhance shareholder returns by improving capital efficiency, the Company has established a framework to acquire its own shares. The purpose of this framework is to allow the Company to flexibly acquire its own share, based on a comprehensive assessment of factors, including the Company's share price level.

Please note that, depending on the Company's investment priorities and market conditions, some of the planned share acquisition may not be carried out.

2. Details of acquisition

(i) Type of shares to be acquired	Share of common stock
(ii) Total number of shares to be acquired	Up to 54,000,000 shares (Equivalent to 6.1% of issued shares (excluding treasury stock))
(iii) Total cost of acquisition	Up to ¥200,000 million
(iv) Period of acquisition	From January 30, 2026 to January 29, 2027
(v) Method of acquisition	Market purchases on the Tokyo Stock Exchange 1) Purchases through the Tokyo Stock Exchange Trading Network Off-Auction Own Share Repurchase Trading System (ToSTNeT-3) 2) Market purchases based on a discretionary trading contract regarding acquisition of own shares

(v) Consolidated Supplementary Schedule

Schedule of Bonds

Not applicable.

Schedule of Borrowings

This information is presented in the note 9 to the consolidated financial statements.

Schedule of Asset Retirement Obligations

As the amount of asset retirement obligations as of the end of the previous consolidated fiscal year and the end of the current consolidated fiscal year are a hundredth or less of the sum of liabilities and net assets each of the said period, it has been omitted.

Schedule of valuation allowance

Notes to Non-Consolidated Financial Statements

<Significant Accounting Policies>

1. Valuation Principle and Methods for Securities

(1) Shares in subsidiaries and affiliates----stated at cost based on the moving average method.

(2) Other securities:

Other than non-marketable equity securities----stated at fair value (unrealized gains and losses are reported in valuation and translation adjustments, realized gains and losses are measured based on the moving average cost method).

Non-marketable equity securities----stated at cost based on the moving average method.

2. Valuation Principle and Methods for Inventories

Inventories valued at cost using the periodic average method (amount shown in the balance sheet is reported at lower of cost or market).

3. Depreciation Method of Fixed Assets

(1) Property, plant and equipment (excluding lease assets)----calculated by the declining-balance method.

For buildings (excluding fixtures) acquired on or after April 1, 1998, depreciation is calculated by the straight-line method.

(2) Intangible fixed assets----calculated by the straight-line method. With regard to software for sale, calculated based on the estimated marketable period in consideration of projected future revenue of the relevant products (3 years), and with regard to internal-use software, calculated based on the estimated useful period in Canon Inc. ("Canon" or the company) (5 years). Goodwill is amortized using the straight-line method over 20 years based on the estimated period for each acquired business during which the excess earning power is maintained.

(3) Lease assets----calculated by the straight-line method. The contractual lease period is determined as the useful life of each lease asset.

4. Basis of Recording Allowances

(1) Allowances for doubtful accounts----provided as provision for estimated uncollectible receivables.

----General accounts

Allowances are provided using a rate determined by credit loss history.

----Allowance for accounts considered to be uncollectible and accounts in bankruptcy filing are provided for the individual estimated uncollectible amounts, primarily determined based on the respective customer's financial conditions.

(2) Accrued warranty expenses----provided as general provision for after-sales services and free-of-charge repair service costs on an estimated amount based on the historical costs.

(3) Accrued bonuses for employees----provided as general provision for bonuses to employees based on an amount expected to be paid.

(4) Accrued directors' bonuses----provided as general provision for bonuses to directors based on an amount expected to be paid.

(5) Accrued pension and severance cost----provided as general provision for employee retirement and severance benefits based on projected benefit obligation and plan assets as of December 31, 2025. In calculating retirement benefit obligations, the method of attributing estimated retirement benefits to the period up to the current fiscal year is based on the benefit formula basis. Prior service cost is expensed using the straight-line method over the average remaining service period of employees at the time the cost is incurred. Actuarial gains and losses are expensed using the straight-line method over the average remaining service periods of employees from the following year when costs are incurred.

(6) Reserve for environmental provision----provided as general provision for the future environmental-related cost, such as construction costs to prevent the proliferation of soil pollution, and also clean-up costs of hazardous substances based on the related regulations.

(7) Accrued long service rewards for employees----provided as general provision for rewards to long-service employees in accordance with management policy based on an amount expected to be paid.

5. Standards of Accounting for Revenues and Expenses

Canon provides products, consumables and product-related services primarily in each segment: Printing Business Unit, Medical Business Unit, Imaging Business Unit and Industrial Business Unit.

For sales of products and consumables and rendering of services, the performance obligations are identified based on contracts with customers.

For product sales, revenue is recognized when the customer obtains control of the product and the performance obligation is satisfied. For products that do not require installation, this is primarily at the time of shipment or delivery. For products that require installation, this is when the equipment is installed and it is confirmed that the agreed specifications have been met based on objective criteria.

