

Canon Inc.
Responsible Minerals Sourcing Report (3TG)
For the Period from January 1, 2025 to December 31, 2025

1. Introduction (Background to the disclosure of the Responsible Minerals Sourcing Report (3TG))

Canon Inc. conducted a “Reasonable Country of Origin Inquiry” (“**RCOI**”) for products manufactured or contracted to manufacture by Canon Inc. and its consolidated subsidiaries (“**Canon**” or “**Canon Group**”) from January 1, 2025 to December 31, 2025 (“**reporting period**”). The inquiry identified four minerals classified as conflict minerals—namely tin, tantalum, tungsten, and gold (“**3TG**”)—that originated in the Democratic Republic of the Congo, some adjoining countries and some of the other Conflict Affected and High-Risk Areas identified by the European Union Conflict Minerals Regulation and did not come from recycled or scrap minerals, that are used in some of the parts or materials that make up Canon Group’s products. Further, Canon Inc. conducted due diligence on the source and chain of custody of 3TG (“**due diligence**”) identified as originating from the Democratic Republic of the Congo, adjoining countries and the other Conflict Affected and High-Risk Areas identified by the European Union Conflict Minerals Regulation (“covered countries”).

2. Application of Responsible Minerals Sourcing Report (3TG) on Canon and products subject to disclosure

As of December 31, 2025, Canon Inc. had 321 consolidated subsidiaries, of which 55 subsidiaries manufactured products or contracted to manufacture products in the reporting period for which 3TG were necessary to the functionality and production. In total, 56 companies of the Canon Group, including Canon Inc. and those 55 consolidated subsidiaries conducted the RCOI. The subsidiaries that conducted the RCOI include certain marketing companies that contracted with manufacturers outside the Canon Group to manufacture items for sale outside the Canon Group.

Canon Group purchases raw materials, parts and components which include 3TG and manufactures products. Canon Group is located downstream in the 3TG supply chain, and does not directly purchase 3TG from mines. Therefore, Canon Group has to rely on information provided by the first-tier suppliers to the Canon Group (“**first-tier suppliers**”)

in identifying the source country of the 3TG. Many of the first-tier suppliers also have to rely on information from their upstream suppliers.

3. Basic principles regarding response to conflict minerals

Canon Inc. established the “Basic Approach of the Canon Group Regarding Conflict Minerals” in September 2012. Canon Inc. expanded the scope of covered minerals and risks in 2020 and updated the policy as the “Canon Group Basic Policy on Responsible Minerals Sourcing”. This has been published on Canon Inc.’s official website and applied to the entire Canon Group.

URL: <https://global.canon/en/sustainability/society/conflict/policy/>

4. RCOI and Due Diligence

The design of Canon’s RCOI and due diligence measures is in conformity with the “OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas (third edition)” (“**OECD Guidance**”). Canon took the steps described below in accordance with the five steps laid out in the OECD Guidance.

a. Step 1: Establish strong company management systems

- In order to respond to the situation of conflict minerals and others, Canon established a cross-functional Conflict Minerals Response Project Team ("**Project Team**") in its headquarters under the direction of a representative director in charge (Executive Vice President & CFO) in December 2010. Moreover, Canon designated a person in charge of conflict minerals in each of its group companies that manufacture or contract to manufacture products. The Project Team currently operates as the Working Group on Responsible Minerals Sourcing (“**Working Group**”).
- As stated above, Canon Inc. established the “Canon Group Basic Policy on Responsible Minerals Sourcing”.
- Canon established the “Guidelines for Responsible Minerals Sourcing” that clarified the responsible divisions and the framework for handling responsible minerals sourcing issues as well as the survey process, for the persons involved in the Canon Group.
- In July 2025, Canon Inc. summoned the persons in charge of responsible minerals sourcing for Canon Group’s domestic subsidiaries that manufacture or contract to manufacture products and held a meeting to share the results of the 2024 minerals

survey and discuss Canon's policies for the survey of 2025. Moreover, starting from August 2025 Canon Inc. shared information regarding responsible minerals sourcing matters for overseas subsidiaries with the persons in charge by e-mail and web meetings.

