SPECIALIZED DISCLOSURE REPORT**

CANON INC.

(Exact name of the registrant as specified in its charter)

JAPAN	001-15122
(State or other jurisdiction of incorporation or organization)	(Commission File Number)
30-2, Shimomaruko 3-chome, Ohta-ku, Tokyo	146-8501, Japan
(Address of principle executive offices)	(Zip code)

Sachiho Tanino, +81-3-3758-2111,
30-2, Shimomaruko 3-chome, Ohta-ku, Tokyo 146-8501, Japan

(Name and telephone number, including area code, of the
person to contact in connection with this report.)

Check the appropriate box to indicate the rule pursuant to which this form is being filed:

- Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1, 2022 to December 31, 2022.
- Rule 13q-1 under the Securities Exchange Act (17 CFR 240.13q-1) for the fiscal year ended December 31, 2022.

Section 1 - Conflict Minerals Disclosure

Established in 1937, Canon Inc. is a Japanese corporation with its headquarters in Tokyo, Japan. Canon Inc. is one of the world's leading manufacturers of office multifunction printers, laser printers, inkjet printers, cameras, medical equipment and lithography equipment. Canon Inc. earns revenues primarily from the manufacture and sale of these products domestically and internationally.

Canon Inc. and its consolidated companies have been fully aware of the issue of conflict minerals and have been working together with business partners and industry entities to address the issue of conflict minerals.

In response to Rule 13p-1, Canon Inc. conducted a "Reasonable Country of Origin Inquiry" and due diligence based on the "OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas," for its various products.

Item 1.01 Conflict Minerals Disclosure and Report

Conflict Minerals Disclosure

A copy of the Conflict Minerals Report of Canon Inc. for the reporting period from January 1, 2022 to December 31, 2022 is provided as Exhibit 1.01 hereto and is publicly available at:

<https://global.canon/en/csr/conflict/index.html>

Item 1.02 Exhibit

Conflict Minerals Report required by Item 1.01 is filed as Exhibit 1.01 hereto.

Section 2 - Resource Extraction Issuer Disclosure

Item 2.01 Resource Extraction Issuer Disclosure and Report

Not applicable.

Section 3 - Exhibits

Item 3.01 Exhibits

Exhibit 1.01 - Conflict Minerals Report for the reporting period from January 1, 2022 to December 31, 2022

SIGNATURES

Pursuant to the requirement of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

Canon Inc.
(Registrant)

/s/ Toshizo Tanaka

Toshizo Tanaka
Executive Vice President & CFO

Canon Inc.
30-2, Shimomaruko 3-chome,
Ohta-ku, Tokyo 146-8501, Japan

Date May 30, 2023

Canon Inc.
Conflict Minerals Report
For the Period from January 1, 2022 to December 31, 2022

This Conflict Minerals Report for the period from January 1, 2022 to December 31, 2022, is presented as an exhibit to the Specialized Disclosure Report on Form SD, to comply with Rule 13p-1 under the Securities Exchange Act of 1934, as amended (the “**Exchange Act**”).

1. Introduction (Background to the disclosure of the Conflict Minerals Report)

Established in 1937, Canon Inc. is a Japanese corporation with its headquarters in Tokyo, Japan. Canon Inc. is one of the world’s leading manufacturers of office multifunction devices, laser printers, inkjet printers, cameras, medical equipment and lithography equipment. Canon Inc. earns revenues primarily from the manufacture and sale of these products domestically and internationally. For details of corporate activities please refer to our annual report filed on Form 20-F.

Canon Inc. voluntarily delisted its American Depositary Receipts from the New York Stock Exchange on March 6, 2023. However, the company currently remains subject to reporting obligations under Exchange Act, including the final rules issued by the United States Securities and Exchange Commission (“**SEC**”) to implement Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act (“**Dodd-Frank Act**”).

In response to Rule 13p-1, Canon Inc. conducted a “Reasonable Country of Origin Inquiry” (“**RCOI**”) for products manufactured or contracted to manufacture by Canon Inc. and its consolidated subsidiaries (“**Canon**” or “**Canon Group**”) from January 1, 2022 to December 31, 2022 (“**reporting period**”). The inquiry identified four minerals classified as conflict minerals—namely tin, tantalum, tungsten, and gold (“**3TG**”)—that originated in the Democratic Republic of the Congo and adjoining countries (“**covered countries**”) and did not come from recycled or scrap minerals, that are used in some of the parts or materials that make up Canon Group’s products. Further, Canon Inc. conducted due diligence on the source and chain of custody of 3TG (“**due diligence**”) identified as originating from covered countries.