For the services, if the performance obligation is satisfied at a point in time upon, revenue is recognized at the point when the services are completed. If the performance obligation is satisfied over time, revenue is recognized over the period during which services are rendered.

The transaction price of products and services is allocated to each performance obligation based on a ratio of the reasonably calculated independent selling price. If independent selling prices are not directly observable, we estimate them. The variable consideration included in the transaction price is included in the transaction price when the uncertainty is resolved and is periodically reviewed.

6. Hedge Accounting

(1) Hedge accounting----Deferral hedge accounting has been applied.

(2) Hedging instruments and hedged items

Hedging instruments----derivative transactions (foreign exchange contract)

Hedged items---- forecasted intercompany sales and intercompany trade receivables

(3) Hedge policy----Derivative financial instruments are comprised principally of foreign exchange contracts to hedge the currency risk in accordance with the Company's policy. The Company does not hold derivative financial instruments for trading purposes.

(4) Assessment of hedge effectiveness---- As the substantial terms of hedging instruments and of hedged items are the same, the fluctuations of foreign currency exchange rates are offset by each other at the hedge's inception and on an ongoing basis. Hedge effectiveness is assessed by verifying those relationships.

7. Notes to Others

(1) Consumption Taxes---- excluded from the statement of income and are accumulated in other receivables or other payables.

(2) Group tax sharing system ---- Applied

<Significant Accounting Estimates>

The following item is recorded based on the amount using accounting estimates which may have material impacts on the financial statements for the following fiscal year.

Valuation of investments in subsidiaries for which fair value is not readily determinable.

1. Amount recorded on the balance sheet as of December 31, 2025.

Shares in subsidiaries and associates 1,526,523 million yen.

(Of the reported amount, 1,457,930 million yen pertains to investments in subsidiaries for which fair value is not readily determinable.)

2. Other information that contributes to the understanding of the users of the Financial Statements with regard to the estimate.

The net asset value of subsidiaries for which it is difficult to determine its fair values is calculated by taking into account excess earning power, which is based on the financial statements and business plans of the subsidiaries. Excess earning power is measured mainly based on estimated future cash flows of the subsidiaries and estimated discount rates. Estimates of future cash flows are based primarily on projections of future growth rates. Discount rate estimates are primarily based on relevant market and industry data and the weighted average cost of capital, taking into account specific risk factors.

Investment in a subsidiary, Canon Medical Systems Corporation, represents a significant investment of the Company, and is recorded at 658,304 million yen in the current fiscal year financial statements. We estimated the future cash flows for Canon Medical Systems Corporation based on a mid-term management plan developed by considering the expected market growth of medical equipment products and growth of relevant regions. The actual value of the subsidiary, including excess earning capacity, calculated during the fiscal year under review did not significantly decrease compared with the acquisition cost of the shares, and the Company has determined that impairment loss was not required.

However, if future cash flows of the subsidiary decrease more than expected due to changes in the uncertain economic environment in the future, an impairment loss may be recognized, which may have a material impact on the financial statements for the following fiscal year.

<Changes in Accounting Policies>

Application of Accounting Standards Related to Income Taxes, Inhabitants Tax, and Enterprise Tax

The “Accounting Standard for Income Taxes, Inhabitants Tax, and Enterprise Tax, etc.” (ASBJ Statement No. 27, issued on October 28, 2022; hereinafter referred to as the “2022 Revised Accounting Standard”) has been applied from the beginning of the current fiscal year. With respect to the amendments concerning the classification of income taxes, the transitional treatment prescribed in the proviso to paragraph 20-3 of the 2022 Revised Accounting Standard has been applied. There is no impact on the financial statements arising from this change in accounting policy.

<Unapplied Accounting Standards, etc.>

Accounting Standard for Leases (ASBJ Statement No. 34 September 13, 2024)

Implementation Guidance on Accounting Standard for Leases (ASBJ Guidance No. 33 September 13, 2024)

(1) Overview

This standard requires that all leases, including operating leases, be accounted for as assets and liabilities.

(2) Planned date of application

This will be applied from the beginning of the fiscal year on January 1, 2028.

(3) Impact of the application of the accounting standards, etc.

The amount of the impact on non-consolidated financial statements is currently under assessment.

(Non-Consolidated Balance Sheet)

1. Items relating to subsidiaries and associates included in each entry, other than those listed separately, are as follows.

	Millions of yen	
	December 31, 2025	December 31, 2024
Receivables	430,899	422,514
Payables	484,796	588,877

2. The following is a joint and several guarantee for bank loans for employees' housing fund.

	Millions of yen	
	December 31, 2025	December 31, 2024
	69	118

3. The total amount of tax purpose reduction entry that is subtracted from non-current assets acquired using national subsidies, etc. and the breakdown thereof are as follows.