- Canon created and distributed the Responsible Minerals Sourcing Survey Manual to the first-tier suppliers.
- Canon requested the first-tier suppliers to sign and submit written confirmation (“**Certificate of Consent**”) of their agreement and cooperation with Canon's “Canon Group Basic Policy on Responsible Minerals Sourcing” and their agreement to take an action for appropriate measures should any significant risks associated with mineral sourcing be found in the supply chain.
- Using its Minerals Information Management System, Canon Inc. linked survey responses to product information, conducted product-level assessments, and stored the assessment results in a database, except for a few subsidiaries. Internal rules require that data records be retained for at least five years.
- Canon Inc. is a member of the Responsible Minerals Trade Working Group (“**RMTWG**”) of the Japan Electronics and Information Technology Industries Association (“**JEITA**”). As part of its initiatives, the RMTWG provided the documents related to the responsible minerals sourcing for suppliers in supply chains in the electrical and electronics industry. Step 3 below provides details of the industry initiatives on responsible minerals sourcing that Canon Inc. participates in.
- As an early-warning risk-awareness system specified in the OECD Guidance, Canon Inc. has established a grievance mechanism “Procedure for the Submission of Concerns Regarding Minerals Risk” on its official website since 2015. No reports from employees, suppliers, or other stakeholders were received by the contact point in 2025.

URL: <https://global.canon/en/contact/conflict/conflict-form-e.html>

b. Step 2: Identify and assess risks in the supply chain

- Canon designed a framework to identify each of the parts and materials used in the products that it manufactured or contracted to manufacture. Canon used its production and shipping management system, which includes bills of materials for products and also used its procurement system, to identify parts and materials required in products planned for production and shipping between January and the end of December 2025. (Canon Group companies not using such system made

use of a similar method to identify parts and materials.) Canon then carried out the RCOI on the first-tier suppliers handling the identified parts and materials.

- For the RCOI, Canon used the RMI Conflict Minerals Reporting Template Revision 6.5 ("**CMRT**"). The CMRT is published by the Responsible Minerals Initiative ("**RMI**"), one of the programs of the Responsible Business Alliance ("**RBA**"). Canon requested the first-tier suppliers that were identified as possibly using 3TG to report their status of 3TG using the CMRT. Suppliers that were not using 3TG for their parts and materials had the option of reporting their status through an alternative method, instead of using the CMRT.
- In addition to the RCOI described above, Canon conducted due diligence examinations of first-tier suppliers that reported the use of 3TG originating from covered countries. Suppliers who reported 3TG smelters were requested to fill in Canon's own " Due Diligence Survey Form" and if they reported any smelters that did not meet the conformant or active smelters in the RMI's audit program, they were also asked to submit the implementation status for requesting upstream suppliers to switch smelters to mitigate the risks on such non-conformant or non-active smelters.
- Canon requested replies from the first-tier suppliers who did not respond by the closing date of the response.
- Canon Inc. verified the replies submitted by first-tier suppliers (for any incomplete answers or errors) using a proprietary reply-processing tool. When necessary, Canon requested resubmissions from first-tier suppliers.
- As of April 30, 2026, Canon had received responses from 94.6 percent of all first-tier suppliers surveyed.
- Canon compared the smelters or refiners ("**SORs**") identified through the RCOI against the list of the SORs which have been validated to be conformant to the Responsible Minerals Assurance Process ("**RMAP**"), the audit program of the RMI, as published by the RMI. The RMI implements cross recognition with the London Bullion Market Association (LBMA) and the Responsible Jewellery Council (RJC).
- Starting from October 2025, Canon sent warning letters to the first-tier suppliers, respectively, and requested them not to use the SORs designated by Canon's customers as non-conformant SORs under the RMAP in order to strengthen risk management. Further, Canon analyzed the responses of the " Due Diligence Survey Form" from the first-tier suppliers. Among the first-tier suppliers who had not been taking action to address risks, Canon approached those that Canon

considered might carry particular risk and requested them to take measures to mitigate risks.