2. Application of Conflict Minerals Report on Canon and products subject to disclosure

As of December 31, 2022, Canon Inc. had 330 consolidated subsidiaries, of which 53 subsidiaries manufactured products or contracted to manufacture products in the reporting period for which 3TG were necessary to the functionality and production, and were subject to the reporting requirements under the SEC's final rules regarding the Dodd-Frank Act. In total, 54 companies of the Canon Group, including Canon Inc. and those 53 consolidated subsidiaries conducted the RCOI. The subsidiaries that conducted the RCOI include certain marketing companies that contracted with manufacturers outside the Canon Group to manufacture items for sale outside the Canon Group.

Canon operates its business in four segments: the Printing Business Unit, the Imaging Business Unit, the Medical Business Unit and the Industrial Business Unit.

The Printing Business Unit includes office multifunction devices, laser printers, and inkjet printers for personal and office use as well as production print products for print professionals. The Imaging Business Unit includes digital cameras as well as lenses and various related accessories. It also includes compact photo printers, network cameras, digital cinema cameras, and broadcast HDTV lenses. The Medical Business Unit includes Computed tomography (CT), Magnetic resonance imaging (MRI), ultrasound, X-ray systems, and clinical laboratory systems, as well as digital radiography (DR) systems and ophthalmic equipment. The Industrial Business Unit includes semiconductor lithography equipment, flat panel display (FPD) lithography equipment, organic light-emitting diode (OLED) display manufacturing equipment.

In each of these units, electronic components and substrates which contain 3TG are used in the majority of products manufactured by or contracted to manufacture by Canon.

Canon Group purchases raw materials, parts and components which include 3TG and manufactures products. Canon Group is located downstream in the 3TG supply chain, and does not directly purchase 3TG from mines. Therefore, Canon Group has to rely on information provided by the first-tier suppliers to the Canon Group (“**first-tier suppliers**”) in identifying the source country of the 3TG. Many of the first-tier suppliers also have to rely on information from their upstream suppliers.

3. Basic principles regarding response to conflict minerals

Canon Inc. established the “Basic Approach of the Canon Group Regarding Conflict Minerals” in September 2012. Canon Inc. expanded the scope of covered minerals and risks in 2020 and updated the policy as the “Canon Group Basic Policy on Responsible Minerals Sourcing”. This has been published on Canon Inc.’s official website and applied to the entire Canon Group.

URL: <https://global.canon/en/csr/conflict/policy.html>

4. RCOI and Due Diligence

The design of Canon's RCOI and due diligence measures is in conformity with the "OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas (third edition)" ("**OECD Guidance**"). Canon took the steps described below in accordance with the five steps laid out in the OECD Guidance.

a. Step 1: Establish strong company management systems

- In order to respond to the conflict minerals situation, Canon established a cross-functional Conflict Minerals Response Project Team ("**Project Team**") in its headquarters under the direction of a representative director in charge (Executive Vice President & CFO) in December 2010. Moreover, Canon designated a person in charge of conflict minerals in each of its group companies that manufacture or contract to manufacture products. The Project Team currently operates as the Working Group on Responsible Minerals Sourcing ("**Working Group**").
- As stated above, Canon Inc. established the "Canon Group Basic Policy on Responsible Minerals Sourcing".
- Canon established the "Guidelines for Responsible Minerals Sourcing" that clarified the responsible divisions and the framework for handling responsible minerals sourcing issues as well as the survey process, for the persons involved in the Canon Group.
- In July 2022, Canon Inc. summoned the persons in charge of responsible minerals sourcing for Canon Group's domestic subsidiaries that manufacture or contract to manufacture products and held a meeting to share the results of the 2021 minerals survey and discuss Canon's policies for the survey of 2022. Moreover, for the persons in charge of responsible minerals sourcing matters for overseas subsidiaries, Canon Inc. shared information by e-mail.
- Canon created and distributed the Responsible Minerals Sourcing Survey Manual to the first-tier suppliers.
- Canon requested the first-tier suppliers to sign and submit written confirmation ("**Certificate of Consent**") of their agreement and cooperation with Canon's "Canon Group Basic Policy on Responsible Minerals Sourcing" and their agreement to take an action for appropriate measures should any significant risks associated with mineral sourcing be found in the supply chain.