	Millions of yen	
	December 31, 2025	December 31, 2024
Buildings	6,264	6,167
Machinery and equipment	3,459	3,007
Vehicles	7	5
Tools, furniture and fixtures	208	77
Land	905	905
Total	10,843	10,161

(Non-Consolidated Statement of Income)

1. Trading with subsidiaries and affiliates are as follows.

	Millions of yen	
	2025	2024
Sales	1,638,004	1,683,967
Purchase	1,214,102	1,246,547
Other transactions	184,862	380,456

2. Major expenses and monetary amount of SG&A expenses are as follows.

The approximate proportion of selling expenses among selling, general and administrative expenses was 20% for the end of the current consolidated fiscal year and 20% for the end of the previous consolidated fiscal year.

	Millions of yen	
	2025	2024
Provision for product warranties	5,072	5,064
Provision for bonus reserves	3,710	3,076
Research and development expenses	199,804	201,168
Salaries and allowance of employees	59,829	59,898
Depreciation	16,447	13,969

3. Regarding the loss on valuation of shares in subsidiaries and affiliates recorded as non-ordinary loss

Due to changes in the business environment surrounding our subsidiaries and affiliates, it was determined that the substantial value of the shares of such subsidiaries and affiliates held by the Company had significantly declined. Accordingly, in the non-consolidated financial statements prepared in accordance with Japanese GAAP, we reduced the book value of these shares to their recoverable amount and recognized the decrease as non-ordinary loss for the current fiscal year.

It should be noted that this valuation loss on shares of subsidiaries and affiliates is eliminated in the consolidated financial statement and therefore has no impact on consolidated financial result.

(Securities)

Investment securities in subsidiaries and affiliates

(Year ended December 31, 2025)

(Millions of yen)

Category	Carrying amount	Market Price	Difference

(Tax Effect Accounting)

1. Major components of deferred tax assets and liabilities

	Millions of yen	
	December 31, 2025	December 31, 2024
(Deferred tax assets)		
Accrued pension and severance cost	15,946	15,457
Shares in subsidiaries	18,036	7,336
Loss on valuation of inventories	2,219	2,247
Accrued business tax	2,185	2,447
Depreciation of fixed assets in excess of limit	18,651	16,148
Excess in amortization of software	4,343	4,869
Amortization of deferred charges in excess of limit	26,737	21,657
Other	12,652	12,929
Subtotal deferred tax assets	100,769	83,090
Valuation allowance	(21,174)	(10,183)
Total deferred tax assets	79,595	72,907
(Deferred tax liabilities)		
Reserve for deferral of capital gain on property	(1,320)	(1,347)
Prepaid pension expense	(8,319)	(2,446)
Other	(4,216)	(4,076)
Total deferred tax liabilities	(13,855)	(7,869)
Net deferred tax assets	65,740	65,038

2. Major components of difference between the statutory effective tax rate and the effective tax rate after tax effect accounting is applied

	%	
	December 31, 2025	December 31, 2024
Effective tax rate	31.0%	31.0%
Adjustments		
Income not taxable permanently such as dividend income	(14.2)	(18.5)
Tax credit for experimental research cost and others	(3.8)	(2.4)
Non-deductible foreign tax, etc.	0.7	0.9
Expenses that are not deductible for tax purposes	3.4	0.0
Other	(1.1)	(0.5)
Effective tax rate after tax effect accounting is applied	16.0%	10.5%

3. Adjustments to Deferred Tax Assets and Deferred Tax Liabilities Resulting from Changes in Corporate Tax Rates

The “Act for Partial Revision of the Income Tax Act, etc.” (Act No. 13 of 2025) was enacted by the Japanese Diet on March 31, 2025, and will result in an increase in the corporate tax rate and other related tax rates for fiscal years beginning on or after April 1, 2026.

Accordingly, the statutory effective tax rate used in calculating the Company’s deferred tax assets and deferred tax liabilities will be changed to 31.4% for temporary differences expected to be reversed in fiscal years beginning on or after January 1, 2027. The impact of this tax rate change is immaterial.

Tender Offer for Shares of Canon Electronics Inc.

Canon resolved at the meeting of its Board of Directors held on November 28, 2025, to acquire the common stock (the “Target Company Shares”) of its consolidated subsidiary, Canon Electronics Inc. (“Canon Electronics”), for the purpose of making Canon Electronics a wholly-owned subsidiary of the Company, through a tender offer (the “Tender Offer”) conducted pursuant to the Financial Instruments and Exchange Act (Act No. 25 of 1948, as amended). The Tender Offer was implemented during the period from December 1, 2025 to January 19, 2026.

As a result of the Tender Offer, the total number of shares tendered exceeded the minimum number of shares to be purchased, and accordingly, the Tender Offer was successfully completed. As a result, the Company’s shareholding ratio in Canon Electronics increased to 87.94%.