c. Step 3: Design and implement a strategy to respond to identified risks

- The head of the Working Group reported the progress of responsible minerals sourcing activities to the representative director in charge.
- Canon Inc. is a key member of JEITA's RMTWG. The RMTWG is allied with the RMI, which plays the leading role in the response to responsible minerals sourcing. Canon Inc. has held the role of co-chair of the RMTWG since 2013. Canon Inc. also has been a member of the RMI since April 2015. Its membership code is "CNON." Canon Inc. assists RMI activities as a corporate member of the RMI.

d. Step 4: Carry out independent third-party audit of smelter/refiner's due diligence practices

- As a RMI member, Canon Inc. supports audits under the RMAP carried out by the RMI on SORs.

e. Step 5: Report annually on supply chain due diligence

- Canon Inc. plans to publish the Responsible Minerals Sourcing Report (3TG) on its official website by June 30, 2026.
- Since 2011, Canon Inc. has been reporting its activities in response to responsible minerals sourcing in its annually published Sustainability Report.

5. Survey results for the 2025 calendar year

Result of RCOI and due diligence

- Canon conducted the RCOI on 2,903 first-tier suppliers that possibly use 3TG. Canon conducted further due diligence on first-tier suppliers which reported the use of 3TG from the covered countries.
- In cases where 3TG originating from covered countries were used, Canon received some responses indicating the minerals in question had been sourced from SORs that are conformant with the RMAP.
- Canon analyzed the information on the SORs mentioned in the responses from the supply chain through the RCOI, with reference to the RMI's SOR

information. The RMI classifies SORs based on the auditing status. The website of the RMI provides information of the auditing status under the RMAP.

<http://www.responsiblemineralsinitiative.org/>

- As of May 1, 2026, 203 SORs in Canon supply chain were identified as RMAP conformant and 4 SORs were identified as Active in the RMAP through our review. The remaining 114 SORs were neither RMAP conformant nor Active in the RMAP. Appendix 1-1, 1-2 and 1-3 provide lists of these SORs.
- Canon was unable to determine whether the remaining entities reported by the first-tier suppliers as SORs were truly SORs.
- Due to inadequate information from its supply chains, Canon was unable to determine the country or region of origin of many 3TG used in Canon Group products.
- Appendix 1-4 lists examples of 3TG countries and regions of origin first-tier suppliers reported to Canon through CMRT responses.
- Based on the results of the RCOI and due diligence mentioned above, Canon was unable to determine whether the 3TG used for the products of the Canon Group financed or benefitted armed groups in the covered countries.

6. Efforts to determine the mine or location of origin of 3TG with the greatest possible specificity and risk mitigation

The following efforts to determine the mine or location of origin of 3TG with the greatest possible specificity are planned to be implemented from 2026 onwards.

- Canon will continue promoting verification operations of high-risk first-tier suppliers in accordance with Canon's Guidelines for Responsible Minerals Sourcing.
- Canon Inc. will continue its participation at JEITA's RMTWG and RMI, and support activities to reduce risks in entire supply chains.

7. Independent monitoring

- KPMG AZSA Sustainability Co., Ltd. conducted an assurance engagement of this report. The assurance engagement assessed whether the due diligence framework Canon designed conforms to the OECD Guidance's due diligence framework and whether the due diligence description in this report is consistent with the actual measures Canon undertook. The independent assurance report is attached in Appendix 2.

Appendix 1.

1. List of SORs that are believed to be in Canon's supply chain who were RMAP conformant as of May 1, 2026. (The notation of SOR names and locations is in accordance with the information provided by RMI.)

Independent Practitioner's Reasonable Assurance Report

To the Board of Directors of Canon Inc.