- Using its Minerals Information Management System, Canon Inc. linked survey responses to product information, conducted product-level assessments, and stored the assessment results in a database, except for such products as handled by newly joined subsidiaries. Internal rules require that data records be retained for at least five years.
- Canon Inc. is a member of the Responsible Minerals Trade Working Group (“**RMTWG**”) of the Japan Electronics and Information Technology Industries Association (“**JEITA**”). As part of its initiatives, the RMTWG provided the documents and videos related to the responsible minerals sourcing for suppliers in supply chains in the electrical and electronics industry. Step 3 below provides details of the industry initiatives on responsible minerals sourcing that Canon Inc. participates in.
- As an early-warning risk-awareness system specified in the OECD Guidance, Canon Inc. established a grievance mechanism — “Contact Point for Reporting Concerns Regarding Conflict Mineral Issues” (renamed in 2020 “Procedure for the Submission of Concerns Regarding Minerals Risk”) — on its official website in 2015. No reports from employees, suppliers, or other stakeholders were received by the contact point in 2022.

URL: <https://global.canon/en/contact/conflict/conflict-form-e.html>

b. Step 2: Identify and assess risks in the supply chain

- Canon designed a framework to identify each of the parts and materials used in the products that it manufactured or contracted to manufacture. Canon used its production and shipping management system, which includes bills of materials for products and also used its procurement system, to identify parts and materials required in products planned for production and shipping between January and the end of December 2022. (Canon Group companies not using such system made use of a similar method to identify parts and materials.) Canon then carried out the RCOI on the first-tier suppliers handling the identified parts and materials.
- For the RCOI, Canon used the RMI Conflict Minerals Reporting Template Revision 6.22 (“**CMRT**”). The CMRT is published by the Responsible Minerals Initiative (“**RMI**”), one of the programs of the Responsible Business Alliance (“**RBA**”). Canon requested the first-tier suppliers that were identified as possibly using 3TG to report their status of 3TG using the CMRT. Suppliers that were not using 3TG for their parts and materials had the option of reporting their status through an alternative method, instead of using the CMRT.

- In addition to the RCOI described above, Canon conducted due diligence examinations of first-tier suppliers that reported the use of 3TG originating from covered countries. Suppliers who reported 3TG smelters were requested to fill in Canon's own "Smelter Risk Check Form" and if they reported any smelters that did not meet the conformant or active smelters in the RMI's audit program, they were also asked to submit the estimated schedule to mitigate the risks on such non-conformant or non-active smelters.
- Canon requested replies from the first-tier suppliers who did not respond by the closing date of the response.
- Canon Inc. verified the replies submitted by first-tier suppliers (for any incomplete answers or errors) using a proprietary reply-processing tool. When necessary, Canon requested resubmissions from first-tier suppliers.
- As of April 17, 2023, Canon had received responses from 96 percent of all first-tier suppliers surveyed.
- Canon compared the smelters or refiners ("SORs") identified through the RCOI against the list of the SORs which have been validated to be conformant to the Responsible Minerals Assurance Process ("RMAP"), the audit program of the RMI, as published by the RMI. The RMI implements cross recognition with the London Bullion Market Association (LBMA) and the Responsible Jewellery Council (RJC).
- Canon sent warning letters to the first-tier suppliers in August and October 2022, respectively, and requested them not to use the SORs designated by Canon's customers as high-risk SORs and non-conformant SORs under the RMAP in order to strengthen risk management. Further, Canon analyzed the responses of the "Smelter Risk Check Form" from the first-tier suppliers. Among the first-tier suppliers who had not been taking action to address risks, Canon approached those that Canon considered might carry particular risk and requested them to take measures to mitigate risks.

c. Step 3: Design and implement a strategy to respond to identified risks

- The head of the Working Group reported the progress of responsible minerals sourcing activities to the representative director in charge.
- Moreover, the Working Group reported, from October to November, 2022, its progress to relevant directors and executive officers of Canon Inc. as well as the presidents of the relevant domestic and overseas subsidiaries, by holding an annual global meeting and distributing relevant materials.