Furthermore, based on the results of the Tender Offer, the Company plans to implement a series of procedures to acquire all of the Target Company Shares and make Canon Electronics a wholly-owned subsidiary of the Company. The common shares of Canon Electronics are currently listed on the Prime Market of Tokyo Stock Exchange, Inc. (“Tokyo Stock Exchange”). However, upon completion of the procedures for making it a wholly-owned subsidiary, the shares will meet the delisting criteria of the Tokyo Stock Exchange and are expected to be delisted following the prescribed procedures.

1. Results of the Tender Offer

Tender Offer Period	: December 1, 2025 - January 19, 2026
Tender Offer Price	: ¥3,650 per share of common stock
Number of Shares Purchased	: 13,470,819 shares
Total Purchase Amount	: ¥49,168 million
Settlement Commencement Date	: January 26, 2026

2. Financing Related to the Tender Offer

Use of Funds	: Funds required for the Tender Offer and related expenses
Lender	: Mizuho Bank, Ltd.
Borrowing Amount	: ¥49,400 million
Interest Rate	: Base rate + spread
Borrowing Date	: January 23, 2026
Borrowing Term	: Within one year
Collateral	: Unsecured

Acquisition of treasury stock

The Company at a meeting of the Board of Directors held on January 29, 2026, passed a Board of Directors resolution regarding the acquisition of its own shares under Article 156, as applied pursuant to paragraph 3, Article 165, of the Companies Act, as follows.

1. Purpose of acquisition of own shares

The Company aims to further raise corporate value through active growth investment. At the same time, to enhance shareholder returns by improving capital efficiency, the Company has established a framework to acquire its own shares. The purpose of this framework is to allow the Company to flexibly acquire its own share, based on a comprehensive assessment of factors, including the Company’s share price level.

Please note that, depending on the Company’s investment priorities and market conditions, some of the planned share acquisition may not be carried out.

2. Details of acquisition

(i) Type of shares to be acquired	Share of common stock
(ii) Total number of shares to be acquired	Up to 54,000,000 shares (Equivalent to 6.1% of issued shares (excluding treasury stock))
(iii) Total cost of acquisition	Up to ¥200,000 million
(iv) Period of acquisition	From January 30, 2026 to January 29, 2027
(v) Method of acquisition	Market purchases on the Tokyo Stock Exchange 1) Purchases through the Tokyo Stock Exchange Trading Network Off-Auction Own Share Repurchase Trading System (ToSTNeT-3) 2) Market purchases based on a discretionary trading contract regarding acquisition of own

< Additional Information >

The Company at a Board of Directors meeting held on December 24, 2025, has resolved to conduct an absorption-type company split where all businesses currently operated by Canon Medical Systems Corporation (“CMSC”), the splitting company, except for sale, technical service and maintenance in Japan, will be succeeded to the Company, the succeeding company. On the same date, an absorption-type company split agreement between the Company and CMSC was executed.

The purpose of the Absorption-type Company Split is to make the medical business one of Canon's pillars by reforming our business structure and strengthening our organization, thereby achieving high profitability and strong growth. By integrating the previously separate operations of the Company and CMSC into a unified structure, we will establish a system that can make maximum use of the Company's technology and expertise in quality control and cost reduction. And by reviewing all operations, including development, manufacturing, and management, we will accelerate our efforts to improve profitability and expand our business in the medical-related market, where stable growth is expected. The effective date of the absorption-type company split is scheduled for April 1, 2026.

<Audit of Consolidated Financial Statements>

Opinion

Pursuant to the first paragraph of Article 193-2 of the Financial Instruments and Exchange Act, we have audited the consolidated financial statements of Canon Inc. and its consolidated subsidiaries (the "Group") included in the Financial Section, namely, the consolidated balance sheet as of December 31, 2025, and the consolidated statement of income, consolidated statement of comprehensive income, consolidated statement of equity and consolidated statement of cash flows for the fiscal year from January 1, 2025 to December 31, 2025, and the related notes, and consolidated supplementary schedules.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as of December 31, 2025, and its consolidated results of its operations and its consolidated cash flows for the year then ended in accordance with accounting principles

generally accepted in the United States of America pursuant to the provisions of the third paragraph of the Supplementary Provisions of the Cabinet Office Ordinance for Partial Amendment of the Ordinance on Terminology, Forms and Preparation Methods of Consolidated Financial Statements (No.11 of the Cabinet Office Ordinance in 2002).

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in Japan. Our responsibilities under those standards are further described in the Auditor’s Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with the provisions of the Code of Professional Ethics in Japan, including the ethical requirements that are relevant to audits of the financial statements of public interest entities, and we have fulfilled our other ethical responsibilities as auditors. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matter

A key audit matter is a matter that, in our professional judgment, was of most significance in our audit of the consolidated financial statements of the current period. The matter was addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on the matter.