Opinion

We have performed a reasonable assurance engagement on:

- management's assertion, included in section 4 of the Responsible Minerals Sourcing Report (3TG) for the reporting period from January 1 to December 31, 2025 (the "Report"), that the design of Canon Inc.'s (the "Company") due diligence framework is in conformity with the criteria set forth in the Organisation of Economic Co-Operation and Development Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas, Third Edition 2016 ("OECD Due Diligence Guidance"), and
- whether the Company's description of the due diligence measures it performed, as set forth in section 4 of the Report, is consistent, in all material respects, with the due diligence process that the Company undertook.

In our opinion,

- the design of the Company's due diligence framework for the reporting period from January 1 to December 31, 2025, as set forth in section 4 of the Report is in conformity, in all material respects, with the OECD Due Diligence Guidance, and
- the Company's description of the due diligence measures it performed as set forth in section 4 of the Report is consistent, in all material respects, with the due diligence process that the Company undertook.

Basis for opinion

We conducted our engagement in accordance with International Standard on Assurance Engagements (ISAE) 3000 (Revised), *Assurance Engagements Other Than Audits or Reviews of Historical Financial Information*, issued by the International Auditing and Assurance Standards Board (IAASB). Our responsibilities under these are further described in the "Our responsibilities" section of our report.

We have complied with the independence and other ethical requirements of the International Code of Ethics for Professional Accountants (including International Independence Standards) issued by the International Ethics Standards Board for Accountants (IESBA).

Our firm applies International Standard on Quality Management (ISQM) 1, *Quality Management for Firms that Perform Audits or Reviews of Financial Statements, or Other Assurance or Related Services Engagements*, issued by the IAASB. This standard requires the firm to design, implement and operate a system of quality management, including policies or procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities for the Report

Management of the Company are responsible for:

- designing, implementing and maintaining internal control relevant to the preparation of the Report that is free from material misstatement, whether due to fraud or error;
- selecting suitable criteria for preparing the Report and appropriately referring to the criteria used; and
- preparing the Report in accordance with the Criteria.

Our responsibilities

We are responsible for:

- planning and performing the engagement to obtain reasonable assurance about whether the Report is free from material misstatement, whether due to fraud or error;
- forming an independent opinion, based on the procedures we have performed and the evidence we have obtained; and
- reporting our opinion to the management.

Our reasonable assurance engagement was not conducted for the purpose of evaluating:

- the consistency of the due diligence measures that the Company performed with either the design of the Company's due diligence framework or the OECD Due Diligence Guidance;
- the completeness of the Company's description of the due diligence measures performed;
- the suitability of the design or operating effectiveness of the Company's due diligence process;
- whether a third party can determine from the Report if the due diligence measures the Company performed are consistent with the OECD Due Diligence Guidance;
- the Company's reasonable country of origin inquiry (RCOI), including the suitability of the design of the RCOI, its operating effectiveness, or the results thereof; or
- the Company's conclusions about the source or chain of custody of its conflict minerals, those products subject to due diligence, or the DRC Conflict Free status of its products.

Accordingly, we do not express an opinion or any other form of assurance on the aforementioned matters or any other matters included in any section of the Report other than section 4.

Summary of the work we performed as the basis for our opinion

We exercised professional judgment and maintained professional skepticism throughout the engagement. We designed and performed our procedures to obtain evidence about the Report that is sufficient and appropriate to provide a basis for our opinion. The nature, timing, and extent of the procedures selected depended on our judgment, including an assessment of the risks of material misstatement of the Report, whether due to fraud or error. We identified and assessed the risks of material misstatement through understanding the Report and the engagement circumstances. We also obtained an understanding of the internal control relevant to the Report in order to design procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on the effectiveness of internal controls. In carrying out our engagement, we:

- evaluated the suitability in the circumstances of the Company's use of the criteria for determining the compliance with each step;
- evaluated the appropriateness of the policies and procedures used by the Company; and
- evaluated the overall presentation of the information presented in the Report.