- Canon Inc. is a key member of JEITA's RMTWG. The RMTWG is allied with the RMI, which plays the leading role in the response to responsible minerals sourcing. Canon Inc. has held the role of co-chair of the RMTWG since 2013. Canon Inc. has also served as team leader of the RMTWG's Smelter Support Team since 2015.
- Canon Inc. participates in the Japan Conflict-Free Sourcing Working Group (CFSWG), a joint initiative by JEITA's RMTWG and major Japanese automobile manufacturers, and serves as the CFSWG vice-chair.
- In addition to the above activities, Canon Inc. has been a member of the RMI since April 2015. Its membership code is "CNON." Canon Inc. assists RMI activities as a corporate member of the RMI.

d. Step 4: Carry out independent third-party audit of smelter/refiner's due diligence practices

- As a RMI member, Canon Inc. supports audits under the RMAP carried out by the RMI on SORs.

e. Step 5: Report annually on supply chain due diligence

- In accordance with the Dodd-Frank Act and the SEC's final rules, on or before May 31, 2023, Canon Inc. plans to file a Form SD and Conflict Minerals Report (this report) with the SEC, and plans to publish the same information on its official website.
- Since 2011, Canon Inc. has been reporting its activities in response to responsible minerals sourcing in its annually published Sustainability Report.

5. Survey results for the 2022 calendar year

Result of RCOI and due diligence

- Canon conducted the RCOI on 3,252 first-tier suppliers that possibly use 3TG. Canon conducted further due diligence on first-tier suppliers which reported the use of 3TG from the covered countries.
- In cases where 3TG originating from covered countries were used, Canon received some responses indicating the minerals in question had been sourced from SORs that are conformant with the RMAP.
- Canon analyzed the information on the SORs mentioned in the responses from the supply chain through the RCOI, with reference to the RMI's SOR

information. The RMI classifies SORs based on the auditing status. The website of the RMI provides information of the auditing status under the RMAP.

<http://www.responsiblemineralsinitiative.org/>

- As of February 6, 2023, 225 SORs in Canon supply chain were identified as RMAP conformant and 11 SORs were identified as Active in the RMAP through our review. The remaining 114 SORs were neither RMAP conformant nor Active in the RMAP. Appendix 1-1, 1-2 and 1-3 provide lists of these SORs.
- Canon was unable to determine whether the remaining entities reported by the first-tier suppliers as SORs were truly SORs.
- Due to inadequate information from its supply chains, Canon was unable to determine the country or region of origin of many 3TG used in Canon Group products.
- Appendix 1-4 lists examples of 3TG countries and regions of origin first-tier suppliers reported to Canon through CMRT responses.
- Based on the results of the RCOI and due diligence mentioned above, Canon was unable to determine whether the 3TG used for the products of the Canon Group financed or benefitted armed groups in the covered countries.

6. Efforts to determine the mine or location of origin of 3TG with the greatest possible specificity and risk mitigation

The following efforts to determine the mine or location of origin of 3TG with the greatest possible specificity are planned to be implemented from 2023 onwards.

- Canon will continue promoting verification operations of high-risk first-tier suppliers in accordance with Canon's Guidelines for Responsible Minerals Sourcing.
- Canon Inc. will continue its participation at JEITA's RMTWG, CFSWG and RMI, and support activities to reduce risks in entire supply chains.

The EU Conflict Minerals Regulation (Regulation (EU) 2017/821) came into operation in January 2021. The EU Conflict Minerals Regulation does not limit due diligence to covered countries in Africa. In response, the CMRT, the industry standard reporting template for conflict minerals, was revised in May 2020 as Revision 6.01 and new Question 4: "Do any of the smelters in your supply chain source the 3TG from conflict-affected and high-risk areas?" was added to the template. Although Canon is not subject to the EU Conflict Minerals Regulation, Canon has conducted due diligence not only in the covered countries stipulated in the Dodd-Frank Act but also in the "conflict-affected and high-risk areas" stipulated in the

OECD Guidance by using the CMRT as revised since the 2020 survey.

7. Independent monitoring

- KPMG AZSA Sustainability Co., Ltd. conducted an independent private sector audit of this report. The audit assessed whether the due diligence framework Canon designed conforms to the OECD Guidance's due diligence framework and whether the due diligence description in this report is consistent with the actual measures Canon undertook. The independent assurance report is attached in Appendix 2.