Goodwill—Medical Reporting Unit—Refer to Notes 1 and 8 to the Consolidated Financial Statements	
Key Audit Matter Description	How the Key Audit Matter Was Addressed in the Audit
<p>The Group’s total goodwill was ¥985,806 million (16.1% of Total assets) as of December 31, 2025, of which ¥405,882 million (41.2% of Goodwill) was allocated to the Medical Reporting Unit.</p> <p>The Group tests goodwill for impairment annually in the fourth quarter of each year, or more frequently if indicators of potential impairment exist. The fair value of the Medical Reporting Unit is determined primarily based on a discounted cash flow analysis, which involves estimates of projected future cash flows, perpetual growth rates and discount rates. The estimates of projected future cash flows are based on a mid-term management plan and a long-term growth rate for the subsequent periods (perpetual growth rates) that considered the future market growth of medical equipment and growth in geographies where the Group operates its medical business. The estimate of the discount rate is determined based on the weighted average cost of capital, which considers primarily market and industry data as well as specific risk factors.</p> <p>As of the measurement date, the fair value of the Medical Reporting Unit exceeded its carrying amount, however, the fair value in excess of the carrying amount as a percentage of the carrying amount is lower compared to other reporting units and an impairment could be recognized if future cash flows of the Medical Reporting Unit is generated lower than forecasted.</p> <p>We determined the valuation of goodwill allocated to the Medical Reporting Unit as a key audit matter given it represents 41.2% of the total</p>	<p>Our audit procedures related to the projected future cash flows, the discount rate and the perpetual growth rate used by management to measure the fair value of the Medical Reporting Unit included the following, among others:</p> <p>(1) Evaluation of internal controls</p> <ul style="list-style-type: none"> We tested the effectiveness of controls over management’s goodwill impairment evaluation, including those over management’s estimates and assumptions used in the projected future cash flows, the discount rate and the perpetual growth rate. <p>(2) Evaluation of the reasonableness of management’s projected future cash flows</p> <ul style="list-style-type: none"> We evaluated management’s ability to accurately project future cash flows by comparing actual results to management’s historical projections. We made inquiries of management to understand significant assumptions used in the projected future cash flows. We evaluated the reasonableness of management’s projected future cash flows by comparing the projections to actual results, documents reported to management, and other related documents for respective revenue, cost of sales and other elements, which together comprise management’s projected future cash flows. We evaluated the reasonableness of management’s significant assumptions regarding the revenue growth rate used in the projected future cash flows, which could have a significant impact on the fair value of the Medical Reporting Unit, by comparing the revenue growth rate to the expected

<p>goodwill and there are significant judgements made by management on estimates and assumptions related to the projected future cash flows, the discount rate and the perpetual growth rate to measure the fair value of the Medical Reporting Unit on which performing audit procedures required a high degree of auditor judgment and an increased extent of effort, including the need to involve our fair value specialists.</p>	<p>market growth rates for each type of medical equipment and each region in which the Group operates its medical business as included in independent third-party industry reports.</p> <p>(3) Evaluation of the reasonableness of the valuation methodology, the discount rate, and the perpetual growth rate</p> <ul style="list-style-type: none"> • With the assistance of our fair value specialists, we evaluated the reasonableness of the valuation methodology, the discount rate and the perpetual growth rate by: <ul style="list-style-type: none"> – examining whether the valuation methodology used, including the determination of the discount rate and the perpetual growth rate, was consistent with existing valuation practices that are both generally accepted in practice and acceptable in the circumstance. – testing the underlying data used in the determination of the discount rate and the perpetual growth rate, and the mathematical accuracy of the calculation; and – developing a range of independent estimates and comparing those to the discount rate and the perpetual growth rate selected by management.

Other Information

Management is responsible for the other information. Audit & Supervisory Board members and the Audit & Supervisory Board are responsible for overseeing the Directors' execution of duties relating to the design and operating effectiveness of the controls over the other information. The other information comprises the information included in the Annual Securities Report, but does not include the consolidated financial statements and our auditor's report thereon.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Audit & Supervisory Board Members and the Audit & Supervisory Board for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with accounting principles generally accepted in the United States of America, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern in accordance with accounting principles generally accepted in the United States of America.

Audit & Supervisory Board members and the Audit & Supervisory Board are responsible for overseeing the

Directors' execution of duties relating to the design and operating effectiveness of the controls over the Group's financial reporting process.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with auditing standards generally accepted in Japan, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks. The procedures selected depend on the auditor's judgment. In addition, we obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion.
- Obtain, when performing risk assessment procedures, an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate whether the overall presentation and disclosures of the consolidated financial statements are in accordance with accounting principles generally accepted in the United States of America, as well as the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business units within the Group as a basis for forming an opinion on the group financial statements. We are responsible for the direction, supervision and review of the audit work performed for purposes of the group audit. We remain solely responsible for our audit opinion.

We communicate with Audit & Supervisory Board members and the Audit & Supervisory Board regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide Audit & Supervisory Board members and the Audit & Supervisory Board with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with Audit & Supervisory Board members and the Audit & Supervisory Board, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

<Audit of Internal Control>

Opinion

Pursuant to the second paragraph of Article 193-2 of the Financial Instruments and Exchange Act, we have audited management's report on internal control over financial reporting of Canon Inc. as of December 31, 2025.

In our opinion, management's report on internal control over financial reporting referred to above, which represents that the internal control over financial reporting of Canon Inc. as of December 31, 2025, is effectively maintained, presents fairly, in all material respects, the results of the assessment of internal control over financial reporting in accordance with assessment standards for internal control over financial reporting generally accepted in Japan.

Basis for Opinion

We conducted our internal control audit in accordance with auditing standards for internal control over financial reporting generally accepted in Japan. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Internal Control Audit section of our report. We are independent of the Group in accordance with the provisions of the Code of Professional Ethics in Japan, including the ethical requirements that are relevant to audits of the financial statements of public interest entities, and we have fulfilled our other ethical responsibilities as auditors. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Audit & Supervisory Board Members and the Audit & Supervisory Board for Report on Internal Control

Management is responsible for designing and operating effective internal control over financial reporting and for the preparation and fair presentation of its report on internal control in accordance with assessment standards for internal control over financial reporting generally accepted in Japan. Audit & Supervisory Board members and the Audit & Supervisory Board are responsible for overseeing and verifying the design and operating effectiveness of internal control over financial reporting. There is a possibility that misstatements may not be completely prevented or detected by internal control over financial reporting.

Auditor's Responsibilities for the Internal Control Audit

Our objectives are to obtain reasonable assurance about whether management's report on internal control over financial reporting is free from material misstatement and to issue an auditor's report that includes our opinion.

As part of an audit in accordance with auditing standards for internal control over financial reporting generally accepted in Japan, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Perform audit procedures to obtain audit evidence regarding the results of the assessment of internal control over financial reporting in management's report on internal control. The procedures selected depend on the auditor's judgment, including the significance of effects on reliability of financial reporting.
- Examine representations on the scope, procedures and results of the assessment of internal control over financial reporting made by management, as well as evaluating the overall presentation of management's report on internal control.
- Plan and perform the internal control audit to obtain sufficient appropriate audit evidence regarding the results of the assessment of internal control over financial reporting. We are responsible for the direction, supervision and review of the internal control audit. We remain solely responsible for our audit opinion.

We communicate with Audit & Supervisory Board members and the Audit & Supervisory Board regarding, among other matters, the planned scope and timing of the internal control audit, result of the internal control audit, including any identified material weakness which should be disclosed and the result of remediation.

We also provide Audit & Supervisory Board members and the Audit & Supervisory Board with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and

where applicable, actions taken to eliminate threats or safeguards applied.

<Fee-Related Information>

Fees for audit and other services for the year ended December 31, 2025, which were charged by us and our network firms to Canon Inc. and its subsidiaries are disclosed in (3) Status of audit in Corporate Governance, included in Information on Reporting Company of the Annual Securities Report.

Interest Required to Be Disclosed by the Certified Public Accountants Act of Japan

Our firm and its designated engagement partners do not have any interest in the Group which is required to be disclosed pursuant to the provisions of the Certified Public Accountants Act of Japan.

<Audit of Non-Consolidated Financial Statements>

Opinion

Pursuant to the first paragraph of Article 193-2 of the Financial Instruments and Exchange Act, we have audited the non-consolidated financial statements of Canon Inc. (the "Company") included in the Financial Section, namely, the non-consolidated balance sheet as of December 31, 2025, and the non-consolidated statement of income and non-consolidated statement of changes in net assets for the 125th fiscal year from January 1, 2025 to December 31, 2025, and a summary of significant accounting policies and other explanatory information, and the supplementary schedules.

In our opinion, the accompanying non-consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2025, and its financial performance for the year then ended in accordance with accounting principles generally accepted in Japan.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in Japan. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Non-Consolidated Financial Statements section of our report. We are independent of the Company in accordance with the provisions of the Code of Professional Ethics in Japan, including the ethical requirements that are relevant to audits of the financial statements of public interest entities, and we have fulfilled our other ethical responsibilities as auditors. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matter

A key audit matter is a matter that, in our professional judgment, was of most significance in our audit of the non-consolidated financial statements of the current period. The matter was addressed in the context of our audit of the non-consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on the matter.