Forward-Looking Statements

This report contains not only past and present facts about Canon, but also future forecasts based on plans, prospects, management policies and strategies as of the publication date. These future forecasts are assumptions or estimations based on information available at the time the report was prepared. Due to a range of variables, however, the results or circumstances of our future business activities may vary from the forecasts contained herein.

Appendix 1.

1. List of SORs that are believed to be in Canon’s supply chain who were RMAP conformant as of February 6, 2023. (The notation of SOR names and locations is in accordance with the information provided by RMI.)

* On March 17, 2022, the U.S. Department of the Treasury added this gold refinery in Uganda to the OFAC's Specially Designated Nationals (SDN) List. The Canon Group has no direct business with the refinery. We alerted the first-tier suppliers of the Canon Group not to use this gold refinery, and requested that suppliers utilizing this refinery in their supply chains provide us with schedules for eliminating the refinery therefrom ("elimination schedules"). As of the date of this report, we remain in the process of confirming the elimination schedules from our suppliers.

Appendix 2.

INDEPENDENT ASSURANCE REPORT

To the Board of Directors and Stockholders of Canon Inc.

We have undertaken a reasonable assurance engagement of:

- management's assertion, included in section 4 of the Conflict Minerals Report for the reporting period from January 1 to December 31, 2022, that the design of Canon Inc.'s (the "Company") due diligence framework is in conformity with the criteria set forth in the Organisation of Economic Co-Operation and Development Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas, Third Edition 2016 ("OECD Due Diligence Guidance"), and
- whether the Company's description of the due diligence measures it performed, as set forth in section 4 of the Conflict Minerals Report for the reporting period from January 1 to December 31, 2022, is consistent, in all material respects, with the due diligence process that the Company undertook.

Management is responsible for the design of the Company's due diligence framework and the description of the Company's due diligence measures set forth in the Conflict Minerals Report, and performance of the due diligence measures. Our responsibility is to express an opinion on the design of the Company's due diligence framework and on the description of the due diligence measures the Company performed, based on the procedures we have performed.

Our reasonable assurance engagement was conducted in accordance with 'International Standard on Assurance Engagements (ISAE) 3000, Assurance Engagements other than Audits or Reviews of Historical Financial Information', issued by the International Auditing and Assurance Standards Board, and the standards applicable to performance audits contained in Government Auditing Standards, issued by the Comptroller General of the United States, and, accordingly, included examining, on a test basis, evidence about the design of the Company's due diligence framework and the description of the due diligence measures the Company performed, and performing such other procedures as we considered necessary in the circumstances. We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Our reasonable assurance engagement was not conducted for the purpose of evaluating:

- The consistency of the due diligence measures that the Company performed with either the design of the Company's due diligence framework or the OECD Due Diligence Guidance;
- The completeness of the Company's description of the due diligence measures performed;
- The suitability of the design or operating effectiveness of the Company's due diligence process;
- Whether a third party can determine from the Conflict Minerals Report if the due diligence measures the Company performed are consistent with the OECD Due Diligence Guidance;
- The Company's reasonable country of origin inquiry (RCOI), including the suitability of the design of the RCOI, its operating effectiveness, or the results thereof; or
- The Company's conclusions about the source or chain of custody of its conflict minerals, those products subject to due diligence, or the DRC Conflict Free status of its products.

Accordingly, we do not express an opinion or any other form of assurance on the aforementioned matters or any other matters included in any section of the Conflict Minerals Report other than section 4.

In our opinion,

- the design of the Company's due diligence framework for the reporting period from January 1 to December 31, 2022, as set forth in section 4 of the Conflict Minerals Report is in conformity, in all material respects, with the OECD Due Diligence Guidance, and
- the Company's description of the due diligence measures it performed as set forth in section 4 of the Conflict Minerals Report for the reporting period from January 1 to December 31, 2022, is consistent, in all material respects, with the due diligence process that the Company undertook.

We have complied with the Code of Ethics for Professional Accountants issued by the International Ethics Standards Board for Accountants, which includes independence and other requirements founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behavior. In accordance with International Standard on Quality Management 1, we design, implement and operate a system of quality management including policies or procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.