Valuation of Investments in Subsidiaries—Canon Medical Systems Corporation—Refer to “Significant Accounting Estimates” and “Securities” of the Non-Consolidated Financial Statements	
Key Audit Matter Description	How the Key Audit Matter Was Addressed in the Audit
<p>The Company's total investments in subsidiaries for which fair value is not readily determinable was ¥1,457,930 million (48.9% of Total assets) as of December 31, 2025, of which ¥658,304 million (45.2% of total investments in subsidiaries for which fair value is not readily determinable) was the carrying value for shares of Canon Medical Systems Corporation (“CMSC”).</p> <p>CMSC was acquired at a price higher than the net asset value per share computed from its financial statements, reflecting its excess earning power (corresponding to goodwill in the consolidated financial statements). In this case, even if the financial position of CMSC does not deteriorate, when the actual value declines due to a significant decrease in the excess earning power after the acquisition and it is expected to continue for a future period, a write-down for impairment is required as long as the actual value falls short of approximately 50% of the carrying value.</p> <p>As of the end of the current fiscal year, no impairment loss was recognized for CMSC's shares as the actual value of CMSC's shares calculated by a method reflecting the excess earning power did not significantly decline compared with the carrying value.</p> <p>As the actual value of CMSC's shares is reflective of the excess earning power, it is determined primarily based on a discounted cash flow analysis, which involves estimates of projected future cash flows, discount rates, and perpetual growth rates. The estimates of projected future cash flows are based on a mid-term management plan and a long-term growth rate for the subsequent periods (perpetual growth rate) that considered the future market growth of medical equipment and growth in</p>	<p>Our audit procedures related to the projected future cash flows, the discount rate and the perpetual growth rate used by management to calculate the actual value of CMSC's shares included the following, among others:</p> <p>(1) Evaluation of internal controls</p> <ul style="list-style-type: none"> We tested the effectiveness of controls over management's calculation of the actual value of CMSC's shares, including those over management's estimates and assumptions used in the projected future cash flows, the discount rate and the perpetual growth rate. <p>(2) Evaluation of the reasonableness of management's projected future cash flows</p> <ul style="list-style-type: none"> We evaluated management's ability to accurately project future cash flows by comparing actual results to management's historical projections. We made inquiries of management to understand significant assumptions used in the projected future cash flows. We evaluated the reasonableness of management's projected future cash flows by comparing the projections to actual results, documents reported to management, and other related documents for respective revenue, cost of sales and other elements, which together comprise management's projected future cash flows. We evaluated the reasonableness of management's significant assumptions regarding the revenue growth rate used in the projected future cash flows, which could have a significant impact on the actual value of CMSC's shares, by comparing the revenue growth rate to the expected market growth rates for each type of medical equipment and

<p>geographies where CMSC operates its medical business. The estimate of the discount rate is determined based on the weighted average cost of capital, which considers primarily market and industry data as well as specific risk factors.</p> <p>We determined the valuation of CMSC's shares as a key audit matter given its carrying value represents 45.2% of the total investments in subsidiaries for which fair value is not readily determinable and there are significant judgements made by management on estimates and assumptions related to the projected future cash flows, the discount rate and the perpetual growth rate to calculate the actual value of CMSC's shares on which performing audit procedures required a high degree of auditor judgment and an increased extent of effort, including the need to involve our fair value specialists.</p>	<p>each region in which the CMSC operates its medical business as included in independent third-party industry reports.</p> <p>(3) Evaluation of the reasonableness of the valuation methodology, the discount rate and the perpetual growth rate</p> <ul style="list-style-type: none"> • With the assistance of our fair value specialists, we evaluated the reasonableness of the valuation methodology to calculate the actual value of CMSC's shares, the discount rate and the perpetual growth rate by: <ul style="list-style-type: none"> - examining whether the valuation methodology used, including the determination of the discount rate and the perpetual growth rate, was consistent with existing valuation practices that are both generally accepted in practice and acceptable in the circumstance. - testing the underlying data used in the determination of the discount rate and the perpetual growth rate, and the mathematical accuracy of the calculation; and - developing a range of independent estimates and comparing those to the discount rate and the perpetual growth rate selected by management.

Other Information

Management is responsible for the other information. Audit & Supervisory Board members and the Audit & Supervisory Board are responsible for overseeing the Directors' execution of duties relating to the design and operating effectiveness of the controls over the other information. The other information comprises the information included in the Annual Securities Report, but does not include the non-consolidated financial statements and our auditor's report thereon.

Our opinion on the non-consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the non-consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the non-consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Audit & Supervisory Board Members and the Audit & Supervisory Board for the Non-Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the non-consolidated financial statements in accordance with accounting principles generally accepted in Japan, and for such internal control as management determines is necessary to enable the preparation of non-consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the non-consolidated financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern in accordance with accounting principles generally accepted in Japan.

Audit & Supervisory Board members and the Audit & Supervisory Board are responsible for

overseeing the Directors' execution of duties relating to the design and operating effectiveness of the controls over the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Non-Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the non-consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these non-consolidated financial statements.

As part of an audit in accordance with auditing standards generally accepted in Japan, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the non-consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks. The procedures selected depend on the auditor's judgment. In addition, we obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion.
- Obtain, when performing risk assessment procedures, an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the non-consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate whether the overall presentation and disclosures of the non-consolidated financial statements are in accordance with accounting principles generally accepted in Japan, as well as the overall presentation, structure and content of the non-consolidated financial statements, including the disclosures, and whether the non-consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with Audit & Supervisory Board members and the Audit & Supervisory Board regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide Audit & Supervisory Board members and the Audit & Supervisory Board with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with Audit & Supervisory Board members and the Audit & Supervisory Board, we determine those matters that were of most significance in the audit of the non-consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

<Fee-Related Information>

Fee-related information is disclosed in independent auditor's report on the consolidated financial statements as of and for the year ended December 31, 2025.

Interest Required to Be Disclosed by the Certified Public Accountants Act of Japan

Our firm and its designated engagement partners do not have any interest in the Company which is required to be disclosed pursuant to the provisions of the Certified Public Accountants Act of Japan.

NOTES TO READERS:

The following is an English translation of management's report on internal control over financial reporting field under the Financial Instruments and Exchange Act of Japan. This report is presented merely as supplemental information.

1. Matters Related to the Basic Framework of Internal Control over Financial Reporting

Fujio Mitarai, Chairman & CEO, and Toshizo Tanaka, Executive Vice President & CFO of Canon Inc. (the "Company") are responsible for designing and operating internal control over financial reporting of the Company and its consolidated subsidiaries (the "Canon Group"), in accordance with the basic framework for internal control set forth in "On the Revision of the Standards and Practice Standards for Management Assessment and Audit concerning Internal Control Over Financial Reporting (Council Opinions)," released by the Business Accounting Council.

Internal control is designed to achieve its objectives within reasonable limits through the effective function and combination of its basic elements. Therefore, there is a possibility that misstatements may not be completely prevented or detected by internal control over financial reporting.

2. Matters Related to Scope of Assessment, the Basis Date of Assessment and Assessment Procedure

The assessment of internal control over financial reporting was conducted as of the end of the fiscal year, December 31, 2025, in accordance with assessment standards for internal control over financial reporting generally accepted in Japan.

In this assessment, we evaluated internal control which may have a material effect on the entire financial reporting on a consolidated basis ("company-level controls") and based on the result of this assessment, we selected business processes to be evaluated, analyzed these selected business processes, identified key controls that may have a material impact on the reliability of our financial reporting, and assessed the design and operation of these key controls. These procedures have allowed us to evaluate the effectiveness of our internal controls.

We determined the required scope of assessment of internal control over financial reporting for the Company, as well as its consolidated subsidiaries and equity-method affiliated companies, from the perspective of how significantly it affects the reliability of financial reporting. How significantly it affects the reliability of financial reporting was determined by taking into account both quantitative and qualitative effects as well as the likelihood of those effects occurring. Based on the results of the company-level control assessment, which covered the Company and its consolidated subsidiaries, we reasonably determined the scope of assessment of internal controls over business processes.

Consolidated subsidiaries and equity-method affiliated companies that were determined to have only minor quantitative and qualitative effects as well as the low likelihood of those effects occurring, were excluded from the scope of company-level control assessment. As one major objective of the Canon Group is to expand the production and sales of products, sales is considered an appropriate measure of business scale and performance

With respect to the scope of assessment of internal control over business processes, based on the satisfactory results of the company-level control assessment, "significant locations and/or business units" were identified by ranking them based on their external net sales (excluding intercompany transactions) for the previous fiscal year and cumulatively selecting them until the total reached approximately two-thirds of the total amount of sales on a consolidated basis. For production sites, as significance could not be assessed using the selection criteria described above, cost of goods sold for the previous fiscal year was used as the criterion. At locations and/or business units that were identified as significant, the scope of assessment of internal control over business processes covered key accounts such as sales, accounts receivable, inventories, cost of sales, and accounts payable, which represent major transaction amounts in the Canon Group's production and sales activities.

Furthermore, the scope of assessment was not limited to the selected significant locations and/or business units. Others were also considered. We identified business processes with a high risk of material misstatement, including processes related to significant accounts that involve estimates or forecasts (such as goodwill valuation), as well as processes related to businesses or operations that engage in high-risk transactions. Based on their potential impact on financial reporting, these processes were included in the evaluation scope as significant business processes.

3. Matters Related to Results of Assessment

Based on the results of the above assessment, we concluded that the Company's internal control over financial reporting was effective as of the end of the fiscal year under review.

4. Supplementary Matters

None.

5. Special Notes

None.
